E. A. Johnson	11 1	1881
E. A. Johnson	6 0½	1881
E. A. Johnson	5 3	1878

1 These records are the only ones generally accepted in this country, though it is certain that several professionals have travelled the distance a yard or two yards quicker. Geo. Seward's apocryphal 9½ secs. is no longer accepted. On July 9, 1890, an American amateur, W. C. Downs, ran a straight ½-mile in 47 2-5th secs. at Boston.

2 Made after leaving the amateur ranks, in a match with Cummings, Aug., 1886, beating previous record by nearly 4 secs.

3 In America P. P. Murray is credited with 1 mile in 6 min. 20 3-5th secs., 3 miles in 21 min. 9 1-5th secs.

Putting the Weight, 16 lbs. G. R. Gray, 47ft., 1893. Throwing the Hammer, 16 lbs. J. S. Mitchell, 145 ft. 4 in., 1892. Both in America, from 7ft. circle.

4 The following are British amateur records:—100 yds., 10 secs., by A. Wharton, C. Bradley, and A. R. Downer; 220 yds., 21 4-5th secs., by C. G. Wood; 300 yds., 31 2-5th secs., by C. G. Wood; 600 yds., 1 m. 11 2-5th secs., by E. C. Bredin. Half-mile, 1 m. 54 3-5th secs., by F. J. K. Cross. High Jump, 6 ft. 4½ in., by J. M. Ryan. Throwing the Hammer (16 lbs., 9 ft. circle), 147 ft., by J. Flanagan. Putting the Shot (16 lbs., 7ft. sq.), 46ft. 5¼ in., by D. Horgan.

6 The pole-jumping record is held by an amateur, R. D. Dickinson, with 11 ft. 9 in. at Kidderminster, 1891.

7 Made in New Zealand.

8 Made in America. 9 Not Music-hall exhibitions.

a Balls jammed in mouth of pocket.

N.B.—The following records are also authentic: 120 Yards Hurdles in England (amateurs), G. B. Shaw, 15 4-5th secs., on grass. In America, on cinders, S. Chase, 15 2-5th secs. Walk to Brighton, 52½ miles, amateur, J. A. Mackintosh, 9 h. 25 m. 8 secs. Throwing the cricket ball, amateur, 127yds. 1ft. 3in. by W. H. Game, at Oxford, 1873. Greatest distance in a six days contest, 623 m. 1,320 yds., by G. Littlewood, New York, 8th December, 1882.

In professional bicycling, F. J. Lees, Sept. 27, 1880, at Middlesbrough, rode 186 m. 1,408 yds. in twelve consecutive hours; while J. Battensby, June 21, 1880, at Newcastle-on-Tyne, rode 211 m. 1,368 yds. in fourteen consecutive hours; and H. Higham, Mar. 18, 1880, at the Agricultural Hall, London, rode 230 m. 469 yds. without dismounting, in 16 h. 59½ min. At the same place in 1879, G. Waller had ridden 1,404½ miles in 6 days of 18 h. a day.

Amateur Road Records.

24 Hours.—Safety (M. A. Holbein, 1895), 397 miles; ordinary bicycle, 312 miles (J. F. Walsh, 1891); single tricycle (F. T. Bidlake), 356½ miles, 1894; tandem tricycle, 333½ miles (Holbein and Bidlake, 1893); tandem safety (M. A. Holbein and J. A. Bennett, 397½ miles, 1896.

100 Miles.—Safety 4h. 21m. 45s. (A. E. Walters, 1896); ordinary bicycle 6h. 22m. 15s. (J. F. Walsh, 1891); tricycle 5h. 15m. 57s. (F. T. Bidlake, 1896); tandem tricycle 5h. 30m. 31s. (S. F. Edge and J. E. L. Bates, 1891). Tandem safety 4h. 46m. 18s. (M. A. Holbein and J. W. Stocks), 1896.

The Land's End to John o' Groats record; safety (G. P. Mills), 3 days 5m. 49s., 1894; tricycle (G. P. Mills), 3 days 16m. 47s., 1893. London to Brighton and back; tricycle (J. Parsley), 6h. 18m. 28s.; safety (C. G. Wridgway), 5h. 22m. 33s., 1896; tandem safety (H. Green and W. Nelson), 5h. 20m. 35s., 1896; London to York (G. Hunt), 10h. 48m.; 1,000 miles (T. A. Edge), 4d. 9h. 19m., 1896.

1 Hour Records (Path).

Safety T. Linton, 1896 (31m. 582yds.); ordinary B. W. Attlee, 1891 (21m. 180yds.); tricycle W. Ellis, 1894 (23m. 800yds.); tandem tricycle 23m. 310yds. (L. Stroud and J. E. L. Bates, 1894); tandem safety (S. MacGregor and G. A. Nelson, 1896), 31m. 610yds.

Cricket.—Highest individual score, A. E. Stoddart, 485, Hampstead *v.* Stoics, 1886. Largest gross score, Orleans Club *v.* Rickling Green, 920, Aug. 3rd, 1882. In a first-class match, Yorkshire, 887, *v.* Warwickshire, May 8, 1896.

Trotting.—Fastest mile, in America, 2m. 3¼s. by Alix, 1894. Fastest pacing mile, 2m. 0½s., by John R. Gentry, 1896.

SKATING (RINK RECORDS).

Distance. Yards.	Name.	Time. H.	M.	S.	Year
100	G. D. Phillips	0	0	10⅗	1883
200	G. D. Phillips	0	0	21⅗	1883
440	J. Bates	0	0	35⅘	1895
880	A. Paulsen *	0	1	41⅘	1884
	J. Smart	0	1	41⅘	1895
Miles 1	T. Giddens	0	3	0⅘	1895
2	A. Paulsen *	0	6	56⅘	1884
3	A. Paulsen *	0	10	33⅘	1884
4	F. Dowd	0	14	10⅗	1885
5	F. Dowd	0	17	45	1885
8	A. Paulsen *	0	29	9⅘	1884
10	A. Paulsen *	0	36	37⅘	1884
20	A. D. Smith	1	6	36⅘	1894
50	J. F. Donoghue	3	15	59⅘	1893
100	J. F. Donoghue	7	11	38⅘	1893

The above, except those of J. Bates, J. Smart, and T. Giddens, were all made in America.

* On a four-lap to the mile track. With a wind, T. Donoghue, in 1887, skated 1 mile straightaway on the Hudson River in 2 min. 12 3-5th secs. Our champion, Fish Smart, in 1881, skated 1 mile straightaway, with a flying start, in 3 min. dead; no wind.

All International records are in mètres. With the wind, or on doubtfully-measured tracks, much faster times than the above are recorded; Harald Hagen of Norway, a professional, has made the following remarkable times:—Dec. 27, 1891, at Hamar, Norway, 5 miles, 15 min. 11 secs.; Jan. 3, 1892, 1 mile, 2 min. 49 secs., 3 miles, 8 min. 46 2-5 secs.; Feb. 28, 1892, half-mile, 1 min. 20 1-5th secs., 2 miles, 5 min. 43 4-5th secs. In England, 1893, Marten Kigma, a Dutch professional, skated 1 mile with three turns in 3 min. 8 secs.

† Jan. 1895, J. Hamakated 220 yds at Hendon in 20 3-5ths.

English path cycling records of 1896:—¼ mile (flying start), Rudham Quintette, 23s.; J. Platt-Betts, 23⅘s.; standing ¼ mile, J. S. Johnson, 29⅘s.; flying ½ mile, J. Platt-Betts, 49⅘s.; standing ½ mile, J. S. Johnson, 54⅗s.; flying ¾ mile, J. Platt-Betts, 1m. 14⅘s.; standing ¾ mile, J. Platt-Betts, 1m. 21⅘s.; flying mile, J. Platt-Betts, 1m. 41s.; standing mile, J. Platt-Betts, 1m. 48s.; amateur flying mile, W. H. Bardsley, 1m. 49s.; tandem flying mile, A. J. Watson and J. Platt-Betts, 1m. 42⅘s.; 1 mile tandem, A. A. and F. W. Chase, 1m. 48⅘s.; 2 miles, A. A. Chase, 3m. 42⅘s.; tandem, A. A. and F. W. Chase, 3m. 39⅘s.; World's record, J. Michael, 3m. 33⅘s., at New Orleans; 3 miles, T. Linton, 5m. 33s.; tandem, A. A. and F. W. Chase, 5m. 28⅘s.; 4 miles, T. Linton, 7m. 24⅘s.; tandem, A. A. and F. W. Chase, 7m. 21⅘s.; 5 miles, T. Linton, 9m. 16s.; tandem, A. A. and F. W. Chase, 9m. 13⅘s.; 50 miles tandem, A. A. and F. W. Chase, 1h. 38m. 14⅘s.; 10 miles amateur, R. Palmer, 20m. 19⅘s.; ladies' safety London to Brighton and back, Mrs. Ward, 7h. 26m. 16s. Tricycles:—1 mile, A. F. Ilsley, 2m. 16s.; 2 miles, 4m. 51⅘s.; 5 miles, 11m. 59⅗s.; 10 miles, 24m. 14⅘s., all by R. P. Clark, August 15, 1896. 24 hours, F. R. Goodwin (Cuca Cup, 1896), 476 m. 1,702 yds., amateur record; French open-air professional path record, 24 hours, G. Rivière, 533m. 1,476 yds., June 27-28, 1896.

1896	Mr. G. F. Fawcett	Fabulous Fortune	Wolfhill.

Digitized by Google

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon and trout is placed by the Salmon and Freshwater Fisheries Acts, 1861 to 1890, in the hands of local boards of conservators appointed for the purpose, with the Board of Trade as the central authority. Districts may be formed, and Boards of Conservators appointed, for waters containing salmon, or fresh water fish. Such Boards have been appointed for 52 Districts. [The districts generally include all rivers running into the sea between the points named, and in the cases marked † also include the sea for a distance of three miles from the shore, or to the mid-channel in estuaries.]

These Boards of Conservators consist of three classes of members—those appointed annually by the County Councils of the various counties through which the rivers flow; *ex-officio* members, or those qualified by ownership of lands or fisheries of a certain value; and representative members, elected annually by the persons who have paid licence duty on instruments other than rod and line, used for salmon fishing in public waters.

There are also certain bodies created by local statutes, having authority over the fisheries, *e.g.*, the Thames Conservancy Board, Lee Conservancy Board, and Conservators of the Medway.

These Boards have power to make bye-laws, not only for the regulation of the fisheries for salmon and freshwater fish, but also, in certain cases, for the regulation of other kinds of fishing

NAME OF DISTRICT.	COAST LIMITS OF DISTRICT.	ADDRESS OF CLERK.
†Eden	Sark Foot to Seaton	J. B. Slater, Carlisle.
†Derwent	Seaton to St. Bees Head	T. C. Burn, Papcastle, Cockerm'uth.

†Dee	New Brighton to near Meliden Church	Henry Jolliffe, Chester.
†Elwy and Clwyd	Meliden Church to Rhos Bay	H. F. Birley, St. Asaph.
†Conway	Rhos Bay to R. Aber	C. T. Allard, Llanrwst.
†Seiont	Garth Point to Llanelhaiarn Pt., and to Twyn y Parc Pt., in Anglesey	J. T. Roberts, Carnarvon.
†Dwyfach	Llanelhaiarn Point to Criccieth	—
Dovey	Criccieth to Cynvelin	W. R. Davies, Dolgelly.
†Ayron	Carreg Tipog to New Quay Head	E. L. Jones, Aberayron.
†Teify	New Quay Head to Dinas Head	H. W. Howell, Aberayron.
Cleddy	Dinas Head to St. Goven's Head	R. T. P. Williams, Haverfordwest.
†Towy, Loughor, & Taf	St. Goven's Head to Worm's Head	W. M Griffiths, Carmarthen.
†Ogmore and Ewenny	Porthcawl to Cold Knap	S. H. Stockwood, Bridgend.
†Taff and Ely	Cold Knap to Bute Dock	A. Waldron, Cardiff.
†Rhymney	Bute Dock to Ty ton y Pill	Colonel Lyne, Newport (Mon.).
†Usk and Ebbw	Ty ton y Pill to Collister Pill	Horace Lyne, Newport (Mon.).
†Wye	Collister Pill to Cone Pill	E. Owen, Builth.
†Severn	Cone Pill to Avon Battery	J. Stallard, junior, Worcester.
Avon, Brue & Parret	Avon Battery to County Boundary	T. F. Barham, Bridgwater.
Taw and Torridge	North Coast of Devon	W. J. Toller, Barnstaple.
†Camel	West Boundary of Devon to Peel Point	A. ago, Bodmin.
†Fowey	Peel Point to Rame Head	W. Pease, junior, Lostwithiel.
†Tamar and Plym	Rame Head to Stoke Point	W. W. Matthews, Tavistock.
†Avon (Devon)	Stoke Point to Start Point	W Beer, Kingsbridge.
†Dart	Start Point to Hope Ness	A. Pike, Totnes.
†Teign	Hope Ness to Clerk Rock	H. Michelmore, Newton Abbot.
Exe	Clerk Rock to Ottermouth	H. Ford, Junr., Exeter.
Otter	Ottermouth to Beer Head	—
†Axe	Beer Head to Portland Bill	W. Forward, Axminster.
Frome	Portland Bill to Hampshire Boundary	P. E. L. Budge, Wareham.
Avon and Stour	W. Boundary of Hants to Hurst Castle	R. D. Sharp, Christchurch.
†Ouse (Sussex)	Portobello to Seaford Head	F. Holman, Lewes.
†Cuckmere	Seaford Head to Fairlight	H. J. Woodhams, Berwick, Polegate.
†Rother	Fairlight to Dungeness	T. J. Smith, Rye.
Stour (Kent)	North to South Foreland	M. Kingsford, Canterbury.
Stour (Suffk. & Essex)	Blackman's Head to Landguard Point	A. T. Cobbold, Ipswich.
Norfolk and Suffolk (2 districts)	.....	G. F. Buxton, Thorpe St. Andrew, Norwich.
†Ouse and Nene	West Boundary of Norfolk to Lapwater Hall	Joseph Miller, Bedford.
Welland	Lapwater Hall to Western Point	S. B. Sharpe, Market Deeping.
†Witham	Western Point to Gibraltar	H. Snaith, Boston.
†Trent	Ingoldnell's Point to Trent Falls	C. K. Eddowes, Derby.
†Yorkshire	Trent Falls to Hayburn Wyke	J. E. Jones, Market Street, York.
†Esk (Yorkshire)	Hayburn Wyke to Skinningrove Beck	W. Brown, Whitby.
†Tees	Skinningrove Beck to Hardwick Hall	M. B. Dodds, Stockton.
†Wear	Hardwick Hall to Souter Point	W. Halcro, Sunderland.
†Tyne	Souter Point to Newbiggin Point	R. Gibson, Hexham.
†Coquet	Newbiggin Point to Hawick Burn	C. Percy, Alnwick.

which are prejudicial to such Fisheries. They are also empowered to issue licences for fishing for salmon, trout, &c. (see Appendix, "Close Times").

SCOTLAND.—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself, but only 29 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND.—In Ireland there are 23 districts, embracing between them the whole country, each with a separate Board of Conservators.

SEA FISHERIES DISTRICTS.—Under the Sea Fisheries Regulation Act, 1888, the Board of Trade has power to form sea fisheries districts within the territorial waters of England and Wales, and to appoint local Fisheries Committees. These committees may be appointed either for a single county or borough, or for several jointly. They have power to make bye-laws, to be confirmed by the Board of Trade, regulating or prohibiting the use of instruments for the capture of sea fish (including shell fish and crustaceans, but excluding salmon), the deposit of rubbish on fishing grounds, &c. The following districts have been created—including in each case the coast and territorial seas adjoining between the points respectively mentioned:—1. Northumberland (coterminous with that county). 2. North Eastern, from Northumberland to Donna Nook in Lincolnshire. 3. Kent and Essex, from Dovercourt to Dungeness, and including the Thames estuary to London Stone near Yantlet Creek. 4. Sussex (coterminous with that county). 5. Southern, from the western boundary of Dorset to Hayling Island. 6. Devon. 7. Cornwall (each coterminous with the respective counties). 8. Glamorgan, from Nash Point to Worms Head. 9. Milford Haven, from Worms Head to Cemmaes Head. 10. Western, from Cemmaes Head to eastern boundary of Carnarvonshire. 11. Lancashire, from Carnarvonshire to Haverigg Point. 12. Eastern, from Donna Nook to Happisburgh. 13. Cumberland, Haverigg Point to Sark Foot.

Similar districts are being formed in Scotland under the Sea Fisheries Regulation (Scotland) Act, 1895.

Seasonable and Unseasonable Fish.

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The asterisk (*) signifies that the fish are then in their prime; the dagger (†) signifies that the fish may be obtained, but are not at their best; the double dagger (‡) signifies that it is "close-time" as fixed by statute.

(*a*) This is for sea crayfish. River crayfish can be obtained in the spring, summer, and autumn. It is a moot point whether it is legal to take freshwater crayfish from March to June.

(*b*) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for storage.

(*c*) In the close season salmon from Holland and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(*d*) For the first six months the bulk of our London supply of shrimps comes from Holland, but Dutch shrimps are far inferior to the English, which are plentiful from July to December.

There are in England, including "Her Majesty's" (Master, Lord Coventry), of which there are 40 couples, the kennels being at Ascot Heath, 18 packs of Staghounds, containing between them 426 couples of hounds; besides seven packs in Ireland, with 170 couples. The following are the Masters, the Kennels, and the numbers of the principal packs of Staghounds (with over 20 couples each):—

Pack.	Couples.	Master.	Kennels.
County Down	34	Mr. F. Barbour	Ballinahinch, county Down.
Devon and Somerset	40	Mr. R. A. Sanders	Exford, Taunton, Somerset.
Enfield Chase	23	Colonel A. P. Somerset, C.B.	Enfield Court, Middlesex.
Essex	21	Mr. S. H. M. Neave	Mill Green Park, Ingatestone.
Gerard's, Mr.	28	Hon. R. Gerard	Wrightington Hall, Appley Bridge, Lancs.
Mid Kent	24	Mr. Aug. Jenner	Waterlingbury, Maidstone.
New Forest	26	Mr. E. P. Kelly	Northerwood, Lyndhurst, Hants.
Rothschild's (Lord)	30	Lord Rothschild	Ascott, Leighton Buzzard.
Roscommon	26	Major Bulte	South Park, Castlerea.
Surrey	25	Mr. F. Gregory	Horleyland, Horley, Surrey.
Seventh Dragoon Guards	24	Capt. Follett	Mousehold, Norwich.
Ward Union	30	Committee	Ashbourne, county Meath.
Surrey, West	22	Mr. M. D. Rucker	Woodland Park, Leatherhead, Surrey.
Humphrys, Mr.	20	Mr. A. E. Humphrys	Lissagoan House, Ballynain, co. Cavan.
Savernake	30	Mr. T. L. Phillips	Durley, Savernake, Marlborough.
Templemore	20	Mr. H. J. Butler	Lloydsboro', Templemore.
Westmeath, South	30	Lord Castlemaine	Ballykeeran, Athlone.

Of Foxhound packs, there are no less than 155 in England and Wales containing 6,044 couples of hounds; in Scotland, ten packs, with 339 couples; and in Ireland, 21 packs, with 803 couples. The following are the packs of Foxhounds containing 50 couples of hounds or more:—

Pack.	Couples.	Master.	Kennels.
Albrighton	50	Mr. Jas. Foster	Whiston Cross, Shifnal.
Atherstone	53	Mr. G. H. Hardy	Witherley, Atherstone, Warwickshire.
Badsworth	50	Mr. J. S. H. Fullerton	Badsworth, Pontefract.
Badminton	75	Marquis of Worcester	Badminton, Wilts.
Bedale		Major H. F. Dent	Low St. Bedale, Yorks.
Belvoir	64	Sir G. Greenall	Belvoir Castle, Grantham, Lincoln.
Berkeley		Committee	Berkeley, Gloucestershire.
Berkshire, Old	50	Mr. F. C. Swindell	Kingston Bagpuze, Abingdon.
Bicester and Warden Hill	55	Earl of Cottenham	Stratton Audley, Bicester, Oxon.
Blackmore Vale	90	Mr. M. Guest	Charleton Horethorne, Sherborne, Dorset.
Blankney	58	Mr. N. C. Cockburn	Blankney, Sleaford.
Bramham Moor	50	Mr. G. L. Fox	Bramham Park, Boston Spa, Yorkshire.
Burton	55	Mr. T. Wilson	Reepham, Lincolnshire.
Cattistock	60	Mr. R. C. Pole	Sydling Court, Dorchester.
Cotswold	50	Major de Fredille	Cotswold, Cheltenham.
Cottesmore	54	Mr. W. Baird	Ashwell Road, Oakham, Rutland.
Craven	50	Mr. W. H. Dunn	Walcot, Hungerford.
Crawley and Horsham	50	Mr. C. B. Godman	West Grinstead, Sussex.
Dartmoor	50	Mr. W. Coryton	Woodland, Ivybridge.
East-Sussex	50	Mr. J. C. Munro	Catsfield, Battle.
Essex	52	Messrs. E. Bowlby & L. Arkwright	Harlow, Essex.
Essex Union	50	Col. J. F. Hornby	Great Burstead, Billericay.
Fernie's (Mr.)	50	Mr. C. W. Fernie	Medbourne, Market Harborough.
Fitzwilliam's (Mr.)	50	Mr. G. W. Fitzwilliam	Milton, near Peterborough.
Galway's (Lord)	55	Lord Galway	Scriby, Bawtry, Yorks.
Garth's (Mr.)	50	Mr. T. Garth	Haines Hill, Twyford, Berkshire.
Grafton	52	Hon. E. D. Pennant	Paulers Pury, Towcester.
H. H. (Hampshire)	55	Mr. F. Coryton & Col. Knox	Ropley, Alresford.
Hambledon	50	Hon. F. Baring	Droxford, Bishop's Waltham, Hampshire.
Hertfordshire	50	Mr. E. R. Sworder	Kensworthe Green, Luton
Heythrop	50	Mr. A. Brassey	Chipping Norton, Oxon.
Holderness	52	Mr. A. Wilson	Etton, near Hull.
Ledbury	50	Mr. G. J. Thursby	Ledbury, Herefordshire.
Meynell	53	Mr. H. Bass, M.P.	Sudbury, Derby.
Middleton's (Lord)	50	Lord Middleton	Birdsall, Malton, York.
North Cheshire	50	Earl of Enniskillen	Forest Kennels, Northwich.
North Cornwall	50	Mr. A. F. Basset	St. Breward, Bodmin.
North Staffordshire	55	Duke of Sutherland	Trentham, Stoke.
North Warwickshire	52	Lord Algernon Percy	Kenilworth
Oakley	56	Capt. H. Browning	Milton Ernest, Bedford.
Puckeridge	62	Mr. E. C. Barclay	Braughing, Ware, Herts.
Pytchley	55	Mr. W. M. Wroughton	Brixworth, Northampton.
Quorn	55	Earl of Lonsdale	Quorndon, Loughborough
Rufford	50	Mr. L. Rolleston	Rufford, Ollerton, Newark.
Shropshire	50	Mr. A. P. H. Lonsdale	Lee Bridge, Preston, Shrewsbury.
South and West Wilts	52	Mr. H. W. Harris	Sutton Veney, Warminster.
South Notts	50	Earl of Harrington	Gedling, Notts.
Southdown	50	Hon. C. Brand	Ringmer, Lewes, Sussex.
Southwold	50	Mr. E. P. Rawnsley	Belchford, Horncastle, Lincolnshire.
Tedworth	50	Mr. C. P. Shrubb	Tedworth, Marlborough
Tynedale	50	Mr. J. C. Straker	Stagshaw, Corbridge-on-Tyne.
Warwickshire	52	Lord Willoughby de Broke	Kineton, Warwick.
West Norfolk	50	Mr. C. D. Seymour	Narford, Swaffham.
Worcestershire	51	Earl Dudley	Fernhill Heath, Worcester.
Wynnstay	61	Sir H. Williams Wynn, Bart.	Wynnstay, Ruabon.
York and Ainsty	50	Mr. R. Lycett Green	Acomb, York.
Zetland's (Marquess of)	56	Marquess of Zetland	Aske, Richmond, Yorkshire.
IRELAND.			
Kilkenny	55	Capt. Langrishe	Rockview, Stoneyford, Kilkenny.
Kildare	57	Major R. St. L. Moore	Jigginstown, Naas, county Kildare.
Meath	64	Mr. John Watson	Beatrice, Navan, county Meath.
Tipperary	50	Mr. R. Burke	Grove, Fethard, co. Tipperary.
Westmeath	54	Earl of Longford	Culleen, Mullingar.
SCOTLAND.			
Buccleuch's (Duke of)	57	Duke of Buccleuch, K.T.	St. Boswells, Roxburghshire.
Eglinton's (Earl of)	50	Earl of Eglinton and Winton	Kilwinning Castle, Irvine, Ayr.

BIRTHS.

When a birth takes place, personal information f it must be given to the Registrar, and the egister signed in his presence, by one of the fol- owing persons:—1. The father or mother of the hild. If they fail, 2. The occupier of the house n which the birth happened; 3. A person present t the birth; or, 4. The person having charge of he child. The duty of attending to the registra- ion thereof rests firstly on the parents. One of hem must, within 42 days of the birth, give to he Registrar by word of mouth the information eeded to enable him to register, and must sign he register in his presence. If they fail to do his without reasonable cause, they will become iable to a penalty of forty shillings. In case of heir failure, one of the other persons above amed must give personal information and sign he register within the same period. If at the nd of 42 days no one has given information and igned the register, the Registrar may write to ny one of the above-mentioned persons, requir- ng him or her to come to him for that purpose, t a stated time and place. Any person who fails o comply with this requisition will become liable o a penalty of forty shillings. Not only will lia- ility to a penalty be avoided, but the registra- ion of a birth will be free of charge when it akes place within 42 days, unless either of the ersons above named sends to the Registrar a ritten request to come and register at his or her esidence, or at the house where the child was orn, when the Registrar on so attending to regis- er may claim a fee of one shilling. After three nonths a birth cannot be registered except in the resence of the superintendent Registrar, and on ayment of fees to him and the Registrar. After welve months a birth can be registered only on he Registrar-General's express authority, and on ayment of further fees. It is important to per- ons of all classes to be able to prove their age nd the place of their birth. The only legal proof f these is afforded by the civil registers, which he law now requires to be made as above described. The child's baptismal name, if changed, or not reviously given, may be inserted in the register ithin twelve months after the registration of he birth.

DEATHS.

When a death takes place, personal information f it must be given to the Registrar, and the regis- er signed in his presence, by one of the following ersons:—1. The nearest relative of the deceased resent at the death, or in attendance during the ast illness. If they fail, 2. Some other relative f the deceased in the same (Registrar's) sub- istrict. In default of any relatives, 3. A person esent at the death; or, the occupier of the ouse in which the death happened. If all the bove-named fail, 4. An inmate of the house, or, he person causing the body to be buried. Rela- ives present or in attendance are first required to ttend to the registration. One of them must, ithin five days of the death, give to the Registrar y word of mouth the information needed, and ust sign the register; or must within the same ime send him written notice of the death, accom- anied by a certificate of the cause of death, igned by a registered medical practitioner, if y such attended the deceased. The written tice will be useless without a legal medical cer- tificate. If notice is sent, information must never- theless be given and the register signed within fourteen days from the death. If relatives present or in attendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. The penalty for not delivering this certificate is forty shillings. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may, by written application, require any one of them to come to him and do so at a stated time and place. Any person failing to attend on this application will be liable to a penalty of forty shillings. Whenever the de- ceased has been attended by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the registrar. After twelve months a death can be registered only on the Registrar-General's express authority, and on payment of fees.

Coroners' Inquests are held in all cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Sudden deaths are supposed by the law to demand inquiry. Still, it often occurs that a medical man quite familiar with the case will give his certificate that the death arose naturally, from heart disease, apoplexy, &c., and in such case a coroner's inquest is dispensed with. Coroners do not obtrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty, or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the pur- pose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*," and the number is immaterial provided twelve agree. The jury is usually summoned from the house- holders residing in the neighbourhood in which the death took place. Any person having been duly summoned as a *witness* is bound to attend, or renders himself liable to be fined in any sum not exceeding forty shillings, the fine for default- ing *jurymen* being £5. The exemptions of persons from serving on juries contained in Jury Acts also apply to Coroners' inquests. There have

been many instances of Coroners' inquests into the cause of fire, even where there is no loss of life, and this is an excellent practice.

VACCINATION.

The parent of every child born in England must, within three months after the birth, or the person having the custody of any child must within three months after receiving the custody have it vaccinated by some medical practitioner, or take it to the Public Vaccinator of the vaccination district in which the child shall be then resident, to be vaccinated. When the child is not vaccinated by the Public Vaccinator, the parent or custodian must also transmit a certificate of successful vaccination, signed by the medical practitioner, to the Vaccination Officer appointed by the Guardians of the district, within seven days after the performance of the operation. For neglecting to procure vaccination, or to transmit the certificate as required, a penalty of 20*s.* is incurred.

MARRIAGE BY BANNS OR LICENCE.

Banns of Marriage.—"Banns" formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. Formerly banns might be proclaimed on Church holidays, but the Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony. If there is morning service the right time for banns is after the Nicene Creed; and if there be afternoon or evening, and no morning service, then the right time is after the 2nd lesson. The law is now chiefly contained in the Marriage Act, 4 Geo. IV. c. 76, which repealed most of the laws then in force. Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the Established church of the parish. In like manner in Scotland the publication takes place in the parish church, even where the parties are married in the Anglican or Episcopal church. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage. The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage may be null and void (*Wood's case*, 4 S. & T. 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may license a Chapel of Ease for the celebration of marriages; but where a district has been assigned to a chapel, and it becomes a vicarage, or "ecclesiastical parish," the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the "mother church" or that of the civil parish.

If three months be permitted to elapse, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are "forbidden." By the Act 6 & 7 Will. IV. c. 85, a marriage may be performed in church on a registrar's certificate without banns.

Marriage licences are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops for marriage in any church or chapel duly licensed for marriages; (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 402). The Act of 1823 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; the penalty is far less severe on a Dissenting minister or registrar taking part in an irregular marriage. By a subsequent alteration in the law, the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

The minister should be careful that there are two witnesses present, and that these witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Act of 1857. An incumbent may under this Act refuse to marry a divorced person, but he must allow another clergyman of the diocese to perform the service.

Although the presumption of law is in favour of the validity of a marriage, great care should be taken to comply with the directions of the several statutes in every particular. Where it is impossible to comply literally, the parties must do all they can to comply with the law.

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is 2*s.* 6*d.*, and a stamp duty of 1*d.* Searches on the register-books may be made on payment of small fees, viz., 1*s.* for a single year, and 6*d.* additional for every other year. There are small fees, regulated by custom, on the certificate given of banns in one parish for marriage in another. Marriage fees are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and 5*s.* to the clerk; and the usual fees are paid although a stranger-clergyman be invited to perform the service.

MARRIAGE LICENCES.

Marriage Licences can be obtained in London by application at the Faculty Office, at the Vicar-General's Office, and at the Bishop of London's Registry, all within the old area known as Doctors' Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office, 23 Knightrider Street, or at the Vicar-General's Office, 3 Creed Lane, Ludgate Hill, E.C. (hours in both offices 10 to 4; Saturdays, 10 to 2), are available for London and all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties; nor will any agent be allowed to interfere, either in procuring or paying for the licence. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to about thirty shillings, in addition to the cost of stamps, 12*s.* 6*d.* The cost of licences through a clerical surrogate in

the country varies, according to the diocese, from £1 13*s.* to £2 12*s.* 6*d.* By the 4th George IV. c. 76, it is enacted, "in order to avoid fraud and *collusion* in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of *such parties hath had* his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized."

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to procure the licence from the Bishop's registry, this being the usual mode of obtaining a marriage licence, the surrogate delivering the same personally to the applicant.

SPECIAL MARRIAGE LICENCES.

Special Licences are granted by the Archbishop of Canterbury (after application at the Faculty Office, 23 Knightrider St., Doctors' Commons), under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must be such as to meet with his Grace's approval. Fees for licence stamp, &c., average £29 8*s.*

PROCEEDINGS AS TO A MARRIAGE BEFORE A REGISTRAR.

Notice and Declaration. — In case of an intended marriage *by Certificate* at a register office (*i.e.*, the superintendent registrar's office), or a certified building (*i.e.*, usually a Roman Catholic or Nonconformist church or chapel), it is necessary for one of the parties to give notice under his or her hand (in the form prescribed by the 19 & 20 Vict. c. 119, schedule A.) to the superintendent registrar of the district within which the parties shall have dwelt for the space of seven days then next immediately preceding; or if the parties dwell in different superintendent registrars' districts, a like notice must be given to the superintendent registrar of each district: every form of notice contains solemn declarations that there is no lawful hindrance to such marriage, as to the necessary residence, the ages of the parties, and consent of parent in case of a minor; such notice and declarations must be signed before a registration officer of the district, namely, a superintendent registrar, or registrar of births and deaths or marriages or the deputy of some such registrar. If the marriage is intended to be had *by licence*, it is necessary for only one of the parties to give notice to the superintendent registrar, in manner before mentioned, in whose district he or she has resided for the space of fifteen days immediately preceding, and if the other party reside in a different superintendent registrar's district, it is not requisite that notice should be given to such last-mentioned superintendent registrar; but one of the parties must, for the space of fifteen days immediately preceding the giving of the notice, have had his or her usual place of residence within the district of the superintendent registrar to whom such notice is to be given. In case a minister did not happen to attend and the parties wished, they might be married before the registrar without any religious ceremony.

Certificate.—After the expiration of twenty-one days next after the day of the entry of notice of marriage which is to be had without licence, the superintendent registrar is required, provided there be no lawful impediment, to issue, upon the request of the party giving the notice, a certificate in the form prescribed by the 19 & 20 Vict. c. 119, schedule B. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the certificate.

Licence.—In the case of marriage by licence the superintendent registrar is required, after the expiration of one whole day next after the day of the entry of the notice of marriage, provided there be no lawful impediment, to issue his certificate and also a licence to marry. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the licence.

Marriage Ceremony.—After the expiration of twenty-one days after the entry of the notice if the marriage is intended to be had without licence, or of one whole day if by licence, the marriage may be contracted at the register office and in the presence of the superintendent registrar and some registrar of the district, and in the presence of two witnesses, between the hours of eight a.m. and three in the afternoon, with open doors. Each of the parties is required to declare as follows:—"I do solemnly declare that I know not of any lawful impediment why I, *A. B.*, may not be joined in matrimony to *C. D.*:" and each of the parties shall say to the other, "I call upon these persons here present to witness that I, *A. B.*, do take thee, *C. D.*, to be my lawful wedded wife [*or* husband]." A wedding-ring is usually required. In case a minister does not happen to be present, and the parties wish it, they may be married in any chapel or building certified for marriages, the registrar only being present with the two witnesses. The marriage laws of Scotland are peculiar, and cannot here be set out; but it may be mentioned that "Gretna Green weddings" are obsolete, a period of residence being now required by law. Provision is made in the Marriages and Registration Act, 1837, sect. 23, for the declaration and form of words to be used in Welsh in Wales and in all places where the Welsh tongue is commonly used. If both parties are of the Jewish persuasion, they must give notice to the registration officer, in manner before mentioned, and may marry according to their usages in a synagogue or private dwelling-house, and at any hour of the day; the marriage must be registered by the secretary of the synagogue to which the husband belongs. If both parties are members of the Society of Friends, they must give notice to the registration officer in manner before mentioned, and may be married in a Friends' meeting-house, and the marriage must be registered as soon as conveniently may be after its solemnization by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a registrar of marriages is not requisite at such marriages of Jews or members of the Society of Friends.

Certificate of Birth, Death, or Marriage. —On giving the name and date this can be obtained at Somerset House on payment of 3*s.* 7*d.* made up as follows: 2*s.* 6*d.* for certificate, 1*s.* for search, and 1*d.* for stamp. Enquiries by post from residents in the Metropolis will not be considered; attendance in person or by agent is necessary. Certificates are also obtainable from the superintendent registrar of the district in which the birth, death, or marriage took place at the above rate.

MARRIAGES OF BRITISH SUBJECTS ABROAD.

An Act was passed on the 27th June, 1892, to consolidate enactments relating to the marriage of British subjects outside the United Kingdom. This Act came into force on the 1st January, 1893. An Order in Council was passed on the 28th October, 1892, laying down Regulations for Marriages under the Act.

British subjects desirous of being married at an embassy, legation, or consulate, must give seven days' notice of the intended marriage, but one of the parties at least must have resided for that time in the district immediately preceding the giving of such notice. After the suspension of such notice for fourteen days the marriage may take place, provided one or both parties have resided for three weeks immediately preceding within the consular district. In cases where one of the parties only has dwelt within the district of the officer by whom the marriage is to be solemnized, the non-resident party, if resident abroad, must give notice to the Consular Officer for the district in which he or she resides; or, if resident in a place in the United Kingdom, the same notice must be given as if that party were about to be married at that place. A Consular Officer holding a warrant for a district can only solemnize a marriage at his own official house. He cannot solemnize a marriage at the office of any subordinate consular officer, or elsewhere. No marriages performed at any other place are valid under the Foreign Marriage Act. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district; two or more witnesses are required to be present; and an oath, declaration, or affirmation must be made by both parties with reference to their age, and parents' consent, if minors.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of 18th August, 1892, and are payable to Her Majesty's Government:—

	£	s.	d.
For receiving notice of an intended marriage	0	10	0
For receiving notice of a caveat	1	0	0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him	0	10	0
For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place	0	5	0
For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same	1	0	0

Marriages may be solemnized between the hours of 8 a.m. and 3 p.m.

The ceremony, if a marriage under the Foreign Marriage Act, may be performed by, or in the presence of, any Ambassador, Minister, Chargé d'Affaires, or any of the Secretaries authorized for that purpose, or by any Consul-general, Consul, Vice-consul, Consular agent (or any person duly authorized to discharge their duties), or Pro-consul, provided that such consular officer is furnished with a warrant signed by the Secretary of State for Foreign Affairs. No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorized Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church. If the service be not that of the Church of England, the contracting parties must make a declaration before the Marriage Officer to the effect that they know not of any lawful impediment why they may not be joined in matrimony, and that they call upon the persons present to witness that they take each other respectively to be lawful wedded husband and wife. In the absence of any religious ceremony, such declaration is sufficient.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of Her Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited. A consular officer is authorized to register, at the consulate at which he is appointed to reside, marriages solemnized in accordance with the *local law* between parties of whom one at least is a British subject, provided that he be satisfied by personal attendance that the marriage has been so solemnized; he cannot be required to attend at the solemnization of a *lex loci* marriage beyond the place at which he is appointed to reside.

A marriage which would not be valid if solemnized in England would be equally invalid if solemnized in one of Her Majesty's embassies, legations, or consulates abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity (such as that between a man and his deceased wife's sister) would not be valid in England even if valid in the country where the marriage was contracted.

Marriages may also be solemnized under the "Foreign Marriage Act, 1892," before any governor, high commissioner, or resident, who may be duly authorized to that effect, and also before the commanding officers of any of Her Majesty's ships on a foreign station.

BRITISH NATIONALITY AND NATURALIZATION.

NATIONALITY.—The following are, by the law of England, deemed to be British subjects:—

1. All persons born in Her Majesty's dominions, whether of British or of Foreign parents.
2. Children of natural-born British subjects, wherever born.
3. Grandchildren of natural-born British subjects, wherever born.
4. Persons naturalized (*a*) By Special Act of Parliament, (*b*) Under the provisions of the "Naturalization Act, 1870."

The above does not apply to married women, who are deemed to be subjects of the state of which their husbands for the time being are subjects.

Natural-born British subjects can only deprive themselves of British nationality, (1) If they happen to be born in the British dominions of foreign parents, in which case they may, if of full age and if under no disability, make a declaration of alienage; (2) If they voluntarily become naturalized in a foreign state.

British subjects born in foreign countries sometimes become, by the law of the country of their birth, subjects or citizens of that country. In such case they may, by the law of England, when of full age, and if under no disability, make a declaration of alienage, and they then cease to be British subjects. Should they retain their British nationality, and continue to reside in the country of their birth, their British nationality will not avail them if claimed as subjects or citizens of the country in question.

NATURALIZATION.—Although in rare instances aliens are naturalized by special Act of Parliament, the ordinary way of becoming naturalized as a British subject is by fulfilling the requirements of the "Naturalization Act, 1870." The applicant must either have resided in the United Kingdom for a term of not less than five years, or have been in the service of the Crown for a similar period. He must also furnish evidence of his intention, when naturalized, either of residing in the United Kingdom, or of serving under the Crown. All applications for certificates of naturalization should be addressed to the Secretary of State for the Home Department.

The privileges of naturalized British subjects are thus stated in the "Naturalization Act":

"An alien to whom a certificate of naturalization is granted shall in the United Kingdom be entitled to all political and other rights, powers, and privileges, and be subject to all obligations, to which a natural-born British subject is entitled or subject in the United Kingdom, with this qualification, that he shall not, when within the limits of the foreign state of which he was a subject previously to obtaining his certificate of naturalization, be deemed to be a British subject unless he has ceased to be a subject of that state in pursuance of the laws thereof, or in pursuance of a treaty to that effect."

With reference to the last paragraph of the foregoing extract, it may be mentioned that the only country with which Great Britain has yet concluded a treaty on the subject of naturalization is the United States of America. In all other countries, therefore, it is incumbent on the person concerned, if he wishes to have British protection in the country of which he was previously a subject, to show that he has ceased to be a subject of that state.

A natural-born British subject, who has become naturalized in a foreign country, may obtain a certificate of re-admission to British nationality on fulfilling the conditions required in the case of aliens applying for a certificate of naturalization.

The children of naturalized British subjects, if born in the British dominions, are by the law of England deemed to be British subjects. If born abroad, they are only deemed to be naturalized British subjects provided that their father was naturalized under the Naturalization Act, 1870, and that during infancy they became resident with their father, or mother being a widow, in any part of the United Kingdom.

British colonies have power to legislate on the subject of naturalization. Colonial naturalization is, however, only operative within the limits of the particular colony in which the naturalization may have been granted.

The following fees are leviable under the Naturalization Act, 1870:—

	£	s.	d.
On grant of certificate of naturalization...	5	0	0
For registration of declaration, with or without oath of allegiance	0	10	0
For certified copy of any declaration or certificate, with or without oath	0	10	0

STATUS OF ALIENS.—Real and personal property of every description may be taken, acquired, held, and disposed of by an alien in the same manner in all respects as by a natural-born British subject, but the acquisition of a title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any municipal, parliamentary, or other franchise.

Aliens are not entitled to be tried by a jury *de medietate linguæ*, but are triable in the same manner as if they were natural-born subjects.

ILLEGITIMACY.—A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 5*s.* a week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of such child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A menial servant found to be *enceinte* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enceinte* renders the employer liable to an action. A man who is adjudged the father of a bastard child may be peremptorily discharged by his employer. In case any living new-born child is found exposed, it is the duty of any person finding such child, and of any person in whose charge such child may be placed, to give information to the Registrar of Births.

NOTIFICATION OF INFECTIOUS DISEASES.

The Act of 1889 (52 & 53 Vict. c. 72) is the outcome of very much public discussion, at medical and other Congresses. The problem was not simple, and there were objections to every mode of solving it. But an Act was clearly necessary, as it was useless to give to local authorities all kinds of powers for destroying and disinfecting, and yet not to ensure that information should be furnished to them. As the medical profession protested against any new duty being cast solely upon them (although they know far more about the matter than any other people), the duty of informing the authorities is placed on the "head of the family" in the first instance; and by sect. 3, the head of the family, and failing him the nearest relatives of the patient, and failing them the person in charge of the patient suffering from any infectious disease, must give notice (in writing or print, in an approved form) to the medical officer of health of the district. Secondly, the medical man attending the patient must send a certificate giving all the particulars to the Officer of Health. Failure to give the notice or the certificate renders the defaulting person liable on summary conviction to a fine not exceeding £2. Forms are to be prepared and circulated; and the local authority is to pay the certifying practitioner a fee on each certificate of 2*s.* 6*d.* if the case occurs in private practice, and 1*s.* if in a public body or institution. The local authority is to give public notice before bringing the Act into operation.

Sect. 6 gives a long list of the diseases, beginning with small-pox and cholera, and ending with fevers of several kinds, and the local authority may by sect. 7 add other diseases to the list. Therefore each locality is liable to have its own list of contagious diseases; and the public must rely, not on the list in the Act, but on the list to be published in the locality. Sect. 9 provides for expenses; and sect. 10 directs what is to be done in London by the officer of health on receiving a notice. Sect. 11 concerns medical men only; while sect. 12 only concerns Woolwich. Sect. 13 applies the Act to ships, boats, vans, sheds, and other places used as habitations. In London, therefore, *i.e.*, the Metropolitan District, the Act is already in force; and householders should procure the information required at their vestry halls.

INFECTIOUS DISEASES.

Precautions Necessary to be Observed.—By the Public Health Act, 1875, it is provided that any person who—(1) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop, inn, or public conveyance, without previously notifying to the owner, conductor, or driver thereof that he is so suffering; or, (2) Being in charge of any person so suffering, so exposes such sufferer; or, (3) Gives, lends, sells, transmits, or exposes, without previous disinfection, any bedding, clothing, rags, or other things which have been exposed to infection from any such disorder, shall be liable to a penalty not exceeding £5. A person suffering from such disorder who enters a public conveyance without previously notifying to the owner or driver that he is so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance is required to immediately provide for the disinfection of such conveyance after it has to his knowledge conveyed any person suffering from a dangerous infectious disorder; but no such owner or driver can be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. Any person who knowingly lets for hire any house, room, or part of a house in which any person has been suffering from any dangerous infectious disorder without having such house, room, or part of a house, and all articles therein liable to retain infection, disinfected to the satisfaction of a legally qualified medical practitioner, as testified by a certificate signed by him, is liable to a penalty not exceeding £20. Any person letting for hire, or showing for the purpose of letting for hire, any house or part of a house, who, on being questioned by any person negotiating for the hire of such house as to the fact of there being, or within six weeks previously having been therein, any person suffering from any dangerous infectious disorder, knowingly makes a false answer to such question, is liable to a penalty not exceeding £20, or to imprisonment with or without hard labour for a period not exceeding one month. Where, on the certificate of the Medical Officer of Health, or of any two medical practitioners, it appears to any urban or rural sanitary authority that any house, or part thereof, is in such a filthy or unwholesome condition that the health of any person is affected or endangered thereby, or that the whitewashing, cleansing, or purifying of any house, or part thereof, would tend to prevent or check infectious disease, the local authority may give notice in writing to the owner or occupier of such house, or part thereof, to whitewash, cleanse, or purify the same as the case may require, and such person is liable to a penalty not exceeding 10*s.* for every day during which he fails to comply with the notice, and the sanitary authority may cause the required work to be done, and may recover the expenses from the person in default. A sanitary authority may direct the destruction of any bedding, clothing, or other articles which have been exposed to infection from any dangerous infectious disorder, and may give compensation for the same. Where any suitable hospital or place for the reception of the sick is provided within the district of a sanitary authority, or within a convenient distance of such district, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied by more than one family, may, on a certificate signed by a legally qualified medical practitioner, and with the consent of the superintending body of such hospital or place, be removed by order of any justice to such hospital or place at the cost of the sanitary authority. The foregoing provisions do not apply to the Metropolis, but the requirements of the law there in force are in most respects the same. The perfect isolation of every case of dangerous infectious disease is the only effectual mode of preventing its spread, and this is best attained by the voluntary co-operation of patients and those in charge of them with the medical attendant or Medical Officer of Health when the disease first makes its appearance.

ARCHITECTS' FEES, although not fixed by law, are easily calculated. It is the custom of that profession to charge 5 per cent. on the value of the work; and if plans, &c., are prepared with a view to works which are never carried out, the ordinary charge is 2½ per cent. If in addition to the building the architect's advice is sought and followed as to decorations, fittings, and furniture, he would beyond doubt be able to recover his 5 per cent. on all the supplementary items.

The following is the scale usually charged for SURVEYING, &c.:—

SURVEY with plain plan—100 acres and under—by arrangement, according to work required. Over 100 acres, 2*s.* per acre and expenses; if with finished map, according to amount of embellishment.

VALUATION to fix rent—5 per cent. on first £200, and 2½ on remainder of one year's rental value, and expenses.

TIMBER valuation—5 per cent. on first £100, and 2½ on the excess, and out-of-pocket expenses.

CROPPING—5 per cent. up to £100, and 2½ on the excess, and out-of-pocket expenses.

VALUATION for probate—2 per cent. on first £500, and 1¼ on the excess, and out-of-pocket expenses. But it is now usual to make a bargain for a fixed and moderate sum.

VALUATION of land—6*d.* per acre, and out-of-pocket expenses. No fee less than 5 guineas.

FOR SALES OF PROPERTY.—Under £500, 5 per cent. on £100, and 2½ per cent. on residue; between £500 and £2 000, 2½ per cent.; between £2,000 and £5,000, 2½ per cent. on £2,000 and 2 per cent. on residue; between £5,000 and £10,000, 2 per cent. on first £5,000 and 1½ per cent. on residue. Above £10,000, 1¼ per cent. on £10,000, 1 per cent. on next £10,000, and ½ per cent. on the residue.

FOR THE SALE of the same by auction—2½ per cent. on the amount realized at the sale, and out-of-pocket expenses; or 1 per cent. on the reserve, and expenses, in the event of no sale being effected.

FOR THE SALE of furniture, &c., by auction—5 per cent. on the amount realized, and out-of-pocket expenses; 5 per cent. valuation of furniture, fixtures, stock-in-trade, and general effects.

FOR LETTING unfurnished houses or disposing of leases when the term is for 3 years or under—5 per cent. on one year's rent; where for more than 3 years, 7½ per cent. on one year's rent; and 5 per cent. on any premium up to £1,000, and 2½ per cent. on residue; and for fixtures, furniture, goodwill, &c., 5 per cent. up to £500, and 2½ per cent. on residue. Should the tenant afterwards purchase, the commission as above for selling will be due, less the commission for letting.

FOR LETTING furnished houses—5 per cent. on the rent payable for one year. If let for a longer period 2½ per cent. on remainder of term.

FOR TAKING INVENTORIES and examining same—From one guinea, according to length.

FOR LETTING building land and brick earth—Building land: one year's ground rent.—Brick earth: 5 per cent. on every year's rent: extra for checking royalty.

VALUATIONS for mortgage, sale, or purchase—1 per cent. and out-of-pocket expenses on first £1,000; and ¼ per cent. on all above that sum upon the full amount of valuation.

FOR NEGOTIATING the purchase of estates, houses, and ground leases—1 per cent. on amount of purchase-money, and out-of-pocket expenses.

FOR NEGOTIATING the taking of houses—Half the above scale for letting, and expenses.

MAKING schedule of fixtures to attach to lease—From 1 to 4 guineas, or about 3 guineas per day.

FOR MAKING schedule of dilapidations, and serving notice to repair—From 2 to 5 guineas per day.

FOR SETTLING amount of dilapidations—5 per cent. on amount, and out-of-pocket expenses.

RAILWAY, School Board, Corporation, Board of Works, and other compensations—

AMOUNT OF AWARD.							
£1,000	fee	18	Gs.	£5,000	fee	38	Gs.
1,200	,,	19	,,	6,000	,,	43	,,
1,400	,,	20	,,	7,000	,,	48	,,

Additional per folio to 20 folios	0	1	6
Each folio after 20	0	1	0
For inventory and valuation:—			
On the first £100 ..... per cent.	2	10	0
For the next £400 ..... ,,	1	5	0
Above £400 up to £10,000 ,,	1	0	0
Above £10,000 ..... ,,	0	10	0

Travelling expenses in addition.

AUCTIONEERS' CHARGES.

For sales by private contract based on the valuation, half the above charges for inventory and valuation.

For sales by auction, including all out-of-pocket expenses as may be authorised at the time by the Official Receiver or Trustee:—

Of chattel property not exceeding—				
On the first £500	£5	0	0	per cent.
Above up to £1,000	4	0	0	,,
Above £1,000	2	10	0	,,
Of estates, freehold, leasehold, &c., including valuations, for determining reserve bids:—				
On the first £300	£5	0	0	per cent.
On the next £1,600.....	2	10	0	,,
Above up to £5,000 ...	1	5	0	,,
Above £5,000	1	0	0	,,

Costs of surveys, dilapidations, and specifications in discretion of Taxing Officer, £2 to £5.

ACCOUNTANTS' CHARGES.

For preparing balance-sheet, investigating accounts, &c., principal's time, exclusively so employed, per day of seven hours, including necessary affidavit, £1 1*s.* to £5 5*s.*

Chief-clerk's time, 10*s.* 6*d.* to £1 11*s.* 6*d.*

Other clerk's time, per day of seven hours, 7*s.* 6*d.* to 16*s.*

These charges to include stationery, except the forms used.

DIRECTIONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, however remote may seem the probability of death, however confident that his property will pass to those he most wishes to benefit, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by means of a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious of the very benefits which had demanded a life-long struggle to provide. Thus a widow may find, to her grievous disappointment, that the estate, a life policy perhaps, or a few hundreds in Consols, is not all hers, but has to be shared with a distant cousin of her husband's, whose name perhaps she had never before heard. Or it may be the eldest son of an intestate ousting all his brothers and sisters from possession of the real estate, or an improvident or unbusinesslike nearest relative may claim to administer the estate. Instances might be multiplied in which negligence, or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—*e.g.* the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying-up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforeseen (*i.e.*, the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, *signed by the testator in presence of two witnesses*, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration *of any kind whatever* must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others:—

TESTATOR OR TESTATRIX.—The person who makes the will is the testator, or if the will-maker be a woman, the testatrix.

ESTATE.—By this word is to be understood property of all kinds, both real and personal. Real property includes tithes and advowsons, as well as freehold lands and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stock in public companies, and the like.

RESIDUARY LEGATEES.—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

TO BEGIN A WILL.—A form in which a will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END A WILL.—After disposing of the property, the will may be ended as follows:—"And I revoke all former wills and codicils. Dated this tenth day of December, 1890."

EXECUTION OF A WILL.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

ATTESTING EXECUTION.—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient:—

Signed by the testator [or testatrix, as the case may be], in the joint presence of us, who thereupon signed our names in his [or her] presence.
William Jones, of Vine Cottage, Silver Street, Reading, Tailor.
Henry Morgan, of North Street, Reading, Esq.

THOMAS SMITH [Signature of Testator.]

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause

should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

Codicil.—When any change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin:—"A codicil to my will, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

Executors.—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows:—"I appoint John Jones, of number twenty-one, London-street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee under the will. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary if it is well known who are the persons intended; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

Appointment of Trustees.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees." When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust for my children, in equal shares, such shares to be paid or transferred on their attaining the age of 21 years." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life (or during widowhood), and on her death or remarriage upon trust for my children then living, and the issue then living of any of them who may have died previously thereto leaving issue, such issue to take equally among them, if more than one, their deceased parent's share, and the shares of all of them to be paid or to be transferred to them on attaining the age of 21 years."

Who cannot Make a Will.—A minor cannot make a will. A woman married before the 1st of January, 1883, can make a will with her husband's consent; but without such consent she can only (under the Married Women's Property Act) bequeath property accruing to her after that date except in certain circumstances, respecting which it is advisable to consult a solicitor. But a woman married after that date can dispose by will of all property belonging to her at the time of her marriage, and of all property acquired thereafter, in all respects as if she were an unmarried woman.

Revocation.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will: so that after marriage the old will should be re-acknowledged, or a new one made.

Lapsed Legacies.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

To One Person Absolutely.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

To Children under Age.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors, or some near relative, guardians of children under age.

All Property to be Invested.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted, p. 411.

The stringency of the law as to the due execution of wills is only relaxed in favour of sailors and soldiers while on service. The law of wills is mostly contained in the Wills Act, 1 Vict. c. 27.

Duties of Executors.—After the death of the testator, the duties of the executor may be stated briefly as follows:—The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists or schedules of the debts and the assets or property. For purposes of duty it is neces-

Digitized by Google

sary to estimate the value of the real and personal property left, or get it valued. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will; to collect all the property of the deceased and pay all his just debts, and, before distributing the estate, if it be a large one, it is advisable to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

NEW ESTATE DUTY.—The Finance Act of 1894 imposes a graduated duty, for which see p. 431.

LEGACY DUTY, varying according to the relationship, is payable excepting where the legatee is the wife or husband of the testator or testatrix, or intestate. The 1 per cent. duties formerly payable are abolished, so far as the Probate or Estate Duty covers them. If deceased died on or after 1st June, 1881, every pecuniary legacy or residue, although less than £20, is chargeable with duty. For scale of duties see p. 432.

SUCCESSION DUTY, like Legacy Duty depending on the consanguinity of the successor, is also now chargeable on the principal value of the property, instead of on the life-interest only, as heretofore. For scale of duties see page 432.

TRUST FUNDS AND INVESTMENTS.

BY RULE OF THE SUPREME COURT, DATED NOVEMBER, 1888, trustees may invest trust funds in the following securities:—

2¾ per Cent. Consols; to be reduced, 5th April, 1903, to 2½ per cent. Consols and Reduced 3 per cent. Annuities. 2¾ per Cent. and 2½ per Cent. Annuities. Exchequer Bills. Bank Stock. India 3½ per Cent. and 3 per Cent. Stocks. Indian Guaranteed Railway Securities. Colonial Government Stocks guaranteed by Imperial Government. Mortgage of freehold or copyhold estates in England or Wales. 3 and 3½ per Cent. Metropolitan Consolidated Stock.

Debenture, preference, guaranteed, or rentcharge stocks of railways in Great Britain or Ireland having for ten years next before the date of investment paid a dividend on ordinary stock or shares.

Nominal stocks or nominal debenture stocks issued under the Local Loans Act, 1875, provided in each case that such stocks shall not be liable to be redeemed within a period of fifteen years from the date of investment.

Local Loans Stock under the National Debt and Local Loans Act, 1887.

THE RULE OF COURT OF NOVEMBER, 1888, will be little referred to now that all the foregoing items in more extensive, and in some cases slightly different, language, are authorized by the Trustee Act, 1893, the more important clauses of which, especially where the Rule of Court is varied, may be summarized as follows:—This Act, which consolidates the enactments relating to trustees, authorizes mortgages on freeholds, or property equivalent to freehold, not only in England and Wales, but also (where not prohibited) in Ireland and Scotland. A very few leaseholds, viz., terms of 200 years, at a nominal rent, are also authorized by the Trustee Act, 1893.

"SECURITIES GUARANTEED BY PARLIAMENT," under the new Act, include the following:—Certain Canada Government stocks, the Turkish Loan of 1855, the Egyptian 3 per cent. guaranteed Loan, a Jamaica 4 per cent. Loan, and one or two others of small amount. In addition to Metropolitan Stock, any stocks of the London County Council are now authorized; also any Corporation or Municipal stocks of the cities or boroughs (about 60 in number) having at the last census a population exceeding 50,000. Also stocks, &c., under certain conditions, of Waterworks Companies and of Water Commissioners. Another very important addition to the list of trust securities is this: Preference, Debenture, Guaranteed, or Rentcharge Stocks of British Railway Companies which have paid 3 per cent. on their ordinary stocks for ten years. This includes all the great lines in England, Ireland, and Scotland, except a few, *e.g.*, the North British, Great Eastern, and Chatham and Dover, which have not, for the whole period of ten years, paid regular dividends to their ordinary shareholders.

THE ACT FURTHER AUTHORIZES trust investments in certain Indian Railways guaranteed by the Indian Government, which can be found on reference to the Stock Exchange official lists. But with regard to the entire list, a trustee cannot invest in anything which is (directly or by implication) prohibited by the terms of his trust. It remains to add (1) that by this Act a trustee may buy at a premium under fixed conditions, but not where the stock is redeemable within 15 years at par, "or some other fixed rate." (2) The last power, as well as every other, is to be used at the "discretion of the trustee"—a phrase which can only be taken in a technical sense; as the Court expects him to show a prudent and cautious discretion, and forbids him, for instance, to favour the tenant for life at the expense of those to follow after. (3) A trustee must consider what is directed, and what is forbidden, by the terms of his trust, before resorting to any of the securities authorized by the Rule of Court, or by the new Act. (4) The Settled Land Act of 1882 also gives a list of securities on which "capital money" arising from sales of property under that Act may be invested—it does not materially differ from the above. The safest plan for a trustee to adopt is this: after looking to his trust, to see that nothing is prohibited, to turn his attention solely to the Act of 1893, sect. 1, and take his choice of the securities therein mentioned. Nearly all of them are at a high price, and he can hardly make sure of obtaining 3½ per cent. for trust money.

If the deed or will under which he is acting authorizes Colonial or Foreign Government Securities, but not otherwise, he may consult

the list of such securities, and select one or more, so as to obtain a return of 4 per cent. or even 4½, and these are the rates usually obtained, and the same on a mortgage.

All the above investments are quite secure; the only one needing caution is that of mortgages: on these not more than two-thirds of the well-ascertained value should in any case be advanced.

High, unimpeachable security generally means a low rate of interest, and when people are dealing with trust money they must confine themselves to the investments permitted by the Court, or they may run considerable risk. When investing their own money they may find many channels sufficiently safe for all ordinary purposes which will yield considerably over 2¾ per cent. Before investing, it will be well to take the advice of some person well conversant with money matters, and to make the purchase through a banker.

SOLICITORS' CHARGES.

These are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder—we say "usually" because that Act allows an option to a solicitor of declining to adopt it. In practice, most solicitors (although some old-established firms are found to prefer the old system) are willing to adopt the Scale, and especially on mortgages and sales. Looking first at the old system, we find that an Act of 1843 made solicitors' charges on conveyancing liable to taxation by a public official; and in 1870 a further Act enabled the taxing officer to have regard to "skill, labour, and responsibility" as well as to mere length of documents. The Act of 1881 enabled the high legal authorities, with the consent of certain representative solicitors, to frame a Scale, and this has been done. It chiefly relates to sales, purchases, and mortgages, and is based upon the value of the property or amount of the money involved. It is too lengthy for insertion here, but a copy of the Remuneration Act, and the "General order made thereunder," with judgments bearing thereon up to the end of the Hilary sittings, 1889, is obtainable of the Incorporated Law Society, Chancery Lane, W.C., price 5s. Vol. I. contains a concise table of charges, which table is in daily use among solicitors themselves. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase, or mortgage-money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent.; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor *negotiates* the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to.

Regulations for Motor Cars.

Applicable to England and Wales.

The following is a summary of the regulations issued by the Local Government Board, supplementary to the Locomotives on Highways Act:—

A light locomotive means a vehicle propelled by mechanical power, under three tons in weight unladen; only used for the purpose of drawing one vehicle, such vehicle and its locomotive together not exceeding in weight unladen four tons; not emitting any smoke or visible vapour, except from any temporary or accidental cause.

In calculating the weight of a vehicle unladen, the weight of any water, fuel, or accumulators used for the purpose of propulsion shall not be included.

It must be capable of being worked either forwards or backwards. The tyre of each wheel must be smooth, with a breadth varying according to the weight of the vehicle, from four inches to two and a-half inches. There must be two independent brakes, each capable of preventing two wheels on the same axle from revolving. If a vehicle is drawn by the locomotive, it, too, must have an efficient brake, controlled by a competent person; or else, the brakes on the locomotive must be able to control the vehicle. The width of a locomotive must not exceed six and a half feet. A lamp is to be carried during the period between one hour after sunset and one hour before sunrise, exhibiting a white light forwards and a red light in the reverse direction. If drawing another vehicle, it must have the name of its owner and his address conspicuously painted on it, together with its weight on the right or off-side in letters white on black, or black on white, not less than one inch in height. The weight must also be painted on every locomotive weighing unladen a ton and a-half and upwards.

Greatest possible speed is fixed at twelve miles an hour. If the weight be one ton and a-half, and does not exceed two tons, the speed shall be not more than eight miles an hour. If the weight exceeds two tons, the speed shall be not more than five miles an hour. Whatever the weight, if used to draw any vehicle, the speed shall not exceed six miles an hour.

This regulation has effect for six months, from Nov. 14, 1896, and thereafter as the Local Government Board shall direct.

General Regulations.—The police are to regulate speed and stoppages for the convenience of the general traffic. A bell or other instrument shall give warning of the approach or position of the light locomotive. The ordinary rules of the road shall be observed. The name of owner shall be given whenever demanded by a constable, or on the reasonable request of any other person.

A breach of any regulation may, on summary conviction, be punished by a fine not exceeding ten pounds.

FARES BY DISTANCE: If hired and discharged *within* the Four-Mile Radius, for any distance not exceeding two miles ..... s. 1 d. 0
For every additional mile or part of a mile 0 6
If hired *outside* the Four-Mile Circle, wherever discharged, for the first and each succeeding mile or part of a mile 1 0
If hired *within* but discharged *outside*, the Four-Mile Circle, whole distance not exceeding one mile, 1*s.*; exceeding one mile, then for each mile *ended* within the circle, 6*d.*; and for each mile or part of a mile *ended* outside 1 0

FARES BY TIME: *Inside* the Four-Mile Circle. Four-wheeled Cabs, for one hour or less, 2*s.*; two-wheeled Cabs 2 6
For every additional quarter of an hour or part of a quarter, four-wheeled Cab, 6*d.*; if a two-wheeled Cab..... 0 8
If hired *outside* the Circle, wherever discharged, for one hour or less 2 6
If above one hour, then for every quarter of an hour or less 0 8
If hired *within*, but discharged *outside*, the Four-Mile Circle, the same.

EXTRA PAYMENTS.—*Hirers of Cabs should be particular in noticing these regulations, as disputes generally arise from their not being clearly understood.*
Whether hired by DISTANCE OR BY TIME.

LUGGAGE.—For each package carried outside the carriage..... s. 0 d. 2

EXTRA PERSONS: For each above two (two children under 10 years of age count as one person) 0 6

WAITING:—By distance: for every 15 minutes completed—if hired within the Four-Mile Circle, four wheels, 6*d.*; two wheels ... 0 8
If hired without Circle, 2 or 4 wheels..... 0 8

GENERAL REGULATIONS.—Fares are according to distance or time, at the option of the hirer, *expressed at the commencement of the hiring*; if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40*s.*

The driver of every hackney carriage shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any hackney carriage shall, if so required, deliver to the hirer a printed ticket, showing fares, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40*s.*, if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare; or, fraudulently endeavours to avoid payment of a fare; or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40*s.*

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

All property left in any hackney carriage shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, New Scotland Yard; but inquiries as to property left in a hackney or stage carriage should be made at the Lost Property Office, New Scotland Yard.

On the 31st December, 1895, there were licensed public carriages:—Hansoms, 7,425; clarences, 3,536; omnibuses, 2,714; tram-cars, 1,099; total, 14,774. Drivers and conductors:—Hackney drivers, 13,498; stage drivers, 6,400; conductors, 7,643; total, 27,541.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, streets, and public buildings in London. How many failed we are not told, but the annual average number of applicants who passed the examination during the past five years was 961. The proportion of drivers to carriages is 12·41 drivers to 10 carriages; 146 of the drivers are over 70 years of age. In 1870 the accommodation of the Metropolitan public was provided for at the rate of one stage carriage to 2,917 people; in 1892 the proportion was one to 1,724.

Of lost property, 32,997 articles were deposited, of which 17,108 were claimed by the owners, and £2,675 awarded to the drivers and conductors.

STREETS AND FOOTPATHS.—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authority of each district, but under certain circumstances the cleansing of footways and pavements adjoining premises, and the removal of filth and ashpit refuse, may be imposed upon occupiers. It is, however, unlawful in any Urban Sanitary District to place or leave on any footway any furniture, goods, wares or merchandise, or any cask, tub, basket, pail, &c.; or to place over any footway any blind, shade, covering, awning, or other projection less than eight feet in height from the ground; or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway; or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway; or to throw or lay down any materials in any street, or beat or shake any carpet, rug, or mat in any street after the hour of eight in the morning.

Sizes of Type.

ALL founders cast their type nearly to one uniform height, though the letters may vary considerably in their breadth.

The type chiefly used in this Almanack is named *Nonpareil*. The column contains 75 lines, and is, technically, 12 Pica ems wide; on an average every column actually contains about 3,000 letters. The compositor in making out his bill reckons that the column contains so many (1,800) ems; he then, doubling that number, charges as so many (3,600) ems.

A very minute type, used only occasionally, is:—

Brilliant. A column the size of this in the Almanack if set in Brilliant would contain 124 lines, and about 7,500 letters.

Printing is the art of producing impressions, from characters or figures, on pa

Diamond is the next size; the column would contain 107 lines, and about 6,000 letters.

Rome	Last Œcumenical	1870

• Only the six thus marked were indisputably General or Œcumenical

Medical Fees.

Unlike those in most other businesses or professions, the charges made by medical men are assessed upon a sliding scale. All engaged in the profession are supposed to be equal in point of skill, and therefore entitled to charge alike, the tariff depending chiefly upon the residence of doctor or patient. A medical man living in the eastern suburbs of London will perhaps charge but half a crown or three-and-sixpence if waited upon by a patient, but, when he removes to the neighbourhood of Cavendish Square, the fee charged for the first visit will be two guineas, and one guinea for the second and every subsequent visit.

Patients are charged according to their supposed incomes, the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners:—

General Practitioners.	Rentals.		
	£20 to £25.	£25 to £50.	£50 to £100.
Ordinary Visit	2s. 6d. to 5s.	3s. 6d. to 7s.	5s. to 10s. 6d.
Night Visit	Double an ordinary visit.		
Mileage beyond two miles from Home	1s. 6d.	2s.	2s. 6d.
Detention per hour	2s. 6d. to 5s.	3s. 6d. to 7s.	5s. to 10s. 6d.
Letters of Advice	Same charge as for an ordinary visit		
Attendce. on servants	2s. 6d.	3s. 6d.	3s. 6d. to 5s.
Midwifery	21s.	21s. to 63s.	63s. to 105s.
Consultants.			
Advice or Visit alone	21s.	21s.	21s.
Advice or Visit with another Practitioner	21s.	21s. to 42s.	21s. to 42s.
Mileage beyond two miles from Home	10s. 6d.	10s. 6d.	10s. 6d.

Special visits—*i.e.*, of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in, in consultation, he is entitled to the minimum fee of 21s.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if *he* send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year, and contain but one amount—"Attendance and medicine," from date to date, so much. The patient has no means of checking the correctness of the charge, although medical men, like all others, are liable to err; they, however, are always willing to show their ledgers when requested.

Population, Births, and Deaths.

Population of 36 large towns in the United Kingdom, and of 25 foreign cities, with the rate per thousand of births and deaths for one year ending September 29, 1896, from the latest quarterly returns issued by the Registrar-General.

Cities and Boroughs.	Population.	Rate per 1,000.

* Rate not stated.

It will be observed that some of the populations given in this table differ from those shown in other parts of the Almanack.

From the beginning of the Christian era to A.D. 300, no mention is made in ecclesiastical history of tithes. In the 4th and 5th centuries, voluntary offerings, which were called tithes, were given to the clergy. Soon afterwards prelates and princes *obliged* the laity to give a "full tenth" of their revenues, fruits, &c., and the Church enjoyed this for two or three hundred years. In the 8th century the laity obtained part of the tithe, and appropriated it to their own use. This was restored again by order of the Lateran Council in 1180. At the Reformation, much of the Church land passed into the hands of laymen, and has since remained free from tithe. From various other causes a great deal is now exempt. Originally the tithe was divided into four equal parts:—For Church edifices, Bishops, Clergy, and the Poor, and was charged upon produce of all kinds, gains from manual occupations and trades. The latter charges gradually ceased, but the tenth of produce was taken until, with increasing population, it became such a check to improved cultivation, and caused so much friction in the matter of collection, that it was commuted in 1836 by Act of Parliament to a payment in money. The land was valued, and a modus fixed, based upon the average value of corn for the preceding seven years, and payments, collected half-yearly by the clergy or lay-owners, have since been made on a septennial average. The value fixed amounted in some cases to as much as ten shillings per acre. The better the land for corn-growing, the larger was the sum to be paid, as it was a direct charge upon the corn grown. The prices upon which the Act was based being per quarter—wheat at 56*s.* 2*d.*; barley, 31*s.* 8*d.*; and oats, 22*s.* Consequently much land, not being worth the tithe, is now out of cultivation, or let at a price which just covers the charge. An Act passed in 1891 makes it compulsory for the owners of the land, instead of the occupiers, to pay the tithe, which amounts in the aggregate to about four millions annually, of which sum £766,334 is paid to 2,096 lay-owners or impropriators. Extraordinary tithes were an additional charge made, when the Commutation Act was passed, upon hop, fruit, and market-garden grounds. These special industries were so affected by the tax, which in some cases amounted to thirty shillings an acre, that serious resistance against the payment ensued, and an Act was passed in 1886 providing that it should not be levied on land brought under such cultivation after the passing of the Act, but land under these crops at the time was permanently burdened with the impost. The tithe map and apportionment for each parish is deposited with the incumbent and churchwarden. Any one interested therein may have access to the same and obtain extracts by paying 2*s.* 6*d.* for inspection, and 3*d.* for every 72 words contained in the extract. Tithe may, upon the joint application of the land-owner and tithe-owner to the Board of Agriculture, be redeemed for a sum *not less* than 25 times its amount. This is dependent upon the consent of the Board, and sometimes on that of the Bishop and patron. Town property and building land is often redeemed, agricultural land rarely, the cost being too great. Since the Commutation Act of 1836 £26,414 16*s.* 10*d.* has been redeemed, the redemption money being £665 574 2*s.* 2*d.*

The average for the past seven years is computed to the Thursday next before Christmas Day; it is taken every year, and the result published in January.

The average Tithe Rent Charge for the first fifty years from 1836 was £102 9*s.* 9½*d.*, and for the past seven years £74 17*s.* 9¼*d.*

1894	18,403,000	5,752,000	18,627,000	44,129,000	37,030,000	49,981,000
Totals ..	£101,742,000	25,995,000	163,132,000	350,769,000	264,874,000	376,764,000

The figures given in the above table are based on Returns prepared by the Director of the United States Mint and published in his annual Reports. Under "British Empire" are included Australasia, Great Britain, Canada, British Guiana, British India, and Africa. The mines of the South African Republic, however, from 1887 to 1894 produced more than 80 per cent. of the total output of Africa (or upwards of 7 per cent. of that of the world), and the increase under "British Empire" in recent years is mainly attributable to those mines.

Gold has been valued in the table at the legal rate of £3 17*s.* 10½*d.* per troy ounce standard, and silver at its *coining* value in this country, namely 5*s.* 6*d.* per troy ounce standard.

The Imperial Coinage.

The authorised Coinage of the United Kingdom consists of the following pieces, some of which are issued only on special occasions:—

Denomination.	Standard Weight.	Least Current Weight.	Remedy of Weight.
Gold:	Grains.	Grains.	Grains.
Five Pound	616·37239	612·500	1·00000
Two Pound	246·54895	245·000	0·40000
Sovereign	123·27447	122·500	0·20000
Half-Sovereign .	61·63723	61·125	0·15000
Silver:			
Crown	436·36363	—	2·000
Double Florin ...	349·09090	—	1·678
Half-Crown	218·18181	—	1·264
Florin	174·54545	—	0·997
Shilling	87·27272	—	0·578
Sixpence.....	43·63636	—	0·346
Groat or 4*d.*	29·09090	—	0·262
Threepence	21·81818	—	0·212
Twopence	14·54545	—	0·144
Penny	7·27272	—	0·087
Bronze:			
Penny	145·83333	—	2·91666
Halfpenny.....	87·50000	—	1·75000
Farthing	43·75000	—	0·87500

Standard Gold contains eleven-twelfths of fine metal and one-twelfth of alloy; fineness, 916·66. Twenty troy pounds of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, intrinsically worth £3 17*s.* 10½*d.*, and one ounce of pure gold, on the same basis, £4 4*s.* 11½*d.*

Standard Silver consists of thirty-seven-fortieths of fine metal and three-fortieths of alloy; fineness, 925. One troy pound of standard silver is coined into 66 shillings. [Another Standard, called the "New Sterling" or Britannia, of the fineness 11 oz. 10 dwt. (958·33), is practically obsolete.]

* Bronze is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part.

The "Remedy" is the amount of variation permitted in fineness and in weight of coins when first issued from the Mint.

Tokens.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £20.

Light Gold.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight, but, under the provisions of the Coinage Act, 1891, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

Bank of England Notes are issued for sums of £5, £10, £20, £50; also for £100, £200, £500, and £1,000.

Bank Post Bills are drawn for any sum from £10 to £1,000, and made payable to order at seven days' date, or at sixty days'. No charge is made for bills so drawn: they may be obtained at the Chief Office in London, or at any of the branches.

Legal Tender of Money.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change. Gold, if above the least current weight, is a legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

Old Moneys.—Guinea, 21*s.*; Carolus, 23*s.*; Moidore, 27*s.* 6*d.*; Angel, 10*s.* Noble, 6*s.* 8*d.*; Tester, 6*d.*

Scots Money.—Merk=13*s.*4*d.*; Pound=1*s.* 8*d.*; Shilling=1*d.*; Plack=2 Bodles=4*d.* Scots.

* It is interesting to note that the weight of a penny is one-third, of the half-penny one-fifth, and of the farthing one-tenth of an ounce, *approximately*. Further, the half-penny is one *inch* in diameter.

Sweden	Crown of 100 öre	1 1¼	18·2
Tunis	Piastre	0 6	40·3
Turkey	Pound of 100 piastres	18 0¾	1·107
United States	Dollar of 100 cents	4 1¼	4·87

In Belgium, Bulgaria, Greece, Italy, Roumania, Servia, Spain, and Switzerland the money of account is identical with that of France—the franc—the names alone differing. Nearly all the South American States issue standard coins corresponding to the peso of Chile, which is identical with the 5-franc piece of France. The principal circulating medium of Austria-Hungary, Russia, Argentine Republic, and Brazil is paper, but, in the first-named country, the paper is in process of being withdrawn, and the currency placed on a gold basis, with the crown (see above) as a new unit of account. In British Honduras the money of account is now the United States gold dollar of 100 cents, subsidiary coins being specially struck for the Colony. Ceylon and Mauritius also possess special subsidiary currencies on the basis of the rupee. By an Order in Council passed in 1894 a British dollar was authorised to be issued for circulation in the East. It is identical in weight and fineness with the Japanese yen, and has been made legal tender in Hong Kong, the Straits Settlements, and Labuan. The last two columns of the Table are calculated on the supposition that the relation between the values of gold and silver remains fixed at 15½ to 1; in other words, that the price of standard silver is 60⅞*d.* per oz. troy. They give therefore the full metallic values on that basis, not the values for purposes of exchange, which are very variable, and depend mainly on the price of silver (see Table, below).

Price of Silver, 1886–95.

The Average yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows:—

1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.	1895.
d.	*d.*	*d.*	*d.*	*d.*	*d.*	*d.*	*d.*	*d.*	*d.*
45⅜	44⅜	42⅞	42 11/16	47¾	45 1/16	39 13/16	35⅝	29	29⅞

In the United States the price of silver is quoted in cents per Troy ounce *fine*. In order to convert an English quotation into cents per ounce fine, first express the pence as a whole number and decimal fraction and then multiply by 2·192; to express a United States price on the English system multiply the cents by 0·4562.

PRESENT VALUE OF A LEASE, FREEHOLD ESTATE, OR ANNUITY,

Per £100 clear Annual Rental or Value, without any deduction whatever.

In the following Table, compound interest at the rates of 3, 4, 5, 6, and 7 per cent. is reckoned.

43	23 98	20 37	17 55	15 31	13 51		33 33	25 00	20 00	16 66	14 28

Example 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent.? Answer:—19·14 years' purchase or £1,914.

Example 2.—A man, aged 54, in the receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? Answer:—Looking at the Table of Expectation of Life on p. 357, it will be seen that the expectation for age 54 is about 17 years; and from the above table an annuity certain for 17 years interest at 5 per cent., is worth 11·27 years' purchase. The present payment required would therefore be £1,127 *approximately*.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

* When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less £1, must be taken. Thus, for £1 at 2½ per cent. for 25 years, take 26 years, £36·012, and deduct £1=£35·012.

REPAYMENT OF PUBLIC LOANS.

Large sums of money are every year advanced to County or District Councils and other public bodies, for improvements, building of workhouses, schools, harbours, bridges, &c., to be repaid in a given number of years, including interest. The following scheme of tables for the repayments of Loans was compiled under the Local Government Act, 1858, and examined by the actuary of the National Debt Office. It gives the sums needed as the annual amount of principal combined with interest required for the liquidation of a debt of £100, at the stated percentage, in 10, 20, 30, 40, and 50 years:—

Years	3 per Ct.			3½ per Ct.			4 per Ct.			4½ per Ct.			5 per Ct.		
	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.	£	s.	d.
10	11	14	5½	12	0	5½	12	6	7	12	12	9	12	19	0
20	6	14	5½	7	0	8½	7	7	8	7	13	9	8	0	2½
30	5	2	0½	5	8	9	5	15	8	6	2	9½	6	10	11
40	4	6	6½	4	13	7½	5	1	0½	5	9	8½	5	16	6½
50	3	17	8½	4	5	3½	4	13	2½	5	1	2½	5	9	6½

If the loan be for £1,000, each annual instalment as shown above must be multiplied by 10; if for £2,000, then by 20, and so on.

Uniformity.—An edict of King Edgar decreed that there should be but one Standard Measure, that kept at Winchester; and by the 27th section of Magna Charta there was to be one Weight for all England. Nevertheless numerous customary weights and measures have continued in use—custom was stronger than law, especially with regard to land, corn, and wool. In 1824, however, an Act was passed rendering uniformity compulsory from the 1st of January, 1826, since which time the Imperial Statute System of Weights and Measures has been in general use, although some remains of the older form still linger.

Avoirdupois Weight.

Drachm..... *dr.* = 27½ grains (27·34375).
Ounce ..... *oz.* = 16 drachms, 437·5 grains.
Pound ..... *lb.* = 16 oz., 256 dr., 7,000 grains.
Customary Stone, *st.*, Butcher's Meat = 8 lbs.
Legal Stone...*st.* = Horseman's weight = 14 lbs.
Quarter .....*qr.* = 28 lbs.
Cental or Quintal, *cent.* = 100 lbs.
Hundredweight, *cwt.* = 4 qrs., 112 lbs.
Ton ..... *T.* = 20 cwt., 2,240 lbs.

Avoirdupois weight is used in almost all commercial transactions and common dealings, but in addition to the above there are special weights for various articles, the chief of which are:—

A Quartern Loaf	=	4 lbs.
A Peck of Flour, 2 Gallons	=	14 ,,
A Firkin of Butter	=	56 ,,
A Firkin of Soft Soap.....	=	64 ,,
A Box of Fish, about	=	90 ,,
A Barrel of Gunpowder	=	100 ,,
A Barrel of Raisins	=	112 ,,
A Seam of Glass, 24 stones of 5 lbs.	=	120 ,,
A Barrel of Butter—4 firkins	=	224 ,,
A Barrel (or pack) of Soft Soap	=	256 ,,
A Faggot of Steel.....	=	120 ,,
A Pig of Ballast	=	56 ,,
A Fodder of Lead, London and Hull	=	19½ cwt.
A do. Derby=22½ cwt.; Newcastle	=	21½ ,,
A Cask of Blacklead	=	11½ ,,

A Sack—Potatoes, 168 lbs.; Flour, 280 lbs.; Coals, 224 lbs.; a ton of Coals, 10 sacks.

The Metrical System of weights is used in Belgium, France, Germany, Italy, Portugal, Spain, Sweden and Norway, and some other countries, the unit of which is the *Gramme*=15·432 grains; the chief multiple of the Gramme is the *Kilogramme*=2·2046 lbs.: in practical use this is found inconvenient for small purchases, and nearly all commodities are sold by the demi or half kilo. The *Centner* of 50 kilos=110¼ lbs., very nearly represents the English cwt.; but heavy goods are sold by the *Tonneau* of 2204·621 lbs., about 19 cwt. 77 lbs., the *Myriagramme* being ignored. *See p.* 426.

In the United States and in Canada the cwt. is generally reckoned as 100 lbs., and the ton of 20 cwt.=2,000 lbs.

In Russia the *Pood* of 36 lbs. is the commercial weight: 63 Poods=1 English ton.

Indian Weights (*Bengal*).

Tola, unit of postage=180 grains.
Chittak=5 Tolas; Seer (16 Chittaks)=2¼ lbs.
Imperial or Indian Maund=82⅔ lbs.

Madras.

Viss=3·09 lbs., Maund=25 lbs., Candy=500 lbs.

Troy Weight.

Carat ... . = 3·17 grains.
Pennyweight.....*dwt.* = 24 grains.
Ounce..... *oz.* = 20 dwts., 480 grs.
Pound .....*lb.* = 12 oz., 240 dwts., 5,760 grs.
Hundredweight . *cwt.* = 100 lbs.

Troy is the weight used by goldsmiths and jewellers. The grains Troy, Apothecaries', and Avoirdupois are equal, and the same in England, France, the United States, Holland, and in most other countries; but the carat varies: in France it is 3·18 grains, in Holland, 3·0 grs., and in the U. S. 3·2 grs. In the U. K. the jewellery ounce is divided into 151½ carats or 600 pearl grains.

The oz. Troy and Apothecaries'= 1·09714 oz. avoirdupois; but the lb. Troy and lb. Apothecaries = only 0·82286 lb. avoirdupois; while 175 lb. Troy and Apothecaries'= 144 lb. avoirdupois.

Apothecaries' Weight.

Scruple ℈	= 20 Grains	=	20 grs.
Drachm ʒ	= 3 Scruples	=	60 ,,
Ounce ℥	= 8 Drachms	=	480 ,,
Pound lb	= 12 Ounces	=	5760 ,,

The avoirdupois oz. of 437½ grains, and the lb. of 7,000 grains are the weights named in the British Pharmacopœia; drugs are purchased by avoirdupois, but compounded by apothecaries' weight. The apothecaries' oz. and lb. may now be considered obsolete.

Hay and Straw.

Truss of Straw, 36 lbs. Truss of Old Hay, 56 lbs.
Truss of New Hay (to September 1st), 60 lbs.
Load, 36 Trusses—Straw, 11 cwt. 2 qrs. 8 lbs.; Old Hay, 18 cwt.; New Hay, 19 cwt. 1 qr. 4 lbs.

Wool.

Clove, *cl.* = 7 lbs.
Stone, *st.* = 2 Cloves 14 lbs.
Tod, *td.* = 2 Stones 1 qr.
Wey, *wy.* = 6½ Tod 1 cwt. 2 qrs. 14 lbs.
Pack, *pk.* = 240 lbs.
Sack, *sk.* = 2 Weys 13 qrs.
Last, *la.* = 12 Sacks 39 cwt.

Since the advent of Shoddy, some of the above weights have become nearly obsolete, although the terms are still in use with different values: thus 16 lbs. = 1 st.; 28 lbs. = 1 Tod; 20 lbs. = 1 Score 12 Score or 240 lbs. = 1 Pack.

Worsted Yarn.

Wrap, 80 yards; Hank=560 yards=7 Wraps Counts or Numbers are the number of hanks in a lb

Cotton Wool.

Cotton Wool, Bale variable; U.S.A. average 477 lbs.; Egyptian, 719 lbs.; East Indian, 396 lbs. Brazilian, 220 lbs.

Cotton Yarn.

Thread = 1½ yards.
Lea, or Skein, *skn.* = 120 Yards.
Hank, *hk.* = 7 Skeins, or Leas.
Spindle, *spdl.* = 18 Hanks.
} Also same for silk.

Counts = the number of Hanks in 1 lb.
Bundle Hanks, either of 5 lbs. or 10 lbs.

Reels of Cotton vary from 30 to 1,760 yards, but by the new Act must be marked correctly.

Bundles of Cotton are chiefly made up for export

Liquid Measure.

The Gill contains 8·665 cubic inches.
The Pint contains 4 gills or 34·660 inches.
Quart = 2 pints = 8 gills.
Gallon = 4 quarts = 32 gills.

Pin = 4½ Gallons or ⅛ Barrel.	Gals.	Qts.	Pts
Firkin or Quarter Barrel	9	36	7
Anker (10 gallons)	10	40	8
Kilderkin, Rundlet, or ½ Barrel	18	72	14
Barrel	36	144	28
Tierce (42 gallons)	42	168	33
Hogshead of Ale (1½ barrel)	54	216	43
Puncheon	72	288	57
Butt of Ale (3 barrels)	108	432	86

Digitized by Google

Practically, the only measures in use are gallons, quarts, pints, and gills, the others are merely nominal; *e.g.*, the hogshead of 54 gallons, *old measure*, contains but 52 gallons, 1 quart, 1 pint, and 3·55 gills imperial measure; and of wine six nominal quart bottles go to the gallon. Of wines imported in casks the following are the usual measurements:—

Pipe of Port or Masdeu	=	115 gallons.
,, Teneriffe	=	100 ,,
,, Marsala	=	93 ,,
,, Madeira and Cape	=	92 ,,
,, Sherry and Tent	=	108 ,,
Butt of Lisbon and Bucellas	=	117 ,,
Aum of Hock and Rhenish	=	30 ,,

Hogshead of Claret, 46; Port, 57; Sherry, 54; Madeira, 46 gallons.

In the United States the old British or "Winchester" wine gallon of 231 cubic inches is in use; the names of measures are the same, but the capacity of the gill is only 7·21875 cubic inches.

Apothecaries' Fluid Measure. **Marked**

60 Minims ℥ (drops)	= 1 Fluid Drachm	f 3
8 Drachms	= 1 Ounce	f ℥
20 Ounces	= 1 Pint	O
8 Pints	= 1 Gallon	C., or Cong.

1 Drachm = 1 Tea-spoonful.
2 Drachms = 1 Dessert-spnful.
4 Drachms = 1 Table-spoonful.
2 Ounces = 1 Wineglassful.
3 Ounces = 1 Teacupful.

Prescribing medicine by the spoon, glass, or cupful, is unsafe, as all those vessels vary in size. Graduated glass measures may be purchased for a few pence.

Dry or Corn Measure.

Quart...	= 2 Pints.	Strike ...	= 2 Bushels.
Pottle...	= 2 Quarts.	Coomb...	= 4 Bushels.
Gallon .	= 4 Quarts.	Quarter.	= 8 Bushels.
Peck ...	= 2 Gallons.	Load ...	= 5 Quarters.
Bushel .	= 4 Pecks.	Last	= 10 Quarters.

Boll of Meal = 140 lbs.; 2 Bolls = 1 Sack.

Wheat and other cereals are commonly sold by weight, the bushel being thus reckoned:—

Wheat, English, 63 lbs. Foreign, 62 lbs.

Barley, English, 52 and 56 lbs. French, 52½ lbs. Mediterranean, 50 lbs.

Oats, English, 40 & 42 lbs. Foreign, 38 & 40 lbs.

Rye and maize, 60 lbs.

Buckwheat, 52 lbs. to the bushel.

Grain of all kinds is frequently sold by the stone of 14 lbs.

Coals were formerly sold by measure: 3 heaped bushels = 1 sack, 12 sacks = 1 chaldron. Coke, apples, potatoes, and some other goods are still sold by heaped measures and the sack of three bushels; of coke, four bushels are usual.

Fruit—The Covent Garden bushel basket is 17½ inches in diameter at top, 10 inches at the bottom, and is 10 inches deep. The smaller market baskets are said to vary in size according to the season and the supply.

Cubic or Solid Measure.

Cubic Foot	= 1,728 Cubic Inches.
Cubic Yard	= 27 Cubic Feet, 21·033 bushels.
Stack of Wood .	= 108 Cubic Feet.
Shipping Ton ...	= 40 Cubic Feet merchandise.
Shipping Ton ...	= 42 Cubic Feet of Timber.
Ton of displacement of a Ship	= 35 Cubic Feet.

Measures of Length.

Mile Geographical, Admiralty Knot, or Nautical Mile, 6,080 Feet = 1·151 Mile Statute.

League = 3 Miles.

Degree = 60 Geographical, or 69·121 Statute Miles.

Inch, *in*	= 72 Points, or 12 Lines.
Nail, ¼	= 2¼ Inches.
Palm	= 3 Inches.
Hand	= 4 Inches.
Link	= 7·92 Inches.
Quarter (or a Span)	= 9 Inches.
Foot	= 12 Inches.
Cubit	= 18 Inches.
Yard	= 36 Inches.
Pace, Military	= 2 Feet 6 Inches.
Pace, Geometrical.	= 5 Feet.
Fathom	= 6 Feet.
Rod, Pole, or Perch	= 5½ Yards.
Chain (100 Links)	= 22 Yards (4 Poles).
Cable's Length	= 100 Fathoms, 600 Feet.
Furlong	= 40 Rods, 220 Yards.
Mile	= 8 Furlongs, 80 Chains, 320 Rods, 1,760 Yards, 5,280 Feet, 63,360 Inches.

Although no longer sold by that measure, Calicos, &c., are sometimes said to be "Ell wide"—the English Ell being 1¼ yard, the Flemish Ell ¾ yard, and the French Ell 1½ yard.

The old *Scottish Mile* was 5,920 feet: ten Scots Miles being about equal to 11¼ Statute Miles. Eleven *Irish Miles* were equal to 14 Statute Miles.

Square, Surface, or Land Measure.

The Square Foot contains 144 Square Inches.

Yard = 9 feet = 1,296 inches.

Rod, Pole, or Perch = 30¼ yards = 272¼ feet.

Chain = 16 rods = 484 yards = 4,356 feet.

Rood = 40 rods = 1,210 yards = 10,890 feet.

Acre = 4 rooods = 160 rods = 4,840 yards.

Yard of Land = 30 acres = 120 rooods.

Hide = 100 acres = 400 rooods.

Mile = 640 acres = 2,560 rooods = 6,400 chains = 102,400 rods, poles, or perches, or 3,097,600 square yards.

An Acre *roughly* stated has four equal sides of 69½ yards: *accurate* measurement gives each side 208·71 feet.

The sides of a square half-acre would be 147·581 feet, and of a square quarter-acre, 104·355 feet.

The above Imperial Measure is now employed in the United Kingdom, in Canada, Australia, and the Colonies generally, also in the United States; but occasionally some older measurements are referred to, of these—

The Lancashire Acre of 160 perches, each containing 49 square yards = 7,840 square yards.

The Cheshire Acre of 160 perches, each containing 64 square yards = 10,240 square yards.

The Irish Acre, equal to 1·619835 Statute; or 1 Statute equal to 0·617347 Irish.

The Cunningham Acre, equal to 1·291322 Statute; or 1 Statute Acre is equal to 0·7744 Cunningham.

The Scottish Acre = 1·261183 Statute (nearly 6,104 square yards).

Measures of Time.

60 Seconds	= 1 Minute.
60 Minutes	= 1 Hour.
24 Hours	= 1 Day.
(23*h*. 56*m*. 4*s*.	= 1 Sidereal Day.)
7 Days	= 1 Week.
28 Days	= 1 Lunar Month.
28, 29, 30, or 31 Days	= 1 Calendar Month.
12 Calendar Months	= 1 Year.
365¼ Days	= 1 Common Year.
366 Days	= 1 Leap Year.
365*d*. 5*h*. 48*m*. 46*s*.	= 1 Tropical Year.

The Astronomical Day commences at noon, and is computed from 1 to 24 hours.

In 400 years 97 are Leap-years and 303 common. Leap-year being omitted every 100th year, but not omitted every 400th. (1900 is not a Leap year.)

Angular Measure.

60 Seconds " ..... = 1 Minute.
60 Minutes ' ..... = 1 Degree.
30 Degrees ° ..... = 1 Sign.
90 Degrees ..... = 1 Quadrant.
4 Quadrants, or 360° ... = 1 Circumference, or Circle.

The Earth rotates at a velocity of 15 degrees an hour (about 17·366 miles a minute at the Equator); 1° is therefore equal to 4 minutes.

Circular Measure.

Diameter of a Circle × 3·1416 gives Circumference.
Diameter Squared × ·7854 gives Area of Circle.
Diameter Squared × 3·1416 gives Surface of Sphere.
Diameter Cubed × ·5236 gives Solidity of Sphere.
One Degree of Circumference × 57·3 gives Radius.
Diameter of Cylinder × 3·1416, and product by its length, gives the Surface.
Diameter Squared × ·7854, and product by the length, gives Solid Contents.

A Circular Acre is 235·504 feet, a Circular Rood 117·752 feet in diameter. The Circumference of the Globe is about 24,855 miles, and the Diameter about 7,900 miles.

Electrical Measures.

It is customary among electricians to express all measurements in terms of the centimeter, gramme, second (C.G.S.) system, either as force or work according to their nature, and, due allowance being made for the effect of gravitation, these units are called "absolute." To understand the basis of this system requires a great deal of very careful study, and more space than we have at our disposal; but it is fair to mention that the accuracy aimed at has not, and probably never will be, attained.

For practical and commercial purposes the chief units are the—

	For the measure of
Volt	Electromotive force = about 92·6% of that given by one Daniell's battery cell.
Ohm	Resistance = the resistance offered to the passage of a current of electricity by a thread of mercury 106 cm. long and 1 mm. cross section at the temperature of melting ice.
Ampère	Current = the current 1 volt will drive through 1 ohm.
Coulomb	Quantity = 1 ampère flowing for 1 second of time.
Microfarad .	Capacity = ·000,001 coulomb at 1 volt pressure.
Watt	Power = 44 ft. lbs. per minute.

Board of Trade Unit = 1000 Watts 1 hour.
746 Watts = 1 horse-power.

In incandescent lamps of 16-candle power (nominal) about four watts are required per candle power to give good economical results for domestic purposes.

One Board of Trade unit will keep a 16-candle incandescent lamp alight for about 16 hours.

Fish Measure.

Herrings are sold by the *Cran*, containing 26⅔ imperial gallons, on the East Coast of Scotland from Shetland to Berwick, also at Castle Bay and Stornoway; but on the West Coast, Isle of Man, and in Ireland, by the *Mase*, which contains 5 long hundreds of 123 each. On the East coast of England they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4. 33 Warps = 1 Long Hundred. 132; 10 Hundred = 1 Thousand, 1,320; 10 Hundred = 1 Last, 13,200.

Timber and Wood.

40 cubic feet rough, 50 cubic feet squared = 1 load.
50 cubic feet of planks = 1 load.
100 superficial feet = 1 square of flooring.
120 Deals = 100.
Width of Battens 7 inches; Deals, 9 inches; Planks are 2 to 4 inches thick, and 10 or 11 inches wide.

Carpenters', Bricklayers', and Builders' Measurements.

Stock or kiln bricks	8¼ inches	× 4¼	× 2¾
Welsh fire-bricks	9 "	× 4½	× 2½
Paving bricks	9 "	× 4½	× 1¾
Square tiles	9¼ "	× 9¼	× 1
"	6 "	× 6	× 1
Dutch clinker bricks.....	9¼ "	× 3	× 1½

A Rod of Brickwork 16½ feet × 16½ feet × 1½ brick thick = 306 cubic feet, or 11⅓ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar.

A Square of Flooring is 100 square feet.

Ordinary bricks weigh about 7 lbs. each; a load of 500 weighs over 1½ ton.

Sizes of Slates.

	in. in.		in. in.
Empress	26×16	Ladies	16×10
" Small ...	26×14	" Small	16× 8
Princesses.....	24×14	" Large	14×12
Duchesses.....	24×12	" "	14× 8
Marchionesses...	22×12	Plantation	13×11
" Small	22×11	Doubles	13×10
Countesses	20×10	"	13× 7
" Wide	20×12	Smalls	12× 8
Viscountesses ...	18×10	Ditto	12× 6
" Small	18× 9	Ditto	11×5½

Water.

Cubic inch ..... = ·0361 lb.
Gallon ..... = 10·0000 "
Cubic foot = 62·3210 lbs. or 6·2321 gallons.
35·943 cubic feet (210 gallons) = 1 ton.

The gallon is = 277¼ cubic inches, = 0·16 cubic feet, = 10 lbs. distilled water.

Water for Ships: Ton, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18.

Cisterns: 1 cubic foot is equal to about 6¼ gallons or 62·321 lbs. A cistern 4 feet by 2½ and deep will hold about 187 gallons, and weigh nearly 16 cwt. in addition to its own weight.

A TON WEIGHT OF THE FOLLOWING WILL AVERAGE IN CUBIC FEET

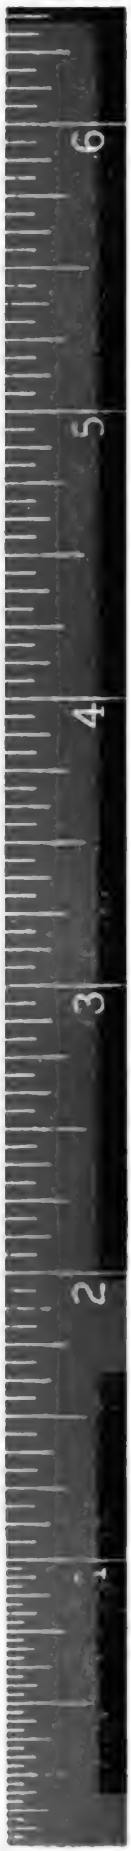
Earth	21	Coal, Newcastle ...	4
Clay	18	Pit Sand	2
Chalk	14	River ditto	1
Thames ballast.....	20	Marl	1
Coarse gravel	19	Shingle	2
Coal, Welsh	40	Night Soil	1

A cubic foot of pure gold weighs 1,210 lbs., pure silver 655 lbs., cast iron 450 lbs., copper 550 lbs., lead 710 lbs., pure platinum 1,220 lbs., tin 456 lbs., aluminium 163 lbs.

Old Scottish Measures.

LIQUIDS.

4 Gills... = 1 Mutchkin.
2 Mutchkins = 1 Choppin.
2 Choppins = 1 Pint.
2 Pints ... = 1 Quart.
4 Quarts . = 1 Gallon
8 Gallons = 1 Barrel.



CORN MEASURE.

4 Lippies... = 1 Peck.
4 Pecks ... = 1 Firlot.
4 Firlots = 1 Boll.
16 Bolls = 1 Chalder

Old Scottish Weights.

16 Drops 1 Ounce, 16 Ounces 1 Pound, 16 Pound 1 Stone.

Digitized by Google

Metrical Weights and Measures.

The French Metrical System is based upon the (assumed) length of the fourth part of a terrestrial meridian. The ten-millionth part of this arc was chosen as the unit of measures of length, and called a *Mètre*. The cube of the tenth part of the mètre was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo*, and *myria*, from the Greek, and the subdivisions by *deci*, *centi*, and *milli*, from the Latin:—

TABLE FOR CONVERTING METRIC WEIGHTS AND MEASURES.

For the use of this table the following explanation is necessary: The figures in heavier type represent either of the two columns beside them as the case may be, viz., with Hectares and Acres in the first set of columns, 1 Acre = 0·405 Hectare, and *vice versa* 1 Hectare = 2·471 Acres, and so on.

Hectare.	Acre.	Kilomtr.	Eng. mil.	Square Kilomtr.	Square Eng. mil.
0·405 **1**	2·471	1·609 **1**	0·621	2·592 **1**	0·386
0·809 **2**	4·942	3·219 **2**	1·243	5·184 **2**	0·772
1·214 **3**	7·413	4·828 **3**	1·864	7·776 **3**	1·158
1·619 **4**	9·885	6·438 **4**	2·486	10·368 **4**	1·544

Time and Watch on Board Ship.

WATCH.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the Starboard (right side, looking forward) and the Port (left). The day commences at noon, and is thus divided:—

Afternoon	*Watch*	... ...	noon to 4 p.m.
First Dog	,,	... ...	4 p.m. to 6 p.m.
Second Dog	,,	... ...	6 p.m. to 8 p.m.
First	,,	... ...	8 p.m. to midnight.
Middle	,,	... ...	12 a.m. to 4 a.m.
Morning	,,	... ...	4 a.m. to 8 a.m.
Forenoon	,,	... ...	8 a.m. to noon.

This makes seven WATCHES, which enables the crew to keep them alternately, as the *Watch* which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into two *Watches*.

TIME.—Time is kept by means of "Bells," although there is but one bell on the ship, and to strike the clapper properly against the bell requires some skill.

First, two strokes of the clapper at the interval of a second, then an interval of two seconds; then two more strokes with a second's interval apart, then a rest of two seconds, thus:—

BELL, ONE SECOND; B., TWO SECS.; B. s.; B. ss. B. s.; B. ss.; B.

1 Bell is struck at 12.30, and again at 4.30, 6.30, 8.30 p.m.; 12.30, 4.30, and 8.30 a.m.

2 Bells at 1 (struck with an interval of a second between each—B. s, B.), the same again at 5, 7, and 9 p.m.; 1, 5, and 9 a.m.

3 Bells at 1.30 (B. s, B. ss, B), 5.30, 7.30, and 9.30 p.m.; 1.30, 5.30, and 9.30 a.m.

4 Bells at 2 (B. s, B. ss, B. s, B.), 6 and 10 p.m.; 2, 6, and 10 a.m.

5 Bells at 2.30 (B. s, B. ss, B. s, B. ss, B.) and 10.30 p.m.; 2.30, 6.30, and 10.30 a.m.

6 Bells at 3 (B. s, B. ss, B. s, B. ss, B. s, B.) and 11 p.m.; 3, 7, and 11 a.m.

7 Bells at 3.30 (B. s, B. ss, B. s, B. ss, B. s, B. ss, B.) and 11.30 p.m.; 3.30, 7.30, and 11.30 a.m.

8 Bells (B. s, B. ss, B. s, B. ss, B. s, B. ss, B. s, B.) every 4 hours, at noon, at 4 p.m., 8 p.m., midnight, 4 a.m., and 8 a.m.

THERMOME

Comparison between Scal
heit, Réaumur, and the C

$$F = O + R + 32 \qquad F = \frac{9}{5} + 32 \qquad F = \frac{9R}{4} + 32 \qquad R = \frac{4(F-32)}{9}$$

$$O = \frac{5(F-32)}{9}$$

Freezing point = 32° F = 0° C = 0° R; Boiling point = 212° F = 100° C = 80° R. To convert degrees CENTIGRADE or RÉAUMUR into degrees FAHRENHEIT, or *vice versâ*, use one of the following formulæ:

Let F = Number of degrees Fahrenheit, C = Number of degrees Centigrade and R = Number of degrees Réaumur, then —

CENT.	FAH'T.	RMR.	CENT.

* When the due date of the Dividends falls on a Sunday or Bank Holiday, the Dividends are payable on the business-day next ensuing.

INVESTMENT OF DIVIDENDS ON 2¾ CONSOLIDATED STOCK, 2½ ANNUITIES, AND LOCAL LOANS STOCK—Holders of amounts of less than £1,000 may instruct the Bank to receive and invest their dividends by filling up forms, to be obtained at the Head Office, at any of the Branches, or at any Money Order Office. A commission is charged of 1*d.* per £, or part of a £, with 3*d.* additional for each advice of a purchase, should such advice be required.

STOCK CERTIFICATES TO BEARER can be obtained in exchange for 2¾ per Cent. Consolidated Stock, 2½ per Cent. and 2¾ per Cent. Annuities, Local Loans 3 per Cent. Stock, and Metropolitan Police Debenture Stock; India 3 per Cent. and 3½ per Cent. Stocks; Metropolitan Stocks; New Zealand, New South Wales, and Queensland Stocks; and the various Corporation Stocks. The charge for Issue is 2*s.* per Cent., and for Re-inscription 1*s.* per Certificate, except India Stocks, where the charge in each case is 2*s.* 6*d.*

DIVIDENDS are paid in one of the following modes:—

I. To the stockholders personally, or to their attorneys, at the Bank of England. [Stockholders may arrange for the receipt of their dividends, free of charge, at any of the country branches, on application to the agent.]

II. By transmission of dividend warrants by post, at the risk of the stockholder, under the following regulations:—

1. Any stockholder residing within the United Kingdom who desires to have his dividend-warrant sent to his address by post, must fill up a form of application, to be obtained at the Bank, or at any of its branches, and for English Government Stocks at any Money Order Office.

2. In the case of joint accounts, the application must be signed by all the members of the account, directing the warrant to be sent to one of them at a given address.

TRANSFER DAYS, any day but Saturday, from 11 to 3; for buying and selling, 11 to 1; for accepting, 9.30 to 4. Dividends are payable from 9 to 4; on Saturdays, 9 to 2. Transfers made on Saturdays are charged a fee of 2*s.* 6*d.* For Brokers' charges, see p. 415. Bank Stock Transfer books are closed for about three weeks before payment of dividend.

GENERAL HOLIDAYS.—Banks of England and Ireland, and the Exchequer: Good Friday, Easter Monday, Whit Monday, First Monday in August, Christmas Day and following day, or if that be Sunday, then the Bank is closed on Monday. The Stock Exchange, in addition to the Bank holidays, is also closed on May 1 and November 1. At the Custom House Inland Revenue Office, and the Docks, the day appointed to be kept as the Queen's Birthday; and at the Docks, Coronation Day (June 28) and the Prince of Wales's Birthday (November 9) in addition. In Scotland: New Year's Day, Good Friday, First Monday in May, First Monday in August, and Christmas Day.

EQUITABLE MORTGAGES under hand only.			
For every £100 or part thereof	0	1	

ESTATE DUTY:

In the case of every person dying after 1st August, 1894, where the principal value of all property, real or personal, settled or not settled, passing on the death of such person, exceeds:

			per cent £ s.
£100	and does not exceed	500	1 0
500	„	1,000	2 0
1,000	„	10,000	3 0
10,000	„	25,000	4 0
25,000	„	50,000	4 10
50,000	„	75,000	5 0
75,000	„	100,000	5 10
100,000	„	150,000	6 0
150,000	„	250,000	6 10
250,000	„	500,000	7 0
500,000	„	1,000,000	7 10
1,000,000		—	8 0

Fractions of £100 on the whole estate are disregarded; *e.g.*, an estate of £1,050 counts as one of £1,000, and pays only 2 per cent.

In addition to the above, where property liable to Estate Duty is settled by the will of the deceased, or having been settled by some other disposition passes under that disposition on the death of the deceased to some person not competent to dispose thereof, a further duty is payable at the rate of £1 per cent. on the settled property, but from that payment the *ad val.* stamp duty charged on the settlement may be deducted.

But where the net value of the property, real and personal, does not exceed £1,000, Estate Duty only is payable, and the property is exempt from Settlement Estate Duty, and from Legacy or Succession Duties.

	£	s.	d.
Small estates up to £300 and £500 gross, are charged, at the option of the accounting parties, with fixed duties of 30*s.* and 50*s.*, and are exempt from all other death duties.			
Where the net value is under £200 the ad valorem duty amounts to £1 only.			
Interest at 3 per cent. per annum is also payable on the Estate Duty on Personalty from the date of the death up to that of delivery of the affidavit.			
The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, with interest at 3 per cent. per annum, and that on certain annuities may at option be paid in 4 yearly instalments with 3 per cent. interest, and interest on realty begins from 12 months after death.			
FACULTY OR DISPENSATION:			
In England, in all cases, £30.			
„ Scotland or Ireland, in some cases £20, in others £25.			
FEES are taken in all Public Departments by means of Stamps: such payments are accounted for to the Exchequer under the heading of Miscellaneous Revenue.			
GAME LICENCES, United Kingdom, if taken out after 31st July and before 1st Nov., to expire on 31st July following	3	0	0
After 31st July, to expire following 31st October	2	0	0

100, for £50, or frct. part of £50		5 0	1 10 0	3 0 0

Agreement for lease not exceeding 35 years, same as actual lease.

LEGACY AND SUCCESSION DUTIES:—*Also see "Estate Duty."*

If the deceased died on or after the 1st June, 1881, every pecuniary Legacy or Residue, or share of Residue, although not of the amount or value of £20, is chargeable with Duty by the 44 Vict. c. 12, s. 42.

(Except in the cases of small estates, see note to Estate Duty. No succession duty is payable where the principal value of the whole succession does not amount to £100: 16 & 17 Vict. c. 51, s. 18.)

Rates of duties payable on legacies, annuities, residues, and, where Estate Duty is payable, or where deceased died before 1 July, 1888, on successions:—

To Children of the Deceased, or their Descendants, or to the Father or Mother or other Lineal Ancestor of the Deceased (see below) ..... £1 per cent.

To Brothers and Sisters of the Deceased, or their Descendants ..... £3 per cent.

To Brothers and Sisters of the Father or Mother of the Deceased, or their Descendants ..... £5 per cent.

Digitized by Google

To Brothers and Sisters of the Grandfather or Grandmother of the Deceased, or their Descendants .....£6 per cent.
To any Person in any other degree of collateral Consanguinity, or to a Stranger in Blood to the Deceased ..... £10 per cent.
Where deceased died on or after 1 July, 1888, and Estate Duty is not payable, Succession Duties for the relationships above are at rates of 1½, 4½, 6½, 7½, and 11½ respectively.
The Husband or Wife is chargeable with Estate Duty, but not Legacy Duty; and the Husband or Wife of a relation is chargeable at the rate at which the relation would be charged.
The duty at the rate of 1 per cent. and the additional Succession Duties mentioned above are not leviable in respect of property chargeable with Estate Duty.

Penalties.—Persons paying or receiving any Legacy, Residue, or Share of Residue liable to Duty, without taking or signing the proper Receipt for the same, are subject to a Penalty of £10 per cent. on the amount or value of such Legacy, Residue, or Share of Residue.

Persons not giving notice of a succession, or not delivering an account, are subject to a Penalty of £10 per cent. upon duty calculated at £1 per cent. for every month of delay.

LETTERS OF ALLOTMENT of any share .....1*d.*

LETTERS PATENT, GRANT OR, to any honour or dignity, viz.: Duke, £350; Marquis, £300; Earl, £250; Viscount, £200; Baron, £150; Precedence, £100; Baronet, £100; *Congé d'élire* to elect an Archbishop or Bishop, £30; any other honour, dignity, or franchise, £30. SPOILED STAMPS.

ALL applications for allowance must be made within six months from the time of spoilage of unexecuted instruments, or within six months of the date or of the first execution of others.

If beyond this date, special application should be made to the Commissioners of Inland Revenue

The hours of attendance for the allowance of spoiled stamps at Somerset House are from 11 to 3 on Monday, Tuesday, Wednesday, Thursday, and Friday, and from 10 to 1 on Saturday.

The hours of attendance at Telegraph Street, Moorgate Street, E.C., for the allowance of sea policy and general spoiled stamps, are from 11 to 3 on Monday, Wednesday, and Friday.

DEEDS STAMPED AFTER EXECUTION.

REGULATIONS under which the Commissioners as a general rule allow deeds and other instruments to be stamped after execution.

WITHOUT PENALTY, ON PAYMENT OF THE DUTY ONLY:—

Agreements under hand only, liable to the duty of 6*d.*—Agreements for letting furnished houses for less than a year.—Appraisements.—Attested copies, within 14 days of *first* execution.

Life policies, within one month of *first* execution.

Foreign Sea policies, within 10 days of arrival in U. K.

Deeds and instruments not otherwise excepted, within 30 days of *first* execution.

NOTE.—Where the deed or instrument has been wholly executed *abroad*, the period within which it may be stamped begins to reckon from the date of its arrival here.

WITH PENALTY IN ADDITION TO PAYMENT OF THE DUTY:—

Articles of clerkship.

Bills of exchange upon stamps of sufficient amount but of improper denomination.

Charter-parties. Receipts, within certain limits of time.—*Vide* Table of Penalties.

Contract notes. Delivery orders.

Letters of allotment. Scrip certificates.

Share warrants. Warrants for goods.

Policies of insurance liable to fixed duty of 1*d.*

INSTRUMENTS WHICH CANNOT BE LEGALLY STAMPED AFTER EXECUTION:—

Inland.—Bills of exchange (except as before mentioned).—Bills of lading.

Marine policies executed in the United Kingdom. Proxies.—Voting papers.

TABLE OF PENALTIES USUALLY ENFORCED:—

	£	s.	d.
Agreements under hand only. Attested copies or extracts: after the expiration of 14 days from their first execution	10	0	0
Charter-parties, within 7 days from their first execution	0	4	6
Charter-parties, after the expiration of 7 days, but within one month	10	0	0
Receipts, within 14 days after they have been given	5	0	0
Receipts, after 14 days, but within one month (beyond this period receipts cannot be stamped under any conditions)	10	0	0
Other instruments not enumerated, excepting those which cannot be legally stamped after execution	10	0	0

In addition to these penalties certain documents are also liable by way of further penalty on stamping to a forfeiture of an amount equal to the stamp duty deficient.

All applications for the remission, mitigation, or return of penalties must be made by memorial, addressed to the Commissioners of Inland Revenue, Somerset House, and supported by statutory declaration, such declaration being exempt from stamp duty.

EXEMPTION FROM ALL STAMP DUTIES:—

Transfers of shares in the Government or Parliamentary Stocks or Funds.

COMPANIES ACT, 1862.

FEES TO BE PAID BY STAMPS.

On registration, with a capital of £2,000, £2; £3,000, £3; £4,000, £4; £5,000, £5.

Five shillings extra per £1,000 above £5,000 up to £100,000; 1s. extra per £1,000 above £100,000: but no fee higher than £50.

Deed stamp 10s. to be put both upon Memorandum and Articles.

For ad val. deed stamp on capital see p. 431.

HOURS AT SOMERSET HOUSE.

Inland Revenue Office, 10 to 5. No money received after 4 (Saturdays, 2).

Stamp Office. Stamps issued from 10 to 4 (Saturdays, 10 to 2).

Impressed Stamps, 10 to 4 (Saturdays, 10 to 2).

*The Customs Tariff, 1896–97.

All articles upon which duties are levied b the Board of Inland Revenue are charged wit countervailing duties if imported from abroad for which see Tariff.

INLAND POSTAL RATES.

The prepaid postage of Letters, Books, and Parcels to any part of the United Kingdom, including the Orkney and Shetland Islands, the Channel Islands, Isle of Man, and the Scilly Islands, is shown in the following table:—

Weight not exceeding	Letter Post.	Book Post.	Parcel Post.	
			Weight.	Charge.
lb. oz.	d.	d.	lbs.	s. d.
0 1	1	½	Not ex. 1	0 3
0 2	1½	½	,, 2	0 4½
0 4	2	1	,, 3	0 6
0 6	2½	1½	,, 4	0 7½
0 8	3	2	,, 5	0 9
0 10	3½	2½	,, 6	0 10½
0 12	4	3	,, 7	1 0
0 14	4½	3½	,, 8	1 1½
1 0	5	4	,, 9	1 3
			,, 10	1 4½
One halfpenny for every additional two ounces.			,, 11	1 6

Newspapers.—A prepaid postage of one halfpenny is charged for the inland transmission of any daily or weekly *registered* newspaper, the weight being disregarded. If more than one paper be included in a packet, the charge is as by book post.

Patterns and Samples.—The rates are 1*d.* for 4 oz. 1½*d.* for 6 oz.; and 2*d.* for (limit) 8 oz.

WEIGHTS AND DIMENSIONS.

Letters.—The weight is unlimited. No letter may be more than 18 inches in length, 9 in width, or 6 in depth, unless sent to or from a Government office.

Newspapers.—Not over 14 lbs. in weight, 2 ft. in length, or 1 ft. in width or depth.

Books.—No packet must exceed 5 lbs. in weight, 18 inches in length, 6 in depth, or 9 in width, except to or from a Government office.

Parcels.—The limit of weight is 11 lbs. The parcel must not be more than 3 ft. 6 ins. in length, or length and girth combined, more than 6 ft. A short parcel may be thicker: thus, if it measure no more than 3 ft. in length, it may measure as much as 3 ft. in girth, *i.e.*, round its thickest part.

Patterns and Samples.—The limit of weight is 8 oz., and the dimensions 12 × 8 × 4 inches.

GENERAL REGULATIONS.

If the postage of letters, books, or patterns be not paid in advance, *double postage* will be demanded on delivery; and if the postage be insufficient, *double the deficiency* will be charged.

No advertisement, decoration or printed matter, beyond the address, is permitted on the right hand half of the address side of envelope or wrapper.

Book Post.—Under this head are included books and periodicals, printed matter, paper, manuscript, deeds and agreements, circulars produced in identical terms by any mechanical process (productions of the type-writer and imitations thereof are admissible provided that at least 20 identical copies are forwarded at the same time, and handed in at the counter of the Post Office), prints or photographs (when not on glass, or in cases containing glass, or any like substance), together with the legitimate binding or mounting, and anything necessary for safe transmission. The packet must be open at the ends, but may be tied with string, and must contain no communication in the nature of a letter. An entry stating to whom a book is given is permitted; so are the name and address of the sender, which it is advisable to put on the outside. If the regulations are infringed, a packet not exceeding 8 oz. is chargeable as a letter, and if over that weight it is transferred to the Parcel Post, with a fine of 1*d.* added to any deficient postage.

Conveyance of Single Letters by Rail.—On payment of 2*d.* to a servant of the railway, in addition to the usual 1*d.* stamp, *Inland* letters not exceeding 1 oz. may be forwarded by the next available train or steamship by those companies in agreement with the Post Office, to be called for at the station to which the letter is addressed, or to be transferred from thence to the nearest letter-box for postal delivery. The letter must be taken to a passenger station of the railway company. Railway letters may be handed in at any express delivery post office for immediate conveyance to the railway station on payment of the express fee of 3*d.* per mile.

District Messenger Service.—By this system messages, letters, and parcels are conveyed, under licence from the Postmaster-General, from various stations in the City and the West-End. Fees:—Half a mile and under, 3*d.*; over half a mile to one mile, 6*d.*; over one mile to one mile and a half, 9*d.*; beyond this distance, special rates. Messengers can be engaged at the rate of 8*d.* per hour, exclusive of omnibus or railway fares. The district offices are open day and night, including Sundays. The company holds itself responsible up to £20 for articles entrusted to its messengers.

Express Delivery Service.—Letters and parcels are now forwarded immediately in the London postal area, and in most large provincial towns, by special messengers, at the following rates:—In addition to ordinary prepaid postage, but inclusive of railway, omnibus, or tramcar charges, for every mile or part of mile, 3*d.* If the packet exceeds 1 lb. in weight, for each lb. or part beyond first lb., 1½*d.* Cabs may be used if specially paid for. Fees to be paid in stamps. Express mail letters may be posted in any letter box, but where possible they should be handed in over the counter, and clearly marked *Express Delivery* above the address. The covers of express letters should be marked with a broad line from top to bottom both on front and back. No Express Delivery on Sundays, Good Friday (except in Scotland), and Christmas Day.

Newspapers.—No writing in the nature of a letter is permitted, but the wrapper may bear the name and address of the sender.

Notice of Removal and for the re-direction of letters must be given on printed forms, to be obtained from the local postmaster or from postmen.

Parcel Post.—The parcel should be distinctly marked in the left-hand top corner "Parcel Post," and handed across the counter of the receiving houses or given to a rural postman. It must not be posted in a letter-box, and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. Money is received at the District Offices in London, at the offices in Bedford Street, Charing Cross, Gracechurch Street, Lombard Street, Mark Lane, and Leicester Square; at the Leicester Square Parcel Dépôt, and at the head offices at Edinburgh and Dublin when the postage of a number of parcels amounts to 20*s.*, and in certain large provincial towns when it amounts to £1. These parcels must be presented at the offices between 9 a.m. and 3.30 p.m., and must be tied

up in bundles representing a postage of 5*s.* each. Money payments as above are also received at the Chief Office till 4 p.m. Parcels will be collected in London and a few large towns when the number reaches 10 at a time, or 50 a week. The name and address of the sender should be on the outside of every parcel. A greater weight than 11 lbs. must not be accepted from one person by a rural postman on foot, or 21 lbs. by a mounted postman, unless he shall have received notice on the day previous that a greater weight would be sent; and either of them may refuse parcels if already loaded.

Parcels left "to be called for" are charged 1*d.* a day after they have lain in the office one clear day, the maximum charge being 1*s.* 5*d.*

Parcels addressed to, or sent from the Channel Islands, are liable to customs duty, and the sender must make a declaration of contents at the office of posting.

No parcels are *received* on Sundays, Christmas Day, or Good Friday. For Bank Holidays, see page 440.

Insurance.—Compensation to the amount of £3 can be claimed for loss or damage. To secure compensation where no insurance fee is paid, a certificate of posting should be filled up and handed in for the signature of the post-office official. The insurance fee in stamps can be paid only at a post office. *See also* Registration *below.*

(No compensation will be granted for damage done to a fragile article, unless the word "fragile," or its equivalent, appears on the cover.)

Pattern and Sample Post.—This is restricted to bonâ fide trade patterns and samples of merchandise; no article sent for sale, in execution of an order, or by a private individual, being admissible. The wrappers should be marked "Pattern Post" or "Sample Post," and the articles so packed as to be easily withdrawn; but samples of seeds, &c., may be enclosed in boxes easy of examination, or in linen bags *tied* at the neck: glass in any form is excluded. Printed matter admissible by Book Post is allowed inside, but no writing except the number, price, and private business marks; and the name, address, and trade of the sender must be printed or stamped on the wrapper. Patterns may be returned at Pattern rates in the original wrappers by erasing the written address and prefixing to the printed address the words "Returned Patterns," or "Returned to." If posted unpaid double postage will be charged on delivery; or if insufficiently paid, double the deficiency; and if any of the regulations are infringed, the packet will be charged double the deficient postage at the letter rate, with a fine of 6*d.*

Poste Restante.—This is intended solely for the accommodation of strangers and travellers who have no permanent abode in the town. Letters and parcels may be addressed to the Poste Restante at every Head Post Office in the United Kingdom and to all Branch Post Offices in London. Letters or parcels to be called for should have the words "Poste Restante" included in the address. No initials, or fictitious names, or Christian name only, will be taken in; and all persons applying for "Poste Restante" letters must prove their identity. Foreigners must produce their passports. Poste Restante letters, &c., are not as a rule kept more than two months; at Provincial Post Offices only one month. After these intervals they are sent up to the Returned Letter Office.

Re-direction.—*Letters* re-posted unopened more than a day after delivery are charged with postage at the prepaid rate. If re-posted the same day no charge is made. *Parcels* may be re-directed free of charge if the original address and the corrected address are both in a delivery from the same office. *Postcards, book-packets, newspapers,* and *sample-packets* are permitted to be re-directed, under the same conditions as those relating to *letters.*

Registration.—The fee for registering an inland letter, newspaper, or postal packet (including parcels) is 2*d.* in addition to the postage. These must be handed to an agent of the Post Office, and a receipt taken. By prepayment of a fee of 2*d.* in addition to the postage and registration fee, the sender of a registered letter may obtain an acknowledgment of its due delivery. The latest time for registering for the night mails is usually half an hour before the box closes for letters; for midnight and early morning mails the hour is 7.45 p.m. If an inland packet marked "Registered" be put in a letter-box it will be liable on delivery to a charge of 8*d.*, less any amount prepaid for registration. The payment of the registration fee effects an insurance on the packet against loss or damage up to £50, at the following rates:—Fee 2*d.*, compensation £5; 3*d.*, £10; 4*d.*, £15; 5*d.*, £20; 6*d.*, £25; 7*d.*, £30; 8*d.*, £35; 9*d.*, £40; 10*d.*, £45; 11*d.*, £50.

Returned and Missing Letters.—Inland letters undelivered, and containing an address, are returned, a registration fee of 2*d.* being charged should anything of value be inside. If without an address, and containing nothing of value, they are at once destroyed. Undelivered foreign letters are returned, unopened, to the countries whence received. Inquiries for missing letters should be made at the Secretary's office, G. P. O. North, St. Martin's-le-Grand, between 10 a.m. and 5 p.m.; Saturdays between 10 a.m. and 1.30 p.m. The Returned Letter Office is at Mount Pleasant, E.C.

Soldiers' and Seamen's Letters.—Letters to soldiers and seamen serving abroad, not exceeding ½ oz., are forwarded for 1*d.*, with a further charge if they pass through a foreign country.

STAMPS, ENVELOPES, Etc.

Postage Stamps (used also for receipts, telegrams, and certain Inland Revenue duties up to 10*s.*) are sold of the respective values of ½*d.*, 1*d.*, 1½*d.*, 2*d.*, 2½*d.*, 3*d.*, 4*d.*, 4½*d.*, 5*d.*, 6*d.*, 9*d.*, 10*d.*, 1*s.*, 2*s.* 6*d.*, 5*s.*, 10*s.*, 20*s.*, and £5. These may be purchased at most offices between 8 a.m. and 8 p.m., and at any office during the hours that attendance is given for telegraph business.

The perforation of stamps with *initials* is recommended. Stamps perforated otherwise than with initials, embossed stamps, or stamps cut from envelopes, wrappers or post-cards, are not available for postage.

Embossed Envelopes.—Embossed Halfpenny Envelopes are in two sizes, Commercial, in packets of 10 for 5½*d.*, and Foolscap, 10 for 6*d.*; they are also sold singly. Penny Envelopes of the following sizes are kept in stock:—**A**, 4¼ × 3½, in packets of 20 for 1*s.* 10*d.*; **C**, 5¼ × 3, 24 for 2*s.* 2*d.*; and a cheaper quality (Commercial), 20 for 1*s.* 9*d.*; but all may be had in smaller numbers. Envelopes embossed with a twopence-halfpenny stamp (sizes **L**, 5½ × 3½, and **M**, 5½ × 4⅛ ins.) are sold at the following rates:—**L**, 1 for 2¼*d.*, 10 for 2*s.* 2½*d.*; **M**, 1 for 2¼*d.*, 10 for 2*s.* 3*d.*

Registered Letter Envelopes, for foreign and inland letters, bearing a twopenny stamp embossed on the flap for the payment of the registration fees are of five sizes, and are sold: **F**, 5¼ ins.

× 3¼ ins.; G, 6 ins. × 3¼ ins., 2¼*d.* each, or 12 for 2*s.* 2½*d.*; H, 8 ins. × 5 ins., H², 9 ins. × 4 ins., 2¾*d.* each, or 12 for 2*s.* 7*d.*; K, 11½ ins. × 6 ins., 3*d.* each, or 12 for 2*s.* 10*d.*

LETTER CARDS are sold thus:—1 for 1¼*d.*, and 8 for 9*d.*, also in packets of 96 for 9*s.*

POST-CARDS impressed with a halfpenny stamp are sold at the rate of 10 for 5½*d.*, or 11*s.* per parcel of 240; a thicker quality being 10 for 6*d.*, or 5*s.* per parcel of 100. They can also be had in sheets of 42 cards at £11 8*s.* and £12 6*s.* per quarter ream (120 sheets) respectively. Reply Post-cards are about double the rates for single cards, but are not sold in sheets.

Private cards, bearing an adhesive ½*d.* stamp, and corresponding as nearly as possible to the size and weight of the official card, may be used.

Private Post Cards are also admissible for foreign and colonial post provided they are in conformity with the official cards in size and weight.

WRAPPERS bearing a halfpenny stamp may be had at ¼*d.* each or 7 for 4*d.*; 22*s.* 10*d.* per parcel of 480. With a penny stamp the price is, singly 1¼*d.*, or 4 for every 4¼*d.*; 21*s.* 3*d.* per parcel of 240. Uncut sheets of *ha'penny* wrappers, 14 on each sheet, may be obtained in quarter reams of 120 sheets for £3 18*s.*

LONDON POSTAL ARRANGEMENTS.

For the purpose of facilitating the collection and delivery of letters, the Metropolis is divided into eight districts, marked:—

East Central (E.C.)	South Eastern (S.E.)
Eastern (E. and N.E.)	South Western (S.W.)
Northern (N.)	Western (W.)
North Western (N.W.)	West Central (W.C.)

Of these the E.C.—comprising the whole of the City, the W.C.—the district between Temple Bar and Charing Cross, and the S.W.—containing nearly all the Government Offices, are the most important. In the E.C. or City district there are twelve deliveries daily. By appending the initials the sorting of letters is facilitated, and frequently two or more hours saved in the delivery. In the other districts there are from six to eleven collections and deliveries. Letters properly directed, and properly posted, should be delivered within from two to four hours.

FOR THE COUNTRY AND ABROAD.—Letters and cards to go the same evening should be posted at Chief District offices, Branch offices, Receiving houses, and Pillar boxes before 6; in suburban places, half an hour to an hour and a half earlier.

LATE INLAND LETTERS.—Inland letters and post-cards bearing an extra ½*d.* stamp are forwarded by the night mails if posted at the town Branch offices and Receiving houses before 7 p.m., and at St. Martin's-le-Grand before 7.45. At certain District offices the hour for posting with the late fee is 7.30 and 8, when the letters are to go from the railways in their immediate neighbourhoods. Letters having an extra ½*d.* stamp may also be posted at the sorting carriage or platform barrier at the various railway termini up to the time of the departure of the train bearing the mails, varying from 8.15 to 10.

NIGHT POSTING.—Country letters too late for the ordinary mails, but posted in the London districts before the 9 o'clock collection, are delivered by the first post next morning if for places (about 250) within the range of the supplementary night and midnight despatches. Later collections are made in London and the suburbs—mostly between 11 and 12—the letters, &c., for the provinces being despatched by the early morning trains, and those for London and suburban districts coming within the first morning delivery. For early trains and the same delivery a collection is made from 2 to 3 a.m. on certain main routes; also at many places in the N.W., S.W., W., and W.C. districts; and at 3.15 in the E.C. district. At all the Chief District Offices the boxes are cleared at 6 a.m. for the first delivery in London districts, and at 7 a.m. for local letters.

LATE FOREIGN LETTERS, with an extra 1*d.* stamp, may be posted till 7 o'clock at Lombard Street, Gracechurch Street, Mark Lane, Eastcheap, Leadenhall Street, Throgmorton Avenue, Threadneedle Street, Fleet Street, Ludgate Circus, Charing Cross, Bedford Street, the District offices, and St. Martin's-le-Grand; with an extra 2*d.* at the latter office till 7.15, or till 7.30 with an extra 3*d.* At the railway termini the late letter-fee is 4*d.* for the Continent, and 2*d.* for the U.S.A., Canada, and the Cape.

FOREIGN AND COLONIAL POST.

LETTER POSTAGE.

A charge of 2½*d.* the half ounce is now made for letters addressed to any part of the world.

The Foreign Post-card Rates to all places to which Post-cards are available is 1*d.* single, 2*d.* return.

Inland cards are transmissible abroad if the additional postage be supplied by an adhesive ½*d.* stamp.

BOOKS, NEWSPAPERS, &c.

NEWSPAPERS, BOOKS, AND PRINTED PAPERS generally, ½*d.* per 2 ozs.

PATTERNS AND SAMPLES, ½*d.* per 2 ozs.; but with a minimum charge of 1*d.*

COMMERCIAL PAPERS, ½*d.* per 2 ozs.; but with a minimum charge of 2½*d.*

The limits of size to British Possessions or non-Union countries* are—length 2 ft., width or depth 1 ft., and must not exceed 5 lbs in weight. To countries in the Postal Union the length is limited to 18 in.; weight not to exceed 4 lbs.

The above-named rates should in all cases be prepaid; no packet can be sent forward wholly unpaid, but, if by inadvertence the postage is insufficiently prepaid, double the deficit will be chargeable on delivery.

MAILS for Canada are made up every Wednesday, Thursday, and Saturday evening; to the United States every Wednesday and Saturday evening and Saturday morning; and to Newfoundland alternate Friday evenings.

To the West Indies alternate Wednesday mornings.

To Australasia, every Friday evening, and various other days

To India, every Friday evening.

To China, Japan, Hong Kong and Ceylon, Friday evening, and various other days.

To Portugal and Tangier, every morning; to Roumania and Morocco, every morning and evening; to Greece, Sunday, Monday, Wednesday and Friday mornings, and every Friday evening.

To Egypt, Sunday and Monday morning, and Friday evening, and various other days; to Cyprus, Monday morning and Friday evening; to Malta, every morning.

To the Cape and Rhodesia every Saturday morning; to West Coast of Africa and Abyssinia, every Friday evening.

To Buenos Aires, Monte Video, and Rio Janeiro, alternate Wednesday and Friday mornings.

* Abyssinia, Afghanistan, Africa (Native possessions on the West Coast), Arabia, Bechuanaland Protectorate, British Central Africa, China, Friendly Islands, Madagascar, Morocco, Niger Protectorate, Orange Free State, Samoa, Sarawak, Society Islands.

Digitized by Google

To Mexico, Wednesday and Saturday mornings and evenings; to Chile, alternate Wednesday evenings, and various other days, with U. S. mails.

To other parts of the world, the places and rates are too numerous for insertion; particulars may be obtained at every Receiving house.

PARCEL POST.

The rules and regulations to be observed are similar to those relating to inland parcels, with the addition that every parcel must have a Customs declaration respecting the contents. This must be on a form obtainable at any Post Office: the duties cannot be prepaid, but are collected on delivery. Certain articles are prohibited; among them letters nearly everywhere; firearms to Colombia, Constantinople, and Gibraltar; opium to Hong Kong and India; and pork and bacon to some places. The charges to British possessions are:—

MONEY AND POSTAL ORDERS.

Money Orders, Inland.—The highest amount granted in one order is limited to £10. The commission charged is:—

For sums not above 20*s.* ..... 2*d.*

Not above £2	3*d.*	Not above £7	5*d.*
„ „ £4	4*d.*	„ „ £10	6*d.*

Money orders are legally void if not presented for payment within 12 months of date of issue. The rules and regulations are on the forms issued.

Telegraph Money Orders.—These are issued between all post offices authorised to transact telegraph and money order business. They are limited to £10, and the commission is double the above rates in addition to the charge for an advice to the postmaster and its repetition, the minimum being 9*d.* Any communication to the payee is a further charge, the minimum being 6*d.*

Postal Orders.—Unlike Money Orders, they are issued for fixed sums; those of 1*s.* and 1*s.* 6*d.* at a charge of ½*d.*; of 2*s.*, 2*s.* 6*d.*, 3*s.*, 3*s.* 6*d.*, 4*s.*, 4*s.* 6*d.*, 5*s.*, 7*s.* 6*d.*, 10*s.*, and 10*s.* 6*d.*, 1*d.*; those of 15*s.* and 20*s.*, 1½*d.* These orders must be presented for payment within 3 months from last day of the month of issue, or a fresh commission will be charged. Stamps to the amount of 5*d.* may be affixed to the *face* of an order, so that practically any odd sum can be transmitted by means of postal orders. The name of the payee should be inserted by the purchaser before parting with it. Payment may be deferred for a period not exceeding ten days, by writing across the order the words "Payable after —— days," and by inserting the name of the office of payment. Postal Orders are payable at any office in the United Kingdom, and at Constantinople, Malta, Gibraltar, India, Straits Settlements, Hong Kong, and Newfoundland. Most bankers and money-changers in the Colonies and on the Continent will also cash them.

The Chief Money Order Office in London is at Mount Pleasant, E.C.

Money Orders, Foreign and Colonial.—These are issued in the United Kingdom on the undermentioned places, the commission being for sums not exceeding £2, 6*d.*; £5, 1*s.*; £7, 1*s.* 6*d.*; £10, 2*s.*:—

*Aden	*Austria	Bermuda
*Adrianople	Bagdad	*Beyrout
Amoy	Bassorah	Brit. Bechuanaland
Australia	*Belgium	

* The limit of weight to Rhodesia is 7 lbs., to other British possessions 11 lbs.

† Parcels for Greece must be packed in some stronger material than paper or cardboard.

Orders issued for the places marked thus * are retained by the remitter, and a new order in the currency of the country is forwarded by the Post Office to the payee.

TELEGRAMS.

INLAND.—Telegrams may be sent to all parts of the United Kingdom at the rate of 6*d.* for the first twelve words, and one halfpenny for every additional word; stamps in payment to be affixed to the form by the sender. The address of the receiver is charged for, but not that of the sender when written on the back of the telegram form. Five figures are counted as one word, so is a letter preceding or following a group of figures. The charge includes delivery within the town postal limits, or within one mile of a head office—beyond that limit the charge is 6*d.* per mile for the first three miles; if three or more miles, at the rate of 1*s.* per mile from the office door. Telegram forms are of two kinds—one issued gratis; the other (A1), embossed with a stamp, may be purchased singly, or interleaved with carbonic paper, in books of 20, price 10*s.* 2*d.* each.

FOREIGN TELEGRAMS are subject to a code of 25 rules, too lengthy to be transcribed. The charges vary from 2*d.* a word to Belgium, France, Germany, and Holland, 2½*d.* to Luxembourg, 3*d.* to Algeria, Italy, Switzerland, Austria, and Tunis, 3½*d.* to Denmark and Norway, 4*d.* to Roumania, Servia, Bosnia, Spain, and Sweden, 4½*d.* to Bulgaria, Gibraltar, and Portugal, 5½*d.* to Russia, 6*d.* to Malta and Morocco, 6½*d.* to Cyprus and Turkey, 7*d.* to Greece, 1*s.* to Canada, and 1*s.* to 1*s.* 8*d.* to United States, 3*s.* 8*d.* upwards to India, 4*s.* 7*d.* upwards to Australia, 5*s.* to New Zealand, 3*s.* 6*d.* to 12*s.* 2*d.* to South America; our own Colonies and possessions being charged generally at about the highest rates.

SUNDAY TELEGRAMS.—In most provincial towns the Telegraph Offices are open from 8 to 10 a.m. in England; in Scotland and Ireland from 9 to 10 a.m. In London the following offices are always open:—Central Telegraph Station; Great Northern Station, King's Cross (except from 1.30 to 2.30 p.m. on Sundays and from 10 p.m. on Sundays to 6 a.m. on Mondays); Great Eastern Stations, Liverpool Street and Stratford; London Bridge (S. E. R.), Paddington, St. Pancras, Victoria (L. C. & D.), Waterloo and Willesden Stations, and West Strand Post Office, the offices at Birmingham, Bradford, Brighton (except between midnight Saturday and 7 a.m. Sunday), Bristol, Cardiff Docks, Derby, Devonport, Dover, Exeter, Falmouth, Holyhead, Hull, Leeds, Liverpool, Manchester, Newcastle-on-Tyne, Norwich, Nottingham, Penzance, Plymouth, Portsmouth, Sheffield, and Southampton; as also are those at Aberdeen, Dundee, Edinburgh, and Glasgow, in Scotland; and Belfast, Cork, Dublin, Londonderry, and Queenstown, in Ireland.

LONDON-PARIS TELEPHONE.—Public Call Offices, General Post Office, W. (Bath Street), open always, West Strand Branch, always open, and Threadneedle Street Branch (open week days, 8 a.m. to 8 p.m). Fee—8*s.* per conversation of 3 minutes. Two *consecutive* conversations are permitted. NOTE.—Paris time is 10 minutes earlier than London time.

SUNDAY AND HOLIDAY ARRANGEMENTS.

At all offices open on Sunday, postage stamps are sold, and letters may be registered, during the time such offices are open. The same regulation applies to CHRISTMAS DAY and GOOD FRIDAY. The hours at which telegraph business is attended to are, as a rule, from 8 to 10 a.m.; but no Money Order, Savings Bank, Insurance, or Annuity Business is transacted on these days, nor in Scotland on Sacramental Fast Days.

In addition to the offices always open, as shown under "Sunday Telegrams," the following in London are opened for postal business on Sundays at 8 a.m., and closed at 8 p.m., unless otherwise indicated:—Blackheath Village, Bow (10 p.m.), Camberwell Green (10), Camden Road, Clapham Common (10), Ealing (8 to 10, 5 to 6), Eastern District Office, Euston Branch Office (10), Fulham Road (10), Greenwich—Nelson Street (10), Hammersmith, Hampstead Green, Holloway (10), Kensington—Young Street, Kilburn Branch Office, Kingsland—High Street (10), New Cross, Northern District Office, Norwood District Office (10), Notting Hill—near Archer Street (10), Paddington—Spring Street, Poplar Branch Office, Putney (8 to 10, 5 to 6), St. John's Wood Terrace Branch Office (10), S. E. District Office, South Kensington—Exhibition Road, S.W. District Office, Tottenham—White Hart Lane (8 to 10, 5 to 6), Western District Office, W.C. District Office, Wimbledon (8 to 10, 5 to 6).

In London, letters can neither be registered, nor despatched by express service on Sunday, Good Friday, or Christmas day.

BANK HOLIDAYS AND FAST DAYS.—Where Bank Holidays are observed as public holidays, the counters of the head office and branch offices are closed at 12 noon (in some small places they are not even opened) *except* for telegraph business, the reception of parcels, the sale of postage stamps, and the registration of letters. At no provincial town in England or Ireland is there more than one delivery of letters on Sunday, Christmas Day, or Good Friday; nor in Scotland on Sunday or the Sacramental Fast Days; and any person is at liberty to prevent even this delivery so far as relates to himself.

In London the holiday arrangements are of an exceptional character, and due notice of them is given by means of bills at the various offices.

BRADBURY, AGNEW, & CO., LIMITED, PRINTERS, LONDON AND TONBRIDGE.

THE EMPIRE OF INDIA.

The British Empire in India extends over a territory larger than the Continent of Europe without Russia. Afghanistan, Nepal and Bhutan are within the sphere of its influence. Baluchistan (130,000 square miles) and Kashmir, with its dependencies of Chitral, Hunza, Nagar, are within its frontier. Within the boundary recently demarcated on the north-west and where the line is still undefined on the north-east there are also tracts of tribal territory under the political influence though not yet under the administrative rule of the "Indian" government. The political boundary of India marches with Persia from the sea to near Zulfikar on the Harirud; then with the Russian Empire along the frontier laid down by agreement in 1885 as far as the Oxus at Khamiab, thence along the Oxus by the Panjah branch up to the Victoria lake, and from the east end of the Victoria lake by the line demarcated in 1895 up to Chinese territory on the Taghdumbash Pamir. From this point the frontier touches the Chinese Empire, mainly along the crests of the Himalayas, till the limits of French control are reached on the Upper Mekong. The Indian frontier leaving the Mekong marches with Siam till it reaches the sea half way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, and the Laccadive Islands, Aden and Perim, the Somali Coast protectorate, and protectorates over Socotra, Bahrein, and various Chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from the 8th to the 37th degree of north latitude, and from the 61st to the 100th degree of longitude east of Greenwich; Calcutta itself lying in 88° E. long. Its total area may be taken to be 1,700,000 square miles, of which 750,000 square miles are under Native and the remainder under British administration. The population of India, shown by the census in February, 1891, if we include the population (computed or estimated) of Manipur, Sikkim, and the Shan States, but not the protected territory of Baluchistan and the Somali Coast, was 288,350,000, of which 66,750,000 belonged to the Native States. The increase of the population of our Indian Empire in the decade 1881 to 1891 was 33¼ millions, of which 5¼ millions were added by the inclusion of tracts, particularly Upper Burma, not enumerated in 1881, while the remainder of the increase being at the rate of over 10 per cent. in the decade, represents the ordinary growth of population. By February, 1897, supposing the population of India to have increased by 6 per cent. since 1891, it will number 305½ millions, of which 70¾ millions will belong to the Native States. The languages spoken in India, excluding European tongues and those which are spoken by less than 1,000 persons, are 78 in number, grouped in a dozen different families; of which 20 languages belonging to five families are spoken by not less than one million persons each. Other particulars regarding the population will be found on pages 465–467. Excluding the Province of Burma, which lies to the east of the Bay of Bengal and forms no part of the Indian Peninsula, we may broadly divide the country, for geographical purposes, into three sections, viz. :—the Himalayan region, the northern river-plains, and the southern table-land. The first of these includes the mountain-range of the Himalayas and their offshoots to the southward. This region, lying mainly beyond the limit of British administration, must be considered as the natural northern boundary of India, and may be described as consisting of two giant mountain-ranges running from north-west to south-east, with a series of great valleys beyond. The southern range, which rises precipitously from the belt of swampy land lying to the north of the Ganges and parallel to its course, springs up to a height of 20,000 feet above the plain, and culminates in the loftiest peaks yet measured on the globe—Mount Everest, 29,002 feet; Kunchin-Junga, 28,176 feet; and Dwhalagiri, over 27,000 feet, near the centre of the range, and Mount Godwin Austen (K. 2), 28,250 feet, near its junction with the Hindu Kush Mountains. The Himalayas, however, are not only a rampart of defence, but also serve to collect and store up a supply of water for the tropical plains below them. The sides of the Himalayas afford an admirable simultaneous representation of the various

The principal Government publications relating to India, which were presented to Parliament in 1896, were:—Statistical Abstracts, 1885-86 to 1894-95, C. 8,238; Moral and Material Progress Report, 1894-95, No. 218; Trade of British India, 1890-91 to 1894-95, C. 7,997; Sanitary Measures in India, 1894-95, Vol. xxvii.; Financial Statement for 1896-97, No. 166; Home Accounts, 1894-95, with Estimates 1895-96, No. 180; Explanatory Memorandum regarding the Accounts and Estimates of 1896-97, C. 8,169; Return of Net Income and Expenditure for eleven years 1884-85 to 1894-95, No. 127; Administration Report of Railways in India for 1895-96, C. 8,136; Chitral Correspondence, C. 8,037; Kafiristan, No. 262 and C. 8,012; Indian Cotton Duties, C. 8,078 and No. 229; Expenses of Indian Troops at Suakin, No. 236 and C. 8,131; Opium Commission Correspondence, C. 7,991; Jhallawar, No. 245; Indian Expenditure Commission, First Report, Vols. I. and II., C. 8,258 and 8,259.

natural belts of the earth's surface, being divided into the tropical, the temperate, and the arctic zones as the upward journey is taken from the plains below. The vegetation of the Himalayan region includes such varied species as the tree-fern, the deodar or native cedar, numerous rhododendrons, the ilex, orchids, barley, oats, millet, and many common vegetables of domestic use. In the way of trade this region produces large quantities of timber, charcoal, barley, millet, and honey. The fauna are no less varied than the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear and ounce, eagles, partridges, and a large number of pheasants. The native tribes afford examples of both the Aryan and the Turanian races, together with an intermingling of the two. The northern river-plains, lying at the foot of the Himalayas, and stretching from sea to sea, comprehend the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from each other, four rivers take their rise in the Himalayas. Of these, two are on the north side of the mountains—the Indus, which flows westward, and the Sang-po or Brahmaputra, which flows eastward. The other two, on the southern slope, are the Sutlej, which, after flowing west and south-west for 900 miles and collecting to itself various other waters, joins the Indus; and the Ganges, which, during a south-east and easterly journey of nearly 1,600 miles, drains almost the whole of the Bengal plain. Meanwhile the Brahmaputra, which runs close along by the mountains on the northern side, having reached the eastern extremity of the Himalayas, turns sharply to the south, then to the west, and finally joins the Ganges, the two rivers discharging themselves together into the Bay of Bengal. The Indus is 1,800 miles long; the Brahmaputra nearly 1,500 miles long. It will be seen from this that the Himalayas send to India the water gathered on both their northern and southern slopes: this result is due to the peculiar *lie* of the land, and this it is which has not only given great abundance and wealth to the country, but has also made it the prey of the spoiler and invader for many centuries. The richest, the most populous, and the most prosperous part of India is to be found in the basins of these three great river-systems, which include in the aggregate an area of 1,125,000 square miles. Each of these rivers is of inestimable value to the country it drains, but particularly is this so with the Ganges. The Ganges is not only the great highway of Bengal, it is also the water-carrier and the fertiliser; without it traffic, where not impossible, would be enormously dear, and the province almost a desert. So rich is the Ganges valley that a wholly agricultural population of nearly 60 millions finds support on the soil at a density of over 700 persons to the square mile (the average density of the population of England and Wales being 500 to the square mile). There are several agricultural districts with a population exceeding 900 to the square mile. There are three harvests in Lower Bengal each year: pease, pulse, and various oil-seeds are reaped in April and May, the early rice crop in September, and the great rice crop two or three months later. The chief vegetable products of N.W. Bengal are the mango, the banyan, the wild cotton-tree, and the tamarind: while the delta region gives rice, the bamboo, and a large variety of palms (cocoanut, date, areca, &c.). In the north, again, we also find wheat, Indian corn, millet, and barley; while to the south, indigo, cotton, sugar-cane, tobacco, and many different dyes, drugs, and spices are also produced. These include the aloe, castor-oil tree, resins, and gums; but there are also grown the melon, pumpkin, tea-plant, yams, the opium poppy, the mulberry, and jute. Just as the Himalayas on the north and the Suleiman Mountains on the north-west form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due east and west from the head of the Gulf of Cambay, form a firm southern boundary to the river-plains of Northern India Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel Coasts, which converge at Cape Comorin, and on the third by the Vindhya Mountains, north of the Nerbudda River. The Eastern and Western Ghauts all but complete the triangle of mountain ranges with which this region is surrounded. As the Western Ghauts lie so close to the coast, and afford no exit for rivers, we find no streams on the Malabar Coast south of the Tapti River: all the rivers—and they are both numerous and of great size—flow eastwards, and passing through gaps or defiles in the Eastern Ghauts, discharge their waters into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.) at intervals further to the south; in the extreme N.W., too, south of the Vindhyas, and parallel to them, but north of the Western Ghauts, we find the Nerbudda and the Tapti flowing westwards. The division line of the basins of these last two rivers is sharply defined by the Satpura Mountains, which lie midway between them. The physical geography of S. India has given it much of its history: the S.W. coast, shut in by the

mountains, is very primitive and moves slowly; the S.E., open and easy of access both from within and without, has advanced with rapid strides in commerce and all other civilising influences. The mountain slopes of this region, those of the Western Ghauts in particular, are still covered with the splendid vegetation of primeval forests of the tropics: teak, ebony, ironwood, and Indian mahogany abound, so also do the jackwood, blackwood, sandalwood, and the ubiquitous bamboo. Coffee is now largely cultivated there, and tea and cinchona are also grown. The elephant, tiger, bison, leopard, deer, sheep, and various smaller game afford limitless sport to the hunter. In the valleys and on the higher plains many crops are raised in profusion, chiefly the same as those grown in the lower basin of the Ganges. The southern table-land has in past times furnished considerable supplies of different minerals, including gold: those found and worked now are mainly lime, coal, and iron; some gold mines are also being successfully worked in Mysore. To the west of the peninsula the Indian Empire includes the mountainous, barren, and thinly populated region of Baluchistan, which has some mineral wealth in its coal and petroleum. East of the peninsula is the large province of Burma, watered by the Irawaddi and its tributaries and by the Salween. The delta region is flat; further inland the country is one of hills and rolling downs; and in the north the province loses itself in the mountains. Rice is the chief staple; cotton, sesamum, and tobacco are also extensively grown. The forests, particularly of teak, make a very large contribution to the exports. Among the industries still to be developed in the province is that of tea-cultivation, the tea-plant being indigenous. Burma is rich in minerals. Rubies, sapphires, and jade are mined. Gold and silver undoubtedly exist; wells for the production of petroleum have long been in operation; coal, copper, tin, lead, are also found. Three-fifths of the Indian Empire are under the direct rule of the British Government, and are divided for administrative purposes into eight principal Provinces—viz., Bengal, the North-West Provinces and Oudh, the Punjaub, the Central Provinces, Burma, Assam, Madras, and Bombay, and five minor administrations. The remaining two-fifths are made up of a large number of Native States, whose chiefs are, as it is termed, in subordinate alliance with Her Imperial Majesty, KAISAR-I-HIND. Her Majesty's representative is styled the Viceroy and Governor-General, his relations with the Home Government being regulated by Act 21 & 22 Vict. c. 106, which substituted the authority of a Secretary of State for India, aided by a Council of fifteen members, for that of the East India Company and the Board of Control. By an Act of 1889, the Secretary of State is permitted to leave five of the seats on his Council unfilled. For the present members of Council see page 158.

For the knowledge we possess of the period that preceded the commencement of connected history in India we are chiefly indebted to the sacred books of the Hindus, the accounts of Greek and Chinese writers, the records of inscriptions and coins, and the evidences of race and language. The existence of various races in India speaking languages not cognate, proves that the country has been subject to successive invasions in remote ages. The first of which we possess direct evidence is that of the ARYANS, who, coming from north of the Hindu Kush, overspread Persia in one direction and Northern India in the other. The *Vedas*, which are the most ancient and venerated of the sacred writings of the Indian Aryans, and are written in Sanskrit of the earliest type, are supposed to date from 1400 B.C. In the early Vedas all classification and ranking of the gods is absolutely wanting; something of the kind, however, is done in the Upanishads, which form a kind of commentary on the Vedas, and make some attempt to solve the problems of creation, the nature of the Deity, and the human soul. The Upanishads, in fact, founded admittedly on the Vedas, contain the germs of those great systems of Hindu philosophy which, in their later development, brought about the separation of the creed of the vulgar from that of the educated. The *Mahabharata* and *Ramayana* are epic poems of later date, abounding in extravagant myths, from which, however, the learned have succeeded in gaining a general knowledge of the habits and condition of the people and of the course of events during the dark period of Aryan conquest. Themselves a branch of the Indo-European race, by whom Europe had already been colonised, the Aryans are believed to have entered India some 2000 years B.C. They were then a pastoral and agricultural people; their form of government was patriarchal, and the offices of prince and priest were united in the same person. Their conquest seems to have been confined at first to the country south of the Himalayas on the west of the Jumna, where they long remained, before they began their advance southwards and eastwards down the Gangetic valley. The enemies they met, who had preceded them in the occupation of the country, were a yellow-skinned, serpent-worshipping race in the Himalayan districts, and in the south a dark-skinned population, short in stature, treacherous, and degraded. The condition of the people, as well as the progress of their wars with the older inhabitants of the country, can be clearly traced in the sacred poems. It appears that when Oudh and Bengal had been subdued, the deified hero Rama effected the conquest of Southern India, and afterwards that of Ceylon. By this time a great change had come over the Aryan invaders. Their primitive simplicity had disappeared. Patriarchs had become luxurious princes, whose priestly duties were deputed to the sect of Brahmans; and by the fifth century, when, it is supposed, the *Laws of Manu*, a digest of the current customary laws, were compiled, this caste had succeeded in estab-

lishing its superiority over the Kshetriyas, or military caste, to whom it had been at first subordinate. The *Laws of Manu* give a good idea of what the priestly caste wished Indian society to be at the period when they were composed. In them we find mention made of the existence of caste and village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Sákya Muni, or Gautáma, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died at a great age in 543 B.C. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood; and within three centuries from the death of its founder it had been accepted as the national religion. For more than a thousand years it existed in India side by side with Brahmanism, which it never succeeded in ousting. But either from internal dissensions of its own, or from persecution without, Buddhism became practically extinct in India before the twelfth century, though it still flourishes not only in China and Japan, but also in Nipal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified. One branch of it, however, survived in the distinct sect of the Jains, whose religion was a combination of Buddhism and Brahmanism. The followers of this creed, of which the antiquity and relations with Buddhism are much disputed, are still very numerous in Guzerat, and may be found in many parts of India.

With Alexander's invasion (327 B.C.) we reach the first landmark in the political history of India. Herodotus tells us that the twentieth satrapy of Persia had previously included part of the north-west of India. Alexander himself did not penetrate beyond the tributaries of the Indus, though he sailed down the river; his Indian possessions fell to Seleucus, whose ambassador, Megasthenes, has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Megasthenes describes the democratic village-communities of the Punjab, and speaks of the peoples as brave and truthful, and averse to litigation, and of the women as chaste; and he notes the absence of slavery. Asoka (B.C. 260–220), the grandson of Chandragupta, whose edicts throw light upon this period, was the great patron of Buddhism, which became for a time the State religion throughout the greater part of India. Our last contributors to a knowledge of India before the period of authentic history are the Buddhist pilgrims from China, who visited the country between the fifth and tenth centuries.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves, between 126 B.C. and 544 A.D., over Northern India. Their inroads, as well as the existence of ancient aboriginal tribes in India, left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus.

So early as A.D. 664 Arabs began to make predatory expeditions against Guzerat and Sind. The conquest of Persia, towards the middle of the seventh century, at length brought the successors of Mohammed to the Indus, and in the N.W. of India they made some temporary acquisitions during the ensuing hundred years. However, two centuries more were to pass before the foundations of a durable Mohammedan empire were laid. It was in the year 999 that Mahmud declared the independence of the kingdom of Ghazni in Afghanistan—a proceeding which he followed up by at least twelve expeditions into India, one of which carried him beyond the Jumna, and another ended in the occupation of Guzerat. Later, in 1024, he conquered and annexed to his kingdom the provinces of Lahore and Mooltan. The succeeding dynasties of Afghan kings held power in India for 500 years; but the advance of their power was gradual, for it was not till 1206 that Delhi was taken, and the greater part of Hindustan annexed by Kutb-ud-din, with whose memory is connected the Kutb Minar, near Delhi; and the first Mohammedan invasion of the Deccan took place in 1294.

From this time onward the history of India is the history of invasion, dynasty following dynasty, while the Mongol hordes again and again swept into the country. At length, during the reign of the last monarch of the Toghlak line, the famous Tamerlane burst into India at the head of a mighty host, and captured and sacked Delhi in 1398: he left behind him Khizr Khan, who thenceforward held the reins of power. A period of misrule, tyranny, and anarchy ensued, and fittingly paved the way for the total conquest of the country by the Mogul emperors.

THE MOGUL EMPIRE.—The Mongols, or Moguls, a Mohammedan Power, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, and, as has been stated, again and again invaded that country. In 1398, during the invasion of Tamerlane, or Teimur, a great part of Hindustan was laid waste. In 1526 *Sultan Baber*, a descendant of both these Tartar chiefs, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE. *Humayoon* (1530–56) lost the whole of the territory conquered by Baber, but recovered a portion of it shortly before his death. *Akbar*, his son (1556–1605), being a minor, the Government was for five years under a regency, but it was a much longer time before Akbar's many opponents were subdued and his Empire firmly established, embracing Cabul, Candahar, all Hindustan, and a portion of the Deccan. The Mogul Empire thus absorbed not only the Afghan kingdom in Hindustan, but also the independent Mohammedan kingdoms of Bijapur, Golconda, Ahmednagar, Berar, and Bidar, in the Deccan. Akbar followed up his conquests by important financial reforms; he was tolerant in religion, and just to all classes of his subjects. Among the great men whom he drew around him were Raja Todar Mall, his able finance minister; Abul Fazl, the historian of his reign; and Faiz, the poet; nor should we overlook Bairam Khan, Akbar's faithful guardian in his youth. The revenue of Akbar's empire is estimated to have been 19 millions sterling; and this gradually increased till under Aurangzeb, at the close of the 17th century, the imperial revenue amounted to £43,500,000. *Jehangir* (1605–28) received in 1615 an embassy despatched by James I., under the conduct of Sir Thomas Roe. His empress was the famous Nur Mehal. Under *Shah Jehan* (1628–58) the Mogul Empire reached its zenith. Many public works and grand buildings testify to his magnificence and taste, amongst others the Taj Mahal at Agra, which is said to have been the work of a French architect—Austin of Bordeaux. The close of *Shah Jehan's* reign was embittered by the rivalries of his four sons. *Aurangzeb* (1658–1707) defeated his brothers and put them to death; his father he kept a prisoner for the rest of his life. *Aurangzeb* had great ability and courage,

Digitized by Google

and was a master of dissimulation; but bigotry and distrust were the bane of his policy, and the decline of the Mogul Empire dates from his reign. Four sons disputed the right of succession: at last *Bahadur Shah* gained the coveted crown, but only for five years. Dying in 1712 he was succeeded by his son, *Jehundar Shah*, who was cruelly murdered by one Farokshir, a great-grandson of the famous Aurangzeb, who seized on the crown. He in turn was himself put to death six years later, and *Muhammad Shah*, grandson of Bahadur, came to the throne. The viceroys of his own appointment grew uneasy and rebellious, and all unconsciously aided in the growth of the Mahratta power. One of them refused his aid to his sovereign, and the Mahrattas in consequence subdued the Deccan. In 1738, to avenge an alleged insult, Nadir Shah of Persia invaded India, captured Delhi, and gave the city over to the mercy of his terrible followers, who are said to have slain more than 100,000 of the inhabitants, and to have levied as contribution and carried off as plunder, treasure equal to more than £50,000,000 sterling. In spite of this enormous sacrifice, peace was only obtained by giving up to the conqueror all the country west of the Indus. On the death of Muhammad, in 1748, the country was fast going to decay—it was, in fact, only waiting for a fresh conqueror. The Mahrattas were there ready for the work to be done. About 1724 the Deccan, Oudh, and Bengal became practically independent under Nizam-ul-Mulk (ancestor of the present Nizam), Sadat Khan, and Aliverdi Khan respectively.

THE MAHRATTAS.—Simultaneously with the decline of the Moguls rose the power of the Mahrattas. They were Hindus, and the country from which they came may be roughly described by drawing two lines from Nagpur to Surat and Goa on the west coast. The founder of their power was *Sivaji* (1627–1680), a chieftain of the family of Bhonslah. *Balaji Vishvanath* (1712–1720), Peishwa, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family; Sivaji's descendants thenceforth holding a merely nominal position as Rajas of Satara. Under the Peishwas, aided by Scindia, Holkar, and the Gaekwar, who formed independent States about this time, the Mahrattas rapidly extended their territory and influence. In 1760 Delhi was in their hands, and though they suffered a disastrous defeat at Panipat in 1761, at the hands of Ahmed Shah, the Afghan invader, they remained for some time the first Power in India, and were the most dangerous opponents of the English. Their system, however, was one of organised plunder rather than of settled government. Like the Pindaris, a horde of freebooters who followed in their train, they were a scourge to the country. It was not until both Pindaris and Mahrattas were finally overthrown in 1818, that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of European adventurers, who, either from love of adventure or thoughts of gain, had been attracted in increasing numbers to the shores of India.

EUROPEAN ADVENTURE.—From time immemorial the trade of Europe with India and the farther East has been the most lucrative branch of the world's commerce, and has enormously enriched in turn each nation that has carried it. In the 15th century it was mainly possessed by the Venetians at its European end, and by the Arabs, the successors of the old Phœnicians, in its Eastern portion; the chief centres of the trade of the Arabs were Calicut, Ormuz, Aden and Malacca. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India. The sea route round the Cape of Good Hope was discovered by Vasco da Gama, who anchored before Calicut on 20th May, 1498. From that time until they lost their naval supremacy the *Portuguese* may be considered to have enjoyed the monopoly of Indian trade. The first Portuguese viceroy, Francis of Almeida (1505–1509), established numerous factories and fortresses, and took possession of Ceylon and the Maldive Islands; while his successor, Alfonso de Albuquerque, captured Goa (1510), and extended the Portuguese dominion in various places, but notably on the Malabar and Malacca coasts. This dominion had, in 1542, practically amounted to an entire regulation of the Asiatic coast trade with Europe from the Persian Gulf to Japan, and for nearly sixty years afterwards the King of Portugal was the virtual suzerain of the southern coast of Asia. When the Portuguese crown fell into weak hands its power in the Eastern seas began to decline; and it was almost annulled in 1580, when the crowns of Spain and Portugal were united under Philip II., and the Asiatic interests of Portugal were subordinated to the European interests of Spain. The Portuguese were content to bring the exports of India to Lisbon; they left it to the Dutch to carry them thence to the other ports of Europe. But when Philip II., on account of the revolt of the United Provinces, shut the harbour of Lisbon against them, the *Dutch* (1580) were driven either to forego the trade or seek it in the East themselves. The enterprise of the nation decided the question, especially as the Spanish naval supremacy had been shattered by the defeat of the "Invincible Armada" in 1588. In 1602 "The Dutch East India Company" was formed by the amalgamation of the previously existing trading societies, and between 1602 and 1620 the principal Portuguese settlements in the East were captured. In 1661 the Portuguese possessed only those remnants of their Indian possessions which they still hold. The Dutch Eastern Empire, situated mainly in the Malayan Peninsula and contiguous islands, passed with the Mother Country under the dominion of the French in 1810. Attacked and conquered by the English in 1812 in consequence, it was surrendered again to the Dutch in 1816, since which date it has remained in Dutch hands.

ENGLISH DOMINION.—At the close of the 16th century the English also began to feel the necessity of freeing themselves from dependence on others for the supply of Indian produce, and to desire a share in the profits of Indian commerce. After the success of some smaller ventures, the English East India Company was incorporated by Queen Elizabeth by royal charter on the 31st December, 1600; there were 125 shareholders, the capital was £70,000, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." When voyages to India—and almost profitless voyages they proved to be—were first undertaken on the joint-stock account, the company's capital was raised to £400,000. Quarrels with the Portuguese ensued; and no footing of any kind was obtained until the year 1615, when Captain Best, with four English ships, won a great victory over the Portuguese squadron off Surat, where a settlement was established, and a

satisfactory treaty concluded with the Emperor Jehangir. Under the terms of this treaty, King James I. sent out as ambassador Sir Thomas Roe, who was not only granted various trading concessions, but was also permitted to reside at the Court of the Great Mogul. When Charles I. was in need of money he granted a second charter to a new Company. Confusion was the result; and piratical and other acts dishonourable to Europeans followed. The Protector Cromwell, however, was equal to the crisis; the rival companies were merged into one, the famous Navigation Act was passed, a reign of order was established, and the English traders gained a reputation for general honesty which—in spite of individuals and solitary cases—they have ever since maintained. In 1639 the English, who had acquired a narrow strip of land, six miles in length and one mile inland, on the coast just below Masulipatam, built a factory there and having surrounded it with a wall, mounted it with guns, and named it Fort St. George; fourteen years later (1653) this settlement of Madras became an independent Presidency. When, in 1661, Charles II. was married to Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay: five years afterwards it was formally made over to the English monarch, who in his turn, in 1668, transferred all his rights over it, together with the responsibilities connected with it, to the East India Company for an annual payment of £10. In 1687 the factory at Surat was given up by the Company, and Bombay was made the seat of the Western Presidency. Although in 1634 the Company had obtained certain treaty rights concerning Bengal from the Mogul, and six years afterwards a factory had been established at Hooghly, near the mouth of the Ganges, yet in that part of the country they held no territorial possessions as in Bombay and Madras. In 1688 the exactions of the Mohammedan authorities forced them to abandon their settlement. They were, however, invited to return, and in 1689 were laid, amid swamp and jungle, the foundations of Fort William, afterwards destined to develop into the modern city of Calcutta. In 1698 a rival company called "The English East India Company," to distinguish it from the old "London Company," was started with a capital of two millions. The competition resulted in over-trading; the home markets were glutted with all kinds of Indian produce, and the English manufacturers were loud in their complaints. In 1702 the two rival companies were united, and in 1708, thanks to the prudence and tact of Lord Godolphin, the whole of the English companies were at last amalgamated under the charter granted by Queen Anne to "The United Company of Merchants Trading to the East Indies." England having entered upon the war of the Austrian succession in 1744, the rival companies of England and France first came into collision in 1746, the immediate result being the capture of Madras in that year. Had Dupleix received continuous support from home, he might have succeeded in founding a French Empire in India. The first reverses of the English were retrieved by *Clive*, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army at Wandewash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin of the French. The territory retained by the French in India since that date is insignificant; and in these possessions they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and the victory of Plassey in the following year made British influence predominant in Bengal. Clive was appointed first Governor of Bengal in 1758. In 1763, in his absence, the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). As a result of this battle, they received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal, Behar, and Orissa, and the jurisdiction over the Northern Circars. Clive returned a second time to Bengal as Governor, and before he left finally in 1767, he succeeded in reforming the services, in which great abuses existed. After an interval of misrule *Warren Hastings* (1772–85) was appointed President of Calcutta, and then Governor-General in 1774, on the creation of that office under the Regulating Act of 1773. He not only greatly increased the power and territory of the Company, notwithstanding the opposition of a hostile Council, of which Sir Philip Francis, the reputed author of *Junius*, was a member, but was also the first great administrative organiser of the British possessions in India. He repelled Hyder Ali's memorable invasion of the Carnatic (1780), and defeated the triple alliance of the Nizam, the Mahrattas, and Hyder Ali. In so doing he probably saved British India. The first reign of *Lord Cornwallis* (1786–93) was marked by the complete reform he effected in the Company's Civil Service, by the introduction of the Permanent Settlement of the Land Revenue in Bengal, and by the Second Mysore War. After the uneventful rule of *Sir John Shore*, afterwards Lord Teignmouth (1793–98), came the administration of the *Marquess Wellesley* (1798–1805), of which the events were numerous and important. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. His son and successor, Tippoo, equally courageous and equally hostile to the English, was in 1798 in secret correspondence with the French, who had then the predominant influence in the military councils of the Nizam and of Scindia, were strongly established in the islands of Mauritius and Bourbon, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tippoo, and the restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassein (1802) broke up the Mahratta Confederacy. The campaigns of Lord Lake and Sir Arthur Wellesley, in the Second and Third Mahratta Wars, curtailed the power of Scindia and Holkar, and added to the strength and extent of the Company's dominions. Lastly, Lord Wellesley developed, if he did not establish, a system of subsidiary alliances with Native States, which promised to give greater security than the balance of power attempted by Lord Wellesley's predecessors. *Lord Minto* (1807–13) established peaceful relations with the Sikhs, Cabul, and Persia, through the mediation of Metcalfe, Mountstuart Elphinstone, and Malcolm respectively, occupied the Mauritius, and extended British influence in the Eastern Seas. Under the *Marquess of Hastings* (1814–23) the Bombay Presidency, hitherto the smallest of the three, attained its present dimensions on the annexa-

tion, in 1818, of the territory of the Peishwa, whose power had lasted a little over 100 years. By his wars in Central India, Lord Hastings also delivered the country from the ravages of the *Pindaris*, freebooters who organised bands, sometimes many thousands strong, and devastated the country in all directions; and he settled on their existing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India. A war with Nepaul also occurred during Lord Hastings' *régime*. In 1823 *Lord Amherst* succeeded the Marquess of Hastings, and marked his period of office by a conquest in another direction. The King of Ava had been not only guilty of great insolence to the Governor-General, but was ever making encroachments on British territory. The result was the First Burmese War, which cost us 20,000 lives and nearly £14,000,000, but gave us the fertile provinces of Arracan and Tenasserim, and, practically, Assam. While *Lord William Bentinck* was Governor-General (1828–35), steam communication with India was introduced, Suttee (or widow-burning) was abolished, educated natives were admitted more largely into the service of the Company, and various measures were passed affecting education, economy, and justice. The Charter of the East India Company was in 1833 renewed for twenty years, on condition that the Company should altogether abandon its trading, and allow of the settlement of Europeans in the country. *Lord Auckland's* resolution to support Shah Shuja against Dost Mohammed brought on the First Afghan Expedition (1839–42), and the serious disaster attendant on the fatal Retreat from Cabul. This was atoned for in the administration of *Lord Ellenborough* (1842–44), which also saw the Conquest of Sind by Sir Charles Napier. *Lord Hardinge* (1844–48) conducted in person the First Sikh War, and fought a series of severely-contested battles, ending with Sobraon (1846). *Lord Dalhousie's* administration (1848–56) was fruitful in events. The Second Sikh War resulted in the submission of the Sikhs, who at Chillianwallah and Goojerat gave further proof of their bravery. The annexation of their country was followed by that of Tanjore; and the Second Burmese War (1852) deprived the King of Burma of his sea-board provinces. Lord Dalhousie promoted the introduction of Railways and the Telegraph. He established cheap postage; promoted steam navigation with England *viâ* the Red Sea; and opened the Ganges Canal, still the largest irrigation work in India. His annexation policy was much criticised at home: it proceeded on the principle that British being preferable to native rule in the interest of the subject populations, gross misrule or a break in the natural succession justified the transfer of a Native State to the British Government. In 1849 Satara, and in 1853 Jhansi, thus became British territory; and after the death of the last of the Mahratta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after long and painful hesitation on the part of the Directorate, and after repeated warnings to the Government of Oudh—a Government marked by tyranny and oppression—that kingdom was also added to the list of annexations. The proclamation was made on February 13, 1856, and the transfer took place without the shedding of blood or the striking of a single blow. *Earl Canning* (1857–62), who succeeded Lord Dalhousie, left England pledged to pursue a policy of peace. It was, however, his fate to meet the greatest crisis that has threatened the British Empire in India. A Mutiny of the native troops broke out on the 10th of May, 1857, at the station of Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of 40,000 of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, the Central India campaign of Sir Hugh Rose (Lord Strathnairn), and all the heroism displayed during that momentous time, will never be forgotten. The Great Mutiny proved the deathblow to the East India Company, whose glorious annals were brought to a close by the transfer of its entire authority and administration to the Crown.

THE BRITISH INDIAN EMPIRE.—The Act for the better government of India established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st of November, 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." *Lord Canning* was succeeded in 1862 by *Lord Elgin*, who, however, died November 20th, 1863. The attention of *Sir John (Lord) Lawrence* (1864–69) was directed to the necessity for financial retrenchment, which arose chiefly from increased military expenditure. His rule was also marked by the Bhutan War and by the terrible Orissa Famine of 1866. *Lord Mayo* (1869–72) succeeded in carrying out a number of measures for the reform of the administration and for the development of the resources of the country, of which perhaps the chief was the introduction of the system of provincial finance, a large measure of decentralisation since extended. He was assassinated on the 8th of Feb., 1872, while on a visit to the convict settlement at Port Blair, in the Andamans. During the time of *Lord Northbrook* (1872–76), H.R.H. the Prince of Wales visited India, and received a loyal welcome from all classes. In the same period occurred a famine in the Lower Provinces of Bengal, and the deposition of the Gaekwar of Baroda for misrule and disloyalty. *Lord Lytton's* Viceroyalty (1876–80) was made eventful by the terrible Famine in Southern India, by the Second Afghan War, and by the Queen's assumption of the title of EMPRESS OF INDIA. He was succeeded by the *Marquess of Ripon* (1880–84), whose peaceful rule was marked by the extension of local self-government. He, in his turn, gave place to the *Marquess of Dufferin* (1884–88), whose *régime* was remarkable for the Third Burmese War, by which Upper Burma and its dependent Shan States were added to the Empire. In this Administration, too, the north-western frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased; and the Jubilee of Her Majesty's reign (1887) was enthusiastically celebrated by all classes and races throughout India. The *Marquess of Lansdowne* (1888–93) succeeded Lord Dufferin. In 1891 trouble occurred in the small State of Manipur, which led to a temporary military repulse and to the murder of British officers. Minor military operations were undertaken on the north-west frontier, on the outskirts of the new province of Upper Burma, and in the petty principalities of Hunza and Nagar, feudatories of Kashmir, over which British predominance was finally established. The continued advance of Russia from the north and the sudden approach of France on the east rendered necessary various measures to increase the strength and efficiency of the army in India.

In domestic policy Lord Lansdowne's administration was responsible for a change in the currency law by which the Mints were closed to free coinage of silver, and the rupee currency cut away from its silver basis to be eventually, it is hoped, attached to a gold standard. The reconstitution of the Legislative Councils introduced a more popular element into the government of India, while the opening of the public service more widely to the natives of India gave them a larger share in the work of administration. With the year 1894 began the viceroyalty of the *Earl of Elgin and Kincardine*, who has completed the abolition of the Presidential Army system, has imposed import duties, cotton yarn and thread and a few other articles being exempted, and has vigorously carried on the work of frontier extension and delimitation. The Chitral expedition of 1895 led to the firm establishment of British authority in Chitral, and to the opening up of the road direct from Peshawur to Chitral, *vid* the Lowari pass. The tribes through whose territory this road passes have fallen in with the arrangements for keeping it open, for protecting the postal runners, and for assisting the yearly relief of the Chitral garrison. The policy of retaining Chitral has so far been justified by its success. Boundary demarcation has been in active progress: that with Russia on the Pamirs has been completed. The boundaries between Baluchistan and Persia, between Baluchistan and Afghanistan, and between India and Afghanistan, have also been finally settled, with the exception of a short section north-west of Peshawur. The Mekong has been accepted as the boundary between British and French territory north of Siam by an agreement between the two countries dated 15 Jan. 1896. The frontier between Upper Burma and China, though laid down in the Convention of 1894, is still only provisionally accepted, as the Convention is under modification by negotiations with China.

Imperial Legislation.—The original charter of the East India Company was granted by Queen Elizabeth at the end of the year 1600. *The Regulating Act* (1773), which created the first Governor-General, created also his Council, and was the first that recognized the East India Company as a ruling body. It was followed, in 1784, by *Pitt's India Bill*, which, while leaving the Government of India nominally to the Court of Directors, in reality transferred it to a *Board of Control*, whose President represented Indian affairs in the House of Commons; and in 1788 by the *Declaratory Act*, which expressly affirmed this important fact. The Act of 1784 also established the supremacy of the Presidency of Bengal, authorizing the historic phrase "The Governor-General in Council." In 1793 the Company's Charter was renewed for 20 years, and its exclusive privileges were continued. In 1813 an Ecclesiastical Establishment was formed, and the trade to India was thrown open; in 1833 the China monopoly was likewise abandoned; a legal member was at the same time added to the Governor-General's Council, and the North-West Provinces were made a separate Administration. In 1853 the Company's Charter was renewed for the last time. Bengal was put under a Lieutenant-Governor, and the Indian Civil Service was thrown open to competition. *Act 21 & 22 Vict. c.* 106, "An Act for the Better Government of India," received the Royal Assent on the 2nd of August, 1858. By it all the territories heretofore under the Government of the East India Company were transferred to Her Majesty the Queen, who in 1877 (Act 39 & 40 Vict. c. 10) formally assumed the title of Empress of India; and all the powers hitherto exercised by the East India Company, or by the Board of Control, were vested in the Secretary of State for India, assisted by a Council. The number of members of this Council who are appointed by the Secretary of State may not fall short of 10 or exceed 15.

The Government of India.

The expenditure of the revenues of India is subject to the control of the Secretary of State for India in Council, who also conducts Indian business transacted in England. In matters requiring secrecy (*e.g.*, foreign policy) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. In all matters the Secretary of State, as the representative of Her Majesty's Government, can impose his orders on the Government of India. The Crown or the Secretary of State appoints the Viceroy and Governor-General, the Governors of Madras and Bombay, the Commander-in-Chief, the Ordinary Members of the Councils of the Governor-General and of the Governors of Madras and Bombay, and the Judges of the Presidency High Courts. The appointments of Lieutenant-Governor are made by the Governor-General, subject to the approval of the Secretary of State. The term of these appointments, except judgeships, is usually for five years. The four Lieutenant-Generals commanding the forces are appointed, two from the British and two from the Indian service, on the recommendation of the Commander-in-Chief at home. Subject to the Secretary of State's control, the Supreme Executive Authority in India is the Governor-General in Council. The Governor-General's Executive Council consists of seven members, including the Commander-in-Chief, who is an Extraordinary Member, and the Public Works Member, whose post may be left vacant at the option of the Crown. Governors and Lieut.-Governors also become Extraordinary Members when the Council meets within their Province. All acts of the Supreme Government in India run in the name of "The Governor-General in Council"; but the Governor-General himself has the power of overruling the opinions of the majority of his Council. The Viceroy's Council, when it meets for purposes of Legislation, consists of the above members and of "Additional Members for making Laws and Regulations." There are similar Legislative Councils in Madras, Bombay, Bengal, and the North-West Provinces (with Oudh), and proposals have been made to establish similar Councils for the Punjab and Burma. The business of the Government of India is divided into the Departments of Finance and Commerce, Home Affairs, Revenue and Agriculture, Military Administration, Legislation, Public Works, and Foreign Affairs. Each Department is under the charge of a Secretary, and is also the special care of a Member of the Supreme Council, who has authority to deal with affairs of

Digitized by Google

routine and minor importance, and to select what is worthy of the consideration of the Governor-General and his collective Council. The Governor-General specially superintends the political business of the Foreign Office. The *Department of Finance and Commerce* looks to questions of Finance, to Stamps, Excise, the Post Office, and anything involving a permanent charge on the State; also to questions bearing on the commerce of the country. The most important subjects coming under the attention of the *Department of Revenue and Agriculture* are the Land Revenue, Forests, and the agricultural development of the country. The *Home Department* deals with the Educational, Medical, Sanitary, Ecclesiastical, and Judicial affairs, Municipalities, Local Government Boards, Police, and other matters, and has charge of the penal settlement of Port Blair. The *Foreign Department* conducts our relations with Afghanistan, Nepal, and other conterminous countries, and through its Political Residents and Agents in the various Native States supervises their administration and directs their relations with the paramount power. The *Public Works Department* deals with matters connected with railways, telegraphs, roads, canals, buildings, &c. The Marine Service, as well as the Army, is under the *Military Department*. The Legal Member takes charge of Government Bills in the *Legislative Council*.

Separate *High Courts* have been established for the Presidencies of Madras and Bombay and for the Lieutenant-Governorship of Bengal (with jurisdiction also over Assam), and of the North-West Provinces. The Punjab has a Chief Court; the Central Provinces, Oudh, and Mysore have each a Judicial Commissioner, and Burma has two Judicial Commissioners (for Upper and Lower Burma respectively) and a Recorder of Rangoon. It is in contemplation to extend over Oudh the jurisdiction of the High Court of the N.W.P.

The division of India into Presidencies is now misleading. The expression is a relic of the time when the three settlements of Fort William, Fort St. George, and Bombay, each under the management of a President and Council, comprised, or were supposed to comprise, the whole of British India. British India is now really divided into *thirteen Local Governments and Administrations*, viz.:—Under Governors, Madras and Bombay, also termed Presidencies; under Lieutenant-Governors, Bengal, North-West Provinces with Oudh (of which the Lieutenant-Governor is Chief Commissioner), and the Punjab; under Chief Commissioners, Burma (a proposal is under consideration to change the Chief Commissioner of Burma into a Lieut.-Governor), Assam, Central Provinces, Berar (of which the Resident at Hyderabad is Chief Commissioner), Ajmere Merwara (the Governor-General's Agent in Rajputana being Chief Commissioner), Coorg (of which the Resident at Mysore is Chief Commissioner), British Baluchistan (of which the Governor-General's Agent in Baluchistan is Chief Commissioner), and the Andaman Islands. These several Local Governments and Administrations enjoy a large measure of financial and administrative independence. The Governors of Madras and Bombay have greater independence than the others, being alone permitted to communicate on certain minor matters direct with the Secretary of State.

The unit of administration throughout British India is the District, at the head of which is an executive officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. He has entire control, and is responsible to the Governor of the Province. There are 245 Districts in British India.

THE SUPREME GOVERNMENT, CALCUTTA.

[Indian revenue figures are stated in tens of rupees under the denomination Rx.]

[Indian salaries are the substantive salaries (excluding allowances) stated in rupees *per mensem*.]

Viceroy and Governor-General (Rs. 20,833 *per mensem*), His Excellency the Right Honourable the Earl of Elgin and Kincardine, P.C., G.M.S.I., G.M.I.E., *b.* 16 May, 1849, *suc.* 1863, *m.* Lady Constance Mary Carnegie, C.I. (Appointed January, 1894.)

Private Secretary, Henry Babington Smith.

Assistant Private Secretary, F. W. Latimer.

Military Secretary, Colonel Algernon G. A. Durand, C.B.

Aides-de-Camp, Capt. R. E. Grimston, 6th Beng. Cav.; Lieut. S. H. Pollen, Wilts Regt.; Lieut. F. L. Adam, Scots Guards; Lieut. A. E. Viscount Fincastle, 16th Lancers.

Extra Aides-de-Camp, Capt. R. W. Morley, 4th Dn. Gds.; Lieut. Lord G. Stewart Murray, R. Highrs.; Capt. M. H. K. Pechell, K.R.R.C.; Lieut. Clive Wigram, R.A.

Native Aides-de-Camp, Risaldar-Maj. Bahauddin Khan, Sardar Bahadur, 1 C. I. H., and Risaldar Wali Muhammad, Sardar Bahadur, Gov.-Genl.'s Bodyguard.

Medical Attendant, Brig.-Surgeon-Lt.-Col. B. Franklin, C.I.E., Indian Medical Staff.

Council of the Governor-General.

Extraordinary Member, H.E. General Sir George S. White, G.C.I.E., K.C.B., *VC*, Commander-in-Chief in India (April, 1893).

Ordinary Members (5), Sir Charles Bradley Pritchard, K.C.I.E.; Sir Jas. Westland, K.C.S.I.; J. Woodburn, C.S.I.; Mackenzie Dalzell Chalmers; Maj.-Gen. Sir E. H. H. Collen, K.C.I.E.; Arthur Charles Trevor, C.S.I.

Extraordinary Members, the Governors of the other Presidencies when the Council shall assemble within their territory.

Additional Members for Making Laws and Regulations:—*Official*, C. C. Stevens, C.S.I.; H. E. M. James; Brig.-Surg.-Lieut.-Col. Sir A. S. Lethbridge, M.D., K.C.S.I.; Alan Cadell, C.S.I.; J. D. Rees, C.I.E.; C. M. Rivaz, C.S.I. *Non-Official*, Mohiny Mohun Roy; M. R. Ry. P. Ananda Charlu, Rai Bahadur; Sir G. H. P. Evans, K.C.I.E.; G. P. Glendinning; Nawab Amir-uddin Ahmad Khan, C.I.E., Bahadur, Fakhar-ud-doulah; Sir Lakshmishwar Singh, K.C.I.E., Maharaja Bahadur of Durbhanga; Rao Sahib Balwant Rao Bhuskute; P. Playfair, C.I.E.; Rahimtula Muhammad Sayani; Pandit Bishambhar Nath.

Sec. to Council, and Sec. to Government Legislative Department, Stephen Harvey James ..Rs. 3,500

SECRETARIES TO THE GOVERNMENT OF INDIA.

HOME.—John P. Hewett, C.I.E. .....Rs. 4,000

Abp. of Madras (Rom. Cath.), The Most Rev. J. Colgan, D.D.
Abp. of Bombay (Rom. Cath.), Most Rev. T. Dalhoff.

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.

(1) MADRAS (area,* 141,189 sq. miles; pop.* 35,630,440), was the scene of our struggle with the French, whose principal settlement, Pondicherry, is 90 miles south of the city of Madras. Though the most important of the three Presidencies until Clive's conquest of Bengal, it was small in extent till 1801, when the annexation of the Carnatic raised it to nearly its present dimensions. It is larger than Great Britain and Ireland together, and has a population equal to that of Italy. With a coast-line of 1,730 miles the province has not one good natural harbour; a large artificial harbour has just been completed at Madras at great expense. The province is not naturally fertile, and possesses little mineral wealth. The Governor of Madras is assisted by a Council ordinarily of two members, to whom are added, for legislative business, other members not to exceed 21 (including the Advocate-General *ex officio*), of whom the first seven have been appointed on the recommendations of the Madras Corporation (1), of other Municipal Councils (2), of District Boards (2), of the Chamber of Commerce (1), and of the University (1); the rest are selected by the Government.

CHIEF CITY, Madras. Population, 453,518.

Governor, Sir Arthur Elibank Havelock, G.C.M.G. (18 March, 1896) ..... Rs. 10,000
Priv. Sec., H. A. Stuart ..... Rs. 1,500
Military Secretary, Maj. Fred. Wm. Romilly, D.S.O., Scots Guards ..... Rs. 1,000
Aides-de-Camp, Capt. Alan Herbert Watlington Lowndes, Rifle Bde.; Capt. Bertram Percy Portal, 17th Lancers; Lt. Evelyn Wintour, 3rd M. Lancers (*extra*); Capt. Lord Herbert A. Montagu Douglas Scott (*extra*).
Native Aide-de-Camp, Subadar-Major Muhammad Hanif, Sirdar Bahadur.
Medical Officer, Surg.-Maj. W. B. Browning, Rs. 1,000

COUNCIL OF THE GOVERNOR.

The Hons. Henry William Bliss, C.I.E. (Rs. 5,120), and James Grose, C.I.E. (Rs. 5,120).
Additional Members for Making Laws and Regulations:—*Official*, David Duncan, D.SC.; John Fred. Price, C.S.I.; S. Srinavasa Raghava Aiyangar, C.I.E., Diwan Bahadur; Ch. Stewart Crole; Arundel Tagg Arundel; Col. Duncan McNeil Campbell, R.E.; Jas. Hy. Spring Branson (*Adv.-Gen.*); John Sturrock. *Non-Official*, V. Bashiyam Aiyangar, C.I.E.; G. L. Chambers; P. Rangayya Nayudu; Rev. W. Miller, C.I.E.; C. Sankaran Nayar; N. Subha Rao Pantulu; K. Kalyanasundram Aiyar; C. Jambalingam Madaliyar, Rao Bahadur; Vijaraghava Chariyas; Vellore Muhammad Sharif Khan Bahadur; H. P. Hodgson; Raja of Bobbili, K.C.I.E.

SECRETARIES TO GOVERNMENT.

Chief Secretary, Hon. John F. Price, C.S.I. Rs. 3,750
Revenue Dept., E. Gibson ..... Rs. 3,125
Public Works Department, Col. Duncan McNeil Campbell, R.E. ..... Rs. 2,243

HIGH COURT OF JUDICATURE.

Chief Justice, Hon. Sir Arthur John Hammond Collins, Kt., Q.C. ..... Rs. 5,000
Judges, Hons. Horatio Hale Shephard; S. Subramanya Aiyar, C.I.E.; J. A. Davies; R. S. Benson; Hungerford T. Boddam ... Rs. 3,750
Advocate-Gen., Jas. H. Spring Branson... Rs. 1,800

(2) BOMBAY.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1661), and was made over by Charles II. to the East India Company in 1668. The Province (exclusive of Native States, but including Sind, Aden, and Perim) contains 125,144 sq. miles (about equal in size to Germany), with a population of 18,901,123: it is 1,050 miles in length, and has many fine natural harbours, Bombay and Kurrachee being by far the most important. Native States occupy about one-third of the Presidency; Sind, conquered in 1843, a non-regulation province, one-fourth; and Bombay proper the remaining 82,000 square miles. The greater portion of the people (76 per cent.) are Hindus, and 17 per cent. are Mohammedans. The greater part of the territory was obtained by annexations from the Mahratta powers, and by the lapse of the Satara State. Sind was conquered by Sir Charles Napier in 1843. Its administration is in some respects separate from that of the rest of the Presidency. Aden and its dependency, the Somali Coast Protectorate in Africa, belong to the Government of Bombay. Aden was occupied in 1839; the Somali Coast Protectorate in 1885. Area of Aden and Perim 85 square miles; population 41,912. Cotton is largely produced for export and for manufacture in the constantly growing cotton mills of Bombay itself. The Governor is assisted by a Council similar to that in Madras, already described, except that the first eight of the additional members are appointed on the recommendation of Bombay Corporation (1), of other Municipal Corporations (1), of District Boards (1), of Sardars of the Deccan (1), of Jaghirdars and Zamindars of Sind (1), of Bombay and Karachi Chambers of Commerce (1 each), and of Bombay University (1). The chief city, Bombay, is yearly rising in importance as the chief commercial port of India.

CHIEF CITY, Bombay. Population, 821,764.

Governor, Lord Sandhurst, G.C.I.E. (2nd Feb., 1895) ..... Rs. 10,000
Private Sec., Joseph John Heaton ..... Rs. 1,500
Military Sec., Maj. Richard Owen, 21st Hussars.
Aides-de-Camp, Capt. H. G. Heneage, 12th Lancers; Lieut. B. J. T. Levett, Scots Gds.; Capt. W. C. Walton, 4th Bom. Rifles (*extra*) (*Native A.-de-C.*).
Medical Officer, Surg.-Maj. H. Martin, M.B. Rs. 1,000

COUNCIL OF THE GOVERNOR.

Herbert Mills Birdwood, C.S.I., M.A., LL.D.; John Nugent ..... Rs. 5,120
Additional Members for Making Laws and Regulations, The Hons. Basil Lang (*Advocate-General*); Phirozshah Merwanji Mehta, C.I.E.; Bal Gangadhar Tilak; Meherban Chintamanrao Raghunath; Daji Aboji Khare; H. Batty; A. T. Shuttleworth; J. K. Spence; T. R. McLellan; Mir Allahbakshkhan walad Mir Alibakshkhan Shahvani Talpur; T. B. Kirkham; Chimanlal Harilal Setalwad; Naoroji Nasarwanji Wadia, C.I.E.; Javerilal Umiashankar Yajnik; T. D. Little; Abdalla Meheralli Dharamsi; Lingapa Jayapa; A. F. Beaufort; W. H. Crowe; Andrew Wingate, C.I.E.; Rao Bahadur Ranchodlal Chotalal, C.I.E.
Secretary to Council, S. L. Batchelor ..... Rs. 1,250

* The areas and populations of the separate provinces are for British territory only, and do not include the Native States subordinate to the provinces in question: the populations are taken from the census returns of 1891.

SECRETARIES TO GOVERNMENT.

Chief Secretary, Revenue, Financial, General, and Separate Departments, Thomas Duncan Mackenzie ..... Rs. 3,750
Political, Secret, Judicial, and Educational, George William Vidal ..... Rs. 3,125
Public Works, T. D. Little, C.I.E. ..... Rs. 2,500

HIGH COURT OF JUDICATURE.

Chief Justice, Sir Chas. Fredk. Farran, Knt. Rs. 5,000
Judges, Hons. John Jardine; Henry James Parsons; Edward Townshend Candy; R. B. Mahadeo Govind Ranade, C.I.E.; Arthur Strachey; Badrudin Tyabji ..... each Rs. 3,750
Commissioner in Sind, Henry E. M. James Rs. 3,750
Political Resident at Aden, Brig.-Gen. Charles A. Cuningham ..... Rs. 3,500

(3) BENGAL (area 151,543 sq. miles; pop. 71,346,987) was placed under a Lieutenant-Governor in 1854, having previously been part of the charge of the Governor-General. With a population nine millions in excess of that of the United States of America, it is spread over an area 1-23rd of that country. It occupies the Valley of the Ganges eastward of Benares, and extends from the Himalayas to the mouth of the Mahanuddy. For the most part the province is a great alluvial plain, producing rice, and is the most populous and productive in all British India. Orissa and Chota Nagpur, to the west and south-west, are ill watered and liable to drought. The chief products, besides rice, are opium, indigo, and jute. In the hills bordering the great alluvial plain, coal measures are also being largely worked. The Lieutenant-Governor is assisted by a Council for the purposes of making Laws and Regulations, of not more than 20 members. Of the following list seven members have been appointed on the recommendations of the following bodies:—Calcutta Corporation (1), other Municipal Corporations (2), District Bodies (2), Bengal Chamber of Commerce (1), and Calcutta University (1).

Chief City, CALCUTTA (pop., including suburbs, 978,370).
Lieutenant-Governor (Rs. 8,333). Hon. Sir Alexander Mackenzie, K.C.S.I. (18 Dec. '95).
Private Secretary, Arthur Hy. Gayer ..... Rs. 950
Aide-de-Camp, Lt. F. G. C. Ross ..... Rs. 452

COUNCIL OF THE LIEUT.-GOVERNOR FOR MAKING LAWS AND REGULATIONS.

The Lieut.-Governor (*President*), The Honourables Sir Gregory Ch. Paul, K.C.I.E. (*Adv.-Gen.*); W. H. Grimley; H. J. S. Cotton, C.S.I.; J. Pratt; C. E. Buckland, C.I.E.; C. W. Bolton; H. H. Risley, C.I.E.; M. Finucane; Rai Durga Gati Banerjea Bahadur, C.I.E.; Nawab Syud Ameer Hossein, C.I.E.; Surendra Nath Banerjea; Maharaja of Darbhanga, K.C.I.E.; Maulvi Muhammad Yusuf, K.B.; Ananda Mohan Bose; Rai Eshan Chandra Mittra Bahadur; Guru Proshad Sen; Maharaja of Ghidaur, K.C.I.E.; W. B. Gladstone; Madhu Sudan Das.

SECRETARIES TO GOVERNMENT.

Chief Secretary, Hon. Henry John Stedman Cotton, C.S.I. ..... Rs. 3,333
General, Revenue, and Statistical, Hon. Charles Walter Bolton ..... Rs. 2,916
Financial and Municipal, Hon. Herbert Hope Risley, C.I.E. ..... Rs. 2,916
Public Works, J. G. H. Glass, C.I.E.

HIGH COURT OF JUDICATURE.

Chief Justice, Hon. Sir Francis W. Maclean, Kt. Rs. 6,000
Puisne Judges, The Hons. Sir Henry Thoby Prinsep (Rs. 4,166); James O'Kinealy; William Macpherson; Ernest John Trevelyan; Chunder Madhub Ghose; Henry Beverley; Dr. Gooroo Das Banerjee; Amir Ali, C.I.E.; Charles H. Hill; Robert F. Rampini; Stephen George Sale; L. H. Jenkins ..... each Rs. 3,750
Adv.-Gen., Sir Gregory Charles Paul, K.C.I.E., B.A.

(4) The NORTH-WEST PROVINCES and OUDH (area, 107,503 sq. miles; pop. 46,905,085), with a population as large as that of the German Empire on less than one-half its area, form the upper part of the great plain of the Ganges to the west of Bengal, lying between the Himalayan Mountains and the hilly border of the central plateau. Originally the North-West Provinces formed part of the Bengal Presidency. In 1833 it was intended (Act 3 & 4 Will. IV. cap. 85) to establish a separate Presidency of Agra. The idea was dropped in 1835 (Act 5 & 6 Will. IV. c. 52), when, however, a Lieutenant-Governor was appointed for the separate administration of these provinces. OUDH, equal in size to Holland and Belgium, was annexed in 1856 and placed under a Chief Commissioner, but since 1877 the offices of Lieutenant-Governor of the North-West Provinces and Chief Commissioner of Oudh have been combined in the same person. In 1887 a Council was established for making Laws and Regulations for the combined Provinces. Of the following list six members have been appointed on the recommendations of the following bodies:—Municipal Corporations (2), District Bodies (2), Chamber of Commerce of Upper India (1), and Allahabad University (1). The maximum number on the Council is 15. The character of the province resembles that of Bengal. The chief staple is wheat, and indigo, cotton, sugar, opium, and oilseeds are sown largely for commerce. Tea is also cultivated in the sub-Himalayan districts. The *Chief City* of the North-West Provinces is ALLAHABAD (pop. 175,246); that of Oudh is LUCKNOW (pop. 273,028).

Lieut.-Gov., Sir Antony P. MacDonnell, K.C.S.I. (6 Nov. '95) ..... Rs. 8,333
Priv. Sec., H. R. C. Dobbs ..... Rs. 1183
Aide-de-Camp, Maj. H. L. Pennall ..... Rs. 624
Chief Sec. to Govt., H. F. Evans ..... Rs. 3,000
Sec. to Govt., T. W. Holderness .....

COUNCIL OF THE LIEUT.-GOVERNOR AND CHIEF COMMISSIONER FOR MAKING LAWS AND REGULATIONS.

The Lieutenant-Governor (*President*). The Hons. Raja Rampal Singh; Babu Sri Ram Rai Bahadur; W. M. Colvin; W. E. Cooper; R. H. Macleod; G. Adams; J. O. Miller; C. W. Odling; J. Hooper; Pandit Bishambar Nath; Seth Raghubar Dayal: Saiyid Mahmud; Kunwar Aditya Narayan Singh; H. F. Evans.

HIGH COURT OF JUDICATURE (WITH JURISDICTION IN THE NORTH-WEST PROVINCES ONLY).

Chief Justice, Sir John Edge, Kt., Q.C. ... Rs. 5,000
Puisne Judges, The Hons. George Edward Knox, Harrison F. Blair, Babu Pramoda Charan Banarji, William Robert Burkitt, Robert Smith Aikman ..... each Rs. 3,750
Judicial Commissioner of Oudh, Mortimer S. Howell, LL.D., C.I.E. ..... Rs. 3,500
Add. Judl. Commr., George T. Spankie Rs. 3,333

(5) The PUNJAB (area, 110,667 sq. miles; pop. 20,866,847), with a larger population than Spain and Portugal together, occupies the north-western angle of the great northern plain of India, and receives its name from "Five Rivers"

which, descending from the Himalayas, cross the plain and unite in the Indus. It was annexed in 1849, and up to 1853 was administered by a Board of Administration. This Board was then superseded by a Chief Commissioner, who in 1859 was raised to the rank of Lieutenant-Governor. The division of Delhi was at the same time transferred to the Province from the North-West Provinces. It has as yet no local Legislative Council; but a proposal to establish one has been made. Besides the territory under British Administration, which is about as large as the Kingdom of Italy, there is an area of one-third that size belonging to 34 Feudatory Native States, with a population of more than 4¼ millions, a revenue of over Rx. 1,250,000, and an armed force of 23,000 men. Thirdly, there are the frontier tribes, split up into numerous clans with divergent interests, whose fighting strength is estimated at 130,000 men. The province is mainly agricultural, and depends largely on artificial irrigation for its harvests. It possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form its principal exports.

CHIEF CITY, Lahore. Population, 176,854.
Lieut.-Governor, W. Mackworth Young, C.S.I. Rs. 8,333
Private Sec. & A.-de-C.,
Chief Sec. to Govt., Herbert Ch. Fanshawe Rs. 2,500
Sec. P. W. Dept, Col. G. F. L. Marshall, C.I.E.
Financial Commissioners, C. M. Rivaz, C.S.I.; D. C. J. Ibbetson, C.S.I.
Judges of Chief Court, C. A. Roe; J. Frizelle; A. W. Stogdon; Protul Chunder Chalterji.

(6) The CENTRAL PROVINCES (area, 86,501 sq. miles; pop. 10,784,294), containing a population equal to that of Holland and Belgium combined on an area 3½ times that of those countries, were formed in 1861, out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. These provinces contain a large population of aboriginal tribes. Much has been done, by constructing railways and roads, to open up the country, which possesses large coal-fields, as well as excellent iron ores, and is an important producer of rice, wheat, and cotton for export.

CHIEF CITY, Nagpur. Population, 117,910.
Chief Comm., Charles James Lyall, C.S.I.....Rs. 4,666
Chief Sec. to Chief Com., H. H. Priest ...Rs. 2,000
Judicial Commissioner, J. F. Stevens.

(7) The Province of BURMA is bounded by China and by Chinese subordinate tribes, by Siam, by our provinces of Bengal and Assam, and by the sea. The area of Lower Burma is 87,957 square miles; that of Upper Burma, 83,473 square miles. Tenasserim and Arakan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war of 1885. The province is thinly peopled. The population of Lower Burma was 4,658,627 in 1891; that of Upper Burma 2,946,933. The delta country of Lower Burma is flat, but above Prome it is an upland, hilly country. Rice is the main product of the delta region, and is very largely exported. The principal export besides rice is teak, which comes from the forests of both Upper and Lower Burma, and from the Shan States and Siam. The Upper Province is also rich in minerals, including gold, silver, rubies, jade, iron, lead, tin, coal, and petroleum. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, supply important navigable waterways. The main river is itself navigable beyond the town of Bhamo, 900 miles from its mouth. Manufactured goods are exported by land to the Shan States and to China. This trade will be much increased when the railway now under construction from Mandalay to the Kunlon Ferry on the Salween River is made. The inhabitants—of the common Indo-Chinese stock—belong to numerous different tribes, who are distinguished by a variety of manners, languages, and religions. The most general religion is some form of Buddhism. The increasing importance of Burma has raised the question of changing the status of the Chief Commissioner to that of a Lieutenant-Governor, and of giving the province a local Legislative Council.

CHIEF TOWN OF LOWER BURMA, Rangoon. Pop. 180,324.
CHIEF TOWN OF UPPER BURMA, Mandalay. Pop. 188,815.
Chief Comm., Sir Frederic William Richards Fryer, K.C.S.I. ..... Rs. 6,666
Chief Sec. to Chief Commissioner, Edward Spence Symes, C.I.E. .....Rs. 3,000
Revenue Sec., F. C. Gates .....Rs. 2,000
Financial Commissioner, Donald Mackenzie Smeaton, C.S.I. .....Rs. 3,000
Judicial Commissioners (*Upper Burma*), George Douglas Burgess, C.S.I. .....Rs. 3,000
(*Lower Burma*) Edwd. Hosking ..... Rs. 2,880
Recorder of Rangoon, Wm. Fischer Agnew, Rs. 2,880

Rangoon by the mail route is 7,663 miles from London; transit 22 to 25 days.
Mandalay is 386 miles from Rangoon by railway; transit 24 hours.
Telegrams to Burma, per word by Eastern or Indo-European Cos., 4*s.* 2*d.*; *vid* Turkey, 3*s.* 10*d.* Post and parcel rates same as India.

(8) ASSAM (area, 49,004 sq. miles; pop. 5,476,833), ceded by Burma in 1825, was not annexed to Bengal until 1874, when it was made into a separate administration. A range of mountains divides the province into the Surma and Brahmaputra Valleys. The *chief City* of the Brahmaputra Valley is GAUHATI (pop., in 1891, 10,817), and of the Surma Valley SYLHET (pop., in 1891, 14,027). The revenue is comparatively small. The staple crop is rice. But Cachar, Sylhet, Sibsagar, and Lakhimpur are the most important tea-growing districts in India, producing in 1893-4, 97 million lbs. of tea. The mineral resources, consisting mainly of coal, petroleum, iron, and limestone, have only begun to be utilized. The construction of an important system of railways for the development of Assam is in progress. On its completion the question of transferring Chittagong from Bengal to Assam as its port and capital will be ripe for consideration.

SEAT OF GOVERNMENT, Shillong. Pop., 2,185.
Chief Comm. (Rs. 4,166), Sir Wm. E. Ward, K.C.S.I.
Sec. to Ch. Comm. (Rs. 2,000), Paul G. Melitus, C.I.E.

(9) BERAR, also termed the *Hyderabad Assigned Districts* (area, 17,718 sq. miles; pop. 2,897,491), which lies to the north of Hyderabad, was placed in our hands by the Nizam in 1853, in payment of arrears due to the British Government and to meet for the future the cost of the Hyderabad contingent. The laws of British India do not run as such in Berar; they may, however, be in force as regulations which the Governor-General directs shall be followed in those districts. The Province is fertile, and yields the finest cotton grown in India. It forms part of the charge of

the British Resident at Hyderabad. The revenue and expenditure of the Hyderabad Assigned Districts, amounting respectively to Rx. 1,011,949 and Rx. 965,042 in 1894-95, are excluded from the Accounts of the Government of India. The surplus revenues, after defraying the cost of administration and the charges for the Hyderabad contingent, go to the Nizam's Government. The surplus in 1894-95, payable to the Nizam, was Rx. 46,907. The amounts paid over to the Nizam on account of the Berar surplus since the transfer of the province to British administration make up a total of Rx. 3,171,000. *Chief City*, Ellichpur (pop., in 1891, 36,240). The administration is under the *Resident at Hyderabad*, T. J. C. Plowden, C.S.I. (Rs. 4,000).

(10) Ajmere-Merwara (area, 2,711 sq. miles, pop. 542,358), ceded in 1818, lies within Rajputana. The Governor-General's Agent in Rajputana is *ex officio* Chief Commissioner of Ajmere-Merwara and the chief executive and judicial authority.

Agent to the Governor-General in Rajputana and Chief Commissioner of Ajmere-Merwara, Robert J. Crosthwaite, C.S.I. (Rs. 4,000).

(11) Coorg (area, 1,583 sq. miles, pop. 173,055), annexed in 1834. The Resident at Mysore is *ex officio* Chief Commissioner and the chief executive and judicial authority.

Resident at Mysore and Chief Commissioner of Coorg, Lt.-Col. Donald Robertson (Rs. 4,000).

(12) British Baluchistan was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan as *ex officio* Chief Commissioner. The districts comprised in this administration were partly acquired from Afghanistan by the treaty of Gundamuck, partly by arrangement with the Khan of Kalat. The Governor-General's Agent also supervises and controls, by advice, by arbitration, and if necessary by direct interference, the affairs of the rest of Baluchistan to the Persian frontier. The area and population of the Agency are not known. The population of British Baluchistan is 145,417.

Agent to the Governor-General for Baluchistan and Chief Commissioner of British Baluchistan, H. S. Barnes (Rs. 4,750).

(13) The Andamans (area, 2,508 square miles), a chain of islands in the eastern part of the Bay of Bengal, divided into two groups known as the Great and Little Andamans, are of tertiary formation, covered with a luxuriant vegetation, and inhabited by a tribe of Negritos. The race is dying out. Since 1858 these islands have been used as a penal settlement by the British Government of India; Port Blair, with its safe and spacious harbour, on South Andaman, constituting the civilised portion. Much valuable timber is obtained from the jungles. Tea, rice, *Musa textilis*, manioc, and Otaheite potatoes are successfully cultivated, and experiments in Liberian coffee, cacao, and indigo are being persevered in. Of the entire population (about 20,000) four-fifths comprise the convict element.

The *Nicobar Islands* (635 sq. miles) lie almost due south of the Andamans and to the north-west of Sumatra. They formerly belonged to Denmark, but were first occupied by the British in 1869, since when they have been affiliated to the Chief Commissionership of the Andamans. They consist of twelve inhabited and seven uninhabited islands, of which the most important is the northernmost (Car Nicobar), containing half the entire population of the group, and supplying more than half the export trade; while the southernmost island (Great Nicobar) contains more than half the entire area, and presents a rich field for colonial enterprise. The principal products are cocoanuts. The inhabitants, numbering about 7,000, are strong, thickly-built men of the Malay type. Their chief characteristic is laziness. Their race in the central and southern islands is dying out. Attempts at colonisation made by the Danes 50 and 100 years ago failed.

Chief Com. & Superintdt., Maj. R. C. Temple, C.I.E. (Rs. 2,500).

Portuguese India.—The city of *Nova Goa*, capital of the territory of the same name, and indeed of all the Portuguese possessions east of the Cape of Good Hope, is situated on the Malabar Coast, about 265 miles S.S.E. of Bombay. Old Goa, five or six miles inland, is fast falling to decay, and New Goa, or Panjim, at the head of the harbour, a walled and strongly-fortified city, is now the centre of trade and government. The principal imports are piece-goods, ivory, raw silk, sugar, woollens, &c.; the principal exports are hemp, cowries, betelnut, toys, &c. The whole territory of *Goa*, 60 miles long by 30 miles broad, contains an area of 1,080 square miles, and a population of 561,384 (1891). The other Portuguese possessions in Western India are *Damaun* (pop. of town, 26,964; pop. of territory, 63,284, area 384 square miles), to the north of Bombay; and *Diu*, a town and fort on an island off the Guzerat coast (pop. 12,758, area 52 square miles). The revenue of the Portuguese possessions was 849,741 milreis (£188,831) in 1894-95, and the expenditure 959,436 milreis (£213,208). The trade is valued at 127,696 milreis. A military revolt broke out in Sept., 1895, and throughout 1896 the country was disturbed.

French India.—Pondicherry, the capital of the French possessions in Hindustan, is on the Coromandel Coast, 85 miles S. by W. from Madras. The fortifications were once strong, but in the war with England they were destroyed, and a clause in the Treaty of Paris forbids their being rebuilt or the place being garrisoned by a French force beyond what is required for police purposes. Rice, indigo, tobacco, betelnut, and cotton are cultivated. The chief exports are oilseeds; the imports consist of lace, fancy goods, furniture, and jewellery. There is no harbour to the place, though the roadstead is as good as any along this coast. The area of the French possessions in India is 205 square miles; the population is increasing. In 1891 it numbered 282,923. The chief settlement is Pondicherry, with an area of 115 square miles, and a population of 172,941. The other settlements are *Chandernagore*, on the banks of the Hooghly, 17 miles north of Calcutta (area 4 square miles, population 24,281); *Karikal*, in the Cauvery delta (area 53 square miles, population 70,526); *Yanaon*, in the Godavery delta (area 5 square miles, pop. 5,327); and *Mahee*, a small town on the opposite coast of India (area 26 square miles, pop. 9,978). Their trade is waning. In 1893 it had fallen to 16,937,000 francs, of which 9,431,000 francs represented their transactions with France. Of the total only 4,616,000 francs were imports into India.

The Budget for the French possessions in India in 1895 was 1,699,416 francs, besides the expenditure by France itself of 341,254 francs.

NATIVE STATES OF INDIA.

The administration of the Native or Feudatory States of India, with few temporary or unimportant exceptions, is not under the direct control of British officials. But it is subject to the

Digitized by Google

control of the Supreme Government, which is exercised in varying degrees. The chiefs have no power of making war and peace, or of sending ambassadors to each other or to external states; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction, and in case of misgovernment the Supreme Government can dethrone the Chief or temporarily suspend him from the exercise of his powers. Some pay tribute, some do not. Generally speaking, the States are governed by their native Princes, Ministers, or Councils, with the help and under the advice of a political officer of the Supreme Government. A common characteristic of all Native States, important or insignificant, is that in their territory British Indian law does not run. For them the Legislative Councils of the Governor-General or of the Provincial Governments cannot legislate; and over them the High Courts and Chief Courts of the Provinces have no jurisdiction. The Assigned Districts of Hyderabad (Berar), Mysore (Bangalore), of Kalat (Quetta and Pishin), are still technically foreign, or Native States territory. The Shan States are on the other hand technically part of British India, though they are administered by their local Sawbwas or petty chiefs.

Afghanistan, Nepal, and Bhutan are considered as independent States, though within the British sphere of influence. For these States, however, see pages 468, 469.

Excluding these countries and that of the trans-Salween Shan States, of which the area is not defined, the Native States of India may be said to cover an area of 750,000 square miles, and to contain a population of over 70 millions, and their united military forces are estimated at 400,000 men, mostly ill armed and ill disciplined, with 6,150 guns, mostly unserviceable. The gross revenues of the chiefs come to about Rx. 21,000,000, out of which an annual tribute of about Rx. 780,000 is paid to the British Government. The States vary greatly in size and importance. Hyderabad, for instance, is as large as the kingdom of Italy, and the Nizam enjoys a gross revenue of Rx. 3,820,000. On the other hand, in Kattywar and elsewhere, where family custom has led to minute subdivision, there are many chiefs of a single village. In the case of such petty estates, it is not correct to speak of native rule; the nominal chief may have some very limited magisterial powers, though this is not always the case, but the administration is regulated and carried on by the British Government in its executive capacity. The amount of control exercised by the British Government over a Native State in its internal affairs depends upon a number of considerations, and varies from State to State. Although the number of Native States, large and small, amounts to as many as 650, only about 200 are of any real importance. Most of these States are of more recent origin than the British power in India. They may be classed under fifteen heads: 1. The Indo-Chinese group of States, and the numerous Hill Tribes of the North-East Frontier. 2. The aboriginal Gond and Kole tribes, under petty princes of aboriginal or Rajput blood, in Chota Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizagapatam) Agency. 3. The Himalayan Hill States, west of Nepal (including Cashmere). 4. The numerous Afghan and Baluch tribes of the North-West Frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. 5. Kalat, with the other Baluch Chiefships which are more or less subordinate to Khelat. 6. The Sikh States, in the Sirhind plain, south of the Sutlej. 7. The three Northern Mohammedan States of Khairpur in Sind, Bahawalpur to the north-east of it, and Rampur, from which Warren Hastings expelled the Rohillas in 1774. 8. The ancient sovereignties of Rajputana, lying to the south of the Punjab, and between Sind and the North-West Provinces. 9. The States of Central India, lying to the north of the Nerbudda, and to the south and east of Rajputana. 10. Guzerat, including Kutch and the numerous petty chiefships of Kattywar. 11. The Southern Mahratta States. 12. Baroda. 13. Hyderabad. 14. Mysore. 15. The Malayalim States of Travancore and Cochin, lying together in the far south.

Hyderabad is the premier State in India. The present Nizam was installed in 1884. *Cashmere* was granted to Gholab Sing by Lord Hardinge, after the First Punjab War. As a frontier State facing the Russian power, Kashmir has a special importance. British influence in it has in late years been strengthened by placing Indian garrisons in its northern province of Gilgit and its feudatory State of Chitral. The present Maharaja came to the throne in 1885, since which date the administration of the State has been much improved under the advice of the British Resident. Of the Sikh States the most important is *Patiala*. *Rajputana* measures some 460 miles from north to south, and 530 miles in breadth; it has a population of twelve millions. Of the nineteen principalities, the most important are *Jodhpur* (*Marwar*), *Oudipur* (*Meywar*), and *Jaipur*. Another State in the Agency is *Jhallawar*, the chief of which was deposed in 1896 for misgovernment and contumacy. The Rajput dynasties are very ancient, and resemble feudal monarchies. A large part of the area of Jodhpur, Bikaneer, and Jeysulmere is desert. The Governor-General's Agent's headquarters are at Ajmir; he has under him a staff of twenty officers, distributed among the States to overlook the administration, and give advice when it is needed or asked for. The *Central India States*, which are one-third less in extent than Rajputana, are split up into nearly four times as many States. The two most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. The opium grown in Malwa is a valuable, though diminishing, source of revenue to the Maharaja of Indore and to the Indian Government. *Bhopal*, one of the principal Mohammedan States in India, has for three generations prospered under female rule. In 1875 the reigning Gaekwar of *Baroda* was deposed, but the native administration was continued under an adopted heir. In 1881 the province of *Mysore*, which had been administered by the British Government since 1834, was restored to native rule. The present Maharaja is a minor and the State is under a regency.

The salutes enjoyed by the Native Princes may be taken to indicate their relative importance. Those with eleven guns or more are addressed with the title of His Highness. Some of the chiefs who by their enlightened administration or for other causes have earned the special approbation of Government have had their salutes increased; but such increase is personal and lapses on the death of the particular chief. The following is a list of the Chiefs having salutes of thirteen guns or more, with some particulars as to their States. In each group the States are given in alphabetical order. In addition to the list given

Digitized by Google

below there are 35 Chiefs having salutes of eleven guns, of whom six have two additional guns in their salutes personal to the present ruler, and there are 26 Chiefs with salutes of nine guns; in one of these cases the present ruler has a personal addition of two guns to his salute.

SALUTES TO INDIAN CHIEFS.

NAME.	Area in sq. miles.	Population in 1891.	Revenue actual for last year recorded or approximate.	Date of Succession.
Salutes of 21 Guns.				
Baroda, The Maharaja of (Gaekwar)	8,226	2,415,396	Rx.1,727,000	27 May, 1875.

Alwar, The Maharaja of	3,144	767,786	276,000	5 June, 1892.
Banswara, The Maharawal of	1,946	211,641	21,000	1842.
Datia, The Maharaja of	836	185,728	100,000	10 Dec., 1880.
Dewas, The Senior Raja of	155	77,922	36,000	1861.
Dewas, The Junior Raja of	134	65,723	35,000	23 May, 1892.
‡Dhar, The Raja of	1,739	167,504	84,000	May, 1860.
Dholpur, The Maharaj Rana of	1,154	279,890	125,000	9 Feb., 1873.
Dungarpur, The Maharawal of	1,447	165,400	20,000	28 Sept., 1846.
Idar, The Maharaja of	1,900	302,134	83,000	26 Dec., 1868.
Jaisalmir, The Maharawal of	16,062	115,701	18,000	12 April, 1891.
Jhalawar, The Maharaj Rana of	2,722	343,601	122,000	(Deposed)
Khairpur, The Mir of	6,109	131,937	61,000	April, 1894.
Kishengarh, The Maharaja of	858	125,516	41,000	25 Dec., 1879.
†Orchha, The Maharaja of	1,933	333,389	90,000	15 Mar., 1874.
Partabgarh, The Maharawal of	886	87,975	43,000	18 Feb., 1890.
Sikkim, The Maharaja of	2,702	30,500	8,000	April, 1874.
Sirohi, The Maharao of	1,964	190,836	28,000	16 Sept., 1875.
Salutes of 13 Guns.				
‡Benares, The Raja of (not a Ruling Chief)				
Jaora, The Nawab of	872	112,280	96,000	30 April, 1865.
Kuch Behar, The Maharaja of	1,307	578,054	217,000	Aug., 1863.
Rampur, The Nawab of	945	551,249	332,000	27 Feb., 1889.
‡Tipperah, The Raja of	4,086	137,442	50,000	31 July, 1862.

* Within their own territories these chiefs have salutes of 21 guns permanently.
† The present chief has a salute with two additional guns as a personal salute, or, in the case of Jaipur, of four additional guns.
‡ The present chief enjoys the title of Maharaja as a personal distinction.
§ The Maharani Regent of Mysore enjoys also a personal salute of 19 guns.

INDIA IN PARLIAMENT,
AND INDIAN LEGISLATION IN 1895-96.

The Indian matters to which the attention of Parliament was principally drawn in this period were—the retention of Chitral, the occupation of Kafiristan (including the Bashgal valley) by the Amir of Afghanistan, the Anglo-French agreement relating to Siam, the deposition of the Maharaj Rana of Jhallawar, the Indian Budget, the charge against Indian revenues of the ordinary expenses of the Indian troops sent to Suakin, and the alteration of the Indian cotton duties. No Bill relating specially to India was passed in Parliament during the year. The Royal Commission on Indian Expenditure commenced its sittings in 1896 and examined a number of witnesses. Two volumes of evidence (First Report, Vols. I. and II., C. 8,258 and 8,259) have been issued.

As in 1894-95 the Acts of the Indian Legislatures which roused most discussion in 1895-96 dealt with duties on cotton goods. Acts II. and III. of 1895 were passed with a view to placing Indian and English mill goods on an equality. The import duty on cotton yarns and thread was abolished, and that on cotton goods was reduced to 3½ per cent.; at the same time an excise tax of 3½ per cent. was laid on all cotton goods produced in British-Indian mills for consumption in India. The Pilgrim Ship Act (XIV. of 1895) attracted great interest in India. Its provisions regulate the conditions of the voyage of Muhammadan pilgrims to and from the Hedjaz; certain rules are prescribed to ensure sanitation and medical attendance, and Government takes power to order certain minimum limits of deck-space for each pilgrim on board. Act XVI. of 1895 was a general repealing and amending Act. Act XVIII. amended the Lower Burma Village Act of 1889 and the Lower Burma Towns Act of 1892. The Indian Volunteers Act of 1869 was considerably modified by Act X. of 1896. Act XI. of 1896 to amend the Legal Practitioners Act of 1879 was designed to prevent touting and other unprofessional conduct at the Indian Bar. The excise law of Northern India, Burma and Coorg was further amended by Act XII. of 1896. The other Acts of the Indian Legislature were of minor importance. In the Provincial Legislatures the most important Act was the Malabar Marriage Act (No. IV. of 1896 of the Madras Legislative Council), which provided a form of marriage for persons following the Marumakkatayam or Altiyasartantana, the object being to clear away doubts as to what formalities constituted a legal marriage in this Hindu society. The Acts of the Bengal Legislative Council to protect Muhammadan pilgrims, and to provide for sanitary drainage of villages and country tracts, may also be mentioned.

INDIAN APPOINTMENTS.

The civil administration of British India is recruited from four sources—1. Competitive examination in England; 2. The Indian Staff Corps; 3. The patronage of the Secretary of State; 4. The patronage of the local Governments. The next examination of candidates for appointments in the *Covenanted Civil Service* of India will commence in London on 3rd August, 1897, the number of appointments varying with the requirements of the local Governments. Inquiry on the subject at the India Office or the Civil Service Commission. The appointments are distributed between (1) Upper Provinces, &c.; (2) Lower Provinces and Assam; (3) Madras; (4) Bombay; (5 cording to their requirements. Th appointments to be offered in 1897 w be about 60. Successful candidates their preference for the province they wish to serve. But their all depend upon a consideration of all stances, especially the requirements c service. The candidates for this must be over 21 and under 23 on 1st J ceding. The selected candidates will tion in England for one year only, and an allowance of £100 if they pass the at one of the Universities or Colleg by the Secretary of State for Indi tion for admission to the examir be made on or before the 31st Ma that can be obtained at any tim December preceding, from "The Sec Service Commission, London, S.W." tion fee is £6. Seniority in the serv on the order of the list resultin final examination. Within a certa the candidate's arrival in India, h to serve in the executive or the jud of the administration, the summit fession in one branch being the Governorship of a Province, in t Judgeship of the High Court. Th a covenanted civil servant con Rs. 4,800 a year. The number of civilians at present in the Indian Ser 1,000. The Native Army absorbs the portion of the *Indian Staff Corps;* t total of about 3,000 officers some 380 to the Police or the Public Works De are in Civil or Political departments, branch being the most sought after. appointments in the *Indian Staff Corp* to successful candidates for admis Royal Military College, Sandhurst, a petitive examination, viz. in June and Upon receiving his commission a succe date is provided with a passage to I attached for a year to a British reg then transferred to a native regime has passed certain language and tests, which must be passed before the third year from appointment to Staff Corps, he is practically on probat nations to Indian cadetships and Hon cadetships, giving special facilities into the army, with choice of appoint Indian Staff Corps, are also given by t of State for India. Applications shou to the Military Department of the Officers in India who entered the A Sept. 1, 1892, remain eligible, without age, for appointment to the Indian under the old regulations requiring th should have completed one year's regi and should be subject to probation fo eighteen months, which must be native troops. A Lieutenant's Staff commences at Rs. 2,700 a year. In Ju examination is to be held in Englan appointments to the Indian *Police*, one, Bengal four, N.-W. P. and Ou Punjab one. Candidates must be bet 21 on 1st June, 1897, and applicatio sent before 1st May, 1897, to the Judicial and Public Department, I to whom also any inquiries should be Selected candidates will be allotte tioners to provinces "upon a cons

all the circumstances, including their wishes." Initial salary of a probationer is Rs. 3,000 a year. On passing the necessary examinations, which must be done within two years of arrival in India, the probationer will be appointed an Assistant-Superintendent on Rs.300 a month. The *patronage of the Secretary of State for India* is very small, and is chiefly dependent on the uncertain requirements of the Government of India in the Ecclesiastical, Judicial, or Educational Departments. *Chaplains*, on appointment, will, for the first three years, be on probation only. Appointments, usually of distinguished graduates of the Universities of the United Kingdom, are made to the Indian *Educational Service* by the Secretary of State. No limits of age are fixed. Appointments are in the first instance usually for five years, the salary beginning at Rs. 500 a month, with annual increments of Rs. 50 a month. The number of appointments varies year by year and is not large. The Local Governments have many appointments in their gift, but no one who is not a native, a covenanted civilian, or an officer of the Staff Corps can be appointed to a post of over Rs. 200 a month without the sanction of the Government of India—the departments excepted from this rule being: *Opium, Salt, Customs, Survey, Mint, Public Works Department, Police.* The *Public Works Department* is recruited from the Royal Indian Engineering College at Coopers Hill, from the corps of Royal Engineers, and, in respect of natives, from the Civil Engineering colleges in India. About 50 candidates, between the ages of 17 and 21 on the 1st July of the year of admission, are admitted in September each year to the college at Coopers Hill, candidates receiving preference according to application for admission. After a three years' course of study, during which the annual charge is £183, the students undergo a competitive examination, and the highest obtain appointments in India (commencing at Rs. 4,200 a year), the number of these being twelve for those who entered the college in 1896, and probably the same number for those entering in 1897. Candidates for the *Telegraph Department* enter the college in the same manner, but their competitive examination is at the end of two years, and the number of appointments offered in 1897 and subsequent years will probably be three annually. The commencing salary is Rs. 3,600 a year. The *Forest Department* of India is recruited from this country; the examination usually takes place towards the end of June. In 1897, six appointments will be offered for competition, the limits of age being 17 and 20 on the 1st of June, 1897. Applications should be made to the Revenue Department of the India Office before 1st May, 1897. In the entrance examination good sight, good hearing, and good powers of physical endurance are insisted on. The course of study extends over about three years, divided into seven terms, to be passed at Coopers Hill, and a period of study under supervision in foreign forests. The charge for each of the seven terms spent at the college is £61, and for the period of foreign study is £150. Probationers who acquit themselves creditably during their college course will begin on arrival in India as Assistant Conservators of Forests, on a salary of Rs.4,200 a year. Examinations for the *Medical Service* take place generally in February and August. The number of appointments to be offered in February, 1897, has not been yet (Nov. 1896) advertised. In previous years the number has been about 12. Candidates must be between the ages of 21 and 28 at the date of examination, and must possess a diploma or diplomas entitling them under the Medical Acts to practise both medicine and surgery. No candidate may compete more than twice. Successful candidates are required to attend a course for not less than four months at the Army Medical School at Netley, during which period they receive an allowance of 8s. a day, to cover cost of maintenance. The commencing salary in India is Rs. 3,810 a year; the highest medical appointment in India carries a salary of Rs. 32,400. The greater part of the medical service is in civil employ, but liable to be recalled to medical duty.

The *Ecclesiastical Establishment* in India, which forms a Civil, not a Military department, consists of the Bishops of Calcutta, Madras, Bombay, Lahore, and Rangoon (whose names will be found at page 450), and 160 Chaplains. Certain allowances are also paid from Indian revenues to other clergymen, and to priests and ministers of other denominations when ministering to British regiments. Applications for appointment to the Ecclesiastical Establishment should be made to the Secretary of State. Chaplains are on probation for the first three years after appointment.

Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, of which a partial summary will be found in the India Office List, published by Messrs. Harrison, 55 Pall Mall, S.W.

THE FINANCES OF INDIA FOR THE YEARS ENDED 31ST MARCH, 1894 AND 1895.

The notation Rx. signifies ten Rupees. (*A Rupee was approximately equivalent to* 1s. 2·547*d.* in 1893–94; *to* 1s. 1·000*d.* in 1894–95; *and to* 1s. 1·638*d.* in 1895–96.)

The Currency legislation of June, 1893, was intended eventually to establish a stable rate of 1s. 4*d.* the rupee, or 15 rupees to the £1. Exchange on 11 Nov., 1895, however, stood at about 1s. 3⅞*d.*

Total Expenditure charged against Revenue	Rx.92,112,212	Rx.94,494,319

In addition to the above expenditure from revenue there was a capital outlay in 1894–95, not charged to revenue, of Rx.3,852,086 on State Railways, and of Rx.594,145 on Irrigation Works, making a total of Rx.4,446,231.

Digitized by Google

The total revenue and expenditure for the year 1894-95 may be classified in the following manner:

Receipts:		*Expenditure:*	
In India—		In India—	
Imperial	Rx.71,354,112	Imperial ...	Rx.42,257,952
Provincial ..	19,641,826	Provincial ..	19,297,834
Local	3,818,893	Local	4,192,885
In England ..	372,598	In England ..	28,775,648
Total ..	Rx.95,187,429	Total....	Rx.94,494,319

RECEIPTS AND EXPENDITURE IN THE SEVERAL PROVINCES FOR THE YEAR ENDED MARCH 31, 1895.

Provinces.	Receipts.	Expenditure.
India	Rx.17,637,741	Rx.22,342,726
Bengal	20,519,357	8,448,040
N.-W. Provinces & Oudh	11,374,173	5,235,561
Punjâb.....	7,912,014	4,815,460
Central Provinces...	2,310,541	1,396,426
Burma.....	5,575,323	3,709,784
Assam	1,227,038	813,805
Madras	13,480,589	9,835,703
Bomb. (with Sind)	14,778,055	9,120,166
England	Rx.372,598	Rx.28,775,648
Total	Rx.95,187,429	Rx.94,494,319

The cost of the Bombay and Madras armies is charged to those Presidencies; the remaining military expenditure is debited to India.

The following is a Table of Revenue and Expenditure for 1842-43, and for each tenth year since, and for 1894-5, together with the totals of 53 years between 1842-3 and 1894-5, the values being stated in the notation of Rx. (Rx.=Rs. 10). It should be borne in mind that the area of British territory in India has risen since 1842 from 626,000 to 965,000 square miles:—

REVENUE.

	Land.	Opium.	Taxes.	Public Works.	Tribute & other.	Total.
	Mil. Rs.	Mil. Rs.	Mil. Rs.	Mil. Rs.	Mil. Rs.	Mil. Rs.

Total 53 Yrs.	427·09	498·37	230·97	881·41	579·39	32·26	172·61	2814·10

During these 53 years there have been 23 years of surplus and 30 of deficit, the net deficit amounting to 46·29 millions of tens of rupees. During the 15 years previous to the Mutiny there had been 11 years of deficit and 4 years of surplus, the net deficit amounting to 6·13 millions. The Mutiny years 1857 to 1862 added 36·28 millions to the total of deficits. Since 1862, there have been 19 years of surplus and 14 of deficit, yielding a net surplus of 1·41 millions, to which may be added 5·33 millions charged but not spent (therefore really surplus) under the head of Famine Insurance. Under this head has also been charged expenditure on construction of railways and irrigation works designed to protect the country against famine to the amount of 11·12 millions. The year 1895-96 was originally estimated to give a surplus of Rx.46,000; later estimates increased the surplus to Rx.951,000, and in his Budget Statement on August 13, Lord George Hamilton indicated that the actual surplus would be yet larger, viz., Rx. 1,600,000. The surplus for 1896-97 was originally estimated at Rx.460,000, calculated on an average rate of exchange of 1*s.* 1¼*d.* the rupee. Exchange has since risen to the benefit of Indian finance, but this may be counterbalanced by loss, or expenditure, from famine. The annual burden of taxation in India is calculated to amount to about Re. 1, 4 annas per head of population, if the land revenue demand which is of the nature of rent be excluded. Including land revenue it would be about Rs. 2, 6 annas.

The INDIAN DEBT stood on the 31st March, 1896, at Rx.103,782,000, plus £115,904,000; adding Rx.19,205,000 for other obligations, the liabilities of the Indian Government are shown at Rx.122,987,000 + £115,904,000. On the side of assets there are Rx.89,331,000 for railways constructed by the State, £59,236,000 for purchased railways, £5,608,000 for advances to Railway Companies, Rx.31,109,000 for Irrigation Works, Rx.11,459,000 lent to Municipalities and Native States, and cash balances amounting to Rx.16,501,000 and £3,795,000, making altogether totals of Rx.148,440,000 and £68,639,000. The liabilities uncovered by assets stand at £47,265,000 in sterling, diminished by Rx.25,453,000, the amount of net assets in rupees. In 1895-96 no debt was incurred either in England or India, the capital outlay on Railways and Irrigation being met from cash balances.

In the preceding statement of expenditure in 1894-95 the charges for interest on debt are found partly under the head of Interest (Rx.4,647,557, to which may be added Rx.476,460 for obligations other than debt), partly under the Railway Revenue Account to the extent of Rx.5,719,418, and partly under Irrigation to the extent of Rx.1,194,115. It may also be observed that the Indian Government received interest to the amount of Rx.815,062 on the sums lent by it to Native States and municipalities. By the operations of the last two years the interest paid on the Indian debt has been reduced by conversion in India and England.

EXCHANGE AND CURRENCY.—The sterling expenditure of the Indian Government was, in 1895-96, about 16 millions, having during the 10 previous years averaged 15 millions. The less the value of the Indian silver coinage relatively to gold, the greater the number of rupees required to meet this sterling expenditure. Loss by exchange is the number of rupees actually required beyond what would have been necessary if 10 rupees had been, as they used approximately

Digitized by Google

to be, equivalent to each £1 sterling. Previous to 1872-73 the value of the rupee had remained fairly steady at an average of nearly 1*s.* 11*d.*, its highest value having been slightly above 2*s.* 2*d.* in 1860-61, and its lowest almost down to 1*s.* 9*d.* in 1848-49. In 1871-72 the value of the rupee relatively to gold began to fall rapidly; in five years it had sunk from over 1*s.* 11*d.* to 1*s.* 8½*d.* The next five years it remained fairly steady at something under 1*s.* 8*d.* During the last thirteen years the following are the figures, together with the actual loss thrown on the Indian Exchequer by the depreciation of the rupee below its nominal value of £1 = Rs.10.

Year.	Average Rate.	Loss by Exchange.
	s. d.	Rx.
1882-83	1 7·525	3,231,000
1883-84	1 7·536	3,360,000
1884-85	1 7·308	3,536,000
1885-86	1 6·254	4,290,000
1886-87	1 5·441	5,632,000
1887-88	1 4·898	6,049,000
1888-89	1 4·379	6,368,000
1889-90	1 4·566	6,758,000
1890-91	1 6·090	5,448,000
1891-92	1 4·733	7,181,000
1892-93	1 2·585	10,287,000
1893-94	1 2·547	11,306,000
1894-95	1 1·101	14,615,000
1895-96*	1 1·680	13,524,000

The currency of India is the silver rupee, which contains 165 grains of fine silver and 15 grains alloy. With silver at 60 pence the oz. the value of the rupee would be 1·858*s.* Until June, 1893, possessors of silver had the right of getting it coined into rupees at the Indian Mints. At that date the Indian Mints were closed for public coinage of silver. By a provision in the law, allowing the public to purchase rupees at the rate of 15 for £1, *i.e.* at 1*s.* 4*d.* the rupee, Government indicated that this was the rate at which it was expected exchange would permanently settle itself. The expectation has not yet been realised.

* Revised estimate (the actual rate was 1 1·638).

For some time prices of both silver and Bills showed a tendency to fall. In July, 1894, silver was procurable at 28½ per oz., and Bills at less than 1*s.* 1*d.* the rupee. The rates have since been higher, and till October, 1896, fairly steady—at about 30⅛*d.* per oz. for silver, and 1*s.* 2¼*d.* per rupee for bills. In Nov. 1896 the rupee rates rose quickly. Latest prices (Nov. 11, 1896) are 29½*d.* per oz. for silver, and 1*s.* 3½*d.* per rupee for Bills. At these rates rupees are valued at almost 39 per cent. more than the value of the silver of which they consist.

The Opium Revenue.—The growth of the poppy in *British India* is strictly confined to the districts of Behar and Benares in Bengal, in which 512,501 acres were under poppy cultivation in 1894-5. The opium manufacture has been a Government monopoly for more than a hundred years. The cultivators undertake to deliver the whole of the produce at the contract price, recently raised from Rs. 5 to Rs. 6 for a seer, or 2 lbs., and when the crop is ripe the juice is collected and sent to the Government Agencies at Ghazipur and Patna. Here it is dried to a certain consistency, and packed in chests containing about 140lbs. each. It is then sent down to Calcutta, disposed of by auction at monthly sales, and exported to China and the Straits Settlements. In the year ending 31st March, 1895, 39,780 chests were thus sold for export, at a rate of Rs.1,338 per chest. The sales realised Rx.7,324,000. The cost of production of Government opium in 1894-95 was Rx.1,616,000, and the net revenue Rx.5,708,000, to which, however, may be added Rx.197,000 as the value of opium issued for the use of the Excise Department in India.

A large quantity of opium is also grown in the Native States of Central India, and pays duty on its entry into the Bombay Presidency. This opium is called Malwa opium, and is also exported for the most part to China. The duty on this opium was Rs.600 a chest at the beginning of the year, but at the end of 1894 was raised to Rs.650; in 1896 it has again been reduced to Rs.600. The revenue derived by the Indian Government from this duty amounted in 1894-95 to Rx.1,801,000, 29,577 chests having paid duty. The cost of collection is insignificant.

Gross Amount of the Revenue and Expenditure (excluding Capital Expenditure on Public Works not charged to Revenue) in India and in England, showing Surplus or Deficiency in each of the ten undermentioned Official Years.

(*Throughout this statement Rx. represents ten Rupees, or their equivalent, whether the transactions have taken place in England or in India.*)

The opium exported to China pays the Chinese Government a duty of Rs.350 a chest, which exempts it from any future payment of "likin" or transit duty to which the native-grown drug is liable. In face of the competition of the native-grown drug the imports of Indian opium into China are declining.

SALT.—The duty on salt is Rs. 2. 8 annas a maund (82⅔lbs.) in the whole of India, excepting Burma, where it is 1 rupee a maund. The total consumption of salt in British India in 1895-96 is stated at 34,590,000 maunds. Taking 50 lbs. as the estimate of the consumption of salt by a family of a man, wife, and three children, the annual family expenditure on salt would be less than 2 rupees. The net revenue from salt in 1894-95 was Rx. 8,167,000.

RAILWAYS, &c.—Excluding the 59 miles of lines in French and Portuguese territory, the number of miles open for traffic on 31st March, 1896, was 19,678; 11,345 miles on the standard (5 ft. 6 in.) gauge, 8,066 on the metre gauge, and 267 miles on other gauges. In addition to the open lines there were 3,789 miles of line then under construction, or already sanctioned for construction. Sanction was given during the year 1895-6 for the construction of 2,394 additional miles of line. The total amount of capital expended on the open Railways (including steamboat service and ferries) up to 31st December, 1895, was Rx. 244,380,000, of which Rx. 184,640,000 represented the cost of standard gauge lines and Rx. 58,835,000 lines on the metre gauge; the gross earnings per mile averaged Rs. 336 on the standard gauge and Rs. 161 on the metre gauge, the percentage of working expenses on gross earnings being 45 and 49 respectively, and the percentage of net earnings on total capital outlay on open lines 5·78 and 5·73 respectively. The year's net receipts on the Indian railways in 1895 were Rx. 14,112,000, or a return of 5·78 per cent. on the capital sunk (as measured in rupees), against Rx. 13,534,000, or a return of 5·69 per cent. in 1894; the number of passengers increased by 8½ millions to 153 millions, and the goods traffic amounted to 33⅓ million tons, or nearly a million tons more than in 1894. Owing mainly to fall in exchange there is yearly a net loss to Government on working the railway system in India calculated for 1894-95 at Rx. 2,348,000, and for 1895-96 at Rx. 1,784,000. With these figures the loss for the whole period since 1858-59 to end of 1895-96 would amount to Rx. 52,927,000. But it should be remembered that the railway account is charged with interest on outlay at the rate of 4 per cent., whereas the Government can now raise money at less than 3 per cent.; and the interest charges include large amounts (in 1895-96 44 lakhs) for sinking funds for the redemption of the capital of certain railways purchased by the State. On *Irrigation* works the Government have laid out a capital of Rx. 36,617,683, which, apart from the advantages to cultivators and protection against famine, gave a return to the State in 1894-95 of about 4·3 per cent. About 11 million acres are irrigated by Government works. The *net* expenditure of the Government of India in 1894-95 on public works, old and new, including special Defence and Famine Relief Works, was Rx. 12,658,000, of which only Rx. 4,446,000 was reckoned as capital not chargeable to revenue. There are 71,000 square miles of *Forests* reserved and scientifically worked by the State in British India, besides about 41,000 square miles of forests belonging to the State which may hereafter be reserved. The forests yielded in 1894-95 a net revenue of Rx. 717,000. The length of *telegraph* lines in India on 31st March, 1895, was 44,648 miles. They yielded in 1894-95 a revenue of 3·89 per cent. on their capital cost of Rx. 5,738,000. The number of messages exceeded 4½ millions. The *Post Office*, which conveyed 394 millions of letters, post-cards, and newspapers, &c., was worked at a net profit to Government of Rx. 26,000.

The ROYAL INDIAN MARINE consists of four troopships of 1500 to 4000 tons each, three other steamers of about 1000 tons each, and a number of smaller craft for harbour and river navigation. The trooping service between England and India is carried out by hired steamers.

ROYAL INDIAN MARINE.

Director of the Royal Indian Marine and Resident Transport Officer, Bombay, Capt. J. Hext, R.N. (retired), A.D.C., C.I.E.

Deputy ditto, Capt. A. Gwyn.

The business of the Indian Troop Service is under the superintendence of the Director of Transports at the Admiralty.

ARMY.—The actual strength of the *Army of India* on the 1st April, 1895, is shewn in the statement on the following page.

For police duties and frontier service the regular military is supplemented by about 170,000 Native Police, officered mainly by Europeans. In addition, the Native Army Reserves numbered 14,000 men (infantry), and the Imperial Service Troops furnished by Native States contributed 18,000, of whom 8,000 were cavalry, besides transport corps and sappers. Further, there were European and Eurasian volunteers to the number of 29,000, of whom 26,000 were declared efficient. British troops have been re-armed with the magazine rifle, the Native infantry with the Martini-Henry, and the Field artillery with new breech-loading guns. The army is now under a single Commander-in-Chief, and is divided, as is shown in the statement on p. 463, into five Lieutenant-Generals' commands. In 1896 there were no military expeditions of importance, but the Indian Army supplied a contingent of about 5,000 men for the garrison of Suakin. It was decided by the Home Government against the claim of the Indian Government that India should pay the ordinary charges of these troops, a decision which was considered by many to be unfair to India. The contingent was to be withdrawn to India by the close of the year.

Education makes steady progress. The number of educational institutions in 1894-95 was 149,496, and the number of male scholars was 3,799,170, and of female scholars 390,600. The proportion of scholars to the population of school-going age is only 12·02 per cent. Of the institutions, about three-quarters are maintained by the State, or aided by grants; the remainder being private and unaided. There are five Universities in India, founded on the model of the University of London, viz., those of Calcutta, Madras, Bombay, and Allahabad, and the Punjab University. The total expenditure on education in India is constantly increasing, and amounted to Rx. 3,309,000 in 1894-95, of which 27·31 per cent. was provided by provincial revenues and 29·54 per cent. from fees.

The **Indian Municipalities** began for the most part in 1884-85 to enjoy the more popular system of representation granted to them by Lord Ripon's measures of Local Self Government. The number existing in India in 1894-95 was 755, with a total population of 15,653,000, and an income, exclusive of loans, of nearly 3¼ millions (Rx.). In almost all districts in British India there are local district boards, partly representative, for the management of local interests. The total income administered in India by local bodies, including municipalities, port trusts, and district boards, was in 1894-95 Rx. 8,437,000.

MAILS for India are made up and despatched from London *vid* Brindisi, every Friday evening. Letters reach Bombay in 17, Madras in 19, Calcutta in 20, and Rangoon in 22 to 25 days. The postage rate for letters to any part of India or Burma is 2½*d.* and for cards 1*d.*; newspapers, not exceeding 4 oz. 1*d.*; books, magazines, &c., every 2 oz. ½*d.*

The **Parcel Post** (to Aden and Burma also) is made up every Wednesday morning, the limit is 11 lbs., and the charge—first lb. 1*s.*, and every subsequent lb. 8*d.*

Telegraphs.—Two lines of telegraphic communication are open. The charges by the Indo-European Company or by the Eastern Company per word are—to India, 4*s.*; Burma, 4*s.* 2*d.* *Vid*

Turkey the rates are—for India, 3*s.* 8*d.*, and for Burma, 3*s.* 10*d.*

The P. and O. Company convey parcels to India at the rate of 1*s.* per lb. (limit 50 lbs.) for any post-town or district in British India; books at the rate of 6*d.* per lb. There are various regulations and restrictions, which may be learnt from the notice issued from the P. and O. Company's offices, 122 Leadenhall Street, and 25 Cockspur Street.

Weights, Measures, and Money.

Weights.

1 Tola ..... = 6$\frac{180}{187}$ dr. avoir.
5 Tolas ... = 1 Chittack ..... = 2$\frac{3}{5}$ oz. ,,
16 Chittacks = 1 Seer ..... = 2$\frac{2}{7}$ lbs. ,,
40 Seers..... = 1 Mun (Maund) = 82$\frac{2}{7}$ lbs. ,,
27·222 (nearly 27½) Maunds ... = 1 ton.

Lineal measures vary throughout India; in Bengal 3¼ Beegahs go to an acre.

A lac (lakh) is 100,000; a crore is 100 lacs.

Money.	Sterling value at the Exchange of 1*s.* 4*d.* = R. 1.
1 Pie ..... =	⅓*d.*
3 Pie ... = 1 Pice..... =	¼*d.*
12 Pie ... = 1 Anna ..... =	1*d.*
16 Annas = 1 Rupee ..... =	1*s.* 4*d.*
16 Rupees = 1 Gold Mohur =	£1 1*s.* 4*d.*

A rupee contains 165 grains of pure silver and 15 of alloy.

Estimated *Agricultural Statistics.*—The net area cropped in British India during 1893-94—197 million acres, of which 28 millions bore two or more crops, and 33 millions were irrigated. The total area of food crops was 185 million acres, of which 68 were under rice, 38 under millet, 22 under wheat, 10 under gram, 5 under barley, 40 under pulse, &c. The chief non-food crops were oilseeds, 15 million acres, and cotton 10 millions. Agricultural stock were estimated 98 million cattle, 37 million sheep and goats, 2½ million horses, ponies, &c.

SEA-BORNE TRADE OF INDIA.*

The *course of trade* with India is shewn by the fact that in the last 46 years Indian exports of merchandise have exceeded the imports by 1,010 million Rx., while in the same period the net imports of treasure have amounted to 483 millions.

	1893—94.	1894—95.	1895—96.

* Aden is not a part of India for purposes of trade statistics. The trade of Aden in 1895-96 was valued at 947 lakhs, of which 135 lakhs were with India, and 63 lakhs inland. The trade of the Somali coast amounts to about 100 lakhs. Aden is a great emporium for the commerce of the Arabian and African coasts.

Indian trade in 1893-94 was disorganized by the closing of the Indian Mints, and the refusal of the Secretary of State for some months to sell his bills at the market price. In 1894-95 normal conditions again prevailed, the net exports exceeding the remittances of government.

By the Tariff Act of 1896 cotton yarn and cotton sewing thread were exempted from duty, and the tax on other cotton goods was reduced to 3½ per cent. Most other articles pay a 5 per cent. duty. There are special import duties on arms and ammunition which are taxed mainly for police purposes. Liquors pay duty, generally at Rs. 6 a gallon L.P.; and salt pays Rs. 1 a maund (82 lbs.) in Burma, and Rs. 2·8 annas in the rest of India. Iron and steel goods, however, pay 1 per cent., and machinery, coal, raw cotton, jute and wool, grain and pulse, oilcake, manures, living animals, unmanufactured tobacco, quinine, gold, precious stones and pearls, and a few other unimportant items are free from duty. Opium grown in the native States pays duty on crossing the land frontier into British Indian territory; and opium not covered by a government pass pays Rs. 24 per seer of 80 tolas.

The Indian sea-borne trade was shared by the various maritime provinces as follows, the figures being lacs of rupees for imports and exports of merchandise respectively:—Bengal 7·19 and 46·44; Bombay 27·91 and 34·16; Madras 5·69 and 12·77; Burma 4·71 and 10·54; Sind 3·81 and 5·64.

During the year 1895-96 Exchange was fairly steady, and conditions in Europe and the far East were favourable to a revival of trade. The only abnormal element was the change of the tariff. In anticipation of the change the imports of cotton goods were extremely large in 1894-95, and fell off in the same degree in 1895-96. This falling off was almost compensated by the larger imports of other articles.

The total number of vessels which entered and cleared at Indian ports from and to foreign countries declined in 1895-96 from 10,577 ships, with a tonnage of 8,255,822 tons to 10,297 ships aggregating 8,226,600 tons. Of this tonnage 81 per cent. sailed under the British flag. In the coasting trade of India there were in 1895-96 337,285 vessels registered as having entered and cleared, representing a tonnage of 26,904,000 tons. Steamers are gradually replacing the sailing vessels and native craft engaged in the coasting trade.

The value of the coasting trade, imports and exports being added together, amounted to Rx. 70,317,044 in 1894-95, and Rx. 74,604,638 in 1895-96.

The following statement exhibits the principal articles of the foreign trade of India in 1895-96, Government transactions being excluded :—

Imports.	Lacs Rs.
Cotton goods and yarn ...	25,75·6
Metals (excluding hardware and cutlery) .	6,77·3
Machinery, &c.	3,23·7
Oils	3,13·7
Sugar	3,06·5
Provisions ...	1,79·7
Silk (man.) ...	1,70·4
Liquors	1,69·7
Apparel	1,59·4
Railway plant .	1,52·1
Woollen goods	1,44·6
Hardware and cutlery	1,42·3
Coal, &c.... ...	1,40·3
Silk (raw) ...	1,23·3
Dyes, &c. ...	85·9
Drugs, narcotics, &c. ...	84·6
Glass	74·1
Spices	65·9
Salt	65·3
Precious stones, &c.	65·2
Tea	49·3
Chemicals ...	45·6
Governmt. Stores	3,62·0

Exports, (*excluding re-exports, amounting to* 4,72·1 *lacs.*)	Lacs Rs.
Cotton	14,09·0
Rice	13,53·7

Belgium	6,68·2
Egypt.....	5,45·8
Austria-Hungary	4,67·5
Ceylon	4,21·4
Italy	3,56·1
Japan.....	3,23·7
Mauritius.....	2,95·6
Persia.....	2,58·7
Russia	2,26·9
Arabia	1,83·0
Australia (including New Zealand, &c.)	1,45·2
Zanzibar & E. Africa.....	1,36·1
Turkey in Asia	1,24·9
South America	1,18·5
Aden	1,07·7
Holland.....	99·6

For the first five months of 1896-97 the foreign trade of India shows the following variations as compared with 1895-96.

Imports of merchandise, increase 313 lacs, or 10 per cent.; treasure, decrease 30 lacs, or 6 per cent.

Exports of merchandise, decrease 233 lacs, or 5 per cent.; treasure, increase 37 lacs, or 18 per cent.

The output of the 96 collieries in India in 1894 was 2,820,000 tons. The 144 cotton mills at work contained 3,711,669 spindles, and the 29 jute mills 201,217 spindles. There were also 6 woollen and 10 paper mills, and 23 breweries. With regard to other industries particulars are not so precise.

LARGE CITIES WITH POPULATIONS EXCEEDING 150,000 (INCLUDING CANTONMENTS).

To this again may be added for French possessions 282,923, and for Portuguese possessions 561,384; making a grand total for all India of 289,187,316.

Digitized by Google

Frontier Land Trade.—The registration of the trade which crosses the land frontier of British India is defective, but constant efforts are made to render it more complete and accurate.

The following is a table showing the land trade of India with the neighbouring regions, some of which, such as Kashmir and the Shan States, are not, politically, foreign countries; Zimmé (Chiengmai) is a province of Siam :—

	1894-95.		1895-96.

The *Home Charges* amounted in 1894-95 to £15,503,982 (Rx. 28,403,050), thus: — Railway Revenue Account, including Railway Debt, £5,739,000; Interest and Management of Debt other than that for Railways, £2,659,000; Stores' £991,000, of which £73,000 were Marine, £566,000 Military, and £82,020 for Special Defence Works; Army Effective charges at home amounted to £1,031,000, and non-effective charges to £2,902,000; Civil and Marine non-effective charges aggregated £1,086,000; Furlough payments amounted to £597,000, of which £323,000 were under the head of Military. The cost of the India Office was £190,000. The Home charges for 1895-96 are estimated at £15,491,000, and for 1896-97 at £15,735,000. The *Royal Commission*, which was appointed to enquire into Indian expenditure and into the question of the division of certain charges between the Indian and English treasuries, began its sittings in 1896, directing its attention in that year mainly to the financial machinery of the Government of India, and to explanations of noteworthy increases of expenditure in the various departments. On the second portion of their reference relating to the apportionment of charges some evidence was also taken. Two volumes of evidence have been issued (C. 8,258, 8,259).

Famine Relief and Insurance.—In 1894-95, the grant for famine relief and insurance was fixed at Rx.1,000,000 a year. Since 1881 to the end of 1894-5, the total amount appropriated under this head amounted to Rx.16,644,000; of this total actual famine relief had cost only Rx.302,000, Rx. 1,776,000 had been spent in constructing protective irrigation works, and Rx. 6,021,000 in constructing protective railways, while Rx.3,218,000 had been set against charges in the railway revenue account to cover the loss on the working of certain protective railways, and Rx.5,327,000 used for the reduction or avoidance of debt. During this period there has been no serious wide-spread famine in India. But the year 1896 closes with a threatening outlook. In Nov., 1896, the area already affected by scarcity contained a population of 36½ millions in the North-West Provinces, Oudh, the Punjab and Central Provinces. The condition of 19 millions more in Bengal, Bombay, and Madras, and of a further 19 millions in the Native States of Hyderabad, Rajputana and Central India, was threatened. In the North-West Provinces and Oudh one crore of land revenue had already been suspended, and 18 lakhs advanced to cultivators for seed and the construction of temporary wells.

Note.—The populations of Aden and Andaman Islands are not included in these columns.

COUNTRIES CONTIGUOUS TO OR IN RELATION WITH BRITISH INDIA.

FRENCH and Portuguese possessions in India are described on page 454. The Native States *in* India which enjoy almost complete independence are Nepal and Bhutan, both of which have slight political relations with China, but with no other foreign Power. In Nepal there is a British Resident, but he does not interfere in matters of internal government.

Outside India there remain to be described; (1) within the sphere of influence of India, Baluchistan, Afghanistan and parts of Arabia; (2) the independent States of Persia and Siam; (3) the dependencies of Russia, of China, of France, of Italy, and of Turkey, so far as these come within the purview of the British Government in India.

NEPAL.

Sovereign, His Highness Maharaja Dhiraj, Pirthivi Bir Bikram Shamsher Jang Bahadur, Sah Bahadur Shamsher Jang, *b.* 8 August, 1875; *suc.* 17 May, 1881; *m.* a daughter of the Maharaja Sir Shamsher Jang, K.C.S.I.

Prime Minister, His Excellency Maharaja Sir Bir Shamsher Jang Rana Bahadur, K.C.S.I., *appointed* 22 November, 1885.

The Kingdom of Nepal lies between British India on the south and Tibet on the north, and occupies the southern ranges of the Himalayas for a distance of about 500 miles, extending about 20 miles beyond the base of the mountains into the plains. It has an area of about 54,000 square miles, a population of about 2,000,000, and for administrative purposes it is divided into four provinces, and these into fifteen districts. Nepal may generally be described as a wild, mountainous country, containing, amongst others, Mount Everest. Between the sterile ranges, however, lie many beautiful valleys, the soil of which is extremely fertile; their elevations are from 2,000 to 6,000 feet above the sea level. The lower hills are covered with jungles of sal, pine, spruce, mimosa, oak, &c., in which wild animals abound. The chief minerals are copper, iron, sulphur, jasper, marble, and rock crystal. Nepal has commercial relations with Tibet and British India, and the value of its exports to the latter in 1895-6 was Rs.18,337,000; the imports amounting to Rs.13,624,000. The revenue, realised chiefly from land rent, and from export and import duties levied at the frontier, amounts to about Rs.15,000,000. The trade routes are numerous, the most important being that connecting Katmandu with Motihari and Segowli, in Bengal. Nepal exports rice and other grains, oilseeds, *ghi*, ponies and cattle, opium, musk, madder, borax, jute, hides and furs, ginger, cardamoms, and yaks' tails. It receives in exchange raw and manufactured cotton and twist, woollen cloth, shawls, rugs, flannel, silk brocade, embroidery, sugar, spices, indigo, tobacco, salt, &c. The manufactures are coarse woollen cloth, iron, copper and brass vessels, and bell-metal. The aborigines are of the Mongolian type, and the religion is Hinduism among the upper, and a form of Buddhism among the lower classes. The country was conquered by the Gurkhas in 1767. The frequent aggressions of these people brought on a war with the British, in 1814, which was concluded by the Treaty of Segowli in 1815, but it is only within the last forty years that our relations with the country have become friendly. The policy of seclusion is, however, consistently followed by the native rulers. A Resident of the Indian Government resides at the capital, but does not interfere in internal affairs. Representatives of Nepal greet each new Viceroy with messages and presents. Complimentary missions are also sent periodically to China. On occasions when friction arises between Nepal and Tibet, Chinese authorities intervene in the interests of peace. Under arrangements with the State, recruits in large numbers are obtained from the hill tribes of Nepal for the Gurka regiments. The army of Nepal numbers 42,000 men (including 25,000 irregulars), with 1,000 guns. The sovereign, a minor, is the nominal chief; but the real power rests with the Prime Minister. The chief receives a salute of 21 guns in British India.

Khatmandu—British Resident, Col. Henry Wylie, C.S.I. ..... Rs. 2,250

Transit, 22 to 24 days.

BHUTAN.

This is another outlying State on the southern slopes of the Himalayas with physical features and productions somewhat similar to those of Nepal. In 1863 the Government of India engaged in war with it in consequence of certain outrages to British subjects and representatives. There is no British agent now residing in the State. The Government of Bhutan is dual in form, with a spiritual chief, the Dherma Raja—who is an incarnation of the founder of the State—and a temporal chief, the Deb Raja, who governs. Bhutan has closer relations with Tibet than with India; its commerce with the latter is insignificant. Such relations as there are between Tibet and India are friendly. There is no knowledge of the area (about 20,000 square miles), population, or revenue of the State.

BALUCHISTAN.

Khan of Kalat, His Highness Mir Mahmud Khan, G.C.I.E., 1893. Salute in British territory 19 guns.

Baluchistan is a term of political geography. Its northern and western boundaries were finally laid down by agreements with Afghanistan and Persia in 1896. It comprises, (1) "British Baluchistan," which includes the Khan of Kalat's assigned districts of Quetta and the Bolan and is a province of British India; (2) the country inhabited by the Marri and Bugti tribes; (3) the Bori and Zhob valleys, which are directly under the British Political Agent: (4) the Native State, including Kalat proper which is under the immediate rule of the Khan, Sarawan and Jhalawan, or the tracts belonging to the two leading Brahui clans and their chiefs, the Chiefship of Las Bela, Kharan, and Makran. The area of division (4) is given at 106,000 square miles, with a population of 220,500. It has a sea-coast 600 miles in length, with harbours at Sunmiani, Kalmat, and Gwadur; its other boundaries march with India, Afghanistan, and Persia. The country is mountainous, the rivers deficient, and cultivation confined to narrow valleys. The summer heat is intense, and in the higher altitudes the winter cold is no less severe. Camels, horses, kine, buffaloes, sheep, and goats form the live-stock of the country; wheat, barley, millet, dates, and fruit are largely grown. Lead, copper, and petroleum are the

Digitized by Google

principal mineral products. The most numerous tribe is that of the Brahuis, who, as well as the Baluchis, are Sunni Mohammedans. The Khan of Kalat is the head of a rather loose confederacy; and till his treaty with the British Government in 1876, he received a rather spasmodic obedience from his feudal inferiors. Mir Khudadad Khan, C.C.S.I., who was Khan from 1857 to 1893, was deposed in the latter year in favour of his son, the present Khan, having been guilty of a number of barbarous and cruel acts, culminating in the murder of his prime minister. The influence of the British Political Agent is extensive though undefined, and the State cannot be considered as independent even in regard to internal administration. It has no relations with other foreign Powers, and British troops occupy the strong fortress of Quetta commanding the Bolan Pass, and have the treaty-right to occupy any other position in the State. *Capital*, Kalat.

Agent to the Governor-General in Baluchistan and Chief Commissioner of British Baluchistan, Hugh E. S. Barnes .....Rs. 4,000 *per mensem*.

Telegrams 3*s*. 7*d*. or 3*s*. 3*d*. a word.

AFGHANISTAN.

Amir, His Highness Abdur Rahman Khan, G.C.B., G.C.S.I., *s*. 1880, *b*. 1845; has four sons, of whom Sardar Habibulla Khan is the eldest, and Sardar Nasrullah Khan the second, and Umar Jan the youngest, but born of a mother of higher rank than his half brothers. Salute in British territory 21 guns.

By agreement with the Amir, Afghanistan has no foreign relations with other Powers except the Government of India. In all other respects Afghanistan is independent, and the rule of the Amir despotic.

The country lies on the north-west frontier of India, between the parallels of 60° 40′ and 74° 30′ E. longitude, and 30° and 38° 20′ N. latitude, bounded on the west and south by Persia and Baluchistan, and north by the Russian provinces and dependencies in Central Asia. The northern boundary from Persia to the Oxus at Khamiab was laid down by an Anglo-Russian Commission in 1886. East of Khamiab to the Lake Victoria (Wood's Lake) the river is the northern frontier. From Lake Victoria the boundary eastward to the Chinese frontier has been determined and demarcated in 1895 by a joint Anglo-Russian commission. Within these limits the area has a breadth from north to south of about 500 miles, and a length from east to west of about 600 miles. The area may be estimated at 270,000 sq. miles. Geographically its three divisions are the Oxus basin, the Kabul (or Indus) basin, and the Helmand basin. Politically the country is divided into five provinces, Kabul, Kandahar, Herat, Turkestan, and Badakshan with Wakhan. The country is generally rugged and mountainous, the elevation being, with few exceptions, more than 4,000 feet above the sea; the climate is severe, cold in winter, hot in summer. The population is estimated to number 4 or 5 millions, who are divided into a number of tribes,—Ghilzais, Tajiks, Duranis, Hazarahs, Aimaks, Uzbegs, &c. All are Sunni Mohammedans except the Hazarahs and Kizilbashes, who belong to the Shiite sect, and the Kafirs, who are idolators. The Amir has by degrees reduced all the tribes to subordination. In 1896 he brought into submission the hitherto independent Kafirs, Kafiristan having been assigned to the Afghan sphere of influence under the Durand agreement. In the cultivable parts of the country there are generally two crops in the year, one of wheat, barley, or lentils, the other of rice, millet, &c.; wheat, however, being the staple food. Afghanistan is also rich in fruits of many kinds. The mineral wealth of the country is reputed great, but few mines are worked. The roads are unsuitable for wheeled traffic, there being only one good road in the country—that made by the English from Peshawar to Kabul through the Khaibar pass, the route by which India has so often been invaded. Goods are conveyed by beasts of burden, mostly by camels. In the 11th and 13th centuries the Afghan empires of the Sultans of Ghazni and Ghor, and in the last century that of Ahmed Shah, extended over the Punjab. In 1838 the country was occupied by British troops, but three years later a national revolt broke out at Kabul, which resulted in the destruction of an English army, and the abandonment of the country to its native rulers. A second invasion by the English in 1879 led to the temporary occupation of Kabul and Kandahar, and to the annexation to the Indian Empire of the chief passes between Afghanistan and India. Since 1893 the relations of the British Government with the present Amir have improved, and boundary difficulties diminished by demarcation of the frontier. Only one section of the boundary remains to be demarcated. The trade of Afghanistan with India is valued at about Rx. 1,250,000, of which about three-quarters were imports. The Amir's revenue is unknown, and consists largely of payments in kind. It may perhaps be estimated at 10 million rupees. He receives a subsidy of Rs.1,800,000 a year from the Government of India. The Amir has organised a regular army of perhaps 60,000 men; with the help of an English engineer, Sir T. S. Pyne, C.S.I., he has started a factory for the manufacture of guns, rifles, and cartridges. He is also turning his attention to manufactures of articles of commerce, wine, soap, paper, &c.; but his system of monopolies and restrictions on trade is detrimental to commerce. The Amir has an agent at Peshawar, for communication with the Government of India, and a business agent. In England his commercial agent is Sir Acquin Martin (Suffolk House, Cannon Street, E.C.). In 1896 the honorary decoration of G.C.M.G. was conferred on the Sardars Habibulla and Nasrullah Khan. In this year, too, the Amir took to himself a new title of Zia-ul-Millat-wad-Din; Light of the Nation and Religion.

Consul-General, Harry Seymour Foster, M.P.

Called by the natives Iran, is situate between 25° 10′—39° 50′ N. lat. and 44° 15′—63° E. long., extending about 700 miles from north to south, and about 900 miles from east to west, and comprising an area of 630,000 square miles. The Caspian Sea, which bounds it on the north, is wholly under Russian influence; the Persian Gulf on the south is dominated and policed by the British Government. The northern frontiers of Persia are in contact with Russian provinces; its eastern with Afghanistan and Baluchistan, which are within the British sphere of influence; and its western with Turkey. The population was estimated in 1881 at 7,653,600, possibly increased by 1891 to 9,000,000. The greater part of the country is an elevated table-land, encircled, except on the east, by mountains. The northern mountain ranges rise to 12,000 feet above the sea, and the peak of Demavend to 18,469 feet. The central and eastern portion of the plateau is a vast salt desert. With the exception of the Karun it has scarcely a river that can be termed navigable, though some of the rivers are several hundred miles in length, and possess great volume of water. The Karun from Mohamerah to Ahwaz has been thrown open to foreign navigation, and ships of all nations may make use of it. Messrs. Lynch Bros. run a fortnightly steamer to Ahwaz. The Upper Karun from Ahwaz to Schuster is also navigable, but its navigation is reserved to the Persian flag. Railways are practically non-existent, and the Shah has bound himself not to allow the construction of railways in Persia before the end of the century. Cart-roads are being made between Tehran and Tabriz, Tehran and the Caspian, and between Tehran and Ahwaz on the Karun. A carriage-road also exists between Meshed and Dushak in Russian territory. Travelling is mostly done by post-horses and caravans, and transport by pack-animals. The whole country is divided into provinces, of which the chief are Azarbijan, Ghilan, Mazanderan, Astrabad, Ardelan, Kermanshah, Irak-Ajemi, Khorassan, Fars, Luristan, Kerman, and Laristan, which are under Governors-General. The chief products are wheat, barley, and other cereals, cotton, sugar, rice, tobacco, and opium. Its minerals are salt, iron, and coal; copper, lead, antimony, sulphur, &c., also turquoises and some other precious stones, are found. The most important manufacture is that of silks, of the richest and most gorgeous kind. The Persians excel in their dyes, also in brocade and embroidery. Arms, carpets, shawls, felts, cotton and woollen fabrics are among the manufactures. The royal treasury is reputed to contain immense wealth in gold and other valuables, but the administration of the state is corrupt, and suffers frequently from a want of means. The commerce of Persia with Russia is chiefly through ports on the Caspian Sea, or by the Trans-Caspian railway, and with British India by way of the Persian Gulf. European goods also reach Persia from the Black Sea, *vid* Trebizond and Tabriz. The trade through Afghanistan between Persia and India has been almost ruined by the Amir's fiscal policy. Of the foreign trade of Persia half passes north through Russia and Turkey, half south by the Persian Gulf. The Persian Gulf trade is mainly with India and the United Kingdom. In 1895 it amounted to between 6 and 6½ millions sterling in value. Some British goods also reach Persia through Turkey. The exports consist of silk, tobacco, wool, carpets, opium, gums, hides, dates, &c. Protection to British trade is secured by the Treaty of 1841. The Imperial Bank of Persia is an English Company, which has its head office at Tehran and branches in the chief cities. These are, with their populations, Tehran (210,000), Tabriz (180,000), Ispahan (60,000), Meshed (60,000), &c. The regular army numbers about 80,500 (of whom 24,000 with the colours), with 200 field guns; the militia 70,000 men. There are 4,150 miles of telegraph, the greater part managed by the Indo-European telegraph department of the Government of India. The Persians are mostly Mohammedans of the Shiah sect. There are also a considerable number of Armenian Christians. The Government is an absolute despotism; the laws are based on the precepts of the Koran; the dispensation of justice is summary. On the 1st May, 1896, the Shah, Naser-ed Din, who was shortly about to celebrate the jubilee of his succession, was assassinated by a religious fanatic; he was succeeded peacefully by his son, the Wali Ahd, whose government has since been undisturbed. The total revenue has been calculated at 55,369,516 krans (= £1,652,820), and the expenditure at 42,233,472 krans (= £1,260,700) for the year 1888. The kran is a silver coin weighing 71 grains, and has depreciated relatively to gold with the fall in silver. In 1895 the exchange was about 51¼ krans to the £1. 10 krans = 1 tuman. The weights and measures in use in the country are not uniform.

Interpreter, Edward H. Loftus.
Honorary Consul-General, D. K. Mason.
Consul, James Riches.

The Kingdom of Siam lies between the British Indian province of Burma and its dependencies on one side, and the territory of French Indo-China on the other. In May, 1896, an agreement* was arrived at between France and England. This divided Siam into three parts. The main central part, including the basins of the Rivers Menam, Petcha Bouri, and Petriou, was neutralised, the two governments agreeing not to send troops into it or to obtain any exclusive advantages in it. Freedom of action was retained by the two powers in regard to the portions of Siam west and east of the neutralised zone. The western portion includes the Malay States dependent on Siam which are adjacent to the British protected Malay States under the Governor of the Straits Settlements. The eastern portion, including the provinces of Battambong and Angkor, are in close connection with the French protected State of Cambodia and the territories acquired by France by the treaty with Siam of 1893. By this treaty France also acquired a certain right of interference with the Siamese administration west of the Mekong to a distance of 25 kilometres from that river. The area of Siam may be taken at 220,000 square miles, with a population variously estimated between 7½ and 38 millions, but probably numbering about 12 millions, of whom about 4 millions are Siamese, the rest being Chinese, Shans, Laos, Malays, Burmese, and hill tribesmen. The revenue is estimated at £2,000,000. Bangkok is the only much-frequented port; Chantaboon, which was occupied by the French as a guarantee for the fulfilment of the treaty to which Siam assented in 1893, is still in their possession. Siamese trade, which centres at Bangkok, is very largely in the hands of British firms, or of Chinese trading from Singapore and Hongkong. The chief products are rice, teak, sandalwood, rosewood, and fruits and garden products. The chief exports are tin, rice, teak, pepper, salt fish, dried fish, teel-seed, bullocks, skins, sapanwood, cardamoms, horns, birds' nests, &c. The chief imports are shirtings, linen, glass, cutlery, cotton manufactures, gold leaf, china goods, opium, kerosene, jewellery, liqueurs, silk goods, and hardware. The Government is monarchical; the King appoints the successor. There is a new legislative Council of State consisting of the ministers, six Royal Princes, and from 10 to 20 members appointed by the King. There is an army of 8,000 men, and a few small gunboats. A telegraph connects Bangkok with Saigon (Cochin-China), and with Burma. An important railway from Bangkok to Korat is under construction.

RUSSIA IN CENTRAL ASIA.

THE Russian provinces of Central Asia are the Trans-Caspian, with an area of 214,237 square miles, and a population of 301,476; and Turkestan, with an area of 409,414, and a population of 3,341,913. The Trans-Caspian Railway, starting from Uzunada on the Caspian, goes through Merv, crosses the Oxus at Charjui, and passes through Bokhara to Samarcand. An extension to Tashkent and branches to other points are in contemplation. Englishmen may not travel upon it except by special authority. It has been the means of greatly increasing the Central Asian trade of Russia, and has led to an immense increase of cotton cultivation in Central Asia for export to Russia. Trans-Caspia is in contact with Persia and Afghanistan, while Turkestan stretches into the Pamir region. Its southern boundary was fixed by the Pamir agreement between Russia and England. Besides these provinces directly administered by Russian officials, the Russian Empire in Central Asia includes the two vassal States of Bokhara and Khiva.

BOKHARA.

Amir, Syed Abdul Ahad, succeeded Nov. 12, 1885.

Once the most famous State in all Central Asia, but since the capture of Samarkand by the Russians, in May, 1868, a vassal State of Russia. By the treaty of 1873 no foreigner may be admitted into Bokhara without a Russian passport. Steps have been taken to incorporate the Bokhara customs administration with that of the Russian provinces. Bokhara, with Karategin, has an area of 92,300 square miles, and a population of 2,130,000. The Uzbegs, of Turkish extraction, are the dominant race, but the Aryan Tajiks are the aboriginal inhabitants of the country. The people are fanatical Muhammedans of the Sunni sect. Slavery has been abolished through the influence of Russia. The country produces corn and fruit, cotton, silk, wine, tobacco, and hemp. Sheep, horses, goats, and camels are numerous; gold, salt, alum, sulphur, and coal are among the mineral productions. The foreign trade is valued at 32,000,000 roubles, imports slightly exceeding the exports. The Amu-Darya, or Oxus, which forms the southern frontier of the country, is now navigated by Russian steamers. The Russian paper rouble is current. The capital, Bokhara, has 70,000 inhabitants.

Telegrams, per word, 1*s.* 11*d.*
Russian Political Resident, M. Lessar.

KHIVA.

Khan, Syed Mohamed Rahim Khan, *suc.* 1865.

A Russian vassal State in Western Turkestan

on the western side of the lower Amu-Darya, or Oxus, which here flows into Lake Aral. The Russians captured Khiva on May 20th, 1873, abolished slavery, and compelled the Khan to acknowledge himself a vassal of the Czar. The area is 22,320 square miles, with about 700,000 inhabitants, dominant among whom are the Uzbegs. The people are Mohammedan of the Sunni sect. The fields and gardens are irrigated by canals, derived from the Oxus; all the surrounding country being a barren wilderness, affording but little pasturage. Wheat, melons, and other fruits, cotton and wool are among the productions. The State has no external relations except with Russia. The Khan's military force is limited by treaty with Russia to 2,000 men, and he pays tribute to Russia to the amount of 150,000 roubles a year, out of a yearly revenue of 500,000 roubles.

CAPITAL, Khiva. Population, 6,000.

CHINA IN CENTRAL ASIA.

YUNNAN, TIBET, CHINESE TURKESTAN.

India is in contact with three provinces of China. On the north-east of Burma is the province of *Yunnan* (area 107,969 square miles, population 11,721,576). The Convention of March, 1894, between Great Britain and China, laid down a boundary between Burma with its dependencies and Yunnan, and made arrangements for trade, extradition, &c. The Convention having been transgressed by China, is subject to modification. Negotiations are proceeding. The question of access to Yunnan and Szechuen is one of great importance to the commercial nations of Europe. The shortest route is through French territory by the Red River. There are competing routes, viz., through Burma, for which an extension of the Burmese railway system to the Kunlon Ferry on the Salween is now under construction; through Siam and up the Mekong Valley; and through China, either up the Canton or West River, or up the long waterway of the Yang-tze-kiang. French consulates are already being established in advance of French trade in Yunnan. By the agreement of 15 January, 1896, Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in the provinces of Yunnan and Szechuen. The province is reputed to be rich in minerals, and in parts has a large and busy population. Next to Yunnan is *Chinese Tibet*, or Bodyul as it is named by its inhabitants, which may perhaps be called a province of China, though it is in internal matters practically independent. Tibet forms the northern frontier of India, from Burma to Kashmir. But separated by the gigantic range of the Himalayas, the intercourse between the two countries is of the slenderest description. It contains the sources of almost all the great rivers of India and China. It is itself a plateau of extraordinary altitude, seldom lower than 10,000 feet, and protected by the vast mountain ranges of the Kuenlun in the north and the Himalayas on the south. The capital, Lhassa, is the religious centre of a special form of Buddhism, contains a large population with a great number of Buddhist monasteries, and continues to be out of the reach of European travellers. The country is, no doubt, very rich in minerals, but these are little worked; cultivation is carried on under extreme climatic difficulties; and the whole country is still shrouded in mystery. The trade in 1895-96 was valued at about 21 lakhs of rupees. Steps have been taken to place the Indian trade with Tibet on a more satisfactory footing by the negotiation of a regular commercial treaty with China. There are as yet no British representatives in Yunnan or Tibet. *Chinese Turkestan*, including Yarkand and Kashgar, was re-occupied by China in 1878, on the suppression of the revolt of Yakub Beg. Little is known of its area and population. Russia has special treaty rights in the north, and a Russian consul is at Kashgar. A representative of the Indian Government (Mr. G. Macartney) also resides at that place, but without the title of consul. Trade between India and Chinese Turkestan has to pass by the lofty pass of the Karakoram (18,500 feet), or by the very difficult routes through Kashmir and Hunza, and by almost as lofty passes across the Hindu Kush. Leh is the centre in Kashmir through which this trade passes. In 1895-96, the value of the Leh trade exceeded 62 lakhs. It is increasing rapidly.

FRENCH POSSESSIONS.

French India. See page 454.

French Indo-China.—These possessions consist of Cochin-China, Tonquin, Annam, and Cambodia. Since the union created in 1887, they have been under a single governor-general, with a lieutenant-governor for Cochin-China, and residents-general for the other three divisions. The first cession of Cochin-China was in 1862; its western provinces were occupied in 1867. Cambodia recognised the French protectorate in 1863; its present status is, however, regulated by a convention of 17 June, 1884; the effective protectorate over Annam dates from 1874, but present relations are determined by a convention of 6 June, 1884. Tonquin may be said to have been finally conquered when peace had been concluded with China in 1885. The Lao country up to the Mekong was added to the French protectorate as a result of the dispute with Siam in 1893, and the Mekong was finally fixed as a boundary between French and British dominions in 1896. Cochin-China is wholly annexed and directly administered by French officials. Annam is governed by a king, with his court at Hué. Subject to the control of the French Resident, the Annamese kingdom is an absolute despotism, after the Chinese type, and the administration is in the hands of the king's officials. In Cambodia the French Resident presides over the State Council, and French interference in internal administration is greater than it is in Annam: but government is carried on in the name of the King of Cambodia. In Tonquin there is a native Regent, who is head of the native administration. But he does not rule. The direction of affairs is in the hands of the French Resident and his subordinate officials. The French possessions extend northwards to 25° 20', and march with China as far west as the Mekong, which river forms the western boundary along almost the whole length of the French Colony. The area and population, of which estimates vary greatly as well as revenues, are given below.

Digitized by Google

	Area. Square miles.	Pop. (In 1891.)	Receipts from Local Revenues, 1893.
Cochin-China	23,082	2,034,453	35,000,000 francs.
Cambodia ...	38,600	1,500,000*	6,000,000 ,,
Annam and Laos.....	100,000	5,000,000*	2,000,000 ,,
Tonquin	34,740	10,000,000*	27,000,000 ,,
Total	196,422	19,534,453	70,000,000 ,,

The deltas of Cochin-China and Tonquin are fertile; Annam, connecting them, is a long mountainous tract, with a narrow littoral on one side, and a wild sparsely populated hill tract stretching to the Mekong on the other. Rice, cotton, sugar, seeds, tobacco, spices, and fish, are the principal productions of the alluvial districts. The principal mineral production is coal, which is largely mined at Tourane, on the coast of Annam, and at Hongay and Kebao on the Tonquin coast. Other minerals, including gold, silver, tin, copper, lead, &c., are said to exist in the protectorate. The principal harbours are Haiphong in Tonkin, Tourane and Thuanan (for Hué) in Annam, and Saigon. The Saigon river is navigable to the capital, and small craft can reach Hué by the Hué river. But the chief routes of inland navigation are the Mekong, which, notwithstanding obstructions and rapids, has been navigated up to where it divides British and French territory; but it is not likely to develop into an important commercial route; the Red River, which can be ascended by steamers as far as Laokai on the Chinese frontier; and the Black River. Much has been done towards improving the canal and road communications in the deltas, and two small lines of railway have been built, of which the most important connects Hanoi with Langson. Concessions for the construction of other lines have been given. The foreign trade of Indo-China was valued in 1895 at 37,000,000 francs for imports, and 80,000,000 for exports; the latter almost wholly of rice. Trade has declined owing to excessive duties imposed by the French tariff. The colony does not pay its way. It has been calculated that to the present it has cost France over 50 millions sterling. The grants in aid voted in the French budgets from 1887 to 1891 amounted to 168 million francs. In 1895 a further loan of 100 million francs was voted for Tonquin expenses.

* Estimated.

The total receipts are approximately as shown above. The principal currency is the new French colonial dollar; its exchange value in 1895 was about 2·75 francs the dollar. The French army of occupation numbers about 8,000, in addition to 12,000 native troops.

Exports from U.K. to French Indo-China, £235,310
Imports to U.K. from French Indo-China, £32,017

Other French possessions with which India is in contact are: (1) Obokh, on the African coast, at the mouth of the Red Sea. The coast line of the protectorate extends for 200 miles; the limits inland are not fixed; the town of Obokh has a population of about 1,000, the protectorate perhaps 30,000. The revenue is *nil*. The chief station has lately been moved from Obokh to Jibuti, which is to be made a coaling station for French steamers, and is expected by the French to become the centre of a large trade with Harrar and Abyssinia. There is an Anglo-French agreement which determines the boundary of the French and English spheres of influence in the direction of Harrar, which place neither party is at liberty to annex. (2) Réunion, in which there is a large number of Indian coolie immigrants; area, 700 square miles, population, 167,847; and (3) Madagascar, for which see page 558.

ITALIAN POSSESSIONS.

ITALY possesses the colony of Eritrea on the west coast of the Red Sea, with its capital at Massowah, having an area computed at 4,000 square miles, and a population of 250,000. As a sequel to Menelik's defeat of the Italians at Adowa on March 1, 1896, a treaty was concluded on Oct. 26, 1896, between Italy and Ethiopia, by which Italy retained her colony but abandoned all claim to a protectorate over Abyssinia (Ethiopia), which is a kingdom with an area of about 540,000 square miles and a population of six millions. By this treaty the Anglo-Italian Agreement defining the boundary of the British Somali coast protectorate was practically annulled. The chief exports of Massowah are skins, ivory, butter, gums, and mules.

ARABIA AND TURKISH DEPENDENCIES.

ADEN is a portion of British India; it is the emporium of the whole trade of Southern Arabia, its imports and exports amounting to 95 million rupees in value. It is also the centre of a British protectorate over the neighbouring Arab tribes from Perim to Ras Sair, which are independent of Turkish rule and are in subordinate treaty relations with the Government of India. Also politically dependent on Aden are the Somali Coast Protectorate on the opposite continent of Africa, the Kooria Mooria islands, valuable for their guano, and the protected island of Sokotra, which has an area of 1,000 square miles and a population of 5,000, mostly Bedouins. At Ras Sair begins the territory subject to the Sultan of Muscat (Oman), who is in treaty relations with the Government of India, and has a political agent of that Government at his court. Muscat,

with its commercial suburb of Muttra, a town of 50,000 inhabitants, is the centre of trade for this portion of Arabia. In the interior Muscat territory marches with El Hasa and Nejd, which form part of the Turkish Pashalik of Basra. The trade of Muscat, mainly British and British Indian, is valued at 3¼ million dollars. Off the south shore of the Persian Gulf is the island of Bahrein, which is under British protection. It is the chief centre of the pearl fisheries of the Gulf. The independent tribes on the coast itself are bound together under treaties with the Indian Government to maintain a maritime truce for the prevention of piracy and the slave trade and for the cessation of hostilities at sea. Their chiefs are in consequence sometimes referred to as the "Trucial" chiefs. The British Political Resident in the Persian Gulf, who resides ordinarily at Bushire, is the recognised arbiter in the quarrels of these tribes, and the peace of the Gulf is maintained by the British flag. In 1896 the peace of the Gulf was not disturbed as in 1895. At El Bidaa begins the Turkish Pashalik of Basra, which extends for 600 miles to Ali Garbi on the Tigris and Kalat-al-Daraj on the Euphrates. The higher basins of these rivers form the Pashalik of Baghdad, which extends to Syria and Kurdistan. Not far from Baghdad itself is the town of Kerbela, the most sacred centre of pilgrimage for the Shia (Persian) Mohammedans. The trade of the Shat-el-Arab and its branches is considerable; much of it is carried by the vessels of the Euphrates and Tigris Steam Navigation Company. The Basra trade alone in 1895 was valued at £2,490,000, of which £1,400,000 were imports. Since 1880 the Pashalik of Basra has been combined with that of Baghdad under one Governor; westwards the province extends over Central Arabia, as far as the Nefud and Syrian deserts. Beyond these deserts are the Turkish provinces of Hejaz, in which are included the sacred cities of Mecca and Medinah, with the port of Jeddah, and Yemen with its chief port at Hodeida, and towns at Sanaa, Assir, and Taiz. The Sinai peninsula and the old land of Midian belong to Egypt.

The whole peninsula of Arabia may be considered to have an area of 1,220,000 square miles, and a population of five or six millions, of which perhaps three are in the Turkish province of Yemen. A large portion is desert, but in the interior, which is elevated, are many extensive tracts affording good pasturage. The inhabitants are Bedouins (Bedawi) and Muhammadans, with the exception of a small Jewish population; their wealth consists largely of horses, camels, asses and mules, for which Arabia is famous. Millet is cultivated for home consumption. Dates and coffee are largely exported. The climate is healthy; but the insanitary condition of the holy cities is a source of contamination, and in some years, of the spread of cholera among Mohammedan pilgrims. The European Governments are accordingly interested in the improvement of the sanitary condition of the pilgrimage.

Greater Britain in the East.

THE following accounts of the different British Colonies and Possessions have been revised by the Local Governments, to whom the Editor begs to return his warmest thanks. He is also indebted to the "Colonial Office List," which contains information upon every subject connected with the British Colonial Empire.

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 53′—9° 51′ N. lat. and 76° 42′—81° 55′ E. long. Its area is about 25,365 square miles, or more than three-fourths of that of Ireland. Its greatest length is, from north to south, 266 miles; and its greatest width 140 miles.

The climate varies with the altitude of the district; but on the whole, although tropical, it is healthy, except in the low-lying jungle. There are no great extremes of temperature, and throughout the low country the thermometer varies little in the course of the year, the mean temperature at Colombo being nearly 81° F. The coolest months are December and January; the hottest are April and May.

The population of Ceylon numbers (1891) 3,008,466, the most important element being the Singhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. According to the 1891 census, the population then consisted of Singhalese, 2,041,158; the Tamils, a race of Southern India, 723,853; the Moormen and other races, 216,156; the Burghers or Eurasians, 21,231; and the Europeans, 6,068. There is also a sprinkling of Veddahs, who are perhaps the aboriginal race of the island; and of Afghans and of Malays. In 1507 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years after, in 1801, Ceylon was erected into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the island are agricultural. The most important for home consumption is rice in its two forms of padi and dry grain. Of the exports, coffee still stood first in

Digitized by Google

value in 1887, although the production has decreased enormously of late years; while next to it came tea, the production of which has proportionately increased. Among other products are cinchona, cocoa, cardamoms, vanilla, and cinnamon. The last was in Dutch times a Government monopoly, and the most important product of the island. In 1895 the export of coffee was 7,461,104 lbs., of tea 98,581,060 lbs., of cinchona 919,820 lbs., and of cinnamon 3,052,000 lbs.

About one-fifth of the island is under cultivation, and the leading areas in 1895, in acres, were:—

Rice	589,077	Cocoanuts	862,582
Other grain	138,633	Cinchona	4,336
Tea	322,810	Cinnamon	40,475
Coffee	22,475		

Among the more important native industries are gold, silver, ivory and tortoise-shell work, pottery, mats, fans, and wood-carving. As regards mineral wealth, Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and the pearl fishery in the Gulf of Manaar, off the N.W. of the island, is in some years a valuable source of revenue. The manufacture of salt is a Government monopoly, and yielded in 1895 a revenue of Rs. 1,033,704.

There are about 300 miles of railway open, and in 1895 the post and telegraph offices numbered 364, there being 1,727 miles of telegraph wire.

The Government of Ceylon is administered by a Governor, aided by an Executive Council of five members, and a Legislative Council of 18 members including the Governor and the Executive Council. The Legislative Council contains representatives of the principal races and interests in the island.

For administrative purposes the island is divided into nine provinces, at the head of each of which is a government agent. The larger towns have municipalities or local boards; and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

The MALDIVE ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Malé, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Mohammedans. The islands are poor and unhealthy, and the main exports are dried fish, cowry shells, cocoanut coir, and tortoiseshell.

STRAITS SETTLEMENTS.

This is the name given to the British possessions on the west coast of the Malay Peninsula, of which the whole southern portion, comprising about 25,000 square miles, is now under the protection, and a large portion under the direct control, of the British Government in Singapore. The importance of this portion of H.M.'s dominions has rapidly increased of late years, and it is now, in point of trade, revenue, and general prosperity, in the front rank among the Crown Colonies.

The name is derived from the Straits of Malacca, on which the Settlements are situated. The settlements forming what is known as the Colony of the Straits Settlements are Singapore; Penang, or Prince of Wales's Island, with Province Wellesley and the Dindings; and Malacca. The Cocos or Keeling Islands, a coral group in the Indian Ocean, on the route from Ceylon to Australia, have since 1886 been a dependency of the Straits Settlements. The colony has an entire area of about 1,472½ square miles. The population in 1891 was 512,342 (Singapore, 184,554; Penang, Prov. Wellesley and Dindings, 235,618; Malacca, 92,170). The great bulk of the population consists of Chinese and Malays.

The climate of the colony is almost uniform throughout the year, and foliage is perennial. The rainfall in 1895 amounted in Singapore to 98·14 inches, and in Penang to 108·70 inches.

Public revenue in 1895	$4,048,360
Public expenditure in 1895	3,782,456

Exports to United Kingdom, 1895	30,062,072
Total imports, 1895	211,046,776
Total exports, 1895	185,813,002

The trade returns are only approximate, as there are no custom-houses in the colony.

The exports comprise—gutta-percha, gambier, pepper, india-rubber, horns, hides, canes, sugar, rice, sago, tapioca, spices, dye-stuffs, tea, coffee, tobacco, gums, tin, &c.

The Government consists of a Governor, assisted

by an Executive Council of 8 members, and a Legislative Council of 8 official and 7 unofficial members, appointed by the Crown. Two of the unofficial members are nominated by the Chambers of Commerce at Singapore and Penang. The Resident Councillors of Penang and Malacca have seats in both Councils. The law of the colony is the common and statute law of England as it was in 1826, qualified by Indian Acts until 1867 and since then by local ordinances. The Supreme Court consists of the Chief Justice and three puisne judges, and constitutes also a court of appeal from which there is yet another appeal in certain cases, viz. to the Privy Council. There is also in Singapore and Penang a Vice-Admiralty Court; and in each settlement there are ordinary magistrates' courts, together with Courts of Requests.

Gov. and Comm.-in-Chief, Lt.-Col. Sir Chas. B. H. Mitchell, G.C.M.G. (with entertainment allowance)	$33,800

Principal Medical Officer, M. F. Simon, M.D.	7,200
Protector of Chinese, W. Evans	6,000

Singapore is an island situated off the Southern extremity of the Malay peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width: its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 226 square miles. It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johor in 1824. The seat of government, for all the settlements, is the town of Singapore, situated on the south side of the island in lat. 1° 16′ N. and long. 103° 53′ E., with 162,547 inhabitants in 1891. The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a point of call for vessels trading between Europe or India and the far East, the North of Australia, and the Netherlands Indies. For its defence several batteries to carry heavy guns have been constructed, at a cost of nearly £100,000, paid by the colony, for which the Imperial Government has furnished guns. The trade returns for 1895 amounted to $293,095,177, the value of exported tin being $19,338,436.

The number of ships entering and clearing in 1895, exclusive of native craft, was 8,603, with a tonnage of 7,093,613. The total for the whole colony was 16,878, with a tonnage of 11,065,780. The total native craft entered at all three ports during the same year was 15,557 (tonnage, 519,655). The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. There are excellent docks. It is a free port; no duties are levied upon anything except wines; the opium and spirit trades are farmed out to Chinese, and the Chinese element is conspicuous among the trading classes.

Penang is the northernmost of the Settlements. It includes Pulo Penang or Prince of Wales's Island (on the eastern side of which is Georgetown, the port and capital, population 1891, 84,948), and the strip of mainland opposite, known as Province Wellesley (population 1891, 108,117). The Dindings, 80 miles to the South of Penang, have also been included in the Settlement for administrative purposes under the Resident Councillor, who also has Consular authority over the Siamese Tributary States on the west coast of the peninsula between Province Wellesley and British Burma. Penang island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 18′ N., long. 100° 21′ E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kédah. Area, 108 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1895 amounted to $99,156,130; the export of tin from the port being $14,935,649 in 1895. Population (1891), 235,618.

Province Wellesley is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kédah in 1800, with some land S. of the Krian river acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, sugar, spices, and tapioca plantations.

The Dindings are at present little developed; but they contain what is considered the best port on the western side of the peninsula, named Lumut, where a District Officer is stationed, and steamers call regularly at Pulo Pangkor. They comprise a group of islands (of which Pulo Pangkor is the largest); and a strip of the mainland on the west coast of the peninsula cut out of the State of Pérak, and measuring about 22 miles long by about 10 miles in width.

Malacca, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N.W. of Singapore, comprises an area of about 659 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the English, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with Holland, 17th March, 1824, being exchanged for the British settlements in Sumatra.

Revenue..... 1875, $118,000; 1895, 339,197

Closely connected with the Straits Settlements are the States of Pérak, Sélángor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government as the Federated Malay States, administered under the advice of a British Resident-General, who controls the Residents subject to the instructions of the Governor of the Straits Settlements.

The first two States extend from the border of Province Wellesley to that of Negri Sembilan,

Digitized by Google

Pahang is on the East Coast, and Negri Sembilan inland near Malacca. All are governed by their native rulers under the above-mentioned control.

High Commissioner, Lieut.-Col. Sir Charles Bullen Hugh Mitchell, G.C.M.G. .....
Brit. Res.-Gen., F. A. Swettenham, C.M.G.
Judicial Commissioner, Laurence C. Jackson

(1) *Pérak* has an area of 10,000 square miles, and in 1891 the population numbered 214,254. The chief industry is tin-mining; but tapioca, pepper, rice, sugar, coffee, and tea have been cultivated with success. Revenue, 1893, $3,034,094. The chief town is Thaipeng, in the district of Larut.

The following railways are in operation: from Port Weld to Thaipeng 8 miles, and from Thaipeng to Kamunting 9 miles; from Teluk Anson to Ipoh 50 miles, and a section connecting Ipoh with Chemor, 12 miles, is now under construction.

British Resident, W. H. Treacher, C.M.G. ...$9,600

(2) *Selangor*, with an area of 3,500 square miles, and a population of 122,555, lies immediately south of Pérak, and, like that State, depends largely for its prosperity upon its tin-mining. Pepper and coffee are being planted with success. The revenue in 1894 was $3,334,469; and a railway, 22 miles long, from the capital, Kwala Lumpor, to the port of Klang, was opened in July, 1886, and this has since been extended inland to Kwala Kubu, a distance of 38¼ miles, with a branch line from Kwala Lumpor to Sungei Besi, 9 miles long. A fresh section, 7 miles long, to connect Klang with Kwala Klang, is now under construction. Imports (1894), $12,139,686, exports, $12,925,602.

British Resident, J. P. Rodger..... $7,800

(3) *Negri Sembilan* is the name of a confederacy of small States in the interior of the peninsula, the affairs of which have been (1886) placed under a British Officer residing at Kwala Pilah. The confederacy comprises Sri Menanti, Rembau, Johol, Tampin, Sungei Ujong, Jelébu, and other small States, comprising about 3,360 square miles, with a population of 41,617 in 1891. Its revenue in 1893 was $141,055.

Sungei Ujong (660 sq. m.) to the south of Sélángor, and north-west of Malacca, and *Jelebu* (700 sq. miles), a rich and growing little State, are now confederated with Negri Sembilan. Both produce tin. The population in 1891 was about 24,000, and the joint revenue in 1894, $397,000. A railway, 23 miles in length, connects Seremban, the administrative centre of the confederation, with Port Dickson on the Malacca coast. The cultivation of Liberian coffee is attracting considerable attention.

British Resident, Hon. Martin Lister..... $4,800

(4) *Pahang* is a large State on the east coast, to which, in 1888, a British Resident was sent at the request of the Sultan. The country is of great extent, probably exceeding 10,000 square miles, and is already full of tin-mining and gold-mining enterprise. Population, 1891, 57,542.

British Resident, Hugh Clifford $4,800

HONG KONG,

an island situate off the south-eastern coast of China, at the mouth of the Canton River, in 22° 10′—22° 17′ N. lat. and 114° 6′—114° 18′ E. long. It is about eleven miles long and from two to five miles wide. The colony comprises, with the opposite peninsula of Kaulung, which is part of the mainland of China, an area of 30½ square miles. The island lies close to the mainland, being separated at one point by a narrow strait (the Li-ü Mun Pass) not more than ¼ of a mile wide. The city of Victoria lies along its northern shore, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some ten square miles. The port is free. It possesses excellent docks, capable of holding the largest vessels, and is fortified.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is over 1,800 feet high. This peak is a favourite place of residence in the hot season, which lasts from March to October. During the winter months, from November to February, the climate is cooler and invigorating. The thermometer ranges from a minimum of 32° in February to a maximum of 93° in August. The average annual rainfall is 85 in., of which not less than 70 in. are received between May and September, when the S.W. monsoon prevails.

Hong Kong was first taken possession of by Great Britain in January, 1841, and was formally ceded by the treaty of Nankin in 1842, British Kaulung being subsequently acquired by the Peking Convention of 1860. It is a military and naval station for the protection of British commerce, and it is the centre of a vast trade in many kinds of produce—chiefly opium, sugar, flour, oil, amber, cotton, ivory, betel, sandalwood, rice, tea, woollens, silks, salt, &c.

It is calculated that, exclusive of the traffic which merely passes through the harbour without breaking bulk, the actual trade of the colony amounts to over £20,000,000 sterling per annum. In the year 1895 shipping to the extent of 7,827,398 tons entered the port.

The population of the colony in 1895 numbered 248,498, of whom 237,670 were Chinese. The white residents, including the garrison, numbered about 10,828.

Much encouragement is given by the Government to education in the colony, and the Chinese are fully alive to the advantages arising therefrom. In 1895 there were 123 schools subject to Government supervision, attended by 8,156 pupils. There were also many private schools, attended by about 2,720 pupils.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of six members, together with a Legislative Council of eleven members including himself.

BORNEO, LABUAN, SARAWAK.

By an arrangement with Her Majesty's Government, which came into force 1st January, 1890, the administration of the Colony of Labuan was transferred from the Colonial Office to the British North Borneo Company, whose territories, together with Sarawak and the Native State of Brunei, have been placed under a British Protectorate.

BRITISH NORTH BORNEO.

British North Borneo includes the northern part of that island, from the Sipitong River on the west to 4° 10′ on the east coast, together with all the islands within three leagues. Its area is about 30,000 square miles, and the population is estimated at 150,000. The inhabitants are Mohammedan Malays with an infusion of Chinese and Arab blood on the coast, and various aboriginal tribes resembling Dyaks in the interior. The country was ceded to a company by the Sultans of Brunei and Sulu in 1877–8, and was subsequently transferred to the British North Borneo Company, to whom a royal charter was granted 1st November, 1881. The territory ceded has a coast-line of some 987 miles, with many excellent harbours. The soil is rich, producing rice, sago, sugar-cane, coffee, cocoa, gambier, pepper, tea, tobacco (total product, 1895, 8,061 bales, $1,176,000), hemp, cinchona, and other tropical products. The country also produces gutta-percha, india-rubber, beeswax, edible birds' nests, camphor, gum, and timber. About 700,000 acres of land have at present been taken up by agricultural companies on cultivation leases. Gold, copper, coal, and other minerals have been found. The company does not itself engage in trade. The revenue is derived from opium and other farms, sales of land, royalties on exports, and duties. The principal places are Sandakan, the headquarters of the administration, Gaya on the west coast, Kudat in the north, Silam on the east, and Mempakol in Brunei Bay.

The government is administered by a Governor, assisted by a Council and by Residents of districts. The mode of government adopted is similar to that of a British colony, with modifications to meet native customs and local circumstances. The territory is now in telegraphic communication with London *vid* Labuan, and a land line to the capital has been constructed.

Capital, Sandakan; population of Sandakan Bay (May, 1891), 6,319.

Public revenue, 1895 (incl. Land sales) ...$349,414
Public expenditure, 1895 313,097
Total imports, 1895, $1,663,906. Exports, $2,130,600

Governor, Leicester Paul Beaufort, B.C.L. $9,000
Governor's Secretary, G. F. M. Ennis 2,484
Treasurer-General, Alexander Cook..... 5,037
Resident, West Coast, R. M. Little 4,200
Sessions Judge, E. P. Gueritz
District Magistrate, E. P. Barraut 2,484
Principal Medical Officer, J. H. Walker, M.D. 4,278

Office of the North Borneo Company, 15 Leadenhall Street, E.C. *Sec.* H. J. Forbes.

Sandakan is distant 9,500 miles. Transit, average 35 days. Parcels, first lb. 11*d.*, additional per lb. 8*d.* to 11 lbs.; telegrams *sent by post* from Singapore.

LABUAN

is an island of the Malayan Archipelago, situated about six miles off the north-west coast of Borneo, in 5° 16′ N. lat. and 115° 15′ E. long. Its area is about 31 square miles; and its population nearly 6,000. It was ceded to Great Britain by the Sultan of Borneo in 1846, being at that time uninhabited. A British settlement was established in 1848, the first Governor being the late Sir James Brooke. The island has a fine harbour, and possesses extensive coal-measures, which are now being developed by the new Central Borneo Company, Limited. In 1894, about 14,957 tons of coal (value $67,354) were exported.

The trade of Labuan consists in the exchange of cloth, rice, crockery, ironware, &c., for the produce of Borneo and the neighbouring islands (gutta-percha, india-rubber, birds' nests, canes, bêche-de-mer, wax, sago, &c.). There are three manufactories in the island where the raw sago imported from the coast of Borneo is converted into flour, and then exported to Singapore. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage.

The government is administered by a Governor, who is also Governor of the British North Borneo Company's territory.

Chief City, Victoria. Population, 1,500.
Public revenue, 1894, $36,962; Expenditure, $42,084
Total imports, 1894, $852,880; Exports, $482,800
Governor, L. P. Beaufort. *Res.*, W. Raffles Flint.

Labuan is distant 9,100 miles, *vid* Suez Canal; transit average 30 days.

SARAWAK.

Raja, H.H. Sir Charles Johnson Brooke, G.C.M.G., *born* 3 June, 1829; *suc.* his uncle, the Raja Sir James Brooke, 11 June, 1868; *m.* 1869, Margaret Alice Lily de Windt, of Highworth, Wilts.
Heir, Charles Vyner Brooke (Raja Muda), *b.* 26 Sept. 1874.

Resident, 1*st Div.*, Hon. C. A. Bampfylde... $6,000
,, 2*nd Division*, (vacant) 2,040
,, 3*rd Division*, Hon. H. F. Deshon... 5,400
,, 4*th Division*, (vacant) 2,400
Treasurer, Hon. Charles S. Pearse 5,400
Postmaster-General, A. K. Leys 2,400
Sup. of Surveys, &c., E. A. Jeffreys 3,000
Principal Medical Officer, C. R. Selbie, M.B. 4,200

The Sarawak territory lies on the north-west coast of Borneo, with a seaboard of 400 miles, an area of about 50,000 square miles, and a population of about 300,000, composed of various races. The government of this district was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Raja Brooke of Sarawak, and was uncle of the present Raja. Other concessions have been made in 1861, 1882, 1885, and 1890, when the Limbang River was obtained, the transfer being approved by H.M. Government, August, 1891. The country produces sago, gutta-percha, india-rubber, beeswax, birds' nests, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper.

Revenue, 1895, $453,800; Expenditure ...$426,381
Imports, 1895, $1,915,597; Exports $2,206,773

CHIEF TOWN, Kuching. Distance from London 8,700 miles: transit 30 to 35 days. Parcels, per lb. 9*d.* (limit 11 lbs.); telegrams *sent by post* from Singapore.

BORNEO.

Sultan, His Highness Hasim Jalilal Alam Akamaldin, *suc.* May, 1885.

Next to Australia and New Guinea, this is supposed to be the largest island in the world. It was discovered by the Portuguese in 1521, and is situated in the Eastern Archipelago, extending from lat. 7° 4′ N. to 4° 10′ S., and from long. 108° 50′ to 119° 20′ E. It is about 850 miles in length and 600 in breadth, and contains an area of 280,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, and Bugis (the aboriginal Celebes). Rather more than two-thirds of the island is included within the Dutch possessions in the East Indies, the remainder belonging to the Sultan of Brunei, the Raja of Sarawak, and the British North Borneo Company, over all of which a British Protectorate has been established. The British Colony of Labuan, which formerly belonged to Borneo, is situate in close proximity to the N.W. coast. The mineral kingdom includes gold, silver, diamonds, antimony, quicksilver, iron, tin, and coal, the latter abundant. The principal imports are opium, tea, cottons, cloths, hardware, brass, iron, &c.; exports, sago, beeswax, edible birds' nests, camphor, hides, rattans, tortoiseshell, trepang, cinnabar, antimony, coal, diamonds, and gold.

CAPITAL, Brunei. Population, about 15,000. Imports from U.K., 1895, £6,856; Exports, £296

High Commissioner and Consul-General for the Territories of the B. N. Borneo Company, Brunei, and Sarawak, Sir Chas. Bullen Hugh Mitchell, C.M.G. (Singapore).

Consul at Brunei, Noel Trevenen £800

Sandakan—Consular Agent, W. B. Pryer.

Parcels, 1st lb. 11*d.*, then 8*d.* per lb. to 11 lbs.; telegrams *sent by post* from Singapore.

Greater Britain in America.

THE British Possessions in North America include the whole of the northern part of that continent, excepting Alaska, and the small islands of St. Pierre and Miquelon, in the Gulf of St. Lawrence, and extend from the United States boundary to the Arctic Ocean. From a physical point of view the whole region may be divided into an eastern and a western division, the Red River Valley, in long. 97°, forming the separating line. The eastern division comprises three areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Quebec, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 150,000 square miles, contributing to the great river system of the St. Lawrence. (3) The northern area, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, preeminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to is divided into two divisions, equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second division, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains and the Gold and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. In the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder than in other parts of the country. The soil is generally fertile, and all the products of the temperate zone are cultivated.

THE DOMINION OF CANADA.

THE Dominion of Canada includes the various Provinces of North America formerly known as Upper and Lower Canada (now Ontario and Quebec respectively), New Brunswick, Nova Scotia, Prince Edward Island, British Columbia, and the extensive regions long under the quasi-government of the Hudson Bay Company, now styled Manitoba and the North-West Territories; in fact, the whole of British North America

Digitized by Google

except Newfoundland and Labrador. This territory, nearly as large as Europe, stretches from the Atlantic to the Pacific Ocean, and is estimated to contain a total area of 3,315,647 square miles, exclusive of the great lakes and rivers. The total population of the Dominion is about 5,250,000, a number which is rapidly increasing, and notwithstanding its diversity of origin, is fast being welded into one harmonious and homogeneous whole. The descendants of the French Colonists reside chiefly in the Province of Quebec, where out of a total population of 1,400,000 above 1,000,000 are Roman Catholics, the majority of whom still very generally use the French language. A Religious Census of Canada was taken in 1891, and the numbers were:—Roman Catholics 1,992,017, Methodists 839,815, Presbyterians 754,193, Church of England 646,059, Baptists 302,565, Congregationalists 28,157, and Lutherans 63,982. Canada possesses an Active Militia numbering 38,000 men (including infantry, cavalry, and artillery), and a reserve estimated at 1,030,000.

Few possessions of Great Britain have made greater strides of late years in wealth, trade, and general advancement than the Dominion of Canada. The population has increased very rapidly: in 1841 it was about 1,538,500; in 1851, 2,380,988; in 1861 it was 3,182,418; in 1871, 3,635,024; in 1881, 4,324,810; and in 1891, 4,833,239. In 1881 there were 35 cities and towns of 5,000 inhabitants and upwards, having a total population of 660,040; in 1891 there were 47 of such cities and towns, and their total population was 1,030,250. The greatest strides during the past twenty years have been made at Winnipeg, in Manitoba, where the population increased from 241 (1871) to 7,985 in 1881, and to 31,649 in 1896. The growth of the city of Vancouver, British Columbia, during the last six years has, however, been even more rapid. In 1885 the city had no existence, while in April, 1891, the census population was 13,685. The general rate of increase throughout the Dominion in the last decade was 11·74 per cent.

Canada was originally discovered by Sebastian Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America. In 1870 the Province of Manitoba was formed, and, with the remainder of the Hudson Bay Territory, now called the North-West Territories, admitted into the Dominion. British Columbia followed in 1871, and Prince Edward Island in 1873, Newfoundland alone remaining a separate colony.

OTTAWA is 3,540 miles from London; letters are nine to eleven days in transit. Mails despatched from London on the evenings of Wednesday, Thursday, and Saturday. Parcel Post rates for parcels not exceeding 1 lb. 8*d.*, for each lb. or fraction of lb. to 11 lbs. (limit), 6*d.* Telegraph charges from 1*s.* to 1*s.* 6*d.* per word.

POLITICAL CAPITAL and Seat of Government, Ottawa. Pop. (1895), 50,000.

CIVIL ESTABLISHMENT.

Governor-General, The Right Hon. the Earl of Aberdeen, G.C.M.G. (with residence)	£10,000
Secretary, Captain John Sinclair	750
Aide-de-Camp, Capt. Beauchamp Colclough Urquhart, Cameron Highlanders	205
" " Lieut. Herbert William Wilberforce, 2nd Dragoon Guards	205
Commanding the Forces (*Halifax*), Lieut.-Gen. Alexander G. Montgomery-Moore, 18th Hussars	1,384
Commanding the Militia, Major-General William Julius Gascoigne	820

The Executive Government and authority is vested in the Queen, and exercised in her name by the Governor-General, aided by a Privy Council. The legislative power is a Parliament, consisting of an Upper House, styled the Senate, and a House of Commons. The Senate consists at present of 81 members, distributed between the various provinces thus: 24 for *Ontario*, 24 for *Quebec*, 10 for *Nova Scotia*, 10 for *New Brunswick*, 4 for *Prince Edward Island*, 3 for *British Columbia*,

4 for *Manitoba*, and 2 for the *North-West Territories*. The members of the Senate are appointed for life by the Crown on the nomination of the Ministry for the time being; each nominee must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the Queen, and the owner of a property qualification amounting to $4,000. The House of Commons is chosen every five years at longest, and consists at present of 213 members; 92 being elected for *Ontario*, 65 for *Quebec*, 20 for *Nova Scotia*, 14 for *New Brunswick*, 7 for *Manitoba*, 6 for *British Columbia*, 5 for *Prince Edward Island*, and 4 for the *North-West Territories*. The House of Commons is also composed of natural-born or naturalised subjects of the Queen, no property qualification is necessary, and its members are elected upon a very wide suffrage. For electoral purposes each province is divided into districts, each of which returns a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Each province has also a separate Legislature and Administration, with a Lieutenant-Governor, appointed by the Governor-General, at the head of the Executive. Justice is administered as in England by judges, police magistrates, and justices of the peace, of whom the first named are appointed by the Governor-General, for life, from among the foremost men at the bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by a separate judge, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of Queen's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure; and trial by jury prevails everywhere throughout the Dominion. The Queen's Privy Council is at present composed of 12 Ministers and two Members without portfolio.

The number of industrial establishments in 1891 was 75,968, with an invested capital of $354,620,750, employing 370,256 hands (273,424 men, 70,280 women, 19,476 boys, and 7,706 girls under 16 years of age), and producing goods to the value of $476,258,886. The amount paid in wages amounted to $100,663,650. $31,466,324 were invested in land, $60,303,043 in buildings, $81,401,247 in machinery and tools, and $181,450,136 other than fixed.

The principal articles of trade between Canada and the home country in 1895 were as follows:—

Imports from Canada to United Kingdom.

Animals	£2 345,610	Fish	£566,2 3
Bacon and Hams	686,976	Fruit	278,15 1
Cheese	2,335 548	Skins & Furs	407,108
Corn	2,001,128	Wood & Timber	3,193 579

Exports to Canada from United Kingdom.

Apparel, &c.	£452,066	Linens	£232,013
Cottons	700,977	Metals	697,703
Hats	141,714	Woollens	1,104,444

HIGH COMMISSIONER FOR CANADA IN LONDON, Hon. Sir Donald Alexander Smith, G.C.M.G.
Secretary, Joseph G. Colmer, C.M.G.
Assistant Secretary & Accountant, A. W. Reynolds.
Offices, Victoria Chambers, 17 Victoria Street, London, S.W.

ONTARIO AND QUEBEC.

The area of these provinces is 450,900 (Ontario, 222,000, Quebec, 228,900) square miles (including the portions of the great lakes within the boundary), comprising all the basin of the St. Lawrence on the north side of that river and the great lakes, and on the south side N. of the parallel of 45°, and extends from 42° to 53° N. lat. and 57° to 90° W. long. The Province of Ontario, formerly called Upper Canada, and the Province of Quebec, formerly Lower Canada, are separated from each other by the River Ottawa. Quebec also comprises the Isle of Anticosti and the Magdalen Islands, in the Gulf of St. Lawrence. Nearly 80 per cent. of the inhabitants of Quebec are of French descent, preserving their original language, religion, and customs; 95 per cent. of those of Ontario are British.

The timber trade, the original occupation of the people, is still of great commercial value, although fast yielding to those of agriculture, dairy-farming, and cattle-raising. The fisheries are deserving of notice as an extensive branch of industry. The mineral resources of the country are scarcely yet developed. Great part, however, especially the regions north of Lakes Huron and Superior and around Lake of the Woods and Rainy Lake, are valuable for their mineral products, such as iron, zinc, lead, copper, nickel (deposits of nickel ore in the Sudbury district of Ontario, are found over an area of about 3,000 sq. miles, and mining and smelting operations are actively carried on), silver,

gold, cobalt, &c. Phosphate of lime and asbestos are abundant, and sandstone, limestone, slate, and marbles of nearly every imaginable colour are also found in many parts. Mineral oil, petroleum and salt are produced in large quantities. During the last thirty years agriculture has made vast progress, both in Ontario and Quebec. The land is generally very fertile, and produces all the varieties of cereals, fruits, roots, &c. Cattle-raising and dairy-farming are also very important industries, and at present large exports are principally from these provinces—Montreal, Toronto, and Quebec being the great centres of distribution. These provinces, doing 82 per cent. of all the manufacturing of the Dominion, contain the chief manufacturing centres of Canada, which are becoming very important, employing considerable capital and labour. Montreal and Toronto command a vast overland system of communication, by canal and railway, both with Canada and the Eastern and Western parts of the United States. The educational system in force in these provinces, and in fact throughout the Dominion, provides practically free instruction, and gives successful pupils the chance of acquiring the highest education at a moderate cost.

The returns collected by the Bureau of Industries in Ontario, show that in that province in 1895 the total area of cleared land was 12,426,992 acres, of which 8,321,173 acres were under crop, the total value of the land being $572,938,472. The total area under pasture was 2,728,655 acres, with 202,614 acres of orchards and gardens. The average production of the principal field crops in Ontario in 1895 was, in bushels per acre: fall wheat, 19·0; spring wheat, 15·5; barley, 25·3; oats, 35·7; rye, 15·8; peas, 19·5; corn, 81·9; buckwheat, 20·6; beans, 20·5; potatoes, 159·0; mangolds, 451·0; carrots, 352·0; turnips, 418·0; hay (tons), 0·73. The total wool clip amounted to 6,214,811 lbs., the average weight of the fleeces being 5·60 lbs. The total quantity of cheese made in 1,164 factories was estimated at 109,230,340 lbs., valued at $8,607,389. There were 135 creameries in operation, which made 4,600,000 lbs. of butter, valued at $877,220. The returns of live stock show that there were 647,695 horses, 2,150,103 cattle, 2,022,735 sheep, 1,299,072 pigs, and 7,752,840 poultry in the province in 1895. Fruit growing is here engaged in on a very extensive scale; there are vineyards and peach orchards of 50 or 60 acres in extent, and innumerable apple orchards. The Ontario Agricultural College at Guelph is the best place of its kind in Canada, and supplies a general education together with a technical training in agriculture. The students meet part of their expenses by the labour they perform on the Experimental Farm attached to the College, the annual balance of cost for board, washing, and tuition (payable by the students' guardians) being from £10 to £15 for natives of Ontario and from £20 to £30 for students from other parts. A central experimental farm has been established by the Dominion Government at Ottawa, and branch farms in connection with it have been established in the several provinces, and in the North West Territories. Free grants of land are obtainable in this province, and improved farms can also be bought at advantageous rates.

In the Province of Quebec the lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to establish two great national parks (Laurentides National Park, containing about 1,600,000 acres, and the Trembling Mountain Park) to favour the planting of trees along highways and on farms, and to organize an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of 62,000,000 acres, of which 32,000,000 are under licence to cut timber. Improved farms may often be obtained in the Eastern townships, largely occupied by settlers from Great Britain, at from £4 to £6 per acre, including dwelling-house, outbuildings, and fencing; while unimproved lands may be bought from the Government at from 20 to 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purposes of settlement unsold on 30 June, 1895, was 6,998,882 acres. In 1895 there were 1,471 cheese factories and 302 butter factories, forming a total of 1,773.

ONTARIO. Population (Census 1891), 2,114,321. The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 92 members elected for four years (no property qualification being necessary), representing 91 electoral districts into which the province is divided, but which differ from those sending members to the Dominion Parliament. The Executive Council consists of eight members, acting as the Ministry of the province; the legislature meets every year at Toronto. The principal cities are Toronto, the capital of the province, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity (population, 181,220); Hamilton, the Birmingham of Canada (48,980); Ottawa, the Federal Capital, with a large lumber trade and woodenware manufactories (44,154); London (31,977), Kingston (19,264), Belleville (9,914), Chatham (9,000), Stratford (9,501), Guelph (10,539), St. Catharine's (9,170), Brantford (12,753), St. Thomas (10,370), Windsor (10,000).

QUEBEC. Population (Census 1891), 1,488,535. The Government of this province is vested in a Lieut.-Governor and an Executive Council, consisting of 24 members appointed for life, and a Legislative Assembly of 73 members elected for five years to represent the same number of electoral districts in the province. The principal cities are Quebec (population, 63,090), the capital of the province, with a large export timber trade and the great seaport town of Canada; and Montreal (population, Census 1891, 216,650), the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence rivers. Other important towns are Three Rivers (8,334), Levis (7,301), Hull (11,265), Sherbrooke (10,110), St. Hyacinthe (7,016). Ocean-going steamers ascend the St. Lawrence as far as Montreal. The tonnage of sea-going vessels that arrived at and departed from the ports of Montreal and Quebec in 1892 was 1,440,481 tons and 945,403 tons respectively.

Quebec is 2,634 nautical miles from London.

NOVA SCOTIA, a province of the Dominion, is a peninsula between 43° 30′—46° N. lat. and 61°—66° 15′ W. long., and is connected with New Brunswick by a low fertile isthmus about sixteen miles wide. It comprises an area (with Cape Breton Island) of 20,600 square miles, one-fifth part of which consists of lakes, rivers, and inlets of the sea; of the whole, about 5,000,000 acres are fit for tillage, that is, nearly half the entire area, and the soil in the western half of the province, particularly in the Annapolis Valley and around the Basin of Minas, is unsurpassed for fertility, owing to the rich marine deposits left on the shore-land by the tides of the Bay of Fundy. The climate is delightful, and the winter is not so cold as in other parts of the Dominion. The population of the entire Province in 1891 was 450,396. In 1891 there were 6,080,695 acres of land occupied (1,993,697 improved), of which 969,548 acres were under crop, 994,113 acres in pasture, and 30,036 acres in gardens and orchards, the remainder being woodland. Hay is the most important crop of the Province, occupying one-fourth of all the improved land, and yielding 600,000 to 700,000 tons. Fruit cultivation is making wonderful progress; apples especially are claimed to be the best in the world; in 1891, the product was 1,051,592 bushels, and many new orchards are coming into bearing. Halifax, the capital of the province, has a magnificent harbour covering 10 square miles. It is the principal winter port of Canada, and is the *entrepôt* of a large trade with the West Indies and South America. It is the principal naval station of North America, and the British Government have an extensive dockyard there. The Dry Dock can accommodate the largest vessels afloat for repairs. The coal deposits are extensive and of good quality, 2,089,245 tons being the output in 1895; iron-ores are plentiful, and gold mines are now being worked with profit, £2,282,509 representing the product of the past 33 years. The principal fisheries are upon the eastern coast. In 1893 the total value of their produce was $6,407,279. The fish of which the largest catches in value are made are cod, haddock, mackerel, herring, salmon, and lobsters. The manufacturing interest is also a growing one. In order to give an impetus to farming, the Government have established an agricultural college and experimental farm near Truro, where both men and women can receive a good practical education in agriculture and domestic economy. The Annapolis Valley is one of the greatest apple-growing regions in the Dominion. Improved farms of 100 to 150 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at £8 16*s.* per 100 acres, and 1*s.* 10*d.* per acre for any additional quantity. Hunting, shooting, and fishing abound; among wild animals there are bears, foxes, moose deer, otter, mink, sable, musquash, hares, racoons, and squirrels; and among the feathered game are the woodcock, plover, snipe, partridges, ducks, geese, and curlew.

Nova Scotia has a Provincial Government, administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of twenty-one members, and a Legislative Assembly of thirty-eight members.

CAPITAL, Halifax. Population, 38,556. Principal towns, Dartmouth (6,249), Truro (5,102), Windsor (2,838), Sydney (2,426), Annapolis Royal (2,832), Yarmouth (6,089), Amherst (3,781), Pictou, New Glasgow, Lunenburg.

Halifax is 2,463 miles from Liverpool. Telegrams, 1*s.* per word.

CAPE BRETON ISLAND, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,125 square miles, with a population of 86,794 inhabitants. The chief town is Sydney, on the eastern coast, having valuable collieries in the neighbourhood.

NEW BRUNSWICK is situated between 45°—48° N. lat. and 63° 47′—69° W. long., and comprises an area of 28,200 square miles, with a population in 1891 of 321,263. It was first colonised by British subjects in 1761, and in 1783 by disbanded troops from New England. The chief industrial pursuits arise from the produce of the forests, the fisheries, and the ship-building trade. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities. With reference to the agriculture of the province, according to the Census of 1891 the occupied land amounted to 4,471,250 acres, of which 1,509,790 acres were improved, 1,018,704 acres being under crop, 479,607 acres in pasture, and 11,479 acres devoted to gardens and orchards. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. Sport of all kinds is abundant. The fisheries include salmon, cod, mackerel, herring, and shad, and were in 1894 of the value of $4,351,526, ranking second in importance to those of Nova Scotia. ST. JOHN is also a winter port of Canada; and new railway connections tapping the Intercolonial Railway at Rivière du Loup are now completed, adding to its importance and trade.

The Provincial Government of New Brunswick is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of forty-one members elected by the people.

CAPITAL, Fredericton. Pop. (1891), 6,502; chief cities, St. John and Portland (39,179), and Moncton (8,765).

Agent-General in London, Hon. Charles A. Duff Miller, 17, Leather Market, Bermondsey, S.E.

Fredericton is 2,748 miles from Liverpool *vid* Cape Race, or 2,535 miles *vid* Belleisle and Chatham, N.B.

MANITOBA, formerly the Red River Settlement, was formed into a distinct Province in 1870, and admitted into the Confederation on 15th July in the same year. It is situated in about the centre of the continent, between 49°—53° N. lat. and 90°—101° W. long. (these parallels and meridians forming its boundaries), and the Canadian Pacific Railway connecting the Atlantic and Pacific coasts, entirely through British territory, is sure to give an important impetus to the rapid development of this Province. Its area is 116,021 square miles, somewhat smaller than Great Britain and Ireland. Its population, census 1891, was 152,506, being an increase of 145 per cent. since 1881, and in 1896 was estimated at about 200,000. The Red River intersects the province, which appears destined to become a great agricultural country. The soil is fertile and productive, emigration is invited and encouraged, and liberal grants of land are made to settlers. According to the census returns of 1891, there were 6,000,000 acres of land occupied, 1,696,583 being cultivated (1896). The acreage under wheat in 1896 was 999,598. The crop in 1896 is estimated at 18,500,000 bushels, and about 39,500,000 bushels of all kinds of grain. The main line of the Canadian Pacific Railway traverses Manitoba, and there are several other lines in operation. The Red and Assiniboine rivers are also navigable throughout their entire course in the province.

The Government of the Province is administered by a Lieutenant-Governor, assisted by an Executive Council of 5 members and a Legislative Assembly of 40 members.

CAPITAL, Winnipeg. Population (1896), 38,000. Principal towns, Portage la Prairie, pop., 4,000; and Brandon, pop., 5,500.

NORTH-WEST TERRITORIES.—These Territories comprise nearly the whole of British North America from the boundary of the United States (lat. 49° N.) to the most northerly part of the continent, and from the western shores of Hudson's Bay to the Rocky Mountains. The area is calculated at 2,497,427 square miles. Until recently it was very sparsely populated, but of late years, owing to the widespread knowledge of its great fertility and immense mineral resources, a large immigration of desirable settlers has set in. Out of this vast territory in 1882, the Dominion

Digitized by Google

Government formed, for the convenience of settlers and for postal purposes, four provisional districts, named Assiniboia (89,535 square miles), Saskatchewan (107,092 square miles), Alberta (106,100 square miles), and Athabasca (104,500 square miles). Three of these districts are now represented in the Dominion Parliament; Assiniboia sending two representatives, and Alberta and Saskatchewan one each. The whole of this territory is stated to possess varied and great resources, over 150,000 square miles being reported favourable for stock-raising and agriculture, the former being largely followed in Alberta, where the climate is milder, owing to the influence of the Chinook winds from the Pacific. Both Assiniboia and Alberta are traversed by the Canadian Pacific Railway, and settlement is rapidly taking place along its route, and generally throughout the territory, where many other railways have been projected, several of which are now being made, while others are already in operation. It has large mineral deposits, iron, coal, and gold having been found. Coal is abundant in all districts, especially in Alberta, where mines are now being largely worked, and are connected by branch lines with the Canadian Pacific Railway. It is watered by some of the finest rivers on the American continent, and it is estimated that there are about 10,000 miles of navigable waters within its boundaries. The fur trade was till recently almost the sole commercial occupation of the inhabitants. In 1870 it was included in the Dominion, previous to which it had been held by the Hudson's Bay Company. Grants of 160 acres of land are given to settlers free of cost, and they can pre-empt a similar quantity in addition at from 8*s.* to 10*s.* per acre.

A census of the three Provisional districts of Assiniboia, Alberta, and Saskatchewan, was taken in August, 1894, by the North West Mounted Police, when the population was found to be 86,851, of whom 13,345 were Indians. The population of the other portions of the Territories, not included in the above census, in 1891 was 32,168, making a total population of 99,967. According to the census returns of 1891 there were in the three districts 2,910,144 acres occupied, and 194,773 acres cultivated. On the ranches in the districts of Alberta, Assiniboia, and Saskatchewan, there were 231,222 cattle, 60,639 horses, and 64,920 sheep. The district of Alberta is specially adapted for stock-raising of all kinds, animals being able to graze at large during the winter; and it is estimated that there are now over 145,000 head of cattle in this district alone. A large tract of land, enclosing hot mineral springs of remarkable curative powers, has been reserved by the Dominion Government at Banff, in the Rocky Mountains, as a national park; the grounds are being laid out under Government superintendence, and the place is becoming one of the most popular and beneficial health resorts on the continent.

The Government consists of a Lieut.-Governor and a Legislative Assembly of 29 elected Members inclusive of an Executive Committee of 4. The Territories are now divided in 29 electoral districts, thereby securing an entire representation to its population.

CAPITAL, Regina. Population (1895), 1,583.

Lieut.-Governor, Hon. C. H. Mackintosh... £1,400
Executive Committee, F. W. G. Haultain H. Mitchell; J. R. Neff; J. H. Ross.

Regina is 4,750 miles from London, *vid* Liverpool, Montreal, and Canadian Pacific Railway.

PRINCE EDWARD ISLAND, the last admitted province, lies in the southern part of the Gulf of St. Lawrence, between New Brunswick and Cape Breton, that is to say, between 46°—47° N. lat. and 62°—64° 30′ W. long. It is about 140 miles in length, and from 4 to 34 miles in breadth; its area is 2,000 square miles (about equal to that of the English county of Norfolk), and its population (census 1891), 109,078. The history of the island is somewhat strange: it was discovered simultaneously with the neighbouring countries, and was first settled by the French, who held it for many years, but only as a fishing station. The English took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756—1763), and compelled the greater part of its French inhabitants to leave. From that time it has remained, without intermission, in the hands of the English. By an Act passed in 1798, which came into operation 1st February, 1799, the island received its present name from Prince Edward, Duke of Kent, having been previously known as St. John's Island. The island is divided into three counties (King's, Queen's, and Prince), each of which elects 10 representatives. The freehold of the island was originally held by a number of absentee landlords, who were finally bought out under the Land Purchase Act of 1875. Its inhabitants are almost exclusively engaged in agriculture, considerable attention, however, being devoted to the fisheries and to the breeding of horses and sheep. There were (1891) 718,092 acres of improved land, of which 536,175 acres are under crop, 178,072 acres of pasture land, and 3,845 acres of gardens and orchards. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. The rivers, too, contain extensive deposits of what is known as mussel mud, which is raised in the winter by a dredging machine worked on the ice, and afterwards used on the land as a fertiliser, where it helps largely in producing excellent crops of hay. The conditions obtaining on the island are favourable for the rearing of live stock, of which a large number are exported to other parts of the Dominion and the New England States of America. Nearly the whole of the land is now cleared, and improved farms can be bought at about 20 dollars an acre.

The Provincial Government is vested in a Lieut.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people.

CAPITAL, Charlottetown, on the shore of Hillsborough Bay, which forms a good harbour. Population, 11,374. Summerside and Georgetown, on the east coast, are also ports of considerable size, and the centres of shipbuilding trade.

Lieut.-Gov., Hon. George W. Howlan $7,000

British Columbia occupies the western frontier of British North America, extending from the summit of the Rocky Mountains and the 120th meridian of longitude, west by the 60th parallel of north latitude to the boundary of Alaska; thence southward and along the Pacific coast (including Queen Charlotte Islands and Vancouver Island) to the Straits of Fuca; thence easterly along those straits and the 49th parallel of latitude to the summit of the Rockies. The area of the mainland is calculated at 383,300 square miles; Queen Charlotte Islands at 6,000 sq. miles; and Vancouver Island at 14,000. The present coal supply, averaging about 1,000,000 tons per annum, is obtained from the latter, where the coal measures are extensive. Coal, however, is distributed over a wide area of the Province, the other principal deposits so far as known being in the Queen Charlotte group of islands on the north-west coast, and in the south-eastern parts of Kootenay district near the Crow's Nest Pass, through which a railway is projected to enter the mineral belt, now being vigorously exploited. This will afford a readily accessible supply of coke for the several smelters already in operation or those that in future may be erected. In addition to the main line of the Canadian Pacific Railway which enters the Province through the Kicking Horse Pass and penetrates it to the coast at Burrard Inlet upon the outlet of which Vancouver City is built, and the Esquimalt and Nanaimo Railway from Victoria to Wellington on Vancouver Island, four branch lines of the former have been constructed. Communication is afforded from the termini of the Nakusp and Hobson branches with the main line by steamboats which ply regularly from Revelstoke on the Columbia River to the Little Dalles south of the boundary line, the river in question being the main artery of traffic for the principal portion of the Kootenay mining region. The Nelson and Fort Sheppard, an independent line of railway, runs south from Nelson connecting on the American side of the line with the Spokane Northern; the Kaslo and Slocan Railway connects the mines of the Slocan district with Kaslo on Kootenay Lake, on which steamboats ply from Nelson southward, calling at Pilot Bay, Ainsworth and Kaslo, connecting with the Great Northern at Bonner's Ferry. The Columbia and Western Railway has been built from Trail to Rossland in the Trail Creek mining district, where most important gold mining developments have taken place, and it is proposed to extend this line to Midway, in the Yale district, and northward to connect with the C. P. R. system at Vernon. A short line of railway runs from Victoria to Sidney on the Gulf of Georgia; the Westminster Southern from New Westminster connects with the Great Northern at Seattle, *viâ* Blaine; Vancouver and Westminster cities are connected by an electric tramway, having an hourly service. Two projected lines prominently before the public are of important character. One is proposed to run from Vancouver *viâ* New Westminster, the Fraser Valley, and Hope, direct to the mines of southern Kootenay, with an ultimate outlet at Crow's Nest Pass. The other, the British Pacific Railway, is projected from Victoria along the east coast of Vancouver Island to Seymour Narrows, where it is proposed to cross to the Mainland and run from Bute Inlet through the interior to Yellow Head Pass, and if an eastern connection be made, will follow the original line of the C. P. R. survey over the prairies. The greater part of the interior of Vancouver Island and a very large portion of the Mainland, especially northward, have been as yet but faintly explored. From the knowledge already possessed, however, it is known that almost the entire area is highly mineralised and is interspersed as well with extensive and fertile agricultural valleys, the main requirements of which, to be made available for settlement, is railway communication. Although, as compared with the whole area of the Province, the agricultural lands are limited, they are, nevertheless, considerable in extent and capable in the aggregate of sustaining a large farming population. The climate of the coast is mild, while the interior is subject to great extremes of temperature. There are very large ranges of pasturage in the interior which forms part of the great central plateau which extends from the Gulf of Mexico northward to within the Arctic circle. The portions at present accessible for agriculture and partially settled are:—The southern end of Vancouver Island, the New Westminster district, the north and south Thompson valleys, and the valleys of the Okanagan. In East Kootenay and the Chilcotin district there are several millions of acres of pastoral and agricultural lands of promising character. Generally speaking, the Province is well adapted for the growth of such fruit, cereals, grasses, and vegetables as are common to the temperate zone, and of such products as flax, hops, sugar-beet and tobacco, &c. There is, perhaps, the largest compact reserve of valuable timber in America on the British Columbia coast, consisting of Douglas fir, red and yellow cedar, and hemlock, the present available supply of which is variously estimated at from 40,000,000,000 to 100,000,000,000 feet. Some 60 mills are in operation, with an annual capacity of about 550,000,000 feet. At the present time mining is attracting a great deal of attention, and the industry is being prosecuted vigorously in a number of districts. Those in which development is most active and extensive are Trail, Slocan, and Toad Mountain in Kootenay, Boundary in Yale, and Alberni on Vancouver Island. The old placer diggings in Cariboo are being mined by improved hydraulic processes on an extensive scale. Next to mining the greatest natural resources of British Columbia are its fisheries, the output of which is valued at about $4,000,000 per annum, and give employment to between 8,000 and 10,000 persons. Salmon canning on the Fraser River and the coast inlets is the principal branch of the fishing industry, but deep-sea fishing is growing into importance yearly. The coast waters abound with many economic food fishes, the principal of which are salmon, halibut, and cod.

The history of British Columbia is comparatively

recent. A little over a hundred years ago its waters were frequented by vessels of several nations, principally British and American, engaged in trading with the natives. From about 1810 to 1846 what was known as the Caledonia and Oregon territory was occupied by the Hudson Bay Co. as a fur preserve. Vancouver Island was exclusively the possession of that company from 1849 to 1859 with a Governor dating from 1850 and a Parliament from 1856. The Mainland, as British Columbia, and Vancouver Island each became independent Crown Colonies in 1858, when the gold excitement began, and continued so until 1866, when they were united under one government. In 1871 British Columbia entered Confederation. After the first gold excitement progress was slow until the construction of railways began, when improvement was very rapid, and from 1881 to 1891 the census showed an increase of population from 47,000 to 100,000. The population of the Province in 1891 is classified as follows:—Whites, 65,266; Indians, 23,257; Half-Breeds, 214; Chinese, 9,691; Japanese, 306; Negro, 36; total 98,170. Four lines of steamships ply to and from the Orient and one to Australia. There are a number of coast lines covering the waters south to San Francisco and north to Alaska. Capital of the province, VICTORIA, at the south end of Vancouver Island, a population (1891) of 17,000. VANCOUVER CITY, the terminus of the Canadian Pacific Railway, on the Mainland, 80 miles from Victoria; population (1891) about 14,000 NEW WESTMINSTER, the seat of the salmon industry of the Fraser river, 6,700; and NANAIMO, the coal city of the West, 5,000.

RAILWAYS.—One of the most important is the CANADIAN PACIFIC, stretching across the entire continent, from Montreal to Vancouver on the coast of British Columbia, a total distance of 2,905 miles. The town of Vancouver, the western terminus of the road, has been built up within the last few years, and already contains a population of 14,000. The main line, starting from Quebec, runs to Montreal, then through Ottawa, Carleton Junction, Renfrew, North Bay, Sudbury Junction, Port Arthur, Ignace, Winnipeg, Carberry, Brandon, Moosomin, Qu'Appelle, Regina, Moose Jaw, Swift Current, Maple Creek, Medicine Hat, Crowfoot, Calgary, and Stephen—the last-named on the summit of the Rocky Mountains—and then through the Selkirk Range to Vancouver, on the Pacific coast. The chief office of the Canadian Pacific Railway is at Montreal. The share capital amounts to $142,324,882. *President of the Company*, Sir William C. Van Horne. *Vice-President*, Thos. G. Shaughnessy. *Secretary*, Charles Drinkwater. The total length of the Canadian Pacific Railway system is 7,218 miles, 300 of which are cut through the solid rock. The last spike was driven on the 7th November, 1885, and the road was opened for general traffic on 28th June, 1886, since which time there has been a daily mail service between the Atlantic and Pacific coasts. The time occupied in making the road was four years six months, an average of 2·6 miles per day. The distance from China, Japan, and the Pacific coast generally to Liverpool is from 1,000 to 1,200 miles less by the Canadian Pacific Railway than by the Central Pacific Railway.

The Imperial and Dominion Governments having granted the Canadian Pacific Railway annual subsidies of £45,000 and £15,000 respectively, a mail service has been established between England and China over this line, the distance being shortened by several days, and the overland journey being entirely through British Territory. Steamers have been built in England specially for this service, and mails have been landed in London within twenty-one days from leaving Yokohama.

THE GRAND TRUNK was originally formed in 1853 by an Act of the Legislature, amalgamating the following lines, viz. — Grand Trunk, Great Western, Midland, Georgian Bay, London, Huron and Bruce, Wellington, Hamilton, Northern and North-Western. North Simcoe, Montreal and Champlain, Beauharnois, Jacques Cartier, Waterloo Junction, and Cobourg, Blairton and Marmora, thus forming a continuous line through the provinces of Quebec and Ontario. The total loan and share capital of the company amounts to over £65,000,000 sterling. The mileage of the lines owned and leased is 3,512 miles, in addition to which the company controls 674 miles in the States of Michigan, Indiana and Illinois, making the mileage of the entire system 4,186 miles. The eastern extremities of the line are Quebec and Portland, Maine, and it extends westward to Detroit, Chicago, Grand Haven and Muskegon, supplying the means of communication with Montreal, Toronto, Hamilton, Niagara, Buffalo, Detroit, and all the principal cities and towns in the provinces of Quebec and Ontario. *President*, Sir Charles Rivers Wilson, G.C.M.G., C.B.; *Vice-President*, Joseph Price; *Secretary*, Walter Lindley. *London office*, Dashwood House, New Broad Street E.C.

NEWFOUNDLAND.

This island, the twelfth largest island in the world, is situated between 46° 37′—51° 39′ N. lat. and 52° 35′—59° 25′ W. long., on the north-east side of the Gulf of St. Lawrence. It is about 317 miles long, and 316 miles broad, and contains about 42,200 square miles, and at the end of 1891 it had a population of 197,934, not including those resident in the portion of Labrador (4,106) within the jurisdiction of Newfoundland. Of these 72,342 are Roman Catholics, 68,075 Church of England, 52,672 Methodists, 1,447 Presbyterians, and 3,398 various. This is the oldest English Colony. It was discovered by Sebastian Cabot in 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bona Vista. The inhabitants are chiefly located on the coast-line of the shore and bays, and the greater part are engaged in fishing; for cod in summer, and seal fishing in winter and spring; these are the two main industries of the island. Lakes and rivers abound; it is estimated that about one-third of the surface is covered with water. The interior is practically in a state of nature; but a survey has been made for the purpose of constructing a railway, which is now in process of being built, and which will open up large tracts of rich agricultural, mineral, and timber lands, but hitherto of small value. There are about 450 miles of railway at present; the Government is rapidly pushing to its completion the line to the Exploits River and thence across the island to Port-aux-Basques (500 miles; of which 350 have been built), which is about nine hours by steam from Cape Breton, the nearest point of the mainland. The climate is salubrious, and the people are a strong, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

Labrador, a dependency of Newfoundland, forms the most easterly part of America, and extends from Blanc Sablon in the Straits of Belleisle on the south to Cape Chudleigh at the entrance of Hudson's Straits on the north; it possesses valuable cod, herring, trout, and salmon fisheries. There are a few Moravian missionary settlements on the coast, and also some posts of the Hudson Bay Company.

The principal exports of the Colony are codfish, value $3,703,338; cod and seal oil, value $541,094; sealskins, $227,888; tinned lobsters, $312,364; herrings, salmon, and other products of the fisheries, $331,937; copper, copper ore, iron pyrites and other minerals, $523,309; besides which there is a prospect of a coal-mining industry being developed.

The Government is a responsible one, administered by a Governor, appointed by the Crown; a responsible executive of seven, a legislative council of not over fifteen, appointed for life, and a House of Assembly of thirty-six, elected by the people every four years. The first general election, under the "ballot system" and "Manhood Suffrage Acts," passed in the 1889 session of the Legislature, and in 1890 the franchise was given to all males of 21 years and over.

BRITISH GUIANA,

which includes the settlements of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America, and comprises a vast area (estimated at 109,000 square miles), the boundaries of which are, in part, undetermined. It has a seaboard of more than 300 miles. The Essequibo River intersects the country in its entire length; the Corentyne River separates it from Dutch Guiana; the Cuyuni is the great waterway on the west. The colony is bounded on the south by Brazil, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The Venezuelan boundary line has not yet been properly defined. The territory still left in question contains the valuable mines known as Venezuelan. There are but two towns, properly so called, Georgetown, population 53,176, and New Amsterdam, population 8,903. The climate is hot, but not generally unhealthy; the country is now almost free from the epidemics of yellow fever which were once prevalent. The cultivated portion of the country, amounting to 94,000 acres, of which 79,284 acres are in sugar-cane, is confined to the sea-coast and to a short distance from the rivers. It is very like Holland, being below the level of the sea and intersected with canals constructed by its former Dutch owners. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April and from the middle of August to the end of November. The temperature ranges between 75° and 90° F. The chief product is sugar, which forms 82 per cent. of the export trade of the colony. Good coffee is also produced. The other principal products are rum, molasses, cocoanuts, timber, and gold. The returns of the leading exports for the year 1895-6 were as follow:—Sugar, value £1,046,160; rum, £121,144; molasses, £15,986; timber, 175,520 cubic feet, value £13,310; gold, 122,057 oz., valued at £449,836. The population, April, 1891, was 278,328, of whom about one-third were Indian immigrants. There are about 10,000 aboriginal Indians, belonging chiefly to Arawak, Acawai, Carib, and Warau tribes; they are occupied largely in fishing, hunting, and raising crops of cassava. The territory now forming the Colony of British Guiana was first partially settled by the

Dutch West India Company in 1580, and was from time to time held by Holland and France, and was finally surrendered to this country at the Peace of 1814. It was stipulated that the Dutch laws and institutions should be maintained.

The Government consists of a Governor and a Court of Policy of 15 members besides the Governor—7 official and 8 elected by the direct vote of the people—in which the Governor has two votes, and a veto on any measure at any stage. The Court of Policy discharges the functions of a Legislative Council, except as to levying taxes, which is the prerogative of what is called the Combined Court, composed of the Court of Policy and of 6 Financial Representatives elected directly by the people. There is, besides, the Executive Council, consisting of the Governor, 5 official and 3 unofficial members nominated by the Crown, which exercises all the executive and administrative functions of government other than those before mentioned. An elective member of the Court of Policy must be the owner of 80 acres of land in the colony, of which 40 at least must be under cultivation, or of immovable property value £1,562 10*s.*, or of house and land of an annual rental of £250. The qualification for the general electors, who number only about 2,000, is, *Country*—Ownership of 3 acres of land under cultivation, or tenancy of 6 acres, do.; tenancy of a house of £40 rental; income of £100 a year; payment of £4 3*s.* 4*d.* taxes. *Town*—Ownership of house, value £104 3*s.* 4*d.*; tenancy of house, rental £25 a year; income and taxes as above. The general electors also choose the Financial Representatives, who must have a similar qualification, or an annual income of £300. There are 1,035 miles of Post Office telegraph lines, and 17 cables, and 67 post-offices; also a Post-office Telephone Exchange in Georgetown with over 400 subscribers. There is a line of Railway along the sea coast from Georgetown to Mahaica, 21 miles in length, owned by the Demerara Railway Company, constructed at a cost of £280,000. A local militia force has been raised from the nucleus of the old volunteer force, and now consists of over 200 men. The depression in the sugar market in 1894–95 has caused much apprehension, and it is feared that many estates will go out of cultivation unless a revival takes place. Attention is in consequence being given to other industries such as farming and rice-growing, and there is good prospect of a development of gold mining in the interior, for which purpose railways are being projected to the richer districts, and roads are in course of construction.

Georgetown, 3,963 miles; transit, 13½ days by R. Mail steamer on alternate Wednesdays from Southampton. Parcels, first lb. 10*d.*, after per lb. 8*d.* (to 11 lbs.); telegrams, per word, 12*s.* 2*d.*

BRITISH HONDURAS.

This colony comprises about 7,562 square miles of territory in Central America, extending from 18° 29′ 5″ to 15° 53′ 55″ N. latitude, and from 89° 9′ 22″ to 88° 10′ W. longitude. Its extreme length and breadth are 174 m. and 68 m. respectively; it abuts on the Atlantic, and is bounded on the north by Yucatan and Mexico, on the west and south by Guatemala, and on the east by the Caribbean Sea. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 56° to 96°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten to twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary. The Census (1891) gives the population at 31,471 (males, 16,268; females, 15,203).

The staple products are the natural woods of the colony, viz., mahogany and logwood, but there are many other excellent furniture woods. Wood-cutting, in fact, forms the chief industry of the colony. The average annual export of mahogany, of which the cost, ready for shipment, is $40 to $50 per 1,000 ft., amounts for the last 5 years to 4,975,405 ft.; while that of logwood, costing $10 to $15 per ton, reached 30,831 tons in 1895. There are some sugar estates; and coffee plantations have been started. Fruits, including bananas, plantains, cocoanuts, pineapples, oranges, and mangoes, are being rapidly and extensively grown, while inland there are extensive regions of good pasturage, and there is reason to believe that gold and other minerals will be found. In 1895 the export of mahogany amounted to

2,868,346 cubic feet. Other exports are: Sugar, 2,316 lbs.; rum, 1,845 gals.; cedar-wood, 62,965 ft., and india-rubber, 17,381 lbs. The value of bananas shipped during the year 1895 was $93,070. The latest returns of the area under cultivation are as follows:—Indian corn, 4,633 acres; sugar-cane, 1,766 acres; yams, fruits, &c., 6,046 acres; rice, 55 acres; coffee, 102 acres. The best description of cocoa trees grow wild in the bush. Crown lands can be purchased at $1 per acre, or leased at an annual rental of 10c. to 30c. per acre. The transit trade with the neighbouring Republics used to be considerable, but has seriously declined of late years with the growth of direct communication by mail steamers. Of the total goods exported in 1895, $770,638 represent the value of the produce and manufactures of the colony itself; and $511,331 that of British, foreign, and other colonial produce and manufactures in course of transit through the colony.

On the 15th October, 1894, the gold dollar of the United States was made the standard coin, with a subsidiary silver coinage, and a paper currency. The sovereign and half-sovereign are legal tender at $4.86 and $2.43 respectively.

There are forty-four schools in the colony, all but one of which are denominational, and in receipt of Government aid.

British Honduras is governed as a Crown colony. The Executive Council consists of the Colonial Secretary, the Treasurer, the Attorney-General, and the Inspector Commandant of Constabulary, and three unofficial members appointed by the Sovereign. The Legislative Council includes the following members:—the Colonial Secretary, the Treasurer, the Attorney-General, and not less than five unofficial members appointed by the Sovereign.

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15′ N. lat. and 64° 51′ W. long., comprising an area of about 19 square miles, and containing (1895) an estimated population of 15,794, of whom 6,000 are white, exclusive of army and navy. These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant. Bermuda possesses a strongly-fortified dockyard, where the British North American squadron refits.

These islands have become a favourite winter resort for visitors from the neighbouring States of America and the Dominion of Canada. Numbers repair thither from November until April to escape the cold of the North American Continent: large hotels have been erected for their accommodation. The climate during this period is most salubrious, the range of thermometer being 60° to 70°, and invalids derive great benefit from the mildness of the winter.

The soil is, on the whole, poor. The products of the island chiefly consist of onions and potatoes, which are grown in large quantities for the spring supply of the New York market, a few melons and pumpkins, and arrowroot of a very fine quality. Lily bulbs, especially the Bermuda Easter Lily, are grown for export, chiefly to the United States. The sea abounds with fish; a few turtles are taken.

The Government is administered by a Governor, who is also Commander-in-chief of the military forces. He is advised by an Executive Council of 6 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members, four of whom are elected by each of the nine parishes. There are 1,167 electors, whose individual qualifications are the possession of freehold property of not less value than £60. Hamilton, on the coast of Long Island, is the chief town and the seat of government: population (1891), 1,854. The churches and chapels are all endowed under a temporary Act: the sum of £10 is paid for every hundred of the denomination.

Public revenue in 1895	£37,850

AUSTRALASIA, that is Austral or Southern Asia, comprises the great island-continent of Australia, the islands of New Zealand and Tasmania, and a vast number of smaller islands, chiefly in the Southern Hemisphere, between the Pacific and Indian Oceans, together with a portion of the island of Papua or New Guinea.

The whole of the British Possessions in this area, including Fiji and a portion of New Guinea, is estimated to contain 3,259,210 square miles, and a population of 4,500,000.

AUSTRALIA forms the main portion of Australasia, and is the largest island on the face of the globe, extending from 10° 39′ to 39° 11½′ S. lat., and from 113° 55′ to 153° 16′ E. long. Its boundaries on the N. are Torres Straits, the Sea of Timor, and the islands of New Guinea (Papua), Timor, Flores, &c.; on the E., the South Pacific Ocean; on the S., Bass's Strait, Tasmania, and the South Pacific Ocean; and on the W., the Indian Ocean. Its nearest point to Asia is situate at a distance of 1,600 miles S.E. of Singapore, the extremity of the continent in this direction; the intervening space being occupied by the East Indian Archipelago, chiefly in the possession of Holland. The area of this vast island-continent is estimated at 2,944,628 square miles. The greatest dimensions are in length from E. to W. 2,400 miles, and in breadth from N. to S. 1,971 miles; it has a rapidly-increasing population, which in December, 1893, was estimated at 3,310,182. It is divided into the five colonies, New South Wales, Victoria, Queensland, South Australia, and Western Australia. There are many excellent and spacious harbours in various parts of the coast, but very few remarkable indentations; at an average distance of sixty miles a range of steep mountains runs along the E. coast, but the greater part of the shore on the N., the W., and S. is low and sandy. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray rivers. Nearly all round the coast, however, and in the eastern portion of the island, is a rich grazing country, admirably adapted to the rearing of sheep, of which there were in New South Wales, 46,617,687; Victoria, 13,180,943; Queensland, 19,587,691; South Australia, 7,325,194; Western Australia, 2,132,311. Sheep-farming is the pre-eminent branch of industry, and it is chiefly as a wool-producing country that Australia has risen into importance. Years of drought occasionally occur, constituting the greatest impediment to the progress of the colonies, often followed by years of flood. The commencement of the seasons is as follows: Autumn, about March 21; Winter, June 21; Spring, September 23; and Summer, December 22. The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island, which falls into the sea on the south coast; on the east coast, the Hunter, Clarence, Richmond, Macleay, Brisbane, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, the Fortescue, De Grey, and Fitzroy; and the Victoria, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria, on the north; but they are of little service in facilitating internal traffic. The most extensive mountain system on the Australian continent takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The chief ranges of the system are the Australian Alps in Victoria and New South Wales, the Blue Mountains and the Liverpool Range in New South Wales, and the Craig Range in Queensland. The highest point is Mount Kosciusko (7,328 ft.), in New South Wales. In 1895 there were 11,144 miles of railway in operation, of which no less than 10,471 are Government and 673 private lines. New South Wales owned 2,616; Victoria, 3,120; Queensland 2,379; South Australia, 1,868; Western Australia, 1,145.

Speaking generally, it may be said that one of the most marked characteristics of the whole continent is the scarcity of rivers and fresh-water lakes. There are few rivers of any considerable size along the whole coast-line (8,000 miles); indeed, for 1,500 miles along the S. coast there is not a single watercourse. Lakes are numerous, but nearly all are salt, and even those barely merit the name, being dependent for their supplies of water upon the rivers and floods. They are more like marshes than lakes: at one time they are immense reedy swamps; at another time they are areas of submerged levels, with broad mud banks for shores that render the water absolutely unapproachable. Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c. The settled portions are intersected by railways, already extending

to 11,144 miles, as shown above, and with about 76,300 miles (excluding telephone wire) of telegraphic wire, connecting together all the principal towns on the continent. Direct steam communication is established with England and the Continent by means of the Peninsular and Oriental, the Orient, Messageries Maritimes, and North German Lloyd, and other lines of steamers. "The Great South Land" is believed to have been first seen by De Gonneville, a French navigator, in 1503, and was inserted in a map constructed by Le Testu of Dieppe about the year 1542. Portions of the coast on the north-west and south were sighted by the Dutch and English at different times, but practically speaking, the Island Continent was made known to the world by Captain Cook in 1770, when he saw the land to the west of Cape Howe, and explored the whole eastern coast to Torres Strait. Subsequently Flinders sailed round it, in 1802, and gave it the name of "Australia." Following the favourable report of Cook, the first British settlement was formed at Port Jackson (Sydney) in 1788. The aborigines are rapidly becoming extinct; the present number may be estimated at about 100,000. There is a weekly mail from London.

POSTAGE.—The Australasian Colonies joined the Postal Union on the first of October, 1891. Parcels to all places: 2 lbs., 1*s.* 6*d.*; excess to 11 lbs., 9*d.* per lb.

THE AUSTRALIAN NAVY.

NEW SOUTH WALES.—**Acheron** and **Avernus**, torpedo steam launches. *Captain commanding Naval forces*, Francis Hixson (late master R.N.); *Chief Executive Officer*, G. S. Lindeman, R.N.

QUEENSLAND.—**Gayundah**, double-screw steel ship, 2 guns, 360 tons, 400 h.p.—**Otter**, gunboat, steel, 1 gun, 220 tons, 460 h.p.—**Paluma**, double-screw iron ship, 2 guns, 360 tons, 400 h.p.; with **Bonito**, **Stingaree**, **Pumba**, **Bream**, **Midge**, and **Dolphin**.

SOUTH AUSTRALIA.—**Protector**, cruiser, 9 guns, 920 tons, 1641 h.p. *Commander and Naval Commandant*, W. R. Creswell, R.N., £300; *Ch. Eng. and Eng.-in-Charge of Submarine Mine Defences and Torpedo Corps*, W. Clarkson, £300.

VICTORIA.—**Cerberus**, double-screw iron armour-plated turret ship; **Nelson** (frigate), with **Countess of Hopetoun**, **Childers**, **Nepean**, and **Lonsdale**. Torpedo Boats: **Batman**, **Fawkner**, **Gannet**, **Lady Loch**, **Commissioner**, **Customs No. 1**, and **Gordon**. Officers: *Naval Comm.*, *Capt.* George Neville, R.N., £1,050; *Comm.* H. C. Kingsford, R.N., £600; *Fleet Eng.* J. L. Breaks, £440; *Staff-Surg.* C. A. Stewart, £150.

TASMANIA.—One torpedo boat.

NEW ZEALAND.—Four torpedo boats and 4 steam torpedo launches.

NEW SOUTH WALES.

The whole of the eastern part of Australia, including the several colonies of New South Wales, Victoria, and Queensland, received the name of NEW SOUTH WALES from its first explorer, Captain James Cook, in 1770. The present colony of New South Wales originated in a penal settlement formed by the British Government, when Captain Arthur Phillip, R.N., its first Governor, arrived at Botany Bay, in H.M.S. *Sirius*, in January, 1788, with six transports and three store-ships, where they anchored, but subsequently proceeded to Port Jackson, which was found to be more suitable than Botany Bay for the new settlement: he there landed the 750 "persons" under his charge, and the British ensign was for the first time hoisted on the shores of Sydney Cove, now the capital and seat of government.

The colony is situated between the 29th and 36th parallels of S. lat. and 141st and 153rd meridians of E. long., and comprises an area of 310,700 square miles—*i.e.*, more than six times the area of England, and nearly three times the size of Great Britain and Ireland—with a population, Census 1891, of 1,132,234, and 1,289,770 on June 30, 1895. The early history of the colony was not free from trouble. The first Governor, Capt. Phillip, remained from Jan. 26, 1788, to Dec. 10, 1792, and was succeeded by Capt. Grose, Dec. 11, 1792, to Dec. 12, 1794; Capt. Paterson, Dec. 13, 1794, to Sept. 1, 1795, when a duly appointed Governor, Capt. Hunter, R.N., arrived, and remained from Sept. 7, 1795, to Sept. 27, 1800. Capt. P. G. King followed, Sept. 28, 1800, to August 12, 1806, when he was followed by the unfortunate Capt. Bligh, whose rule came to an abrupt termination by a general revolt; and after an interregnum of nearly two years, Major-General L. Macquarie arrived, and, Jan. 1, 1810, assumed the governorship, which he retained for nearly eleven years, since which time there has been a regular succession. "Botany Bay" was for many years almost synonymous with Australia, and had a most unsavoury reputation; but with the cessation of the long European war after Waterloo, and the great distress in this country consequent upon the return of so many men discharged from the Army and Navy, attention was attracted to Australia as a centre of emigration. In 1813 the interior of the country was explored, and the great plains being found admirably adapted for sheep-farming, several breeds of sheep, including the celebrated merino, were introduced, and a foundation laid for the future prosperity of the country. The agricultural progress of the colony has been truly marvellous. In the year 1792 there were but 23 head of cattle, 11 horses, 105 sheep, and 43 pigs,

On the 31st March, 1896, there were 487,943 horses, 2,150,057 cattle, 47,617,687 sheep, and 221,567 pigs. In 1895, 297,448,104 lbs. of wool, valued at £8,958,690, were produced.

Minerals at first attracted but little attention, but in these the country is also rich: the gold fields were discovered in 1851, and up to the end of 1895 these had produced, since first discovery, £42,326,598; (coal, £30,694,050). Copper, silver, tin, iron, antimony, asbestos, cinnabar, and kerosene shale are also found; and in small quantities, diamonds, rubies, opals, and other precious stones. The total value of minerals raised in 1895 was £4,413,580.

Agriculture is one of the principal industries of the colony. About 1,348,600 acres are under cultivation (excluding 300,862 under permanent artificial grasses), producing during the year ended 31st March, 1896, 11,370,460 bushels of wheat, maize, and other kinds of grain, with 56,179 tons of potatoes, and 11,142 cwt. of tobacco. Sugar-cane to the extent of 207,771 tons was produced, also 885,673 gallons of wine, and 5,954,940 dozens of oranges. So rich is the soil, and so genial the climate, that almost every kind of fruit and vegetable may be grown. The total extent of land alienated or in process of alienation at the end of 1895 was 44,895,532 acres, while the area of land leased for pastoral occupation and homestead, mining and other purposes at the same date was 124,075,086 acres. At Sydney the mean temperature for 36 years averaged 63·2°, about the same as at Madrid; at Bathurst it is only 58°, but on the inland plains it averages about 65°. The western portion of the country is unfortunately not well watered, and the chief rivers, the Darling and the Lachlan, both tributaries of the Murray, which divides the colony from Victoria, are only navigable for part of the year; the coastal districts are, however, watered by numerous streams, and the Richmond, Clarence, Macleay, Manning, Hunter, Hawkesbury, and Shoalhaven are the principal rivers which empty their waters into the Tasman Sea. In 1851 the south of the country was formed into the separate colony of Victoria, and in 1859 the northern portion into that of Queensland.

The number of people in New South Wales of the Church of England denomination, according to the Census of 1891, was 502,980. The Head of the Church is the Most Revd. The Primate Bishop of Sydney. There are six dioceses, viz.:—Metropolitan, Bathurst, Goulburn, Newcastle, Grafton and Armidale, and Riverina. The See of Sydney, now Metropolitan, was erected in 1836, when it comprised the whole of Australia, but in 1847 took its present designation; the other Sees in N. S. Wales are those of Newcastle, 1847, Goulburn, 1863, Bathurst, 1869, Grafton and Armidale, 1869, and Riverina, 1885; the clergy number about 330.

All religions are free, there is no establishment, and all payments are voluntary, with the exception of such as remain due under former arrangements. About two-thirds of the people are Protestants, the greater part members of the Church of England, according to the 1891 Census; there are 286,911 Roman Catholics. The head of the Roman Catholic Church is His Eminence the Cardinal Archbishop of Sydney, with bishops of Maitland, Bathurst, Armidale, Goulburn, Wilcannia, and Grafton. Presbyterians and Methodists come next, but almost every sect is represented. Education is compulsory. The total enrolment in 1895 was 216,396, and the average daily attendance during that year was 139,978; the gross disbursements of the Public Instruction Department amounted to £751,294; in addition to this amount, £8,500 was received from Government by university affiliated colleges, and Sydney Grammar School. The University of Sydney, incorporated in 1851, enjoys a deservedly high reputation; degrees granted there rank with those of Oxford and Cambridge. Of churches and chapels, the total number belonging to all denominations was 2,031.

The ordinary passage-money by first-class steamers averages, cabin, £55 to £70; intermediate, £30 to £37; steerage from £14. The population (Census 1891) was 1,132,234, made up of males, 612,562, and females, 519,672, showing a preponderance of males of no less than 92,890.

The estimated number of aborigines in the colony is 7,046, of which 3,770 are males, and 3,276 females.

The estimated population on 31st December, 1895, was 1,277,870, and on June 30, 1896, 1,289,770.

"Responsible government" was established by the Constitution Act, 18 & 19 Vict. c. 54, and is vested in a Governor appointed by the Crown, and a Legislative Council consisting of not less than 21 members; the Council at present consists of 66 members. The Legislative Assembly consists of 125 members, representing 125 electoral districts, elected under an Act assented to on June 13, 1893, and receiving a salary of £300 per annum. With few exceptions all natural-born or naturalised males, 21 years of age, who have resided 12 months in the Colony and three months in the district are entitled to the franchise. The voting is by ballot, and property qualification and plural voting are abolished.

Railways, roads, and bridges have their several departments. There were open on June 30, 1896, 2,531¼ miles of Government railway, upon the construction of which £36,852,194 has been spent; there are also 84 miles of private railway lines, and 7 miles of private tramways; and on Dec. 31, 1895, there were 28,799 miles of telegraph-wire with 834 stations, in addition to 601 miles of telephone wire. The Post Offices and receiving offices numbered 1,972, the number of letters conveyed was 68,079,000; of newspapers, 44,902,900; of packets and book parcels 11,259,300; and of parcels, 422,772. There are now 61 miles of Government tramways open for traffic; capital expended, £1,434,896.

In 1895 the number of vessels entered and cleared was 6,211, with a total tonnage of 5,860,038. There were on June 30, 1896, 13 banks of issue, with a paid-up capital of £19,801,760. The total average assets within New South Wales on the same date were £45,096,961, the total average liabilities within the colony being £31,717,617. The savings bank of New South Wales had deposits amounting to £3,951,874. There were also 499 Post Office savings banks having deposits amounting to £4,121,700. The Public Debt on 30 June, 1896, amounted to £59,635,889, mostly incurred for the construction of railways, waterworks and sewerage, telegraphs, and other reproductive public works.

While fully trusting to the ability and willingness of the mother country, the colony has not been altogether unmindful of defence. In December, 1895, there were enrolled in the permanent and volunteer naval and military service of the colony 6,819 men: 1,046 artillery-men, 112 engineers, 98 submarine miners, 72 electricians, 2,609 infantry, 359 mounted rifles, 379 lancers, 68 army service corps, 122 medical staff corps, 1,800 members of attached rifle clubs, 168 others, staff,

&c. The naval brigade and naval artillery volunteers comprise 544 officers and men. The officers and men who formed the well-known "Soudan contingent" were chiefly selected from these forces. The cost of defence for 1894 was £321,337, and the expenditure up to end of 1894, from Consolidated Revenue, £3,990,417; from Loans, £1,197,306; volunteer land orders, £167,745; total, £5,355,468 (which is exclusive of the cost of the Soudan contingent, £121,630).

SYDNEY, the chief city and Capital, stands on the shore of Port Jackson, surrounded by scenery of surpassing beauty. It extends four miles north and south by three miles east and west; and contains 115 miles of streets with 22,400 houses, and a population of about 100,000, or, including suburbs, 1,415 miles of streets, 85,076 houses, and a population of 408,500. About 3,800 acres have wisely been set apart for parks and open spaces: here are situated the Government buildings, Royal Mint, the University, National Art Gallery, Free Public Library, Observatory, two cathedrals, and numerous churches. The other large towns outside the metropolitan area, with their populations, are Newcastle, 13,500; Broken Hill, 19,100; Bathurst, 9,350; Goulburn, 12,300; Parramatta, 12,000; Maitland, E. & W., 10,800; Wickham, 6,650; Grafton, 6,000; Albury, 5,900; Hamilton, 5,200; and Tamworth, 5,100.

Sydney, *vid* Suez Canal, is 12,043 miles from London; transit from 32 to 43 days. Telegrams, 4*s.* 11*d.* and 4*s.* 9*d.* per word.

VICTORIA.

This territory originally formed part of New South Wales (known as the Port Phillip district), from which it was severed, and erected into a separate colony, in 1851; and although one of the youngest, and, in point of area, the smallest colony on the Australian continent, is still almost the most populous and probably the wealthiest. It com-

Digitized by Google

prises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes: it lies between the 34th and 39th parallels of south latitude, and the 141st and 150th meridians of east longitude. Its extreme length from east to west is about 490 miles, its greatest breadth is about 300 miles, and its extent of coast line nearly 700 miles. The entire area comprises 87,884 square miles, or 56,245,760 acres, of which 2,864,342 were under cultivation in 1896. Its population on the 30th June, 1896, was 1,177,444, including about 8,500 Chinese and aborigines. At the census of 1891 the native Victorians numbered about 713,000; natives of other Australian colonies about 80,000; English, 163,000; Irish, 85,000; Scottish, 51,000; Chinese, 8,000; and natives of other countries about 40,000. Nearly four-fifths of the population are Protestants, while the Roman Catholics number about 250,000. The Victorian aborigines at the time of the first colonisation of the district were, according to the most trustworthy estimates, about 15,000 in number; in 1851 the official return gave 2,693, while the census of 1891 showed them to be as few as 565 (325 males and 240 females). The birth-rate of Victoria for 1895 was 28·56 per 1,000; the death-rate, which is remarkably low, was 13·25 per 1,000. Victoria is the principal gold-producing colony of Australia, to which it owes its extraordinarily rapid progression: from the discovery of gold in 1851 to the end of the year 1895, the quantity raised—60,198,372 oz., estimated at £4 per oz.—amounted in value to £240,793,488. During the year 1895 the gold produced in the colony amounted to 740,086 ozs. The value of other minerals raised to the end of 1895, consisting principally of tin, copper, and antimony, is estimated at about £1,581,475. From its geographical position it enjoys a climate far more genial to Europeans than any other colony within the continent of Australia. There were 3,120 miles of railway completed at the end of June, 1895, all of which belonged to the Government, the capital cost amounting to £37,909,626, or an average of about £12,151 per mile. Of this amount £3,147,940 was paid from general revenue, the remainder being raised by loans. The net income, after paying all working expenses, was £1,038,198, equivalent to a return of nearly 2·75 per cent. on the mean debenture capital. There were 772 stations for electric telegraphs, extending over 7,091 miles (poles), which produced a revenue of £95,896 in 1895, the total mileage of wire being 14,409, and the telegrams transmitted numbering 2,036,449. There were also 10,822 miles of telephone wire in connection with exchanges, &c. The chief sources of income until 1862 were the customs duties and sales of public lands; but fresh sources of revenue, derivable from the railway system, public works, land tax, income tax, and stamp duties, have since been added. Wool, gold (including specie), wheat, flour, biscuit and butter are the staple productions of the colony. In 1895 the chief exports were of the following respective values:—Wool, £5,151,153; gold (including specie), £3,759,737; butter, £978,687; wheat, flour, and biscuit, £629,960; and live stock, £294,886. A trade is also springing up in preserved and frozen meats, the value of preserved meat exported in 1895 being £47,737, and of frozen meat £209,179. The principal imports of the colony in 1895 were wool (from across the border), £2,367,915; live stock, £361,369; sugar and molasses, £647,982; gold (including specie), £1,421,553; cottons, £927,269; woollens, £496,920; and timber, £174,146. The estimated number of sheep in 1894-95 was 13,180,943. Agriculture, although formerly neglected, has of late years much improved, wheat and oats being the two cereals chiefly cultivated; the dairy industry has also made marked progress. Of the 2,864,342 acres under cultivation in 1895-96, 1,412,736 were wheat crops and 255,503 oats. In 1894-95, 1,903,972 gallons of wine were produced, being more than the production of the previous year by 419,788 gallons. Manufacturing industry has made much progress in Victoria. The shipping statistics of the colony furnish abundant evidence of the magnitude and value of its trade. In 1895, 3,837 vessels, of an aggregate tonnage of 4,348,686, with 164,411 men, entered and cleared at Victorian ports.

MELBOURNE, the chief city and the seat of government, also an episcopal see, is distinguished for its University, Museum, Mint, Public Gardens, Observatory, Public Library, Hospital, its churches and other institutions: with its suburbs it contained on 31 December, 1895, an estimated population of 452,258 inhabitants, being the most populous city in the southern hemisphere. The other important towns are Ballarat, pop. 45,326; Bendigo (Sandhurst), pop. 42,381; Geelong, pop. 24,575; Castlemaine, pop. 7,021; Warrnambool, pop. 6,600; and Stawell, pop. 5,250.

The Government is vested in a Governor appointed by the Crown, aided by an Executive Ministry consisting of 10 members, and a Parliament consisting of a Legislative Council of 48 members elected for 14 provinces, and a Legislative Assembly of 95 members for 84 districts.

Melbourne, distant 11,267 miles; transit, 32 to 37 days. Telegrams, 4*s.* 8*d.* and 4*s.* 10*d.* a word; press, per word, 1*s.* 10*d.*

Note.—The salaries of public officers were, with a few exceptions, reduced during the years ended 30th June, 1894, 1895, and 1896, by various percentages varying from 5 per cent. for salaries from £100 to £150, to 15 per cent. for salaries over £1,000.

SOUTH AUSTRALIA.

A Legislative Act, by Royal Letters Patent, dated 6th July, 1863, rendered this name a misnomer by extending the boundaries of the colony so as to include the entire centre of the Australian continent from north to south. Thus it extends from 11° to 38° S. lat., and from 129° to 141° E. long., comprising an area of 903,690 square miles, with an estimated population, on Dec. 31, 1895, of 357,403, exclusive of aborigines. The dryness customary to the whole of the island-continent marks the character of the climate of South Australia, the average annual rainfall, calculated on a period of 57 consecutive years, amounting to no more than 21·277 inches. It was first colonised in 1836. The Constitution of the colony was remodelled in 1856, and the present form of government adopted. The settled portion is essentially an agricultural and pastoral province, bread-stuffs and wool constituting a large proportion of its exports. The lands purchased from the Crown, up to 1895, amounted to 7,629,667 acres, and those held upon lease for pastoral purposes numbered 152,176,868 acres in addition. The extent of land under cultivation in 1893 was estimated at 2,758,304 acres, of which wheat alone occupied 1,732,711 acres. Oats are not successful; potato-growing is carried on to a considerable extent, while the culture of flax and hops is also receiving attention. In 1895 the weight of native-grown wool exported was 54,550,423 lbs.; the value of bread-stuffs was £873,872, and of minerals £255,402. Apples and pears grow everywhere, strawberries do well in the hills, and oranges in many parts; the olive-oil is considered equal to any in the world, and the grape-vine thrives splendidly. The live-stock in 1893 numbered—horses 201,484, cattle 675,284, sheep 7,325,003. The shipping returns, too, show well, and speak of prosperity. In 1895 the arrivals and departures amounted to—British, 2,481,469 tons; foreign, 498,174 tons; total, 2,979,643 tons. The number of vessels belonging to Port Adelaide (1895) were:—steamers, 95, with a tonnage of 17,715; sailing vessels, 214, with a tonnage of 22,930. The places of worship provided in 1894 numbered 1,083, which gave 165,033 seats, exclusive of Roman Catholic, as to which no statistics are obtainable. The South Australian system of education is free, compulsory, and secular. In 1895 there were 634 government schools, and 254 private schools, with 1,196 and 568 teachers respectively. There are also 143 country institutes, providing libraries amounting altogether to 161,657 volumes. Bank assets, 1895, £7,435,051; funds in savings banks, £2,628,652. in 1895. Mining operations are pursued on a very extensive scale in the colony, the mineral wealth hitherto discovered consisting chiefly of copper; the Moonta, Wallaroo, and Burra Mines being the largest. South Australia has immense deposits of copper and iron, and some good silver-lead mines. Gold, silver, and tin have been met with in various places, but nowhere in great abundance. The story of the copper mines may be told in a line or two. The Kapunda copper mine was discovered in 1842, and is still being worked; the next year the Montacute mine was found, and in about eighteen years was worked out; in 1845 the famous Burra mines were discovered, and gave employment to a large population; but the new era in the colony's history was marked by the finding of the celebrated Wallaroo mines, during 1860, in Yorke's Peninsula, which yielded enormous quantities of productive ore, and brought about the usual mania. A year or two later the famous Moonta mine was opened; and both this and the Wallaroo, after being largely worked for more than twenty years, show no signs of exhaustion. South Australia possesses a large extent of telegraphic lines, 5,620 miles having already been made (1895). One through the centre of Australia, 2,200 miles, joins the submarine cable to England, bringing Australia into telegraphic communication with all

Digitized by Google

parts of the world. There were 1,867 miles of railway open on 31st December, 1895. The military defence of the colony is entrusted to a volunteer force and militia, the latter, which embraces cavalry, artillery, and infantry, being 1,736 all told. Two land batteries, one at Glanville and the other (having some heavy armaments) at Largs Bay, have been constructed to resist attacks by sea; and there is one gunboat—the *Protector*—belonging to the colony to aid the land defences.

The Government is administered by a Governor and an Executive Council of 6 members, who constitute a responsible Ministry, and are required to be members of Parliament. The Parliament consists of two houses, the Legislative Council or Upper House, and the House of Assembly. Both houses have equal powers, but money bills must originate in the lower chamber. The members of the Upper House are elected for nine years (one-third retiring every three years), and must be natural-born subjects of the Queen (resident in South Australia for three years) or naturalised subjects (resident in the colony for five years). A property qualification gives the right of voting for the Council, but the Assembly is elected upon a basis of adult suffrage, and by the Constitution Amendment Act, 1894, the franchise was extended to women. The law is administered by a Chief Justice, two puisne judges, a Commissioner of Bankruptcy, Local Courts (presided over by seven stipendiary magistrates), and various benches of magistrates in different parts of the country.

QUEENSLAND.

This colony, situated in lat. 10° 40′—29° S., and long. 138°—153° 30′ E., comprises the whole north-eastern portion of the Australian continent. It was formerly a part of New South Wales, but was separated therefrom, and erected into a distinct colony, in December, 1859.

Its eastern seaboard was discovered by Captain Cook in 1770; some years afterwards its coast was visited by Capt. Flinders; but the first attempt to explore and settle any portion of the interior was made by Oxley, the Surveyor-General of New South Wales, who, in 1823, entered the River Brisbane, and selected the site of its future capital city of that name on a spot about 20 miles from its mouth, in Moreton Bay. The subsequent settlement of the country has followed the discoveries of a series of explorers.

Queensland proper possesses an area of 668,497 square miles (*i.e.*, equal to more than 5½ times the area of the United Kingdom), of which the Government have parted with the fee simple of 12,453,840 acres; under a system of deferred payment, 1,757,755 more are in process of alienation out of the total of 427,838,080 acres, but an additional area of 264,882,426 acres has been leased out for sheep and cattle runs, large tracts of recently-explored country on the borders of the eastern boundary of South Australia having been taken up and stocked during the last few years. Most of the productions of both temperate and tropical countries can be cultivated with success in Queensland. Wheat, oats, and barley flourish on the downs, and are used both for grain and also as hay and green food for cattle; while a still larger area is devoted to maize, which yields an average crop of about 25 bushels per acre. Both English and sweet potatoes are cultivated; as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, and various English fruits. In the year 1895, 86,255 tons of sugar were produced. The chief articles of export, the produce of the Colony, in 1895, were:—Wool, £2,986,589; gold, £2,265,354; silver, lead, £48,379; tin, £74,187; pearl and tortoise-shell, £73,348; meat, £985,381; extract of meat, £42,791; green fruit, £58,555; oysters, £13,544; bêche-de-mer, £4,231; sugar, £796,117; timber, £2,570; hides and skins, £456,506; coal, £52; tallow, £595,992; live stock, £339,899. The climate generally may be considered sub-tropical; the summer is the rainy season, and is naturally hot, but even in winter the vegetation of Queensland is not wholly arrested. At Brisbane the average temperature for 1895 was 68·6°; the maximum reading for 1895 in shade was 93·0° and the minimum 36·4°. Wool is at present the staple production; rich gold, copper, tin, lead, quicksilver, antimony, and coal deposits are found in several districts; timber also of fine quality for cabinet manufacture, the Moreton Bay pine and the *Dammara robusta*, together with the cedar of Queensland, forming valuable products for export. The broad plains afford the richest pasturage. At the end of 1895,

the horses numbered 468,743, and the cattle, 6,822,401. The official returns give 19,856,959 sheep, and 100,797 pigs. The population of this vast territory at the end of 1895 was estimated to be 460,550, consisting of 259,160 males, and 201,390 females.

At the end of 1895 there were 2,379 miles of railway open; the length of telegraph wires being 17,790 miles, and the number of post-offices 1,033. In 1895 there were 738 State schools in operation, with 1,535 teachers and an average daily attendance of 48,270 children; and 193 private schools, with an average attendance of 10,796.

Among statistics of a miscellaneous character that testify to the vigour and prosperity of Queensland are the returns of banking deposits, which on the 31st Dec., 1895, were £11,022,209, apart from the £2,286,810 in the hands of the Government savings bank at the end of the year. In recent years Deposit and Savings Banks have been carrying on business in Brisbane, and are now holders of considerable sums of money.

The shipping trade of Queensland is considerable, the number of vessels entered inwards during 1895 being 584 (tonnage, 469,710), and the number outwards 634 (tonnage, 502,195). The defence of Queensland was provided for by an Act of Parliament passed in 1884, under which a force of about 3,000 men are at present enrolled. These comprise 3 classes, "Permanent Defence," numbering about 150; "Defence" (paid for each day's drill), some 2,000 strong, the rest being "Volunteers." Besides these, however, every male above 18 and under 60 helps to form one of four lines of "Reserves" according to his age and conjugal condition, and is liable for military service if required. The marine defences include a battery at Lytton and at Thursday Island, commanding the entrance to the Brisbane River, and some torpedo works carried out under the advice of Sir W. Jervoise. The colony possesses, in addition, a torpedo boat, two gun-boats, and a picket-boat; also five Naval Reserve corps.

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, and Adelaide; hence we find numerous ports of considerable size extending along the coast, the chief of them being Brisbane (pop. 93,657), Rockhampton (14,392), Maryborough (11,724), Townsville (10,355), Port Douglas, Mackay, Thursday Island, Cooktown, and Bundaberg. Among other places of importance are Ipswich (13,059), Toowoomba (10,936), Charters Towers (13,320) and Gympie (10,972).

The Constitution was slightly altered by an Act of 1869, but is now very similar to that of the other Australian colonies, and comprises a Governor, Legislative Council, and Assembly—the former consisting of 39 members, nominated for life by the Crown, and the latter of 72 members elected by the colonists. The administration of the law is in the hands of the Supreme Court, attached to which there is a Chief Justice, together with four puisne judges, and in those of the inferior courts, which are constituted as in New South Wales.

WESTERN AUSTRALIA,

includes all that portion of the continent west of 129° E. long., the most westerly point being in 112° 52′ E. long., and from 13° 30′ to 35° 8′ S. lat. Its extreme length therefore is, from north to south, 1,450 miles, and 850 from east to west. It embraces an area of 975,920 square miles. A very large proportion of this is heavy timber country. The jarrah (Eucalyptus marginata), sometimes erroneously called maho-

* Also receives £700 under a Railway Commission.

gany, covers immense tracts of land in the S.W. portion of the colony: its timber is extraordinarily durable, and as it resists the white ant and the "Teredo navalis," it is admirably adapted for railway sleepers, and for piles for bridges and harbour works. The sandal-wood (Santalum cygnorum) has long been an article of export; the tuart (Eucalyptus gomphocephala) and karri (Eucalyptus diversicolor), eucalypti of enormous size, are valuable timber trees. The "karri," which sometimes attains the height of 300 feet, is considered to be almost equal to the "jarrah" for many purposes. The occupied portion of the colony extends along the western coast for about 1,200 miles, by perhaps 150 in average breadth, and the population, June 30th, 1895, was 89,550. The average temperature of Perth (lat. 32° S.), the capital for the past nineteen years, was 64°, while the mean for the barometer was 30·045 inches. The climate is, undoubtedly, one of the healthiest and most enjoyable in the world; from the northern extremity to the southern it varies considerably, in the south being like that of France, but of a higher temperature; while in the north it is hot, but tempered by cool sea-breezes, and the atmosphere, as a rule, is free from the moistness characteristic of tropical climates generally. There are two seasons, the wet and the dry, the former lasting from April to September. The total rainfall at Perth during 1894 was 23·72, the average for the past 19 years being 33·362. The colony was first settled in 1829, and for many years made but little progress. It is, however, at the present time giving every indication of very rapid development. The chief products are gold, wool, timber, pearls and pearl-shells, lead, copper, tin, horses, and cattle. The cultivation of the land has in the past been much retarded by want of sufficient labour; large tracts of fertile soil, where sandalwood and other trees grow abundantly, and which are suitable for the culture of the vine, olive, and fig, occur in the south-western districts. The climate and soil are admirably adapted for silk-growing and for vintage purposes, the latter of which will, in all probability, prove in the future one of the most important industries of the colony, and there are at present 1,863 acres of vineyards in the colony. Good wheat-growing soils also exist in large areas in the southern division, and the produce is of excellent quality and abundant yield. At present there are, however, only 193,197 acres under cultivation. Magnetic iron, lead, copper, and tin ores exist in large quantities. The Yilgarn and the now celebrated Coolgardie goldfields, which are situated about 350 miles to the eastward of Perth, are being rapidly developed, about 160,940 oz. of gold having been already obtained from the former, and 186,229 oz. from the latter, and there seems to be every prospect of the fields proving the richest in Australia. Gold is also being found in the Kimberley, Pilbaum, Ashburton, and Murchison districts, from which, respectively, about 589 oz., 16,254 oz., 285 oz., and 52,946 oz. of gold were exported during 1894. The total amount of gold exported from the colony from 1886 to the 31st of August, 1895, is about 606,993 oz. There are 1,153 miles of railway open (30 June, 1895), and 392 under survey; the Eastern and Great Southern Railways connect Perth, the capital of the colony, with Fremantle and Albany (King George's Sound), the two principal ports. Railway communication has also been established between Perth and Yilgarn, and between Perth and Geraldton. There is direct telegraphic communication with England by the Eastern Extension Telegraph Co.'s cable from Roebuck Bay on the N.-W. coast, in addition to the line through Eucla to Adelaide. The imports chiefly consist of sugar, tea, tobacco, spirits, beer, soap, ironmongery, clothing of various kinds, &c. The exports are of wool, gold, jarrah and karri timber, lead, tin, copper ore, whale oil, guano, sandal-wood, pearls and pearl-shells, kangaroo skins, &c. The estimated value of the exports for 1894 was:—Wool, £232,201; timber, £74,804; sandal-wood £23,430; pearls, £25,000; pearl-shells, £37,805; gold, £787,099; guano, £3,919; tin ore, £15,274; skins, £14,775. The stock returns of the colony gave as follows:—Horses, 50,001; cattle, 187,214; sheep, 2,132,311; and pigs, 28,396. The shipping of West Australia is not extensive: in 1894 the vessels entered inwards numbered 372 (tonnage, 675,775); and those outwards 349 (tonnage, 653,303). During the last decade the revenue has increased from £290,319 in 1884 to £863,680 in 1894, and the expenditure from £291,306 to £755,564: while the value of the imports has grown in the same period from £521,166 to £2,114,414, and that of the exports from £405,692 to £1,251,406.

Amount of public revenue, 1894	£863,680
Amount of expenditure, 1894	755,564
Public debt, 1895 (30 June)	3,417,339

			336,120

Under an Act of the Imperial Parliament, 53 & 54 Vict. c. 26, the colony is ruled by a Governor appointed by the Crown, a Legislative Council, and a Legislative Assembly. This Act was proclaimed and came into operation 21st Oct. 1890. Of the population one-half belong to the Church of England, one-fourth are Roman Catholics, and the remaining fourth belong to various other denominations. The Bishop of Perth is assisted by a Synod in which the lay element forms a prominent feature. The Synod was established in 1872, and so far appears to work well. The educational system is compulsory; and the numerous elementary schools, which exist all over the colony, are under the control of the Minister of Education. There are also schools assisted by different denominations, having grants-in-aid from colonial funds, as well as a school in Perth for the higher education of boys. The total amount expended on education during the year ended 31st December, 1894, was £18,270; on school buildings, £10,643.

The principal towns in the colony are:—Perth (pop. about 16,000), on the right bank of the Swan River estuary, 12 m. from Fremantle; Fremantle (9,500); Albany (3,500), and Geraldton (3,000); Coolgardie (3,000), Kalgoorin (1,200), Southern Cross (1,200), Cue, York, and Guildford (from 1,000 to 3,000 each). About one-third of the whole population is to be found in Perth and Fremantle; there are, also, numerous smaller townships scattered throughout the colony, *e.g.*, Bunbury, Busselton, Bridgetown, Pinjarra, Newcastle, Northam, Marble Bar, Cossack, Roebourne, &c.

NEW ZEALAND,

a colony in the South Pacific Ocean, consisting of three islands, known as the North, Middle (or South), and Stewart's Islands, situate about 1,200 miles E. of New South Wales, between 34° 20′—47° 20′ S. lat. and 166° 25′—178° 35′ E. long. Portions of them were explored by Tasman, under the direction of the Dutch East India Company, in 1642, and visited at various times during the 18th century, and in 1777 by Captain Cook. The first settlement of Europeans was made in 1814, but no colonisation took place until 1839. In 1841 New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. The entire area (inclusive of the Auckland and Kermadec Islands), is stated at 104,471 square miles, or 66,710,320 acres (being a little smaller than Great Britain and Ireland), of which two-thirds are fitted for agriculture and grazing. The North Island comprises about 44,468 sq. miles; Middle Island, 58,525; Stewart Island, 665, with only 252 inhabitants; and an adjacent group, named the Chatham Islands, contain 375 sq. miles.

The European population of New Zealand was ascertained by the Census taken on 12th April, 1896, to be 703,360 (371,415 males and 331,945 females). The native population (Maoris) was found by a Census taken in February, 1896, to be 39,854 (21,673 males and 18,181 females), chiefly in the North Island, making the total population of the colony, including Maoris, 743,214 persons. In 1840 a treaty was concluded at Waitangi with the native chiefs, whereby the sovereignty of the islands was ceded to Great Britain, while the chiefs were guaranteed the possession of their lands, forests, &c., so long as they desired to retain them; the right of pre-emption was, however, reserved to the Crown if they wished to alienate any portion. This right was abolished by legislation in 1862, when the Crown relinquished its right of pre-emption, whilst at the same time the purchase of native lands for the Crown did not abate, but continued side by side with the private purchases until 1894, when the right of private purchase was withdrawn. Thus New Zealand became a regular colony, and the seat of government was fixed at Auckland, to be removed to Wellington in 1865.

New Zealand in many parts is very mountainous; a mountain chain traverses the west side of the South Island, culminating in Mount Cook, 12,349 feet in height. The geographical position and physical features of these islands tend naturally to render the climate greatly varied; yet it is remarkable for its salubrity, and resembles in many respects that of Great Britain, though its atmosphere is drier and more elastic. The extremes of daily temperature vary throughout the year only by an average of 20°: London is 7° colder than the North Island and 4° colder than the South Island. The mean annual temperature of the whole colony for the different seasons is:—Spring, 55°; Summer, 63°; Autumn, 57°; and Winter, 48°. The climate, in short, is admirably adapted for raising every fruit, flower, and edible that flourishes in Great Britain. Amongst the productions most peculiar to New Zealand are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding, from its lightness and elasticity, the resin of this tree forming also one of its most valuable exports, Kauri gum; and the native flax, considerable quantities of which are transmitted to the United Kingdom and the United States of America for the manufacture of ropes and twine. Wool is largely produced, tallow and timber are also among the principal exports of the colony, and a large and increasing trade in frozen meat has been developed. Gold mining, both alluvial and quartz, is an important industry in many districts, and a rich iron ore, in the form of ironsand, has been found in Taranaki. Coal is widely distributed, and copper is met with in several localities.

The total extent of land under all kinds of crop (excluding lands in artificial grasses), and of land broken up but not under crop, is (1896) 1,355,600 acres, while there are 9,285,170 acres of land in sown grass of which 5,030,247 acres had not been previously ploughed. The value of the principal articles of export for the year 1895 is as follows:—Wool, £3,662,131; frozen meat, £1,262,711; agricultural products, £326,029; gold, £1,162,181; Kauri gum, £418,766; tallow, £260,999; and timber, £141,892. In April, 1895, the number of sheep was 19,826,604; horned cattle, in January, 1896, 1,047,901; and horses, in January, 1896, 237,418. In March, 1896, there were 2,014 miles of government railway lines in working order, and 114 miles more under construction; and the colony possesses in addition 167 miles of private lines, together with an excellent coaching system. The shipping trade is also considerable, and regular lines of steamers run between the numerous ports, besides direct steam communication with England. During 1895 the vessels entered inwards numbered 611 (tonnage, 672,951); and those entered outwards 597 (tonnage, 648,946).

Public Revenue, 1895-96	£4,610,403
Public Expenditure (and from loans, £2,972,203)	4,403,749
Public debt (gross), 31 March, 1896	43,050,780
Accrued sinking fund, 31st Mar., 1896	778,891
Total imports, 1895	6,400,129
Total exports, 1895	8,550,224

Imports from United Kingdom, 1895.

The General Government consists of a Governor, aided by a Ministry, a Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for seven years only), at present consisting of 44 members, and a House of Representatives, consisting of 74 members elected for three years. Four of the members are Maoris elected by the natives. Women are entitled to register as electors and to vote at the elections for Members of the House of Representatives, but are not qualified for election, nor may they be appointed to the Legislative Council.

The State system of education is free, secular, and compulsory. There are (December, 1895) 1,464 public primary schools, with 3,386 teachers and 129,856 scholars; there are also 298 private schools, with 14,655 scholars, and, in addition, 69 village schools for the Maoris. The higher education of boys and girls in the cities and large towns is carried on in 24 endowed colleges and grammar schools. The University of New Zealand has power to confer degrees. The annual postal circulation of the colony amounts to 55,000,000 letters and post-cards, 19,000,000 newspapers, and above 13,000,000 books and packets, and the work is effected by 1,404 post-offices. There are 6,245 miles of telegraph line carrying 15,764 miles of wire. The administration of the law is carried out by a Supreme Court, consisting of a Chief Justice and four puisne judges, and by district judges, stipendiary magistrates, and justices of the peace.

New Zealand has 4 torpedo boats.

CAPITAL, Wellington, in the North Island.

The population of the chief cities and towns on 12th April, 1896, was as follows:—Wellington (and suburbs), 41,758; Auckland (and suburbs), 57,616; Dunedin (and suburbs), 47,280; Christchurch (and suburbs), 51,330; Invercargill (and suburbs), 9,996; Nelson, 6,659; Oamaru, 5,225; and Napier, 9,231.

TASMANIA

is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, in which are situated the Furneaux Group and King Island, included within the colony. It lies between 40° 33′—43° 39′ S. lat. and 144° 45′—148° 30′ E. long., and contains an area of 26,215 square miles, or 16,778,000 acres of land, of which, on 31st March, 1896, 212,703 acres were under crop, and 221,970 under artificially-sown grass; wheat 64,652, barley 6,178, oats 32,699, potatoes 19,247, hay 54,748. The statistics for 1895 show that 630,035 acres were leased from the Crown principally for pastoral purposes, besides numerous islands. Agricultural land in a state of nature can be selected for purchase at £1 an acre for cash, or at £1 6*s.* 8*d.* to be paid off in yearly instalments extending over fourteen years. The estimated population, 31st December, 1895, was 160,833, and contains representatives of all the principal religious bodies; half of them are stated to belong to the Church of England, and are under a bishop and 58 clergymen. The Roman Catholic Church, to which about 20 per cent. of the population belong, has also an archbishop and coadjutor bishop in the island; and the various Nonconforming bodies have their synods, presbyteries, and conferences as in Great Britain. The aboriginals have become quite extinct, the last, a female, "Truganini," having died in 1876. This island was first discovered by Tasman, in December, 1642, and named by him "Van Diemen's Land," in honour of his patron, the then governor of the Dutch possessions in India. It was subsequently partially explored by Captain Cook. In 1803 Lieut. Bowen was despatched from Sydney with a few soldiers and convicts to form a penal settlement, and finally fixed upon the spot where Hobart now stands. In 1825 it was severed from New South Wales and formed into a distinct colony. Transportation of criminals was abolished in 1853, and the name officially changed from Van Diemen's Land

Digitized by Google

to Tasmania. The climate is fine and salubrious, and well suited to European constitutions; it is, in fact, the healthiest of the whole Australasian group. The hot winds of Australia do not reach the island. At Hobart in 1894 the mean annual temperature was 55·00°, the mean summer temperature being 62·7°, and that of winter 47·9°. The thermometer rarely rises as high as 100° or falls below 29°. The average rainfall for 1894 was 27·39 inches. The surface of the country is generally undulating and covered with forests. There are many mountains of from 1,500 to 5,000 feet in height. There are also several wide expanses of level, open plains. The chief products of the colony are wool, gold, silver, copper, timber, tin, and fruit; the wool is much esteemed, and commands a high price in the English markets. Tasmanian stud sheep are in great request in the other colonies, and bring high prices. The live stock of the colony is celebrated for its general excellence, and great attention is paid to its improvement; the estimated totals on March 31, 1896, were as follows:—Sheep (and lambs), 1,523,846; cattle, 162,801; horses, 31,580; and pigs, 70,142. The wheat ranks high for its quality; the yield per acre is large, and the sample heavy. The woods of Tasmania are scarcely yet fully appreciated; the sources of supply are practically inexhaustible, abounding in the most beautiful cabinet woods and the largest-size timbers, adapted for every variety of purpose. (A small consignment of wood blocks consisting of blue gum and stringy bark was sent to London for paving purposes in 1894.) The fauna of the colony are of special interest, and include the Tasmanian devil and native tiger, and the curious duck-billed platypus; while the wombat, the wallaby, and the opossum supply valuable skins. The mineral kingdom is also well represented, and of late great attention has been directed to its development. The silver fields on the west coast have become the leading mineral feature of the colony; over 35,000 acres have been taken on mineral leases, and a large population with considerable capital has been attracted. Mines of both lode and stream tin, of great richness, are being worked in the north-western and north-eastern portions of the colony. The value of tin exported in 1895 was £167,754, of silver £227,916, and of copper £9,677. Iron-ore exists in nearly every district. Gold has been found in many places; the amount exported in 1895 was £218,308. Coal, of a good quality, and in easily accessible positions, is very generally distributed over the island. Jams and green fruit to the value of £161,464 were exported in 1895. There are in all 475 miles of railway open, including the main line running from Hobart to Launceston, through the island. There are 216 telegraph stations, with 3,004 miles of wire; a submarine cable (422 miles) communicating with the Universal Telegraph System; 520 miles of telephone; 327 post-stations, and 2,426 miles of post roads. The shipping of Tasmania is considerable. On Dec. 31, 1895, the total registered shipping for the year was 51 steamers and 162 sailing vessels, with a total tonnage of 18,168. The inward entries during 1895 were 711 (tonnage, 463,979); and the outward entries 742 (tonnage, 473,546). The present military defence is mainly composed of volunteers, who number 487, and 787 of all ranks in the Country Rifle Clubs. On the Derwent and the Tamar, batteries have been constructed, and the colony possesses a torpedo-boat.

With the object of stimulating production direct from the soil, a Department of Agriculture was formed in 1892. There is a central Council, and branches in the various agricultural districts. Through these Boards the cream of the experience of farmers is collected and disseminated, and the Council provides expert and scientific assistance.

Primary education is administered by a Department, under which are 258 state schools.

Amount of public revenue, 1895 ..... £761,971
Amount of public expenditure, 1895 748,946
Public debt, 31 December, 1895 8,180,925
Total imports, 1895, £1,094,457; exports 1,373,063
Imports from United Kingdom, 1895 337,952
Exports to United Kingdom, 1895 274,441

The Constitution of Tasmania was settled by Local Act (18 Vict., No. 17). By this Act the Legislative Council and House of Assembly are constituted "The Parliament." The former consists of 18 members, elected for six years; and the latter of 37 members, elected for 3 years. The Governor, who is appointed by the Crown, is aided by a Cabinet of responsible Ministers. For local purposes the island is divided into municipal, police, and road districts, which elect their own councillors and trustees.

Capital, City of Hobart. Population, with suburbs, 36,300. Other towns are Launceston, pop. 23,122, Zeehan, Ulverstone, E. Devonport, Latrobe, Waralan, Westbury, and Longford.

FIJI

is a group of 200 to 250 islands in the South Pacific Ocean, about 1,100 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45′—21° 10′ S. lat. and 176° E.—178° W. long. The gross area of the group is about 7,451 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji), and Vanua Levu (Great Land). The area of Viti Levu is 4,112 square miles, and that of Vanua Levu 2,432 square miles. The island of Rotumah was annexed in 1881. The climate is very equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief productions being the breadfruit tree, banana, plantain, pea-nuts, yams, and dalo (taro), cocoanut, sugar-cane, tea, cotton, maize, tobacco, and arrowroot. Sugar, pearl-shells, maize, bêche-de-mer, and copra and cocoanut oil, were for some time the chief exports, but the cultivation of fruit, especially bananas and pine-apples, for export to Australia and New Zealand, has extended rapidly of late years, and the value of this export has of late been second only to that of sugar. Fiji was ceded by its chiefs to the British Crown, and the islands were formally annexed by Sir Hercules Robinson, on Oct. 10, 1874. Sir Arthur Gordon (now Lord Stanmore), the first Governor, landed in the colony in June, 1875. The Governor is appointed by the Crown, and is assisted by an Executive Council, consisting of three official members. Laws are passed by a Legislative Council, of which the Governor is president, and which contains six official and six unofficial members, all nominated by the Crown. Native administration is carried on through the chiefs under the Governor's supervision. The population (31 December, 1895), 120,245; comprising 101,316 native Fijians, 9,861 Indian immigrants, 2,872 Europeans, and some Polynesians, half-castes, and Chinese.

Public income, 1895	£78,240
Public expenditure, 1895	76,204
Public debt, 1895	221,037
(of which £99,637 is to the Imperial Government, bearing no interest)	
Imports from British colonies, 1895	222,504
Exports to British colonies, 1895	259,280
Total imports, 1895	241,759
Total exports, 1895	332,209

BRITISH NEW GUINEA.

Papua or New Guinea, the largest island in the world after Australia, extends for 1,490 miles from N.W. to S.E. between the equator and lat. 12° S. and between E. long. 130° 50′ and 154° 30′. Its greatest breadth is 430 miles, and its area about 234,768 sq. miles. The N.W. half, to the W. of 141° E. long., belongs to Holland, which annexed it in the 16th century. The E. portion was independent until 1884, when it was divided between Great Britain and Germany. The colony of British New Guinea comprises the southern and south-eastern shores of the island, from the 141st meridian of east longitude eastward as far as East Cape, and thence north-westward as far as the 8th parallel of south latitude in the neighbourhood of Mitre Rock, together with the territory lying south of a line from Mitre Rock, proceeding along the said 8th parallel to the 147th degree of east longitude, then in a straight line in a north-westerly direction to the point of intersection of the 6th parallel of south latitude and of the 144th degree of east longitude, and continuing in a west-north-westerly direction to the point of intersection of the 5th parallel of south latitude and of the 141st degree of east longitude, together with the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade groups of islands, and all other islands lying between the 8th and the 12th parallels of south latitude, and between the 141st and the 155th degrees of east longitude, and not forming part of the Colony of Queensland; and furthermore, including all islands and reefs lying in the Gulf of Papua to the northward of the 8th parallel of south latitude.

The extent of territory is about 90,000 square miles, about half as large again as England, with a small population, the number of which is at present unascertained, but is probably not over 150,000. All tropical trees and fruit grow abundantly. The most important export is bêche-de-mer; pearl-shell, copra, gum, and sandal-wood are also exported, and alluvial gold has been found.

The territory was at first taken over as a Protectorate under the management of a Special Commissioner; but on the Colonies of Queensland, New South Wales, and Victoria undertaking to guarantee £15,000 a year for the cost of administration, which was further secured by a Queensland Act, the Queen's sovereignty was formally proclaimed on the 4th Sept. 1888, and the territory was constituted as a colony under the name of British New Guinea. It is governed by a Lieut.-Governor, with a nominated Legislative Council consisting of not less than two other persons.

CAPITAL, Port Moresby.

WESTERN PACIFIC.

There are a large number of scattered islands, or groups of islands, in the Pacific Ocean which are British possessions or under British protection. Among them are the islands known as Cato, Raine, Bell Cay, Bramble Cay, Pilgrim, Ducie, Baumau, Roggewein, Teinhoven, Coral, Dudosa, Suwarrow, Starbuck, Little Scrub, Palmerston, Surprise, Vostoc, Willis's Islets, and many others: to which must now be added Christmas, Fanning, and Penrhyn Islands, which were formally annexed in 1888, the Hervey or Cook Islands, the chief of which is Raratonga, over which a protectorate was established in the same year, and the Gilbert Islands, April, 1892. A Protectorate was established over the Southern Solomon Islands in 1893.

For the Western Pacific a High Commissioner has been appointed by the Crown, with jurisdiction over all islands in that portion of the ocean which are not within the limits of a British colony or within the jurisdiction of any civilized power. His functions are to carry out the provisions of certain Acts of the Imperial Parliament, passed in 1872 and 1875, for the protection of the Pacific Islanders, and to adjudicate upon disputes between British subjects living in the islands within his jurisdiction, which includes the New Hebrides, the Tonga, or Friendly Islands, the Samoan or Navigators Islands, and various other small groups. He is assisted by Deputy Commissioners, with criminal jurisdiction in cases punishable with less than 7 years' penal servitude, and with civil jurisdiction in Common Law, Equity, and Bankruptcy; and by Judicial Commissioners with powers analogous to those of the Supreme Court of a colony. There is a right of appeal in certain cases to the Supreme Court of Fiji. The expenses of the High Commission are defrayed from Imperial funds.

Greater Britain in the West Indies.

The West Indies are an immense number of islands and islets, some of them mere rocks, extending from 10° to 27° North, and from 59° 30′ to 85° West. They are divided by geographers into (1) the Bahamas, (2) the Greater Antilles, and (3) the Lesser Antilles, of which the last named are subdivided into the Leeward and Windward Islands. The islands lying off the coasts of South America and Central America respectively form two separate groups in addition to those already mentioned. The total area of the West Indies is probably about 95,000 square miles, of which the Greater Antilles occupy not less than 83,000 square miles. The prevalent character of the islands is bold and mountainous. In Cuba and Hispaniola the highest points are more than 8,000 feet above the sea-level, and in Jamaica there are hills almost as high. Others, too, among the smaller islands rise to between 4,000 and 6,000 feet in height, and several of them contain active volcanoes, while nearly all of them show signs of volcanic action. The climate is tropical, but the surrounding seas tend to counteract the otherwise intense heats of the torrid zone. The mean yearly temperature of the islands is about 78°, but that of the higher lands is often much less. Slight frosts occasionally occur in the higher regions of Cuba, but snow is never known to fall. The seasons alternate from drought to moisture, and in most parts of the archipelago there are two wet and two dry seasons. On the whole it may be said that the climate is generally healthy, and between the months of November and May in many of the islands it is delightful. During the great rains, however, intermittent fevers are prevalent. The vegetable productions of the West Indies are both varied and abundant, the principal articles of commerce including sugar, coffee, cocoa, cotton, pimento, nutmegs, indigo, tobacco, maize, guava, ginger, annotto, aloes, sassafras, the castor-oil tree, and medicinal drugs. Of the more common fruits there are the pine-apple, pomegranate, cocoa-nut, cabbage-tree, oranges, lemons, limes, citrons, the mango, shaddock, papaw, banana, and plantain. Yams, sweet potatoes, and manioc also grow freely. The mountains in the greater islands furnish a varied abundance of timber, including mahogany, cedar, lignum-vitæ, iron-wood, Indian-fig, well adapted for cabinet-work, shipbuilding, and other arts. The grains of England are not grown in the West Indies. Indian corn yields abundant crops almost everywhere, while rice, as a profitable investment, is all but confined to the island of Trinidad. The total population of the West Indies is nearly 4,000,000, of whom above half are negroes, while the remainder are chiefly mulattoes. The islands of the archipelago, at the time of their discovery, were inhabited partly by the Caribs, a fierce and warlike race, and partly by a less savage race known as the Arrowauks. Both these native Indian races, however, are now extinct, with the exception of a few scattered families. By far the largest of the West Indies are the magnificent islands of Cuba and Hispaniola. Cuba, which belongs to Spain, is known as the "Queen of the Antilles." It is 750 miles from east to west, from 60 to 70 miles in average breadth, and has an area of 45,870 square miles, of

which about one-seventh is under cultivation or in pasture. The population is reckoned at about 1,520,000. Hispaniola is about 400 miles long from east to west, and has an extreme breadth of 150 miles. Its total area is about 28,250 square miles, and the official estimate of the population—probably too high—is 800,000. The Republic of San Domingo occupies the eastern part of the island, and that of Hayti the western part.

The first spot on which Columbus landed in the New World in 1492 was San Salvador, one of the Bahamas. On the same voyage Cuba and Hispaniola were discovered, and the other islands very shortly afterwards. For some time the West Indies remained in the undisputed possession of Spain, subject only to occasional visits from French and English ships. At the commencement of the 17th century, however, the English, French, and Dutch began to form settlements, and to import negroes from West Africa to work the plantations; and whenever war broke out in Europe it spread to the West Indies, where the most bitter struggles were carried on for the possession of these sources for the supply of sugar and other tropical products. These contests terminated in 1810 by the conquest of almost every island by Great Britain; but some of the most valuable were afterwards restored to their previous owners. At the present time the principal islands are divided as follows:—*British:* Jamaica, Turks and Caicos Is.; all the Bahamas; Antigua, Montserrat, Nevis, St. Christopher, Dominica, the Virgin and the Cayman Islands, Grenada, St. Vincent, Tobago, St. Lucia, Barbados, Trinidad; and the islands off the coast of British Honduras. *Spanish:* Cuba, Isle de Pinos, Porto Rico, Bieque, and Culebra. *French:* Martinique, Guadaloupe, Deseada, Marie Galanta, Les Saintes, St. Bartholomew, and St. Martin (the last partly Dutch). *Dutch:* St. Eustatius, Saba, Bonaire, Curaçao, Aruba. *Danish:* Santa Cruz, St. Thomas, St. John. *Venezuelan:* Coche, Cuagua, Tortuga, and Margarita. *Independent:* Hispaniola, divided into the two Republics of Hayti and San Domingo.

Those of the West Indies belonging to Great Britain have an area of about 13,750 square miles, and a population of 1,350,000. In the early part of the century slavery existed in all the islands; and when it was abolished, and the protective duties repealed, an entire collapse took place, and many persons were ruined. They are now again resuming their proper position, and becoming in most cases the scene of a moderate prosperity. Attention has been turned to the development of other industries besides sugar and rum; in Trinidad and Grenada with cocoa and nutmegs, and in Jamaica with tobacco and fruit. The methods of sugar production have been slowly but steadily improved; and, under the government of the Crown, in most of the islands communication has been opened up, and railways and telegraphs introduced.

Imports from United Kingdom, 1895:

Apparel, &c.	£247,384	Leather	£111,916
Beer and Ale	71,012	Metals	156,688

Cottons	547,700	Misc.	811,064

£2,104,374

Exports to United Kingdom, 1895:

Cocoa	£565,555	Rum	£158,044
Coffee	85,526	Sugar	499,425
Dye-Woods	187,466	Misc.	367,657

£1,863,673

JAMAICA,*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 3′—18° 32′ North lat. and 76° 11′—78° 21′ W. long. It is the largest and the most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,193 square miles, and a population, in April, 1891, of 639,491, showing an increase during the previous decade of 58,687, and (1891) including whites, 14,692; coloured, 121,955; blacks, 488,624, and a number of Coolies and Chinese. It was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid. From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Western Peak of the Blue Mountains, an elevation of 7,360 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 107 miles of railway open. Telegraph stations and post-offices are established in every town and in very many villages. The number of accounts open in the savings banks is about 18,500. Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches the highest price that is given in the London market. There is an extensive trade in fruits, chiefly bananas and oranges, with the United States. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the senior military officer

* The Government of Jamaica publishes annually a Handbook of the Island, full of information respecting the history and *personnel* of the island.

the Colonial Secretary, Attorney-General, Director of Public Works, and the Collector-General (all *ex-officio*), and of such other persons, not exceeding 10, as the Queen or the Governor provisionally may appoint, called Nominated Members, and 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, with Port Royal, the naval station, pop. 46,542; the next in importance are Spanish Town, pop. about 5,000, and Montego Bay, 4,803.

Public revenue, 1895-96	£814,341
Expenditure from income, 1895-96	836,483
Expenditure from loans, 1895-96	66,301
Public debt in 1896	1,666,178
Total imports, 1895-96	2,191,745
Total exports, 1895-96	1,921,421

The chief articles of export in order of importance are:—Fruit, 29·9; dye-woods, 20·4; coffee, 16·0; sugar, 11·0; and rum, 9·3. The chief customers are the U.S.A., 57·0, and the U.K., 27·6, the imports being from the U.K. 48·1, U.S.A. 41·8.

Turks and Caicos (Cayos or Keys).

These islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1874 they were annexed to Jamaica, from the north-west of which they are distant about 430 miles. They have an area of about 223 square miles. The population in 1891 was 4,744, of which the principal island, Grand Turk, contains 2,500.

A Commissioner administers the affairs of the Settlement, assisted by a Legislative Board. This Board has sole control of local finance, and passes local ordinances; but the supreme legislative body is the Legislative Council of Jamaica.

Revenue, 1895	£10,087

THE BAHAMAS,

a chain of islands lying between 21° 42′—27° 34′ N. lat. and 72° 40′—79° 5′ W. long. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 5,794 square miles, and a population in 1895 of 50,599, the most part being whites, and the rest descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Eleuthera, Mayaguana, Harbour Island, Great Inagua, and Andros Islands. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the Peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1895 were valued at £67,565. The fruit trade, principally with the United States, is also very important. The total value of pineapples exported in 1895 was £22,784, and of oranges £4,934. Bananas, cocoanuts, tomatoes, and various other kinds of fruit and vegetables are also exported. Mahogany, lignum-vitæ, mastic, iron-wood, ebony, logwood, and satinwood are found throughout the islands; tobacco, castor-oil plants, and cotton flourish, but enterprise is lacking to encourage these industries. The fibre industry may now be considered as fairly established, the estimated land under cultivation of the fibre plant being about 20,000 acres. The imports are chiefly food-stuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a Legislative Council of 9 members, and a Representative Assembly of 29 members.

THE LEEWARD ISLANDS.

The Leeward Islands under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda, (2) St. Christopher and Nevis, with Anguilla, (3) Dominica, (4) Montserrat, and (5) the Virgin Islands, which, with the several dependencies named, are each in charge of a Commissioner, and have each their own local legislature. These five presidencies make up the

colony of the Leeward Islands, which is administered by a Governor, to whom the Commissioners are subordinate, and which has also a general Legislative Council possessing concurrent legislative powers with the local Legislatures on certain subjects. The federal colony in 1891 contained 127,723 inhabitants (58,780 males and 68,943 females), with a revenue of £119,082 in 1895. The General Legislative Council consists of 10 nominated and 10 elective members.

Amount of public revenue in 1895	£119,082
Expenditure, 1895 (excluding expenditure from Loans for Public Works)	165,374
Public debt, 1895	
Imports, 1895, £415,990; exports, 1895	288,145
Governor, Sir Francis Fleming, K.C.M.G.	£3,000

Transit, 15 to 16 days. Parcels, per lb., 7*d.*, limit 11 lbs.; telegrams, per word, to Antigua, 9*s.* 10*d.*, Dominica 9*s.* 2*d.*, St. Kitts, 9*s.* 10*d.*

(1) Antigua (and Barbuda).

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in 17° 6′ N. lat. and 61° 45′ W. long., and is about 70 miles in circumference. Its area is nearly 108 square miles, equal to 68,980 acres, of which nearly 20,000 are under cultivation. The population (with Barbuda) in 1891 was 36,699, including 17,124 males and 19,575 females. Settled by the English in 1632, and granted to Lord Willoughby by Charles II., this is one of those islands which has always been more distinctively English. It was at one time a naval and military station of some importance. It is much less hilly and wooded than the other Leeward Islands. It is almost entirely given up to the cultivation of sugar, the export amounting to £50,989 in 1895; but it also exports rum, molasses, tamarinds, and arrowroot.

Amount of public revenue in 1895	£44,348
Expenditure in 1895	70,221
Amount of public debt, 1896	146,121
Imports, 1895, £144,864; exports, 1895	110,958

Its local Legislative Council is elective, but the franchise is somewhat limited. The principal town, St. John's, has a population (1891) of 9,738.

President & Island Sec. (the Col. Sec. of the Leeward Islands), George Melville, C.M.G.	£50
Auditor-Gen., L. J. Bertram.	
Treasurer, W. D. Auchinleck	500
Magistrate, W. H. Whyham	400
Do., G. C. Evelyn	400

Barbuda is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35′ N., long. 61° 45′ W. Area, 75 square miles. Population, 580. The island is flat and fertile, producing corn, cotton, pepper, and tobacco. It was formerly a possession of the Codrington family.

Redonda, a small island with a phosphate industry, has a population (1891) of 120.

Magistrate, J. F. Smyth (acting)	£150

(2) St. Christopher (St. Kitts) and Nevis (with Anguilla).

These two islands, with their dependency of Anguilla, were united in 1882 to form one presidency, and taken together they are at least equal in importance to Antigua, having a population, 1891, of 47,662. St. Christopher, popularly called St. Kitts, is situated in lat. 17° 18′ N. and long. 62° 48′ W., about 46 miles to the west of Antigua: it comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about five and a half miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a height of nearly 4,000 feet. St. Kitts is essentially a sugar island. Sulphur is found in the mountains, but is not made an article of commerce. Basseterre, on the south coast of St. Kitts, is the chief town and the seat of government; population, 9,097 (males 4,110, females 4,987).

Nevis (separated from St. Kitts by a strait some 3 miles wide) is but a single mountain rising 3,200 feet above the sea, and has an area of 50 square miles, with a population in 1891 of 13,087. Sugar, rum, and molasses are the only exports, but some proprietors have extensive plantations of the lime. Chief town, Charlestown. Population (1891) 838.

Anguilla (or *Little Snake*) is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 3 to 1½ miles, containing an area of 35 square miles. Population, 1891, 3,699, of whom hardly any are white. Salt, obtained from a small lake in the centre of the island, and phosphate of lime are the principal productions, besides cattle and garden stock.

Amount of public revenue in 1895	£43,215
Amount of expenditure in 1895	55,394
Public debt, 1896	72,474
Imports, 1895, £172,281; exports, 1895	140,542
Administrator, T. Risely Griffith, C.M.G.	£900
Treasurer, James Burns	500
Magistrates, *St. Kitts* { F. S. Wigley	400
{ Captain A. Roger	350
Nevis, Meritt Evelyn (acting)	250
Anguilla, N. Lockhart	220

(3) Dominica,

The largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 15° 20′—15° 45′ N. lat. and 61° 13′—61° 30′ W. long., 95 miles S. of Antigua, and is about 29 miles long and 16 broad, comprising an area of 291 sq. miles, or 186,240 acres, of which about 55,000 acres are cultivated, the major part being difficult of access. It is very mountainous and picturesque, and abounds in rivulets well stocked with fish. It is of volcanic origin. There was a slight volcanic eruption in 1883, destroying 6 square miles of forest. Sulphur, thrown out of the soufrières, is very plentiful, and good game is abundant. Land may be purchased at about 10*s.* an acre. Population (1891), 26,841 (males 12,059, females 14,782). The natives still speak a French patois, resulting from their former connection with France. The principal productions are cocoa, sugar, coffee, maize, cotton, tobacco, molasses, rum, lime-juice, fruit, and cabinet woods. The soil is good. The climate varies greatly according to the altitude: on the high lands it is excellent, but in the lowlands and the coast districts the mass of vegetable matter of various kinds keeps it unduly moist. There is a Legislative Assembly which controls local finance and administration, half the members of which are elective. The principal town is Roseau, on the south-west coast; population (1891) 5,186.

Amount of public revenue in 1895	£22,859
Amount of public expenditure in 1895	27,102
Public debt raised or authorised, 1896	63,986
Imports, 1895, £69,789; exports	39,471

Administrator, Philip Arthur Templer £700
Treasurer, W. H. Porter 300
Colonial Engineer (vacant) 350
Magistrates, W. Coull; W. H. Roper; and R. F. Garraway ..... each 300

(4) MONTSERRAT

is situated in 16° 42′ N. lat. and 62° 13′ W. long., 26 miles S.W. of Antigua. It is about 12 miles in length and 8 in breadth, comprising an area of 47 square miles, and in 1891 a population of 11,762 (5,331 males, 6,431 females). It was settled by Englishmen, but conquered and held by the French, and only finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles: it contains an active soufrière and several hot springs. About two-thirds of the island are mountainous, the rest well cultivated. The lime-tree is largely grown; the Montserrat company alone has a plantation of 600 acres, and annually exports about 100,000 gallons of lime-juice, valued at £7,426. Sugar is the crop of greatest importance, the export in 1892 reaching £20,559, but there are no first class sugar estates. The chief town is Plymouth, with a population (1891) of 1,472.

Public revenue, 1895, £7,125; expenditure, £10,702
Amount of public debt, 1896 18,100
Total imports, 1893, £29,325; exports..... 32,715
Commr. & Treasurer, Edward Baynes..... £400

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and Denmark, form a connecting link between the Greater and Lesser Antilles. They form a thickly studded archipelago of islands and rocks, the majority of which are mountainous. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27′ N. lat. and 64° 40′ W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1891 was 4,639. There is good pasturage for cows, sheep, and goats. Sugar and cotton are raised in small quantities, and fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at Virgin Gorda in past years. The capital of the group is Roadtown, on the south side of Tortola; population (1891) 403. The R.M.S. *Tyne*, subsidized by the Colony, calls at Tortola twice a month.

Public revenue, 1895, £1,533; expenditure, £1,954
Imports, 1895, £4,576; exports, 1895..... 3,818
Commissioner & Treasurer, N. G. Cookman ... £300

THE WINDWARD ISLANDS.

The Windward, or Southern, group of the West Indian Islands includes Barbados, St. Lucia, St. Vincent, the Grenadines, Grenada, and Tobago. Of these, Barbados is a separate colony with its own governor, and Tobago is attached to Trinidad. The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. There is one governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. There is a Court of Appeal, consisting of the judges of the three colonies and of Barbados, a common Audit, and a common Lunatic Asylum; but, with this exception, each island retains its own institutions, and is governed by an Administrator subordinate to the governor. The population, April, 1891, was 135,976; and the total area 508 sq. miles.

Governor-in-Chief, Sir C. Bruce, K.C.M.G... £2,500
Private Secretary, and Clerk of the Councils, Grenada, M. H. De la Poer Beresford... 425

Transit, about 14 days. Parcels, 8*d.* per lb. to 11 lbs. (St. Vincent, 7*d.*); telegrams. Grenada, per word, 9*s.* 11*d.*; St. Lucia, 9*s.* 2*d.*; St. Vincent, 9*s.* 6*d.*

GRENADA (AND THE GRENADINES).

Grenada is situated between the parallels of 12° 30′—11° 58′ N. lat. and 61° 20′—61° 35′ W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. It contains about 85,120 acres, of which about 20,418 are cultivated, and it had, in April, 1891, a population (including some of the Grenadines) of 53,209. The country is mountainous and very picturesque. The Grand Etang, a lake on the summit of a mountain ridge about 1,740 feet above the level of the sea, and Lake Antoine, are the most remarkable natural curiosities. The climate is healthy, like that of the other islands of the group. Grenada was discovered by Columbus in 1498, and named Conception. The colony was founded by the French in 1650, and surrendered to the British in 1762; in 1779 it was retaken by the French, but in 1783 it was ceded by the Treaty of Versailles to Great Britain, in whose possession it has since remained. The soil is very fertile; amongst the principal products are cocoa, spices, sugar, rum, cotton, and coffee: large quantities of fruit are also grown. The chief production of the island is, however, cocoa (or cacao), of which 69,191 cwts. (valued at £138,520) were exported during the year 1895. Nutmeg cultivation now occupies a prominent position, and is being largely developed (3,220 cwt., valued at £18,969, were exported in 1895). The forests are rich in many valuable timbers, particularly bullet wood, locust, mahogany, white cedar, and galba; and vanilla and several varieties of gum-yielding trees have been found to be indigenous. Large numbers of turtle are also caught and exported, and whales are met with, especially among the Grenadines. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 14 members, seven of whom are officials.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour and coaling station.

Amount of public revenue in 1895 ..... £8,468
Expenditure in 1895..... 63,675
Public debt, 1895 113,200
Total imports, 1895 175,712
Total exports, 1895..... 174,497
Colonial Secretary, Edward Rawle Drayton ... 600
Treasurer and Postmaster, C. Falconer Anton 450
Chief Justice, Sir Joseph T. Hutchinson ... 1,000
Attorney-General, Leslie Probyn 700

The GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The chief produce consists of cotton, ground provisions, and live stock. The largest island is Carriacou, attached to the Government of Grenada, pop. 6,031.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 42′—14° 8′ N. lat. and 60° 52—61° 7′ W. long., at a distance of about 24 miles W.N.W. of Barbados, 21 miles N.E. of St. Vincent,

Digitized by Google

and 24 miles S.E. of Martinique, is 24 miles in length with an extreme breadth of 12 miles; it comprises an area of 233 square miles, with a population (in 1895) of 45,906. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are—Sugar (8,125,900 lbs. in 1895), molasses, cocoa—which is now being extensively cultivated—and logwood. St. Lucia at present stands alone amongst British sugar islands in having inaugurated the Central Factory system of sugar-growing. The chief places are Castries, the capital (pop. 1895, 7,000), and Soufrière (pop. 2,300).

Port Castries, one of the finest in the W. I., is the second naval station of the empire in these parts, and a coaling dépôt. Extensive harbour improvements have been carried out at a cost of £100,000, and the port has been strongly fortified by the Imperial Government. In 1895, 365 steamers (tonnage, 453,216), entered Port Castries, and many British and foreign war ships coaled.

Amount of public revenue in 1895	£48,564
Amount of expenditure in 1895	57,578
Amount of public debt, 1895	185,380
Total imports, 1895	154,915
Total exports, 1895	137,868
Administrator & Colonial Sec., (vacant) (and £200 entertainment allowance)	£800
Treasurer, D. G. Garraway	500
Chief Justice, Arthur Child	700
Attorney-General, P. J. K. Ferguson	400

St. Vincent,

an island about 95 miles west of Barbados, situate in 13° 10′ N. lat. and 60° 57′ W. long., is 18 miles in length and 11 in breadth, comprising an area of 140 square miles, and a population (in 1891), including dependencies, of 41,054. In 1846 a large number of Portuguese labourers, amounting to 2,400, immigrated hither, and proved a valuable acquisition to the island. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

It is one of the last islands upon which a struggle took place between the aboriginal Caribs and the white man, and the north part of the island is still known as the Carib reserve.

The chief products are sugar, molasses, rum, arrowroot, cassava, cocoa, coffee, cotton, and spices. The St. Vincent arrowroot has a specially good name in London. Its chief imports are linen, cotton, and woollen manufactures, American flour, fish, &c. The upset price of Crown lands, of which an area of 40,000 acres is still for disposal, is 20*s.* per acre, cash, or £2 if spread over 5 years. The capital is Kingstown, on the south-west coast (pop. 1891, 4,547).

Amount of public revenue in 1895	£25,459
Amount of expenditure in 1895	28,911
Total imports, 1895	64,842
Total exports, 1895	68,690
Administrator, Colonial Secretary, and Registrar, Harry Langhorne Thompson (and £100 table allowance)	£700
Treas. & Collector of Customs, F. B. Griffith	500
Chief Justice & Vice-Chan., G. Trafford	800
Attorney-Gen., H. P. Schooles (Jamaica).	
Police Magistrates, G. P. St. Aubyn (Kingstown), £450; J. J. A. Hughes (Leeward Dist.), £350; H. E. Lynch (Windward), £380.	
Colonial Surgeon, W. F. Newsam, M.D.	300

Barbados,

the most windward of the West India Islands, is situated in 13° 4′ N., and longitude 59° 37′ W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 105,470 acres, or about 166 square miles. About 100,000 acres are highly cultivated. The population in 1895 was estimated at 188,000, being about 1,114 to the square mile. The principal exports are sugar, molasses, and rum. The imports are rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal. This island is the headquarters of H.M. forces in the West Indies, under a major-general, who resides in the island. Barbados is a station of the West India and Panama Telegraph Company, has a railway across the island, a tramway through town and suburbs, and telephonic communication throughout the island. The deposits in the savings bank on Dec. 31, 1895, were £175,997. Besides various fire and life offices, the island has its own mutual life and fire insurance office. In 1861 a project for supplying the town with water was completed; and in 1897 the country districts will receive a Government supply through about 200 miles of mains. Liberal provision is made for elementary education, and Harrison's College, a school organised on the lines of the English public schools, places Barbados in the front of the West Indies as regards higher education. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1625. In 1885 it was constituted a distinct government. The government consists of a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of nine members appointed by the Sovereign, and a House of Assembly of twenty-four members elected yearly on the basis of a moderate franchise.

The chief town and port is Bridgetown (pop. about 21,000), on the shores of an open roadstead known as Carlisle Bay; Speightstown, on the west coast, is further to the north.

TRINIDAD AND TOBAGO.

TRINIDAD.

Trinidad is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between 10° 3′—10° 50′ N. lat. and 61° 39′—62° W. long., and is about 55 miles in length by 40 in breadth. It comprises an area of 1,754 square miles, with a population (1891) of 205,753. The island was discovered by Columbus in 1498, and was first colonized in 1588 by the Spaniards; it capitulated to the British under Abercromby in 1797. The chief town and port of entry, "Port of Spain," population 1891, 33,273, is one of the finest towns in the West Indies. Other towns of importance are San Fernando (pop. 6,570), about 30 miles south of the capital, Princestown (pop. 4,197), and Arima (pop. 3,653). A remarkable phenomenon is the pitch lake near the village of La Brea, 110 acres in extent, containing an apparently inexhaustible supply; in 1895, 85,148 tons (£97,318) were exported. The soil is rich and productive, its most important products being sugar, cocoa, molasses, rum, and cocoa-nuts, and various kinds of timber and fruits. The chief exports (1895) were:—Sugar, 122,353,755 lbs.; rum, 178,167 gals.; molasses, 1,498,215 gals.; bitters, 40,129 gals.; and cocoa, 29,456,813 lbs. The total extent of land under cultivation is nearly 100,000 acres, or one-eleventh of the whole island. Coal is found in Manzanilla, and is indicated in other parts of the island. There are 60 miles of railway open, and further extensions will shortly be available by which the east coast will be opened up; harbour improvements, water works and sewage operations are also being undertaken. The island is crossed by the telegraph wire of the West India and Panama Company, and by Government telegraph and telephone wires. Twenty steamers from Europe arrive every month, and four from the United States and Canada.

The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

TOBAGO,

originally settled by the English, was held for some time by the French, and eventually was ceded to England in 1783. For many years it was included in the government of the Windward Islands; but since the beginning of 1889 has been annexed to the Government of Trinidad, with its finances distinct and controlled by a partially elective Board of Finance. It is between 11° 9′ N. lat. and 60° 43′ W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados; is 26 miles long and from 6 to 7½ broad, and has an area of 114 square miles, with a population (31st Dec. 1891) of 18,692. The Crown lands, suitable for cocoa and other economic plants, will be offered for sale by the Commissioner, the prices varying from 5*s.* to £1 per acre. The island is one of the most healthy of the West Indies; the living is of the cheapest; the temperature varies from 81° in February to 88° in September.

There are only two towns in the island, viz., Scarborough, the capital (1,370), and Plymouth.

THERE are two leading groups of British Colonies in Africa:—the West African colonies, situated upon the tropical, fever-stricken coast to the north of the Equator; and the South African colonies, which occupy the southern extremity of the continent, and are generally healthy and well adapted for European settlement. There are also the island of Mauritius and its dependencies, which are usually regarded as belonging to Africa, and the islands of Ascension and St. Helena in the Atlantic. And, besides the colonies, there are now large portions of the continent under British protection, viz., the territories of the Royal Niger Company and the Niger Coast Protectorate on the West Coast, those of the British East Africa Protectorate upon the East Coast; the British Central Africa Protectorate; the Uganda Protectorate, the Zanzibar Protectorate, the Witu Protectorate, and the territories of the British South Africa Company to the North of Bechuanaland and the Transvaal, and a portion of the Somali coast with the Island of Socotra.

SOUTH AFRICA.

The South African Colonies are the Cape of Good Hope or Cape Colony, Natal, Basutoland, and Zululand; and Her Majesty exercises a Protectorate over part of Bechuanaland, the territories under the Administration of the British South Africa Company, and Amatongaland, as far north as the Portuguese frontier. The first among the colonies in wealth and importance is the great self-governing colony of the Cape. Further along the coast to the north-east are the self-governing colony of Natal, and the Crown Colony of Zululand; and beyond them is the territory of Amatongaland, which extends to the Portuguese territory of Delagoa Bay. Inland, to the west of Zululand and Delagoa Bay, is Swaziland, the administration of which is under the Government of the South African Republic in accordance with the convention of 1894 between Great Britain and the Republic. Then, further to the westward, and extending for some 400 miles from north to south and about the same distance from east to west, is the South African Republic or Transvaal, which is under the suzerainty of Great Britain as regards its foreign relations, but is otherwise independent. Between the Transvaal and the Cape Colony is the Orange Free State; and between the Free State, Natal, and the Cape Colony is the small British colony of Basutoland. To the westward of the Transvaal is British Bechuanaland, now a part of the Cape Colony, beyond which, upon the west and north, is a British Protectorate, extending westward to the boundary of the German Protectorate. Upon the north, the interior as far as the Lakes Moero, Tanganyika, and Nyasa, is also under British protection. To the west of the 20th meridian the whole country from the Orange River to the Cunene River, with the exception of the Walfish Bay territory, which forms part of the Cape Colony, is under the protection of the German Empire. The eastern coast from Delagoa Bay northwards to Cape Delgado belongs to Portugal.

The total area of the British Colonies, excluding territory which is only protected, is more than 300,000 square miles. The white population as at the 1891 census was, Cape Colony, 376,987; Natal, 46,788; Bechuanaland, 5,211; Basutoland, 578.

The Cape of Good Hope was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Dutch East India Company took possession of the shores of Table Bay, established a fort, and occupied the lands adjacent, in order to be always ready with supplies for their passing ships. Until 1796 the Cape remained in the hands of the Dutch, when it was captured by an English force; but in 1803 it was restored to the Batavian Government. In 1806 it was for the second time occupied by a British force, and at the general peace of 1814 it was formally ceded to the British Crown.

The history of the subsequent expansion of the Colony, and the formation of the various States and Colonies which have grown out of it, will be found under the separate headings.

The main geographical feature of South Africa is the great mountain range which begins near the Orange River, and stretches for more than 1,000 miles, right through the Cape Colony and Natal, towards the north-east. Its direction coincides with that of the sea-coast, from which it is never more than from 100 to 150 miles distant. Viewed from the seaward side it is a veritable mountain range, rising in places to the height of

Digitized by Google

10,000 ft.; but when surmounted it is seen to be properly but the broken edge of the great table-land, between 3,000 and 4,000 ft. high, which occupies the whole of the interior of South Africa. From the mountains to the sea the ground descends, not regularly, but by a series of terraces or steps; and, as the British possessions also extend for some 700 miles from south to north, the differences of elevation and latitude produce in them many varieties of climate. As a general rule South Africa is dry and well suited to Europeans. It is also suitable to the members of the great Bantu family, to which the Kafirs, Zulus, Bechuanas, Hereros, and other tribes now inhabiting South Africa belong. These tribes have been gradually coming down by land from the north-east, while Europeans have been coming in by sea from the south; and between the two invading streams the aboriginal Hottentots and Bushmen have been almost crushed out of existence. The Bantus have shown no signs of dying out from contact with civilization; and in comparing South Africa with Canada or Australia as a field for colonization, it must always be borne in mind that in South Africa there are three distinct elements in the population—the Dutch, the British, and the Kafir or (as it is usually, though not quite correctly, termed) Native, element. To reconcile the divergent interests of these separate elements, and to secure that the whole population shall live peacefully together, is the great problem of South African administration.

POSTAGE.—Cape Colony entered the Postal Union on Jan. 1, 1895.

CAPE COLONY.

The CAPE OF GOOD HOPE, strictly speaking, is a small promontory near the S.W. extremity of the continent of Africa; but the extensive colony of that name, in which are now included the Diamond Fields, the Transkei territories, Bechuanaland, and Pondoland, is washed by the Atlantic and Indian Oceans on the west and south and south-east, while upon the north and north-east it is bounded by the German Protectorate and each of the other colonies and states of South Africa. It reaches in S. lat. from 26° to 34° 50′, and in E. long. from 16° 25′ to 30°. Its extreme length from E. to W. is nearly 600 miles, and its breadth 450. It has a coast-line of nearly 1,200 miles, and an area of 276,902 square miles. The territory of Walfish Bay on the west coast is also a portion of the colony. The principal events in the history of the colony since it came under British rule have been the following:—Introduction of British settlers into the eastern districts as a barrier against the Kafirs, 1820; first Kafir war, 1834; commencement of the trekking of the Dutch Boers, which resulted eventually in the colonization of Natal and the Free States, 1836; second Kafir war, ending in the extension of the boundary to the Kei River, 1847; introduction of representative government, 1853; first diamond discovered, 1867; Griqualand West proclaimed a colony, 1871; introduction of responsible government, 1872; Gaika and Gealeka rebellion, 1877–8; Basuto war, 1879–81; amalgamation of Griqualand West with the Colony, 1880; separation of Basutoland from the Colony, 1883; establishment of German Protectorate on the west coast to the north of the Orange River, 1884; incorporation of all the Transkeian territories, except part of Pondoland, with the Colony completed, 1885, annexation of Pondoland, 1894, and Bechuanaland, 1895.

The Colony is divided, geographically, into two parts by the main range of mountains, which, as already mentioned, follows the line of the South African coast at a distance of 100 to 150 miles from the sea; and the southern portion is divided again by two other ranges which run across from W. to E., and are not quite so high as the first. Between the mountains and the sea, in the south-western portion of the Colony, are the chief grain and wine producing districts; in the south there are extensive forests; and along the south-eastern coast, where the climate is almost tropical, tobacco and maize are successfully cultivated. Between the two upper ranges of mountains is an elevated tract known as the Great Karroo, which extends from W. to E. for 300 miles, and has a breadth of 70 miles. During a great portion of the year the Karroo is, as its name implies, a dry and barren district, but after rain it is covered with luxuriant vegetation, and supports countless flocks of sheep and many cattle and horses. It is here also that the important industry of ostrich-farming is carried on. The country to the north of the mountains is still more elevated, forming part of the great South African table-land. It supports, like the rest of the Colony, large numbers of sheep, and contains the chief mineral districts. The rivers of South Africa are numerous, but practically useless for either irrigation or navigation. Most of them flow in deep and precipitous ravines, and, except when swollen by the rains, are mere shallow torrents, even the largest having sufficient water only for the smallest craft, or bars at their mouths which render entrance both difficult and dangerous. The climate is healthy, and its peculiar dryness and the uniformity of the temperature causes it to be much favoured by Europeans suffering from pulmonary complaints. The vegetation of South Africa has a peculiar and distinctive character; flowers of great variety abound everywhere. The principal native flora are heaths, proteæ, and stapelias (or carrion flowers), and dense thorny thickets of what is called *bush*, in which are several species of aloe. The native animals are either disappearing altogether or retreating northward owing to the rapid spread of civilization. But elephants and buffaloes are still found in the Knysna Forest on the south coast; and springboks abound in many parts.

The population of the whole Colony (Census of 1891) was 1,599,960, of whom the Europeans or whites were 382,198 (not including the population of Pondoland, *circ.* 200,000, 1894). The Dutch preponderate in the western, and the English in the eastern, districts. The principal industries are the production of wool and wine, and the rearing of horses, cattle, and ostriches. Great attention is paid to the culture of wheat, barley, and oats. The colony is also rich in minerals. There are important mines of copper in Namaqualand, the copper ores being of the richest

kind, and yielding a percentage of from 32 to 35. The exports in 1895 amounted to 23,545 tons, value £246,597, against 7,300 tons in 1870. Gold is found in the Knysna and Prince Albert divisions, and manganese in the Paarl. Coal is also raised of considerable value, the annual produce being about 86,595 tons. But by far the most valuable export is that of diamonds, which are chiefly found at Kimberley. The declared value of the diamonds exported in 1895 was £4,775,016.

The railways of the colony are mostly the property of the Government, which in 1895 had 2,253 miles open for traffic. There are also 258 miles of private railways, and contract has been signed for the construction for the government of 291 miles of line before 1899, tenders for 163 miles having been called for in addition. To the 31st Dec., 1895, the capital expended by Government was £20,487,072, in which amount is included the money expended upon the Kimberley line. The returns for 1895 show a profit of £7 9s. 10d. per cent. per annum on the capital expended; 6,316 miles of telegraph open, carrying 15,604 miles of telegraph wire. The Colonial Forces in December, 1895, consisted of Cape Mounted Riflemen (780 officers and men); and horse and foot volunteers (5,788 officers and men). Extensive harbour works are being constructed at Table Bay (Cape Town), Port Elizabeth, and East London. On the works at Table Bay alone no less than £2,173,033 has been spent up to 31st December, 1895, and further works are in progress. The dockyard, &c., for the Royal Navy is at Simon's Bay. In August, 1896, an electric tramway was opened in Capetown.

The Colony is under what is known as responsible government. There is a Governor appointed by the Crown, a Legislative Council of 22 elected members, and a House of Assembly of 76 elected members. The Ministers comprised in the Cabinet, who are responsible to the Colonial Legislature, are the Colonial Secretary, the Secretary for Agriculture, the Commissioner of Public Works, the Treasurer (Premier), and the Attorney-General.

CAPITAL, Capetown. Pop., 1891, 51,251 (including suburbs, 83,893); Grahamstown, 10,498; Port Elizabeth, 23,266; Kimberley, 28,718; Beaconsfield, 10,478.

BASUTOLAND.

Basutoland is an inland colony, being completely hemmed in by the Cape Colony, the Orange Free State, and Natal. It lies between 28° 45′ and 30° 40′ South latitude and 27° and 29° 30′ East longitude, and has a computed area of 10,293 square miles. The population in 1891 was 218,324 natives and 578 Europeans; the latter are not allowed to settle without special permits (estimated pop. 1896, 250,000).

The territory is well watered, and enjoys a delicious climate. It is one of the finest grain-producing districts in South Africa, and the abundant grass enables the Basutos to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged. The Basutos were first formed into

a single tribe by a chief named Moshesh, about 1818. In 1852 they fought against the British Government and were defeated, but their country was not annexed. In 1856 disputes, resulting in hostilities, arose between Moshesh and the Orange Free State. These disputes continued more or less until 1868, when the Basutos, being hard pressed by the Free State, were saved from destruction, being taken under British protection. In 1871 their country was annexed to the Cape, but was not made subject to the general law of the Colony. In 1879 a chief named Moirosi rescued his son from justice, and it was only after severe fighting that his stronghold was taken by the Colonial forces. In the following year, owing to the extension to Basutoland of a Cape Act providing for a general disarmament, the whole tribe rebelled; and, after much negotiation, it was arranged that the Imperial Government should take over the country, receiving a subsidy of £20,000 (reduced to £18,000) from the Cape Government towards the cost of the administration. This arrangement was carried out in 1884, and Basutoland thus became a separate Colony. Basutoland entered the customs union in 1891, and a share of the dues is paid over to the Cape as a set-off against the £18,000.

The territory is now governed by a Resident Commissioner under the direction of the High Commissioner for South Africa; the latter possessing the legislative authority, which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The Revenue arises from the Cape contribution, the Post-office, native hut-tax, and the sale of licences. Telegraph offices have been opened at Maseru and Mafeking, in connection with the Cape Colonial system. There are 144 schools, with 7,543 scholars, nine-tenths being in the schools of the French Protestant Mission. There are two small Government schools, and grants in aid of education were made to the extent of £3,829 in 1895-6.

Revenue, 1895-96, £45,653; expenditure, £42,970.
Imports, 1895-96, £137,000; Exports, £139,500.
CAPITAL, Maseru. Pop., 763 (99 Europeans).

BECHUANALAND.

Bechuanaland lies to the north of Griqualand West, and part of it has been annexed to Cape Colony; the rest is a British Protectorate. The Colony of British Bechuanaland is bounded on the east by the South African Republic or Transvaal; on the south by the Orange river and Griqualand West, Cape Colony; on the west by the 20th meridian east, and the Nosop and the Molopo rivers; and on the north by the Protectorate. It has an area of about 61,000 square miles, and a population estimated at 6,000, of whom about 5,000 are whites. The domestic revenue of the whole district as constituted in 1893-94 amounted to £55,370.

CAPITAL, Vryburg.

Governor (The Governor of Cape Colony).
Administrator and Chief Magistrate, Sir Sidney G. A. Shippard, K.C.M.G., D.C.L. ... £1,800

THE BECHUANALAND PROTECTORATE.

The Protectorate is bounded on the east by the South African Republic and Matabeleland, on the south by Cape Colony, on the west by German South-West Africa, and extends northwards to the northern boundaries of the Bamangwato territory. It is about 400 miles long and 450 miles broad, and its area is about 400,000 square miles.

The British "sphere of influence" comprises all the territory to the northward of the Protectorate and of the Transvaal as far as the Zambesi River.

The climate is healthy, but there is a great scarcity of water, and much of the country is thick bush. The natives have suffered much from the rinderpest and a bad harvest, and cattle-raising, the chief industry, has been almost entirely checked in consequence. The exports consist mainly of maize or mealies, wool, hides, cattle, and wood, for the Kimberley market. The local revenue is derived chiefly from customs, and the greater part of the expenditure will be met by a special grant in aid.

The High Commissioner (Cape) has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Khama (Bamangwato), of Linchwe (Bakathla), of Sebele (Bakweni), of Bathoen (Bangwaketsi), and of Ikaneng (Bamalete).

The railway from Kimberley to Vryburg and Mafeking is expected to reach Palapye in January, 1897. There is a telegraph line from Cape Colony through from Mafeking, *viâ* Gaberoni's Palapye, Tati and Macloutsie to Buluwayo and Salisbury.

The chief European centres are Gaberoni's Palapye and Tati.

Governor, Rt. Hon. Lord Rosmead, G.C.M.G., (Governor of Cape Colony).

NATAL.

The colony of Natal derives its name from the fact of its discovery by the celebrated Portuguese navigator Vasco da Gama, on Christmas Day, 1497. The Portuguese did not attempt to make any settlement, and two attempts made by the Dutch, in 1688 and 1721, were both unsuccessful. The country was occupied solely by natives until 1824, when the first European settlement was formed by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu Kingdom under Chaka. Between 1835 and 1837 another settlement was formed

Digitized by Google

by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony, and settled in the northern districts, where to this day the Boers preponderate, although the bulk of the whole white population of the Colony is British. The Boers attempted to set up an independent government at Pietermaritzburg; but the Governor of the Cape took military possession of the district, and in 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government. It lies on the south-east coast of Africa, Durban or Port Natal being about 800 miles from Cape Town. Speaking roughly, it is in 30° E. long. and 30° S. lat. It comprises an area of 20,851 square miles, with a seaboard of 180 miles. The population in 1891 was estimated at 543,913, consisting of Europeans, 46,788; natives (Zulu-Kafirs), 455,983; Indian Coolies, 41,142. The scenery is in parts picturesque in the extreme. The country is well watered, no less than 23 distinct rivers running through it into the Indian Ocean, but not one of them is navigable. On the N. W. Natal is bounded by the Drakensberg Mountains, a portion of the great range extending from Cape Town; and, as in the Cape Colony, the country rises from the sea to the mountains by a series of terraces. The coast region, extending about 15 miles inland, is highly fertile, and has a tropical climate. Sugar, coffee, indigo, arrowroot, ginger, tobacco, rice, pepper, and cotton thrive there, and the pine-apple ripens in the open air. Tea is also grown. The midland district is more adapted for cereals and other European crops. The upper district is chiefly grazing land, and sheep-farming is the principal occupation of the inhabitants; horses and cattle are also reared in large numbers. The coalfields of the colony are of large extent, and are now connected by rail with the seaport of Durban. The output for the year ended 30 June, 1895, was 151,520 tons. The advantages accruing to the colony from the permanent establishment of this industry will be considerable, but they depend in great measure on the establishment of an export trade. Some attempts have been made to utilize the rich beds of iron ore which have been found in many parts of the colony. Large forests of valuable timber abound in the kloofs of all the mountain ranges, and many tracts along the coast are also well wooded. The chief exports in 1895-6 were wool, £597,289; gold, £161,581; sugar, £51,932; hides, £46,955; angora hair, £24,697; skins, £13,842; bark, £17,951; coal, £81,236.

In Durban, or Port Natal, the Colony has the only harbour of any importance on this coast. The bar, which hitherto has prevented large vessels from entering, is now in course of removal. There are 402 miles of railway open, all worked by the Government. The main line extends from the Port of Durban to Pietermaritzburg (the capital), from thence to Charlestown on the border and onwards to Johannesburg and Pretoria in the South African Republic. A branch line extends northwards from Durban to Verulam 19¾ miles, and is now being extended across the Tugita river into Zululand, and another from South Coast Junction to Isipingo 6¼ miles. A branch to Harrismith, in the Orange Free State, from the main line, was completed and opened on July 13th, 1892, and the survey of a line from Harrismith to a point of junction on the Orange Free State line between the Sand and Valsch rivers was completed in 1892. There is a weekly mail service with England; and a telegraph cable to Zanzibar, Aden, and Europe, besides land lines to all parts of South Africa. There are Government High Schools at Pietermaritzburg and Durban; and of elementary schools there are 20 maintained by Government; there are also 426 private aided denominational and aided native schools. The climate of the middle and upper districts is singularly beneficial to those suffering from pulmonary complaints. That of the coast district is, as already stated, tropical.

The Government consists of a Governor, a Legislative Council, and a Legislative Assembly. The former consists of 11 members, nominated by the Governor in Council, one half of whom retire every 5 years. The latter consists of 37 members elected by popular vote. There are 10,256 electors on the register, and there is a property qualification.

PIETERMARITZBURG, the capital and seat of government, is situated about 50 miles inland from Port Natal. Population (1896), 20,500.

ZULULAND.

The Territory of Zululand comprises about two-thirds of the country formerly under the Zulu kings. It is bounded on the south and south-west by Natal, from which it is divided by the Tugela river; on the south-east by the Indian Ocean; on the north by Tongaland; and on the west by the South African Republic.

The Zulus are a tribe of warlike Kafirs, who formed themselves into a powerful kingdom about the beginning of this century under a chief named Chaka. In 1828, Chaka was killed by his brother Dingaan, who succeeded him; and Dingaan, having been defeated in 1840 by the Dutch and English settlers in Natal, was deposed in favour of his brother Panda. In 1873 Panda died, and was succeeded by his son Cetywayo. The relations between Cetywayo and the English in Natal were not unfriendly; but there had for many years been a dispute between Cetywayo and the Dutch Government of the Transvaal as to their boundaries, and, when the Transvaal was annexed in 1877, Cetywayo was disappointed to find the British Government of that country took the same view of his claims as the Dutch Government. The situation having become critical, Sir Bartle Frere sent an ultimatum to Cetywayo, and no reply having been received, a British army was marched into Zululand in 1879. After much fighting, in which the British suffered at first some serious reverses, Cetywayo was defeated, and his country divided among 13 chiefs. In 1883, Cetywayo was reinstated by the British Government in his kingdom; with the exception of the district on the north-east, which had been assigned to a chief named Usibebu, and the territory immediately adjacent to Natal, which was constituted a native reserve under British supervision. Usibebu, however, attacked and defeated Cetywayo, who had to take refuge in the Reserve, where he died in 1884; and the British Government, finding that the Zulus were unable to form an orderly administration for themselves, and that their lands were gradually being taken from them by the Transvaal Boers, decided at last to make what remained of Zululand a British Territory, which was done in May, 1887. On July 15, 1895, the territories of Sambane, Umbegeza, Mahlaleni, and other petty chiefs, bounded on the South and East by the Pongolo river, on the North by the Maputa river, and on the West by Swaziland and the Transvaal, were declared to form part of Zululand. A magistracy has been established over these Territories, which now comprise the Ingwavama District.

The Territory, which has been divided into districts, is administered by a Resident Commissioner residing at Eshowe, under the supervision of the Governor of Natal, who is also Governor of Zululand. Native law remains in force as between natives, but the Governor can legislate by proclamation. The cost of administration is chiefly defrayed by a tax of 14*s.* on each hut. The only district in which the settlement of Europeans is allowed is that of Entonjaneni, where there are Boers whose farms were included in Zululand by the settlement of 1886, and who were thereby allowed to retain and occupy their holdings, the occupation of the remainder of the land by Europeans being prohibited, except for missionary, trading, or mining purposes. There is a telegraph line, from Lower Tugela to Melmoth *vid* Eshowe, and another from Dundee, Natal, to the Nondweni goldfields. The mails from Lower Tugela, on the Natal border, to Eshowe, and from Vants Drift to Nondweni, are conveyed by daily post carts, and regular communication between Eshowe and the several magisterial districts is maintained by means of native runners.

Revenue, 1895 ..... £51,746
Expenditure, 1895 66,172
Governor, The Governor of Natal (Sir Walter Francis Hely-Hutchinson, K.C.M.G.) £1,000
Resident Commissioner and Chief Magistrate, Sir Marshal Clarke, K.C.M.G. (and allowance) 2,274

CAPITAL, Eshowe. Parcels, same as to Natal: telegrams, 5*s.* 2*d.* per word.

THE BRITISH SOUTH AFRICA COMPANY.

Chairman, Duke of Abercorn, K.G.
Deputy do., Duke of Fife, K.T.
Sec., H. Canning, 19 St. Swithin's Lane, E.C.
Administrator, Earl Grey.

On Oct. 29, 1889, this Company received a Royal Charter entrusting it with the development of the extensive regions lying to the South of the Zambezi, which the year before had been proclaimed British territory. A satisfactory understanding having been come to with Lobengula, the chief of the warlike Matabele, a pioneer force under Colonel Pennefather was despatched from Kimberley, and on Sept. 12, 1890, reached the vicinity of Mount Hampden, and there built Salisbury, the present capital of Mashonaland. Subsequently, in May, 1891, the field of operations of the Company was extended to the north of the Zambezi, and its territories, with the exception of the "British Africa Protectorate," which is under direct Imperial administration, now cover the whole of British South Africa from Mafeking to Tanganyika. This territory embraces an area of 750,000 square miles, or 8½ times the size of Great Britain.

The rainy season extends from November to February, when about 40 inches of rain fall. Gold abounds, and silver, copper, blende, tin, antimony, arsenic, and lead have also been discovered.

In January, 1896, Dr. Jameson, the then administrator of the Company, from motives which have not yet been clearly established, invaded the Transvaal with a small armed force; the expedition was met at Krugersdorp by an overwhelmingly superior body of Boers, and Jameson and his officers surrendered and were conveyed to Pretoria. The subsequent deliverance of the principal actors into the hands of the British government, their trial and the sentence of certain of them as first-class misdemeanants, combined with the unfriendly action of the German government, will live in the annals of the century.

Much has been done for facilitating intercourse with the outer world. A railway from Kimberley to Vryburg (126 miles) was opened on Dec. 3, 1890, and is being extended to Mafeking. The railway from Beira to Salisbury (295 miles), through Portuguese territory, has also been commenced, and on its completion Mashonaland will be within five weeks' travel from the mother country, instead of eight weeks as at present. Salisbury already boasts some good hotels, a church, and a newspaper. It is defended by a fort, as are also the growing places of Tuli, Charter, Victoria, and Umtali.

WEST AFRICA.

The West African Colonies are the Gambia, Sierra Leone, the Gold Coast, and Lagos, which are all situated upon the coast of North-Western Africa between the mouths of the rivers Senegal and Niger. They are not colonies in the strict sense of the word, but merely trading settlements, in which the products of the neighbouring countries are collected and exchanged for European goods. The climate is such that Europeans cannot live there permanently, and even the negro inhabitants suffer greatly from malarial fever. The West Coast of Africa has, however, been eagerly frequented by European traders since it was first explored by the Portuguese in the latter part of the 15th century, just before the discovery of America by Columbus. In the 17th century all the chief maritime nations of Europe, except the Spaniards, had forts or factories established on the coast, from which they used to supply slaves to their plantations in the West Indies and on the mainland of America. The importance of the coast was much diminished when these same nations agreed, at the commencement of the present century, to join in putting down the slave trade. The Dutch and the Danes relinquished their possessions; and although the French and the Portuguese maintained their positions, the English were practically without any serious rivalry in the development of a legitimate trade in tropical products, of which palm oil was the most important, to take the place of the trade in slaves. Within the last few years, however, the French have been spending large sums, and making strenuous efforts, with the avowed intention of founding a great French Empire in North-Western Africa. The Germans possess the territory of the Cameroons and Togoland, in the immediate neighbourhood of the British possessions; and, more to the south, the Congo Free State has been founded by the King of the Belgians. Each nation is striving to extend its influence as far as possible into the interior; and British authority is being extended, not only by means of the colonies, but also through the Royal Niger Company, which exercises, under a charter from the British Crown, all the functions of government ceded to it by the various rulers and people in the lower basin of the River Niger.

GAMBIA.

The river Gambia rises in the mountains at the back of Sierra Leone; it flows first towards the north, and then, turning towards the west, empties itself into the Atlantic about 100 miles south of Cape Verde. The chief town, Bathurst, is situated on an island at the mouth of the river in 13° 24′ N. lat. and 16° 36′ W. longitude. It is the only West African river which is navigable by ocean-going steamers, having 26 feet of water on the bar at low tide. Vessels drawing 10 feet can go up it for 250 miles. It was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618, an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognized, by the Treaty of Versailles, as British. It had no regular political institutions until 1807, when it was put under the Government of Sierra Leone, to which it was annexed in 1841.

The settlement now consists of the Island of St. Mary, British Combo, Albreda, the Ceded Mile, McCarthy's Island, and various other islands and territories on the banks of the river. The estimated population on 31 December, 1893, was 14,978. The climate is as unhealthy as that of any other part of West Africa during the rainy season, viz., from June to October; but during the rest of the year it is fairly healthy. Special inducements are held out to sportsmen, who are promised good bags of hippopotami, antelope, monkey, alligator, and other delicacies. The chief export is ground-nuts, which forms nearly nine-tenths of the total exports. They are sent chiefly to Marseilles, where the oil is extracted and used for the same purposes as olive oil. Beeswax, rubber, and hides are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities for export. The annual value of the exports was on the decrease from 1882 to 1892, but the latest returns show a marked improvement. The chief imports are spirits, wines, sugar, guns, gunpowder, and cotton goods. Rice is also imported very largely. The colony has no debt, but, on the contrary, an amount of money invested. There is an armed police force in the settlement (numbering about 150 men), which performs both civil and military duties. The Gambia was made a separate colony in 1888. The government, which is that of a Crown Colony, is now vested in an Administrator, assisted by an Executive Council, and by a Legislative Council consisting of 4 official members (besides the Administrator) and 2 unofficial members, nominated by the Crown.

THE GOLD COAST COLONY.

This colony comprises the coast of the Gulf of Guinea from about 2° W. to 1° 10′ E. of Greenwich, with a protectorate extending inland to an average distance of 300 miles, and calculated to include an area of 90,000 sq. miles. The population of the Colony and protectorate is estimated at 1,500,000 (exclusive of Ashanti), of whom 150 are Europeans. The natives are almost all Pagans; but there are a few Christians, and the number of Mohammedans is steadily increasing. The Castle and settlement of Elmina was founded by the Portuguese and taken from them by the Dutch. In 1618, some English merchants built a fort at Cormantyne, and subsequently many forts and factories were established, not only by the English and Dutch, but also by the French, the Danes, and the Germans, for the purpose of supplying slaves to their West Indian and American possessions. The first English Company to trade with the Gold Coast was chartered in 1662. This was succeeded in 1672 by the Royal African Company, which enlarged and strengthened Cape Coast Castle until it was the best on the Coast, and also built forts at Dixcove, Secondee, Commendah, Anamaboe, Winnebah, and Accra. This was again succeeded in 1750 by the African Company of Merchants, which was constituted by Act of Parliament, with liberty to trade and form establishments on the West Coast of Africa between 20° N. and 20° S. lat. The settlements were in 1821 transferred to the Crown, and placed under the Government of Sierra Leone, from which they were finally separated in 1874 under the title of Gold Coast Colony. The Dutch and English forts were intermingled until 1868, when an exchange was effected which gave all those on the West to Holland and those on the East to Great Britain. In 1872 the Dutch transferred all their forts to Great Britain, which had previously, in 1850, bought the Danish forts. It was out of this transfer that the last Ashanti war of 1873–4 arose, as the King of Ashanti, who had always been on good terms with the Dutch, feared that he would be cut off from the sea. The result of the war was that the Ashanti power was completely shattered, and the British possessions were left free for development without fear of native aggression or hindrance from European rivalry. Within the last few years, however, the French have begun to extend and develop their Colony of Grand Bassam and Assinie, which adjoins the British Colony on the West; and the Germans have formed a settlement adjoining the Colony on the East, called Togoland, which is rapidly increasing in commercial importance. The produce of the Gold Coast is chiefly sent to Great Britain. Gold is found in considerable quantities, and ivory, gum-copal, monkey-skins, cotton, camwood, Guinea grains, and oil, are also exported to England. A trade has been recently developed in rubber, the quantity shipped in 1882 being 7,168 lbs., and in 1895, 4,022,385 lbs. (value £322,070). But the principal export is palm-oil, 4,338,627 gallons (value £231,415). During the last year the export of rubber has shown a progressive increase, whilst that of palm kernels has been stationary. Trade in timber also promises well. The chief imports are textiles, alcohol, and hardware. The climate is damp, hot, malarious, and unhealthy. Very little had been done for the natives during the 400 years that Europeans have occupied the Coast, until within the last few years. But the Government is now assisting the Roman Catholic, Methodist, and German missionaries in educational matters, and great efforts are being made to improve the sanitary condition of the Coast towns. The Government has also some schools of its own; the towns are lighted and policed, and 380 miles of telegraphs have been established.

The seat of Government is Accra (population 16,276). The other principal towns are Cape Coast (11,614), Elmina (10,530), Addah (7,530), Saltpond, and Quitta. The Legislative Council consists of 6 official and 3 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone (Lion Mountain) was ceded to Great Britain in 1787 by the native chiefs, to be used as an asylum for the many destitute negroes then in England; and great numbers of liberated Africans from North America and the West Indies, besides those taken in slavers on the coast, have from time to time been settled there. In this respect Sierra Leone is really a colony, and differs from the other West African colonies, which were all formed as merely trading stations. But Sierra Leone, too, is now commercially important. The route from Freetown to the great central African plateau is shorter and easier than that from the navigable head of the Gambia, and the harbour is far the best in West Africa. So excellent is the harbour that it has recently been strongly fortified as a coaling-station for the Royal Navy on the Cape route to India. In addition to the peninsula, the colony now comprises Sherbro Island, and various other territories extending along the coast from the French Colony known as the "Guinée Française" upon the North to the Republic of Liberia on the South. The extreme length is about 185 miles, with an estimated area of 4,000 sq. miles. The population in 1893 amounted to 136,000, of whom 210 were resident Europeans. Of the rest, more than half were liberated Africans and their descendants, while the remainder belonged to the neighbouring tribes. The liberated Africans were brought from all parts of Africa, and as the result no less than 60 different languages are said to be spoken in Freetown. Almost every Christian denomination is represented in Freetown, and there are also many Pagans and

Mohammedans. Education, though not compulsory, is in an advanced state. The climate is humid and enervating to Europeans, and malarial fevers are prevalent, especially at the beginning and end of the rains, which last from May to October. The peninsula itself produces hardly anything. The inhabitants are almost all employed in exchanging the products of the interior for European goods. The exports consist chiefly of palm-oil and palm-kernels; but benni-seed, cocoa-nuts, ginger, ground-nuts, india-rubber, gum-copal, hides, beeswax, and kola-nuts are also exported. The imports are chiefly ale and porter, apparel, including boots, shoes, and hats; beads, flour, and biscuits; cotton and woollen goods; cutlery, earthenware, and glassware; gunpowder and guns; haberdashery, hardware, lumber, provisions; spirits, chiefly rum and gin; tobacco and wine. The taxation consists of specific duties on wine, spirits, ale and porter, tobacco, gunpowder, guns, kerosine oil, lumber, hardware, salt, and sugar; and of a 7½ per cent. ad valorem duty on other goods.

Amount of public revenue, 1895 ..... £97,851
Amount of public expenditure, 1895 96,690
Public debt, 31st Dec., 1895 50,000
Total imports, 1895 427,357

LAGOS.

The Colony and Protectorate of Lagos, formerly one of the great centres of the African slave trade, is situated on the Bight of Benin and is comprised within 2° and 6° East longitude. Its sphere of influence extends to the 4th parallel of N. latitude, embracing the whole of Yoruba, a large and fertile region and one of the most successful fields of missionary enterprise; it was permanently occupied by Great Britain in 1861. Up till 1886 it formed a dependency of the Gold Coast, but is now a separate Crown Colony and Protectorate. The Protectorate comprises the kingdoms of Pokra, Okeodan, Ilaro, Addo, Igbessa, Awori, Jebu Remo, Mahin, Ogbo, and Jakri up to the right bank of the Benin river on the east, where it adjoins the territory of the Niger Coast protectorate. Lagos island has an area of 3¼ square miles, and the whole colony and protectorate includes 1500 square miles, with 2,000,000 inhabitants. There are about 200 persons of European birth in the colony. The town of Lagos has 32,500 inhabitants.

Palm-oil and palm-kernels constitute at present the most important natural products of the Colony; the value of the palm-oil exported in 1895 having been £205,553, and that of kernels £320,434. The imports are chiefly cotton-goods (£274,427), spirits (£106,335), and tobacco (£25,615).

THE NIGER COAST PROTECTORATE.

H.M. Commissioner and Consul-General, Ralph D. Rayment Moor, C.M.G. £2,500
Dep. Commr. & Cons.-Gen., J. R. Phillips ... £800
Vice-Consuls, T. A. Wall (*Post and Customs offices*), Capt. H. L. Gallwey, D.S.O.; Major Copland-Crawford, D.S.O. ..... £600 to 800
District Commissioners, A. G. Leonard, C. E. Harrison, R. F. Locke, A. B. Harcourt, W. F. W. Fosbery, A. A. Whitehouse, W. Burrows £500
Commandant of Forces, Capt. A. M. Boisragon.
Supr. Marine Dept., Capt. F. G. Dundas.
Principal Medical Officer, R. Allman 1,000

This "Protectorate," formerly called the "Oil Rivers Protectorate," includes the whole of the maritime region lying between Lagos and the Rio del Rey, with the exception only of the mouth of the Niger, assigned to the Royal Niger Company. The coast region was secured by treaties with the native chiefs, concluded by Mr. E. H. Hewett, C.M.G., in 1884, and was placed, in 1891, under an Imperial Commissioner. The Protectorate was announced in the *London Gazette* of June 5, 1885, Oct. 18, 1887, and May 13, 1893. Centres of trade are Old Calabar, the capital (pop. not computed), Opobo, Bonny, New Calabar, Brass, Benin, Warri and Sapele. The leading exports are palm-oil, £514,302; palm-kernels, £296,396; rubber, £11,787; ebony, £5,190, and ivory; the leading imports being cotton-goods, £187,968; hardware and cutlery, £25,044.

Revenue (from Customs Duties), 1895 . £151,244
Total Imports, 1895 750,775
Total Exports, 1895 508,637
Imports from United Kingdom, 1895 575,447
Exports to United Kingdom 844,333

Steamers of the "British and African" and "African" lines run regularly between Liverpool

and the principal ports. Headquarters, Old Calabar. Transit about 25 days.

Parcels, 9*d.* per lb. to 11 lbs.; telegrams, Bonny and Brass, 9*s.* 8*d.* per word.

THE ROYAL NIGER COMPANY.

Chartered and limited; Capital, £1,100,000.
Governor, Sir G. Taubman-Goldie, K.C.M.G.
Deputy Gov., Rt. Hon. the Earl of Scarbrough.
Secretary, Henry Morley.
Office, Surrey House, Victoria Embankment.
Agent-General, William Wallace.
Chief Justice, Samuel Moore.
Principal Medical Officer, E. E. Craster.

The Royal Niger Company may fairly be described as the offspring of the "National African Company," which in the course of 1884 and 1885 bought out or amalgamated the French companies then trading on the Niger, and concluded treaties conferring territorial rights with about 300 native Chiefs and States. It was consequent upon this vigorous activity that the British Government, on June 5, 1885, declared the whole of the coast lying between Lagos and the Rio del Rey a British Protectorate. A boundary, separating this newly created "British sphere" from the German Protectorate of Cameroons, has been settled by conventions made in 1886 and 1893. This boundary intersects Adamawa, a dependency of Sokoto, in the very centre, but assigns the capital, Yola, to England. This boundary terminates at a point on the south shore of Lake Chad, thirty-five minutes east of Kuka, the capital of Bornu, which is within the British sphere. Another line agreed upon in 1890, and drawn from Say on the Niger to Barua on Lake Chad, separates the French and British "spheres." The frontier between these "spheres" on the west of the middle Niger is not yet determined; but under treaties with the Mohammedan Sultan of Gandu, and the Pagan King of Borgu, the company claims a large extension westward. The "Protectorate" within the limits indicated covers an area of 500,000 square miles, and is estimated to contain from 20 to 30 millions of inhabitants.

A part of the maritime districts of these territories was formed into the "Oil Rivers Protectorate," now the Niger Coast Protectorate, but the whole of the remainder was granted to the Royal Niger Company, chartered on July 10th, 1886.

The very considerable political and administrative powers granted to the Company are exercised under the control of the Secretary of State for Foreign Affairs. Treaties with Sokoto, Gandu, and Borgu confer upon the Company the fullest jurisdiction over all non-native residents and visitors. Among the small tribes outside these empires, on the Lower Niger, and south of the Benue, the Company's power is scarcely limited at all. The authority is exercised there for the suppression of all slave-raiding, and the Chiefs are required to submit their disputes to arbitration, instead of resorting to intertribal war.

The Company maintains 42 stations, of which the more important are:—Akassa, at the Nun mouth of the Niger, with workshops for the repair of steamers; Asaba, 150 miles up the river, the administrative headquarters, where are the supreme court, the central prison, a hospital, and a botanical garden; and Lokoja, at the confluence of the Benue, with the head-quarters of the military force. This force numbers about 1,000 men, chiefly Hausas, and is officered by Europeans. In addition to it each administrative district has its agent or magistrate, supported by a small police force. Thirty steamers navigate the Niger and its tributaries, and afford the principal means for the maintenance of order and security.

The principal exports are rubber, ivory, palm-oil, gums, hides, &c. The principal imports are cotton-goods, earthenware, hardware, powder, salt, silks, spirits, and woollen goods. The Company have prohibited the importation of rifles and cartridges into any part of their territory. Spirits are charged a heavy import duty, and cannot be imported at all into the districts lying to the north of lat. 7°. Their consumption, as a consequence, is not now one-fourth of what it was before the grant of the charter. The revenue is chiefly raised by export duties, import duties being charged only upon guns, powder, salt, spirits, and tobacco.

A military expedition with an unknown destination was organized and sent out at the close of 1896.

EAST AND CENTRAL AFRICA.

There are no British *Colonies* on the East Coast of Africa to the north of Zululand (already treated of under the head of "South Africa"). But a large portion of the Continent, both on the coast and inland, is under British protection and is administered directly by the Imperial Government, through the Foreign Office. Just as on the West Coast, the rivalry of European Powers has resulted in the division of the territory on the East into "spheres of influence," the definition of whose boundaries has given rise to much diplomatic negotiations, and is not yet finally completed. From the boundary of Amatongaland northward to Cape Delgado is *Portuguese*; from Cape Delgado to the river Umba is *German East Africa*; the islands of Zanzibar and Pemba form a British Protectorate; and the British East Africa Protectorate (together with the little Witu Protectorate), extends from the Umba to the river Juba, which forms the southern boundary of the *Italian Sphere* extending northward as far as the British Protectorate on the Somali Coast. It will be observed that on this portion of the African Continent the French have made no acquisitions, but their recent annexation of the great island of Madagascar places them in a position of importance on the East Coast, although their influence does not extend to the mainland. The history of the European occupation of East Africa may be briefly stated thus:—the Portuguese acquired their rights by discovery and conquest. The Germans obtained a footing on the mainland opposite Zanzibar between 1880 and 1885, at which latter date the Sultan of Zanzibar recognized their Protectorate over Usagara, and in the same year the Germans declared a Protectorate over Witu. In 1888 the Imperial British East Africa Company received a Royal

Charter, having been granted a few years previously by Seyyid Barghash, Sultan of Zanzibar, administrative rights over his mainland possessions. In 1890 the respective spheres of Great Britain and Germany were settled by agreement. Zanzibar became a British Protectorate, and Germany withdrew from her Protectorate over Witu in favour of Great Britain. The boundaries of the *Italian Sphere* were agreed upon in 1891. The Imperial British E. Africa Co. transferred the administration of their territories to the Imperial Government in 1895, having done much to promote the advance of civilization in the large tract of country now known as the "British East Africa Protectorate."

The term "Central Africa" is rather misleading to the unofficial mind. It must be understood as not applying to Uganda, although that country is, properly speaking, the most "Central" of the British Colonies or Protectorates in the Continent. The "British Central Africa Protectorate" comprises a territory about the size of England and Wales, on the west and south of Lake Nyassa. The respective limits of British and Portuguese possessions or protectorates in East Africa were determined by the Treaty signed at Lisbon on June 11, 1896.

THE BRITISH EAST AFRICA PROTECTORATE.

Commissioner & Consul-Gen., A. H. Hardinge, C.B.
Members of Protectorate Council, A. H. Hardinge, C.B.; Sir Lloyd Mathews; W. B. Cracknall.
Secretary, W. Strickland.
Sub-Commissioners and Vice-Consuls, C. H. Craufurd; J. Ainsworth; Capt. A. S. Rogers; A. C. W. Jenner ..... £500 to £600
Judicial Officer and Legal Vice-Consul, R. Cator 600
Treasurer, E. Bradbridge 600
Commander of Forces, Major G. P. Hatch.

The Imperial British East Africa Company was incorporated by Royal Charter, dated September 3, 1888; and under the control of the Secretary of State for Foreign Affairs, exercised sovereign jurisdiction over the territories leased by the Sultan of Zanzibar, or acquired by treaties entered into with native Chiefs. A British Protectorate was announced over these territories on June 18, 1895, and the Company handed over the administration on July 1, 1895.

These territories are now comprised under the name of "The British East Africa Protectorate," and include the whole of the coast from the Umba to the Juba River, granted on a 50 years' lease by the Sultan of Zanzibar, as also the vast territories in the interior bounded in part by international conventional lines. The southern boundary was defined by the Anglo-German conventions of 1886, 1890, and 1893; that on the east (along the Juba) and north-east, by an agreement with Italy (1891). On the west the Protectorate adjoins that of Uganda.

A great portion of this vast region consists of pasture lands, or barren wastes, but there are not lacking extensive districts of great natural fertility on the coast, as well as in the interior. The Protectorate is divided for administrative purposes into four districts: (1) The Coast Province; (2) Ukamba; (3) Tanaland; and (4) Jubaland, of which the centres of administration are respectively Mombasa, Machakos, Lamu, and Kismayu.

Mombasa, which is connected with Europe and India by telegraph, is the capital of the Protectorate, and possesses the finest harbour on the east coast of Africa. There is also telegraphic communication along the coast between Mombasa and Lamu. The Uganda Railway has its terminus at Mombasa, which is now connected with the mainland by a railway bridge 1,732 feet in length.

The principal exports are ivory, hides, rubber, cloves, gums, orchella weed, sesame, ebony, boorities (poles and rafters), rhinoceros horn, hippopotamus teeth, &c.; the principal imports piece goods, rice, brass wire and beads.

The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the consumption of spirits is also heavily checked.

Capital, Mombasa; transit about 21 days. Parcels, first lb., 1*s.*, then 8*d.* to 11 lbs. Telegrams, Mombasa, 5*s.* per word, other places, 5*s.* 5*d.*

THE UGANDA PROTECTORATE.

Commissioner and Consul-General, E. J. L. Berkeley £1,450
Deputy Commissioner, Consul and Commandant, Major T. Terman, D.S.O. 750
Military Officers, Capt. W. P. Pulteney, Capt. H. J. Madocks, Lieut. Dugmore ...
Vice-Cons., F. J. Jackson, R. Macallister, Capt. C. G. Sitwell, E. de L. Collinson 650
Senior Medical Officer, Dr. R. U. Moffat 450

A British Protectorate over the territory of Uganda was proclaimed in the "London Gazette" of June 19, 1894, and included only the country subject to King Mwanga, known as Uganda proper, bounded by the territories known as Usoga, Unyoro, Ankoli and Koki. This Protectorate has since been extended over Unyoro and Usoga—(see notice in "London Gazette," July 3, 1896). *Uganda proper* lies on the N.W. shore of Lake Victoria, between 500 and 600 miles in a direct line from the nearest point on the East Coast of Africa. It is situated on, and to the N. of the Equator. *Usoga* lies further to the East, on the N. shore of the Lake. *Unyoro* is to the N.W. of Uganda and extends to Lake Albert. *Koki* is to the S.W. of Uganda.

The capital town of Uganda is Mengo, but the centre of the Protectorate Administration is the neighbouring settlement of Kampala. The population of Uganda is estimated at over 300,000. The exports are at present almost confined to ivory. Efforts are now being made to place steamboats on the lake.

The Uganda Railway.—A survey of the route to be followed by a railway to connect Uganda with the coast at Mombasa was made in 1892. In 1895 H.M. Government decided to proceed with the construction of the railway, and in September of that year a Committee was formed with the late Sir Percy Anderson, assistant Under-Secretary of State for Foreign Affairs, as Chairman, to supervise the undertaking and organise details, under the authority of the Secretary of State for Foreign Affairs. The Committee meets regularly at the Foreign Office, and since the death of Sir Percy

Anderson, the chair has been taken by the Hon. Francis Bertie, Assistant Under-Secretary of State.

The gauge adopted for the railway is one metre. The chief engineer and staff arrived at Mombasa in December, 1895, and a large number of labourers have been imported from India for the work of construction, in addition to such local labour as can be engaged. The total length of the line to be constructed is about 660 miles, and it is hoped that 100 miles will be open for traffic in the first half of 1897. A telegraph line is also in process of construction. The necessary funds for the construction of the railway were provided by the *Uganda Railway Act*, 1896 (59 & 60 Vict. ch. 38) by which the issue of £3,000,000 is authorized from the Consolidated Fund.

THE WITU PROTECTORATE.

Sultan, Omari Mahdi, *succeeded* 1895.
British Resident, Capt. A. S. Rogers. (See East Africa Protectorate.)

This Protectorate is a small tract of country extending about 66 miles along the coast, and 30 miles at furthest inland, at the mouth of the river Tana. The Germans proclaimed a protectorate over it in 1885, which they resigned to Great Britain by the agreement of 1890. (See introductory note.) The British Protectorate was proclaimed Nov. 19, 1890. In March, 1891, the Imperial British East Africa Company undertook the administration of the country, from which they withdrew on July 31st, 1893. Witu is now regarded, for administrative purposes, as part of *Tanaland*, one of the districts into which the British East Africa Protectorate is divided.

Parcels, 1st lb. 1*s*., then 8*d*. to 11 lbs.

THE ZANZIBAR PROTECTORATE.

Sultan, Hamud bin Muhamad bin Said, *succeeded* his cousin, Hamed bin Thwain, 27th Aug., 1896.
H. M. Agent and Consul-General, A. H. Hardinge, C.B. £1,800
Consul, Basil S. Cave..... 700
Consul and Judge, W. B. Cracknall..... 700
President of Ministry, General Sir Lloyd William Mathews, K.C.M.G. (October, 1891).
Officers in Command of Native Troops, Captain Harrison and Lieut. A. E. H. Raikes.
Treasurer and Collector of Revenue, C. W. Strickland.
Minister of Public Works, Bomanji Manekjee.
Port Officer, Capt. A. le P. Agnew, R.N.R.
Health Officer, Dr. Francis Charlesworth.

The Zanzibar Dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far South as Tanghi Bay and North as Warsheikh; but since the cession of the coast line from Ruvuma to Wanga, including the island of Mafia, to Germany in 1890, they are now confined to the islands of Zanzibar and Pemba (985 sq. m., and 165,000 inhabitants), and a ten-mile coast line from Wanga to Kipini, together with the islands of Lamu, Manda, and Patta, and the ports of Kismayu, Brava, Merka, Magdisho, each with a radius of 10 miles, and the port of Warsheikh, with a radius of 5 miles. As far as the mouth of the Juba, the Zanzibar dominions on the mainland are under the administration of H. M. Government through the Commissioner and Consul-General in the East Africa Protectorate (see p. 521), and the remainder, known as Benadir, is leased to an Italian Company. Zanzibar has been a British Protectorate since November, 1890.

Early in 1893, the late Sir G. Portal obtained from the Sultan a decree transferring to the British Consular Court all cases in which British subjects may be concerned against subjects of His Highness, either as plaintiffs or defendants. The Powers having treaties with Zanzibar continue to retain what are known as extra-territorial rights.

On the sudden death of the late Sultan, Hamed bin Thwain, in August, 1896, Said Khaled, a member of the reigning family, seized the palace and held it with a large number of armed followers, in defiance of the protecting power. He proclaimed himself Sultan, but was not recognized as such by any of the foreign Consular representatives. Khaled having refused to quit the palace, it was found necessary to resort to force to compel his submission. After a bombardment of half-an-hour from the British warships in the harbour, Khaled fled to the German Consulate, whence he was eventually deported to German East Africa, and remains there under German supervision.

The City of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities to shipping and trade generally. It was declared a free port in February, 1892. The population of Zanzibar is about 250,000.

The principal imports, which amounted in 1895 to a total value of £1,293,646, are piece-goods, ivory, cloves, rice and groceries; the exports are piece-goods, ivory, cloves, copra, rubber, gum-copal, and many minor articles amounting in 1895 to £1,199,841. More than one-third of the imports (£466,823) come from British India, £65,126 from Germany, £22,401 from France, and £91,163 from Great Britain. The largest exports are made to German East Africa, which in 1895 accounted for £390,716, the principal other participators being Great Britain (£152,594), and British India (£115,818). These figures refer to the port of Zanzibar, and not to the trade of the Zanzibar dominions. The large quantities of goods which pass through Zanzibar in mail and other steamers, and those which are transhipped to and from the coasting vessels in the harbour without being landed, are not included in the statistics from which the above figures are taken, which do not, therefore, give an adequate idea of the importance of the port of Zanzibar as the centre of trade in E. Africa. There is no direct steam communication with the United Kingdom, passengers, mails, and goods having to tranship at Aden. There are through steamers of French and German Companies.

The number of ocean-going vessels which entered the port in 1895 was—British 70, German 59, French 26, making a gross tonnage of over 243,000 tons. This does not include the coasting and dhow traffic, which is a very large one, extending to Bombay, Arabia, the Comoro Islands, and Madagascar.

Transit about 21 days. Parcels, 1 lb. 1*s*.; then 8*d*. per lb. to 11 lbs.; telegrams, 5*s*. per word.

BRITISH CENTRAL AFRICA PROTECTORATE.

H.M. Commissioner and Consul-General, Sir Harry Hamilton Johnston, K.C.B.
Deputy Commissioner and Consul, Alfred Sharpe.

This country, which was formerly termed *Nyasaland*, was proclaimed a British Protectorate on May 15, 1891. The Protectorate comprises the eastern portion of British Central Africa, and is administered directly by the Imperial Government. The remainder of the territory is administered by the British South Africa Company.

Digitized by Google

The population of the Protectorate is estimated at 845,000, of whom 289 are Europeans and 259 British Indian subjects. The principal exports are ivory and coffee. Rice, tobacco, sugar, cotton, and tea are grown. Total exports (April 1, 1895, to March 31, 1896), £19,668. Principal imports are soft goods, provisions and hardware, and amounted in the year ending March 31, 1896, to £82,760. On Lake Nyasa there are five British steamers (two of which are gunboats) and one German Government steamer. There are also steamers on the upper and lower Shiré river.

The Protectorate contains eighteen administrative stations. Chief towns:—Blantyre (population about 100 Europeans and 6,000 natives) and Zomba, the headquarters of the administration. Communication is maintained between Chiromo (at the junction of the rivers Ruo and Shiré), and Chinde (at the mouth of the Zambesi) by the African Lakes Company's steamers, the Zambesi Traffic Co., and the African International Flotilla Co.

Between Chinde and Europe, the means of communication are Messrs. Rennie's line viâ Natal, the Union Steam Ship Co., the German East Africa S.S. Co., and the Portuguese Royal Mail steamers.

The construction of a railway to connect Chiromo with Blantyre is under consideration, and the preliminary surveys have been made. The Protectorate will before long be connected by telegraph overland with the Cape, viâ Fort Salisbury.

Estimated Rev. and Expenditure, 1896-97 £51,400

Parcels, not exceeding 1 lb. 1*s.* 6*d.*; for each additional pound, 1*s.* 6*d.* to 7 lbs. Telegrams, 5*s.* 8*d.* per word.

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 500 miles east of Madagascar, between 57° 18′—57° 49′ E. long. and S. lat. 19° 58′—20° 32′, and comprising an area of 705 square miles. The resident population on the 31st December, 1895, was 378,041, of whom no less than 260,990 were Indians (the majority originally Coolies imported for working the sugar estates). The general population is mainly of French or mixed descent. The whole island is practically given up to producing sugar for export, and the necessaries of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

Mauritius was discovered in 1505 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Count Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1712 they abandoned the island, and in 1715 the French took possession of it. Under the French it became a great centre of trade, and in 1789 the seat of French Government in the East was removed to it from Pondicherry. In the war between England and France it was a base for privateering expeditions, which inflicted serious damage on British trade, until it was taken by a British force in 1810. The French called it the Isle of France, and the French language and French law have been preserved under British rule. Its past greatness, and much of its present value, are due to the excellent harbour on the N.W. coast, on which the capital, Port Louis, stands. In 1895 there were 103 miles of railway and 54 post-offices in the island, with 135 miles of telegraph. A cable to Zanzibar was opened in 1893, bringing Mauritius and the Seychelles into telegraphic touch with the world. The annual trade of the island passes almost entirely through Port Louis.

The Government is more representative than that of an ordinary Crown Colony, being administered by a Governor, aided by an Executive Council of five officials, and two elected members of the Council of Government, and a Legislative Council of twenty-seven members, of whom eight are ex-officio, nine nominated by the governor, and ten elected for the various districts into which the island is divided. Port Louis has two members, and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. The department of public instruction comprises two branches—the Royal College for higher education, and the Schools' Department for primary education. The College, which is affiliated to the London University, is under the control of a Rector, who is assisted by a staff of professors. The Schools' Department is under the direction of a superintendent, aided by two inspectors. The government schools are supported wholly by the State, the great schools only partially so. The total expenditure on education in 1895 amounted to Rs. 496,622. Of the pupils in the government and aided schools 71·31 per cent. are Roman Catholics, 3·23 per cent. belong to the Church of England, and 1·40 per cent. to other Christian denominations; 24·06 per cent. are Hindoos and Mohammedans to whom no assistance is given. A small British garrison is maintained at Curepipe and Port Louis.

CAPITAL, Port Louis. Population, 1896, 57,387.

Public revenue in 1895	Rs: 8,273,622
Public expenditure in 1895	8,488,736

DEPENDENCIES OF MAURITIUS.—(1.) The SEYCHELLES ISLANDS, 940 miles due north of Mauritius and about 1,100 east of Zanzibar, are governed by

an Administrator, assisted by an Executive and Legislative Council. Originally discovered by the Portuguese, they were occupied by the French about 1742, captured by a British ship in 1794, and finally assigned to Great Britain at the peace of 1814. Although close to the Equator they are very healthy, the death-rate being but 14.80 per 1,000. The estimated population, 1895, was 17,625. There are about 30 islands, the whole area of which is variously estimated at 78 to 160 square miles. Mahé is the largest island; and Port Victoria, the capital, is situated on a fine harbour on the N.E. side, which is visited by numerous men-of-war, and steamers of the Messageries Maritimes Co., which make it a coaling station on their monthly voyages to and from Australia. The principal exports are vanilla, cocoa-nut oil, and tortoise-shell; but the most remarkable product is the unique double cocoa-nut, *Coco de Mer*.

Revenue, 1895, Rs.233,282; Expenditure, Rs.226,004
Imports, 1894, Rs.604,000; Exports..... 764,000
Administr., Henry Cockburn Stewart ...Rs. 13,500
Judge, R. M. Brown 7,000
Collector and Treas., G. A. Banbury..... 4,000
Auditor, &c., J. Driver, B.A. ..... Rs. 3,000
Government Med. Officer (vacant) 4,000

(2.) Rodrigues, 350 miles almost due east of Mauritius. Population in 1893 estimated at 2,540. Area, between 80 and 90 square miles. Cattle, beans, salt fish and goats are the principal exports. The island suffers much from hurricanes; and the revenue usually has to be supplemented by a grant from Mauritius. *Magistrate*, B. H. Colin, Rs. 5,120.

(3.) Other Dependencies. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by a magistrate, whose duty it is to enquire into the condition of the labourers, and settle any disputes which may be referred to him. The chief product is cocoa-nut oil. The most important is Diego Garcia, one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and, as it possesses a good harbour, has been much used of late years as a coaling station.

Transit: Mauritius, 24 days; Seychelles, 19 days. Parcels, *viâ* Colombo, 3 lbs. 2*s*., 11 lbs. (limit) 4*s*.; telegrams, 8*s*. 9*d*. per word.

Greater Britain in the Southern Atlantic.

ASCENSION,

an isolated Island in the South Atlantic (3,417 miles from Plymouth, 690 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55′ 55″ S. lat., and 14° 25′ 5″ W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with a circumference of 22 miles and an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious. It remained uninhabited till 1815, when the English took possession of it. It now possesses a steam factory, naval and victualling yards, and a coaling dépôt. There are also excellent hospitals. Rabbits abound, and a few pheasants, guinea-fowls, sea-swallows, partridges, and goats, which afford some sport. The island is visited by the sea-turtle from January to May, which lay their eggs in the sand; as many as 100 to 150 turtle are often "turned" during the season. The weight is from 500 to 800 lbs., and they are sold at an average price of £2 15*s*. In 1896 there were about 16 acres of ground under cultivation, producing vegetables and bananas. The island is under the Board of Admiralty, by whom a naval officer is appointed as Captain in charge, and it is managed in all respects as if it were a man-of-war. There are no inhabitants except officers and their families, seamen, marines, and Kroomen; a limited number of men also have their families with them, the full complement of the island being 245 with about 60 women and children. Georgetown, the garrison settlement, is situated in a small bay on the N.W. coast. The island is of importance as a coaling station, and as a health resort for crews of vessels detained on the African coast.

Imports from U. K., 1895 ..... £3,725
Officer in Charge, Capt. J. E. Blaxland, R.N. £800
Fleet Paymaster, Abraham Turner, R.N.
Staff Surgeon, C. W. Buchanan-Hamilton.

Transit, about 28 days outward through St. Helena, and 14 days homeward. Parcels, per lb. to 11 lbs. 8*d*. Telegrams *forwarded by post* from Capetown.

TRISTAN D'ACUNHA

is the chief of a group of islands lying in lat. 37° 6′ S. and long. 12° 2′ W. These islands are of volcanic origin, and were discovered in 1506 by a Portuguese admiral, after whom they are named, and are very healthy. The population numbers about 100, and the inhabitants are said to be very long lived.

Inaccessible Island is a lofty mass of rock with sides 2 miles in length: the island is the resort of penguins and sea-fowl.

The Nightingale Islands are three in number, of which the largest is 1 mile long and ¼ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. These islands are visited by large numbers of seals and sea-elephants.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15′—53° S. lat. and 57° 40′—62° W. long. They consist of East Falkland (area 3,000 sq. miles), West Falkland (2,300 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 6,500 sq. miles, and a population in 1888 of about 1,890. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. After having successively belonged to France and Spain, they were given up to Great Britain about 1771, but not actually occupied. In 1820 the Republic of Buenos Aires established a settlement in these islands, which was destroyed by the Americans in 1831. In 1833 they were again taken possession of by the English for the protection of the whale-fishery.

and colonized, and from that time to the present have so continued, being, as a whole, the most southerly organized colony of the British Empire. The climate, though somewhat bleak, is usually considered healthy; and the temperature is on the whole equable, the thermometer ranging in winter from 30° to 50°, and in summer from 40° to 65°. The islands are chiefly pasture-land, and kitchen-gardens occupy the only cultivated part, the population being mainly of the sheep-farming and seafaring industries. The chief exports in 1895 were wool £100,612, sheep-skins £10,028, frozen meat £6,801, and tallow £2,748. The total tonnage of vessels entered and cleared in 1895 was 80,212. There are three places of worship (one Church of England, one Roman Catholic, and one Presbyterian). The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

There is a volunteer force of 100 men.

South Georgia, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, and several other small uninhabited islands, are comprised within this colony.

Amount of public revenue, 1895	£12,518
Amount of expenditure, 1895	13,159
Total imports, 1895	71,826
Total exports, 1895	122,988
Imports from the United Kingdom, 1895...	64,248
Exports to the United Kingdom, 1895	122,988

The Government is vested in a Governor, aided by an Executive Council of three members, and a Legislative Council, the members of both being appointed by the Crown.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, and 1,800 from the coast of S. America, in 15° 55′ S. lat. and 5° 42′ W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population in 1891 of 4,116, including 1,986 males and 2,130 females. It is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trades" keep the temperature mild and equable. The thermometer goes up to 84° in the town at the sea level; but in the country, 1,800 feet above the sea, the maximum is about 74°, and the mean temperature ranges from 57° in September to 66° in March, there being very little difference between night and day. The lowest temperature in winter is 57°. The total rainfall (1895) was 32 inches. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on 21st May, 1501 (St. Helena's Day), and remained unknown to other European nations until 1588, when it was visited by Captain Cavendish on his return from his voyage round the world. It remained uninhabited until the Dutch colonized it *circ.* 1645. The English East India Company seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch by Capt. Munden, of the English Navy, and was held by the East India Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for Napoleon Bonaparte, who died there 5th May, 1821), when it was ceded by them to the Crown. In those days it was a most important station on the route to India, and many highly-paid officials and wealthy merchants were settled in the island. Its prosperity received a fatal blow by the cutting of the Suez Canal, and it is now frequented only by American whalers and by a few sailing ships on their homeward voyage from the East Indies. The tonnage dues on calling ships was abolished in 1882, and the port is now free to all ships except when bringing or taking cargo to and from the port. Its strategical importance as a coaling station for the British Navy is now recognized, and modern fortifications, with heavy guns, have recently been constructed by the Imperial Government. There is one good inlet only, on the north-west of the island — St. James's Bay — possessing a good anchorage. Oats, barley, root-crops and flax are grown. Of export trade in the ordinary sense there is none, and the natural products are not so fully developed as they might be. The cultivation of silk and cotton has been started. The fisheries might be better worked, and productive industries might be increased by the introduction of plants and trees for which the soil is adapted.

The number of vessels which called in 1894, excluding 203 boarded by island boatmen when passing, was 187.

The government of the island is administered by a Governor, with the aid of an Executive Council of 4 members. There is no Legislative Council, the Governor alone making all ordinances.

Capital, Jamestown. Population, 2,233.

CYPRUS,

is an island in the Mediterranean Sea, between N. lat. 34° 30′ and 35° 41′, and E. long. 32° 15′ and 34° 35′. It is about 60 miles distant from the nearest point of Asia Minor; and 41 miles from Latakia on the Syrian coast, with which it is connected by a submarine telegraph cable. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is about 3,584 square miles. The population in 1891 was 209,286 persons, of whom about 23 per cent. were Mohammedans, and the remainder mostly members of the Orthodox Greek Church. The principal productions are grain of various kinds, sesame, linseed, wine, silk, olives, locust-beans, and cotton. The fertility of the soil has for centuries been proverbial. In 1895 the wine and spirits exported amounted to 1,358,354 gals., the bulk of which went to Turkey and Egypt. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered severely when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus still forms part of the Ottoman Empire; but by virtue of a treaty made between England and the Porte, dated 4th June, 1878, the government is administered by England for so long a time as Batoum and Kars may be kept by Russia. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered, under the Colonial Office, by a High Commissioner, assisted by a Legislative Council composed of eighteen members, six being official and twelve elected. The island is divided into three electoral districts, each returning one Mohammedan and three Christian members.

For administrative and legal purposes it is divided into six districts. In each district the executive government is represented by a commissioner; and each has a Court of Law presided over by an English barrister, who is assisted by two native judges, one being a Christian and the other a Mohammedan. There is also a Supreme Court for the whole island, consisting of two English judges.

The amount paid to the Sublime Porte yearly is £87,800 for revenue, £5,000 in compensation for State lands, and 4,166,220 okes of salt (an oke=2·83 lbs.). This sum is not actually paid to the Sultan, but is retained as part payment of the loss sustained by England and France in paying the deficiency on the Guaranteed Turkish Loan of 1855.

The capital is Nikosia (Lefkosia), near the centre of the island, with a population of 12,515 in 1891; the other principal towns are Larnaka (population 7,593), Limassol (7,388), Famagusta, Kyrenia, and Papho.

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 91½ square miles. The colony includes also the adjoining island of Gozo, with an area of 24¾ square miles; Comino — the site of the *Sultan's* disaster in 1889, and several islets. The population of the whole group, 31 Dec., 1895, was 172,537, exclusive of the British troops, who numbered 8,741. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants from families who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe, and usually speak Italian. There is a native order of nobility consisting of 29 families. The islands are highly cultivated. The chief products are cotton, corn, oranges, melons, grapes, cumin seed, and early potatoes for the London market; figs and honey are plentiful. It was estimated that in 1891 the area under cultivation in the three islands was about 37,896 tumuli. From 4,000 to 5,000 women and children, chiefly in Gozo, are employed in making lace. The principal occupation of the people is, however, in connection with the shipping. In 1895 there were 57,432 persons living in Valletta and the "Three Cities" on the other side of the harbour, and many persons from the neighbouring villages come in daily to work at the Port. The harbour is one of the finest in the world, with such a depth that the largest vessels can anchor alongside the very shore. It is a most important port of call for the many vessels passing to and from the East and Australasia by the Suez Canal, being just half-way between Gibraltar and Port Said. There is also an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet. Another graving dock was opened on Feb. 12, 1892; the island is strongly fortified, and has a garrison of 9,124 (including 383 Royal Marine Artillery), besides a Maltese regiment of militia 1,138 strong. The climate, although not actually tropical, is very hot in summer. In the two hottest months (July and August) the average daily range of temperature is from 71° to 87° F., with an occasional rise to 96° or fall to 65°. In winter the range is from 48° to 58°, with an occasional fall to 41° or rise to 64°. Citta Vecchia, the former capital of the island, is a handsome old town of 7,446 inhabitants, and contains the ancient palace of the courts of justice, the Cathedral, and the Seminary. It has, however, been entirely eclipsed in importance by the modern fortified capital of

Valletta, which was founded in 1566. Malta is well provided with an educational system. In addition to the university and lyceum at Valletta, it has 112 elementary schools, 2 secondary schools, and 24 night schools for boys, all maintained by Government at a cost of £20,675 in 1895.

In ancient times, Malta was occupied in succession by Phœnicians, Greeks, Carthaginians, Romans, and Byzantine Greeks, as each nation secured the command of the Mediterranean Sea. It attained to a high degree of commercial prosperity, being especially noted in Roman times for its textile fabrics. It is said to have been converted to Christianity on the occasion of St. Paul's shipwreck in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger, of Sicily. For the next 440 years it followed the fortunes of that kingdom; but in 1530 it was handed over to the Knights of St. John, who proceeded at once to make it a stronghold of Christianity against the Turks. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by the Grand Master La Vallette. The Knights freely expended their vast revenues in fortifying the island and carrying out many useful and magnificent works, until, in 1798, they were expelled by Napoleon. The Maltese, however, rose against the French garrison, and with some help from British and Neapolitan forces, compelled it, in 1800, to capitulate. They then ceded the islands to Great Britain, and the cession was confirmed by the Treaty of Paris in 1814. The government is administered by a Governor, who is usually a distinguished General, assisted by an Executive Council consisting of 10 members, and by a Legislative Council, called the Council of Government—6 official and 14 elected members. The Governor is President in both.

In 1895 the port of Valletta was entered by 3,939 vessels (tonnage, 3,512,427).

CAPITAL, Valletta. Population, 25,650 in 1891.

Amount of public revenue, 1895	£305,440

Malta is 2,280 miles by sea, and *vid* Naples about 1,995; transit, 4 days. Parcels, 1 lb. 8*d*., then 4*d*. per lb. to 11 lbs.—*vid* Italy, 3 lbs. 2*s*. 4*d*.; 11 lbs. 4*s*. 2*d*.; telegrams, per word, 6*d*.

GIBRALTAR,

a rocky promontory, 3 miles in length and ¾ of a mile in breadth, and 1,439 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779-83, when General Eliott, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. During the year 1895 no fewer than 4,627 vessels entered, with a tonnage of 4,562,252. The chief sources of revenue are the port dues, the rent of the crown estate in the town, and duties on wine, spirits, and beer. The estimated resident civilian population 31 Dec., 1895, was 21,387. The actual strength of the troops at that date was 5,665.

The Governor is in command of the garrison, and exercises all the functions both of government and legislation; there being no executive or legislative council. The currency is that of Spain. The accounts are kept in pesetas, which are approximately the same as francs.

Amount of public revenue, 1895	£61,928
Amount of expenditure, 1895	58,411
Imports from United Kingdom, 1895	518,885
Exports to United Kingdom, 1895	44,037

See also Boundary Treaties, &c., pp. 586–91.

A list of the Foreign Countries with which this Nation holds intercourse by means of Ambassadors or Consuls, giving the Name of the Sovereign or Ruler of each, with Statistics of the Area, Population, Products, and Commerce, and distinguishing the Amount of Trade with this Country, the Names of English Ambassadors, Ministers, and Consuls, with their Salaries and Allowances, and of the Foreign Ambassadors and Consuls resident in London.

To many Countries their distance from England is given and, to nearly all, the time occupied in transit, the rates of Parcel Post, and cost of Telegrams.

There is a uniform Postal Rate to all parts of the world, the initial charge for letters being 2½*d.* the half-ounce; newspapers and books ½*d.* for two ounces; patterns and samples ½*d.* the two ounces, but with a minimum charge of 1*d.*; and commercial papers the same, but with a minimum charge of 2½*d.*

Many of the following Statistics have been revised specially for the Almanack by direction of the various Governments. The Editor is also indebted to some English Residents at Foreign Courts, and to the British Consuls; he has also to thank several of the Foreign Ministers and Consuls in London for many particulars.

ABYSSINIA.

(*See also* p. 589).

Ruler (*Negus*), **Menelek of Shoa, *proclaimed* 12th March, 1889.**

A country of N. Africa (of interest to the British in connection with the Abyssinian war of 1867-8, conducted by the late Sir Robert Napier, who became Lord Napier of Magdala), situated on the highlands S.W. of the Red Sea, between 8° 20′—16° 20′ N. latitude and 25° 30′—40° 30′ E. longitude, containing the sources and upper portions of the Blue Nile and Atbara rivers. It is bounded on the North-East by the Red Sea, on the South-East by British Somaliland and the Indian Ocean, on the South and South-West by the British East Africa Protectorate, and on the North-West by Upper Egypt. Part of this territory is the Italian colony of Eritrea; the remainder, which is in the Italian "sphere of influence," is under the rule of the Negus. The area of the colony is about 50,000 square miles, with some 200,000 inhabitants, and of the whole sphere about 1,050,000 square miles, with a population estimated at about 3,000,000. An Italian protectorate was declared over the province of Tigre in 1895, but was met with opposition by the Negus; an armed occupation of the country was checked by a series of defeats on the Italian arms, culminating in the crushing disasters of Ambalagi on Dec. 7, 1895, and Adowa, on March 1, 1896. Peace with honour has been secured by the Italians, but the moral effect on European enterprise in Africa will probably even exceed the material effect on the colony of Eritrea, and it is supposed in some quarters that the Egyptian expedition of 1896 was, in a measure, undertaken to minimise this loss of prestige. Abyssinia consists of a series of plateaux, with an average elevation of 5,000 to 8,000 feet, from the surface of which rise mountain groups and ranges, the loftiest point attaining an altitude of 15,200 feet. The exports consist of ivory, gold-dust, musk, and coffee, and, now that peace has been declared between the country and Italy, Oct. 26, 1896, a reopening of trade may be expected through the Eritrean seaport of Massowah. The principal towns are Massowah, the seaport and capital of Eritrea (pop. about 8,000), and Gondar, Adowa, Aksum, and Ankober. There is a short line of railway from Massowah, which port is connected by telegraph with Saate and Perim.

Imports from United Kingdom, 1895..... £10,683

AFGHANISTAN. (*See* pp. 469 and 586.)

ALGERIA.

Gov.-Gen., **M. Jules Cambon, 11 May, 1891.**

Algeria, the most important French Colonial possession, was formerly inhabited by a nest of pirates, who infested the Mediterranean and made themselves a terror to merchants. As a punishment, the city of Algiers was bombarded in 1816 by Lord Exmouth, and piracy and Christian slavery were for ever suppressed in the Eastern States of Barbary. In 1830, in consequence of a dispute between their Consul and the Dey, the French besieged and took the city, and after much fighting conquered and annexed the country, which is now considered and treated as a province of France. It is in North Africa, between Morocco and Tunis, bordering for about 630 miles upon the Mediterranean, and stretching southward into the Sahara. There are three distinct zones, viz., the fertile Tell, or maritime region; a steppe region, with shotts or sebkhas (salt swamps); and the Sahara, with its oases, portions of which lie below the level of the sea. The area is 122,910 sq. miles, exclusive of the Sahara; the population (1893) 4,124,732, including 267,672 Frenchmen and 215,793 other Europeans. The country exports wheat and other cereals, wine, alfa or esparto grass, olive oil, fruits, vegetables, and tobacco. The mineral wealth is considerable, and iron, copper, quicksilver, zinc, and lead mines are being worked, while large deposits of phosphates have been discovered in the province of Constantine. The live-stock is numerous, and in 1896 included 255,408 camels, 645,460 horses, mules, and asses, and 11,437,120 sheep and goats. Algiers is much frequented as a winter health resort, the average mean temperature for 13 years being Jan. 54°; Feb. 55°; March 57°; April 61°; May 66°; June 71°; July 76°; Aug. 78°; Sept. 75°; Oct. 68°; Nov. 60°; Dec. 55° Fahr. There were (October, 1896) 2,925 miles of railway. The Revenue is not equal to the cost of administration if the army of occupation, which consists of 54,000 men and 15,000 horses, is included. Algiers has become an important coaling station, and in 1895, 1,367 vessels (mainly British) called at the port.

Total Revenue, 1895	£2,093,492

Consul-Gen., Don Alexr. Paz, Broad St. House, New Broad Street, E.C.
Consul, A. Lumb, Broad Street House, E.C.
Vice-Consul, Miguel R. Carneiro.
Consul at Liverpool, Francisco P. Hansen.
Do. Southampton, G. Burmeister.
Do. Cardiff, I. C. Belvis.
Do. Manchester, D. Francisco Leys.

The Republic is composed of 14 provinces and 9 territories, with a large seaboard on the east coast of South America. It is estimated to contain 1,212,000 square miles, with a population estimated at 4,200,000. By the treaty of 23rd July, 1881, with Chile, Terra del Fuego has been divided between these two Republics. The country was discovered in 1517, and settled by the Spaniards in 1535. The principal productions are wool, hides, linseed, sugar, maize, wheat, and tobacco. The other products are tallow, Paraguay tea, and excellent European and indigenous fruits. The mineral products are copper, silver, coal, and salt. The export of frozen sheep to Europe is becoming of great importance: there are at present 5 factories in working operation. The chief articles of export in the first half of the year 1894 were:—

Wool, 113,000	tons	£4,140,000
Meat, 46,000	,, ...	820,000
Wheat, 1,029,000	,, ...	4,320,000
Maize, 33,000	,, ...	
Hides, (2,194,000)	,, ...	1,180,000
Sundries,	,, ...	1,420,000
	Total	£12,280,000

The principal imports from the United Kingdom are machinery, hardware, and cotton, woollen, and linen goods. France is the largest customer; the total trade in 1892 was, with France £7,360,000; Belgium £4,280,000; Great Britain £11,100,000; Germany £5,440,000; and to other countries £11,000,000.

In 1893 there were 8,376 miles of railways in working order, connecting the principal cities of the Republic with the capital. Telegraphs, 19,600 miles, mostly government lines. Immigration is encouraged, the arrivals in 1889 reaching the unprecedented number of 218,744, mostly Italians, and in 1893 the total number of immigrants was 84,420: the language in ordinary use is Spanish. The first three sections of the Buenos Aires port works and the new port at the Ensenada have been opened for traffic.

The Argentine Republic is connected by cable with all the cities in the world. The Army consists of about 7,400 men, in addition to the National Guard of about 350,000. The military school has 150 cadets, and the school for non-commissioned officers, 120. Navy: 28 vessels, including 3 ironclads, and 4 torpedo launches. The naval school has 60 cadets, and the school of gunners, 80. Public instruction is much developed: there are 2 universities, 2 schools of engineering, 2 colleges of agriculture, 27 training colleges, and 3,227 public schools, with 254,608 pupils in 1888. The climate of the Argentine Republic is temperate and healthy.

The Republic has agreed to transmit yearly to Bank of England £1,565,000 for next five years, this sum to be apportioned among the bondholders, and in sixth year to pay the interest on the Argentine External Debt in full. At the present time no correct estimate can be formed of the country's exact position. The natural resources of Argentina are very great and eventually its difficulties should all pass away.

Public revenue in 1895 (estimated).....	£8,143,650
Public expenditure, 1895 ,, ...	7,086,511

Deputy Consul-General and Director of the Commercial Department of the Embassy, Baron E. de Ferstel.
Vice-Consul, Chevalier Walter de Princig.
Secretary, J. Kohn.
Office, 11 Queen Victoria Street, E.C.

The largest State, next to Russia, on the continent of Europe, situated between 42°—51° N. lat. and 9° 30′—26° 20′ E. long. It embraces an area of 261,649 English square miles, and a population (1895) of 44,448,474, viz.:—Austria proper, 115,914 sq. miles, population, 24,736,700; Hungary, 124,448 sq. miles, pop. (1890) 18,120,738; Bosnia and Herzegovina, 20,177 sq. miles, pop. 1,591,036. Among the population (41,359,204 without Bosnia and Herzegovina) there were in 1890 about 18,648,000 Slavs, 10,570,000 Germans, 7,435,000 Magyars, and 2,801,000 Roumanians. According to religion, there were (1890) nearly 32,312,000 Roman Catholics, 3,888,000 Protestants, 3,190,000 Greeks and Armenians, and 1,872,000 Jews. The Empire—the official denomination of which is now Oesterreichisch-Ungarische Monarchie (the Austro-Hungarian Monarchy)—is divided into the Austrian State and the Hungarian State, each having its own Parliament, Ministry, and Administration.

The lands of the Austrian Crown are—Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Carniola, Coast-Districts (Görz, Gradisca—Trieste, and Istria), the Tyrol and Vorarlberg, Bohemia, Moravia, Silesia, Galicia, Bukowina, and Dalmatia. The lands of the Hungarian Crown embrace Hungary proper, Transylvania, Fiume, Croatia, and Slavonia. The soil produces grain of all kinds, potatoes, beetroot, and wine. Austria ranks next to France, Italy, and Spain as a wine-growing country (Austria, 1895: 78,820,962 gallons, and 30,514,198 in Hungary, 1894); but from its inland position and other causes the wines are not so well known in this country as they deserve to be: 767,138 tons of beet-sugar were manufactured in 1895–96. Industry is almost wholly confined to the western half of the monarchy, and more especially to Vienna, Bohemia, Moravia, and Silesia. Styria is the great centre of the iron trade; Brünn is famed for its woollens, Reichenberg for woollens and cottons, Trautenau for linen, Bohemia for glass, and Vienna and Pilsen for lager beer. The mineral riches are very great, comprising gold, silver, copper, iron, quicksilver, lead, tin, zinc, and coal; petroleum is also found in Galicia.

The Empire possesses a powerful army, amounting, on the peace footing, to 377,018 men, with 14,657 officers; and the war establishment, including a Landsturm of 1,060,300 men, consists of 2,769,714 officers and men, with 2,192 field guns. Military service is compulsory on all. The navy consists of 133 vessels, of which 10 are line-of-battle ships, 3 ironclads, 13 torpedo vessels, and 63 torpedo boats. Pola is the great naval arsenal.

In the year 1895 the imports to Austria-Hungary amounted to £65,132,000; the exports from Austria-Hungary to £63,894,899 — precious metals imported £4,512,233, exported £2,021,478. The value of some of the principal articles exported from Austria-Hungary in 1895 is as follows:—Cereals, animals, and mill produce £13,057,597; sugar, £5,006,395; wood, coal, turf, £7,862,679; raw materials and manufactures of the textile industry, £6,201,994; metals, machines and vehicles, £2,521,765; chemicals, grease and oils, £2,536,673; divers other materials, £5,047,196; manufactures, £19,587,687. The share Hungary took in the trade of the Austro-Hungarian Monarchy during the year 1895 is as follows:—Imports to Hungary, raw material, £9,348,750; manufactured goods, £35,941,000. Exports from Hungary, raw materials, £26,084,083; manufactured goods, £15,983,583. Commerce is carried on principally with Germany, Italy, Roumania, and Russia, and through the ports of Trieste and Fiume, also direct with the transmarine world, including England. In 1894, 19,548 miles of railway were open for traffic. The commercial marine (Austria) consisted in 1895 of 1,693 vessels, burthen 165,550 tons, and Hungary 246 vessels, burthen 66,076 tons.

Duality extends to the annual budgets. Towards the common expenses Austria contributes to the extent of 68·6 per cent.; Hungary, to that of 31·4 per cent. These common expenses were estimated for 1895 at £13,617,000.

Each of the two countries has a separate Parliament and a separate Ministry.

Austria, Revenue, 1896 (estim.)	£55,500,516
„ Expenditure, 1896 (do.)	55,380,813
Debt, Common 5%, December, 1895	229,675,020
„ Austrian, „ 1895	119,601,444

HUNGARY.

King, Francis-Joseph, also Emperor of Austria, crowned 8th June, 1867.

MINISTRY FOR THE KINGDOM OF HUNGARY, 1895.

President, Baron Desiderius Banffy.
Ministre a latere, Baron Samuel Fosika.
Interior, M. Desiderius Perczel.
Finance, M. Ladislaus Lukács.
Instruction and Religion, M. Julius Wlassits.
Commerce, M. Ernest Daniel.
Agriculture, Ignatius Daranyi.
Justice, Alexander Erdelyi.
National Defence, Gen. Baron Geza Fejervary.
Minister for Croatia, Emerich Josipovich.

Although the term Austria-Hungary is occasionally used, Hungary itself as a State is seldom thought of. Austria alone is mentioned as covering the whole monarchy. Actually Hungary is an independent state, which has, in almost every sense, a separate and distinct existence. The Emperor of Austria is also separately crowned as King of Hungary. In 1896 there were festivities at Buda Pest to celebrate the millennium of the Hungarian State.

Hungary, with its dependent states, has an area of 322,310 sq. kilometres, about 124,448 sq. miles, that is, rather larger than the United Kingdom, with a population of 17,463,789 at the census of 1890: to this Fiume contributes 30,337, and Croatia and Slavonia 2,201,927. The country is divided into 72 counties, with 474 districts for those of Hungary. Hungarian is the official language, except in Croatia and Slavonia, where Croatian is spoken. Croatia and Slavonia are annexes of the Crown of Hungary, but both countries have an autonomy for home affairs, law and public instruction. At the head of the Croatian Government is the *Banus* Khuen Héderváry, who is responsible to both the Diet of Croatia and to the Hungarian Prime Minister. In all other matters are in common, the Croatian Diet sending 40 members to the Hungarian Parliament, while the Hungarian Ministry contains a Croatian member.

The Hungarian Parliament consists of 453 members, elected for five years; of these Croatia sends 40, but they are not entitled to vote on matters connected with Hungarian laws, education, and home affairs. There is also an Upper House, consisting of the *Barones regni*, prelates, such members of the magnate families who contribute more than 3,000 florins to the land tax, the *Banus*, and three members of Croatia sent by the Diet, and fifty members nominated by the Crown. Of the inhabitants there were about 8,000,000 native Magyars at the census of 1890, but a large portion of the other nationalities speak also that tongue. Those who do not are generally the uneducated, chiefly Roumanians in Transylvania, who are there nearly as numerous as the Hungarians, the Székelys, "the most excellent Hungarian race," and the Saxons of Transylvania. In addition to Buda Pest there are five cities each containing more than 50,000 inhabitants, and thirty-two with more than 20,000 each.

Hungary excels in its agriculture. All the great plains produce vast quantities of grain. In many parts, owing to the peculiar nature of the soil, wheat grows upon land that is seldom or never manured. The returns for 1894 (excluding Croatia and Slavonia) give 49,989,780 hectolitres of wheat, 19,201,969 of rye, 19,790,745 of barley, 24,874,024 of oats, and 27,120,801 of Indian corn. The cattle number 4,879,038, sheep 10,594,831, horses 1,748,859, and swine 4,803,639. Hungary is not a manufacturing country; its exports, therefore, are chiefly of cereals, live stock or of raw materials. Amongst them wheat figures for £2,988,000, barley £2,546,000, and wheaten flour £5,634,000. The imports are chiefly manufactured goods; textile fabrics alone were valued at £12,103,000 in 1891, at £13,114,000 in 1892, at £11,924,000 in 1893, and at £13,447,000 in 1894.

In mineral productions Hungary is one of the richest countries in the world. The chief products are gold, silver, copper, lead, quicksilver, antimony, iron, coal, "brown coal," sulphur. The mines, however, are not so well worked as they should be, and might be made a much greater source of income to the State and to individuals. Salt, which is a Government monopoly, produced £1,217,000 in 1893.

The chief articles (over 4 million florins) of import in the year 1894 (in thousand florins) were:—

Cotton stuffs	60,735	Wheat	7,17
Woollen cloth	44,869	Overleather	7,43
Wine in barrels	14,039	Ribbons	7,06
Silk fabrics	19,484	Men's clothes	8,33
Gold manufactures	4,376	Boots and shoes	7,97
Women's dress	12,944	Sawn wooden wares	7,14
Sugar, refined	10,105	Oxen	6,53
Coffee	9,259	Soling leather	4,91
Cotton yarn	7,812	Pictures on paper	6,26
Swine	6,441	Linen	6,87
Linen cloth	7,108	Books	4,55
Parts of machines	9,543	Wooden furniture	4,50

78¼ per cent. being manufactured articles.

Hungary manages its own money matters, the income and expenditure for 1894 being as follows:—

Income, 1894	£43,039,126
Expenditure, 1894	43,186,115

Showing a deficit of £146,989.

The National Debt of Hungary, 1894, was:—

I. 4 p. c. Gold Rentes	Fl.577,919,187
4 p. c. Hungarian Crown Gold Rentes	483,663,416
Other Gold Debts	205,771,743
Other debts, Paper and Silver	33,508,405
II. Debts, burdening single portfolios	33,508,405

(£176,232,189) = fl.2,114,785,912

To the common debt of Austria, Hungary pays the sum of £2,526,108 annually. As a set-off against its indebtedness the country possesses railways, mines, forests, and other national State property, valued at £219,013,985.

Consul at Dover, Sir Wm. H. Crundall.
Vice-Consul at Harwich, William Groom.

A Kingdom of Central Europe, anciently inabited by the Belgæ (a Celtic-speaking German ibe), and part of the *Gallia Belgica* of the omans. In 1815 the country was joined to the ingdom of the Netherlands, an arrangement hich was upset by the Revolution of 1830. On ct. 4, 1830, a National Congress proclaimed elgium independent, and on June 4, 1831, Prince opold of Saxe-Coburg was chosen hereditary ing.

Belgium has a frontier of 831 miles, and is ounded on the north and east by the Netherands (268 miles), on the south and west by rance (381 miles), on the east by Germany (60 miles), and the Grand Duchy of Luxemburg (80 miles), and has a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil.

Belgium has an area of 11,373 square miles, about equal to the four counties of Hertford, Lancashire, York, and Lincoln; its great harbour and commercial *entrepôt* is Antwerp, a strongly fortified city on the Scheldt. The other harbours are at Ostend, Nieuport, and Blankenberg.

The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 square miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Scheldt (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 63°, winter 37°).

The population was 6,841,950 in December, 1895. It is consequently one of the most densely peopled countries of the world. It is divided into nine provinces, namely, Antwerp, Brabant, Flanders (East and West), Hainaut, Liège, Limburg, Luxemburg, and Namur. BRUSSELS (452,158) is the capital. Other towns with over 100,000 inhabitants are Antwerp, the chief port (227,225 exclusive of suburbs), Ghent (153,740), and Liège (149,789).

The population increases decennially at the rate of about 10·39 per cent. From 1861 there has been an annual excess of immigrants over emigrants. In 1894 the totals were respectively, emigrants 18,302; immigrants 24,636. There are 1,004 females to every 1,000 males; and annually 29 births and 27 deaths to every 1,000 inhabitants.

French is the chief official language and that of the upper classes, but Flemish has also been adopted as an official language, and may now be used in criminal proceedings; it is spoken by the majority, and preponderates in Flanders and Brabant, including Antwerp; the study of it is making great progress. In 1880 45 per cent. spoke Flemish, 40 per cent. French, 8 per cent. both Flemish and French. Nearly all the inhabitants are at least nominally Roman Catholics, and in 1880 there existed 1,259 convents, inhabited by 4,027 monks and 20,645 nuns. Education can hardly be said to be in a satisfactory condition, for in 1880 32 out of every hundred inhabitants of 5 years of age and upwards were unable to read; and of the recruits levied in 1890, 11·48 per cent. were in a similar condition. There are four universities—Ghent (with 783 students), Liège (1,383), Brussels (1,692), and Louvain (1,800)—5,628 students in the academic year 1890-91, besides a famous Academy of Art at Antwerp, a Conservatoire of Music at Brussels, Ghent, and Liège, and numerous technical schools.

Belgium is essentially a manufacturing country, for although agriculture is carried on with much industry, like England it is largely dependent upon foreign supplies for its food. The soil is divided (1889) among 1,173,169 proprietors. Of the total area 58 per cent. is under cultivation, 13 per cent. consists of meadows and pastures, 17 per cent. of forest. The mineral kingdom yields coal (1893, 19,410,000 tons), iron, zinc, lead, and copper. The leading manufactures are fire-arms (Liège), machinery (Seraing), iron and steel, glass (Charleroy), woollens (Verviers), cottons and linen (Ghent), lace (Brussels, Mechlin, and Bruges), hosiery (Tournai), beet-sugar (Hainaut), paper,

beer. The exports, in addition to these manufactures, include also corn, butter, eggs, vegetables, coal, building-stones, hides, tallow, and rabbits. The exports of home produce in 1895 amounted to £55,417,562. France, Germany, and England take the lead in this foreign commerce. The exports to the United Kingdom in 1895 were valued at £17,515,636, the chief articles being :—

Butter	£123,375	Iron manufactures	£462,559
Cotton manufacts.	674,378	Linen yarn & mfs.	944,051
Eggs	713,464	Gold leaves	118,624
Clocks & watches	351,583	Silk and manufs.	1,939,801
Flax	849,856	Sugar	960,437
Glass	1,004,446	Wool	442,405
Gloves	425,246	Woollen manufs.	387,303
Hides	246,694	Do. yarn	1,165,340
Hops	81,673	Zinc	280,128

The imports of British produce and manufacture amounted to £11,934,653, and included—

Animals (horses)	£155,974	Leather & manufs.	£202,193
Coals, &c.	372,846	Manure	183,533
Cotton yarn & mfs.	1,440,406	Metals & hardware	450,962
Fish	191,296	Woollen yarn & mf.	1,582,040
Linen yarn & mfs.	217,206	Skins, &c.	33,870
Machinery	652,979		

The value of foreign and colonial goods exported to Belgium included cotton, £252,977; wool, £1,928,713; coffee, £182,831; jute, £93,259; and palm oil, £193,266. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1895) of 59 vessels (54 steamers), 87,213 tons, in addition to which there were 366 fishing boats. In 1893 there were 2,828 miles of railway (2,036 being the property of the state, with a gross revenue of about £1,785 per mile); the telegraphs had a length of 3,914 miles, and the post-office carried 356 millions of letters, post-cards, &c. The navigable rivers and canals have a length of 1,370 miles.

The Belgian constitution of 1831 jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 69 senators and 138 representatives are elected by the people, the former for 8, the latter for 4 years. Universal male suffrage, with plural voting up to 3 votes by property and educational qualifications, was introduced by the Electoral Law of 1894, and the united constituencies numbered about 1,300,000 voters, with 2,112,000 votes in 1896. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

The army, on a peace footing, numbers 43,323 men without officers with the colours (1890), while the total force upon paper appears to be 155,566. It is recruited by conscription, the term of service being thirteen years, of which from 28 months to four years are passed with the colours. Exemption can no longer be purchased. There is also a *Garde civique* of 43,647 men. Antwerp is the principal fortress. In 1888 the Chambers voted £480,000 for the construction of new forts on the Meuse: they are to be armed with guns placed in iron cupolas according to the designs of Gen. Brialmont, to whom the execution of these works was intrusted. Belgium has neither a navy nor colonies; but the King of the Belgians is at the same time "Sovereign" of the Congo Free State in Africa.

Consulate, 12 Fenchurch Street, E.C.

This and Paraguay are the only States of South America without a seaboard, Antofagasta, its former port, having been ceded to Chile in 1884. It was formerly comprised in the Spanish Vice-royalty of Colombia under the name of "Peru," and derives its present name from its great liberator, Simon Bolivar. It extends between lat. 8° and 23° S. and long. 57° 30′ and 73° W., and occupies an area of 472,000 square miles. Its population is estimated at about 2,300,000. In the war against Chile, 1879, it equipped an army of about 6,000 men. The mineral productions are very valuable: the silver mines of Potosi are believed to be almost inexhaustible, while gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes: copper, lead, tin, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, the choicest fruits, cinchona bark, medicinal herbs, &c., which are also its principal exports; its chief imports being iron, hardware, and silks.

Public revenue, 1894–5	£515,527

Consul in London, C. Dias Vieira, 6 Great Winchester Street.
Consul-General in Liverpool, J. C. de Pereira Pinto.

The Republic of the United States of Brazil was founded on the 15th of November, 1889, by a bloodless revolution which drove Dom Pedro from the throne. A provisional government was immediately formed, upon the model of that of the United States of America, under the presidency of Marshal Deodoro da Fonseca, and on February 24, 1891, a new Constitution was voted by the Constituent Assembly by which the President's term of office was fixed at four years. Everything went on much as usual; but the Church and the State were separated, civil marriages only made valid, and education secularised. A second revolution broke out in 1891 by which President Fonseca was unseated.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvarez Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, Guiana, and Venezuela; on the west by Ecuador, Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. This immense country extends between lat. 4° 22′ N. and 33° 45′ S. and long. 34° 40′ and 73° 15′ W., being 2,600 miles from north to south, and 2,500 from west to east; with a coast-line on the Atlantic of 3,700 miles. It comprises an area of 3,261,000 square miles, and contains a population of 16,300,000, the greater part of mixed blood. In 1871 there were 1,800,000 slaves, but in that year the work of emancipation was commenced; children were born free, but under certain regulations were compelled to serve with their mother until they reached the age of 21. On the 13th of May, 1888, a bill was passed for the immediate and unconditional manumission of all slaves, and now not one is to be found throughout the States. There are about 1,000,000 "wild" Indians, and other uncivilised tribes; 94,580 immigrants, mostly Italians and Portuguese, arrived at Rio in 1895. In 1895 the army consisted of 29,000 men, and the navy of 5 ironclads, 9 cruisers, 5 gunboats, 1 torpedo catcher, 12 despatch boats, and a few sailing vessels. Brazil contains 20 states, 16 of which lie along the coast, and 4 in the interior. There are 42 ports along the coast, of which the principal is Rio with a shore line of 123 miles. It is unequalled for the number and extent of its rivers: the Amazon, the largest, though not the longest, in the world, with its immediate tributaries; and the Tocantins, San Francisco, and others. The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. Its forests are immense, abounding in the greatest variety of useful and beautiful woods, adapted for dyeing, cabinet-work, or ship-building; among these are mahogany, logwood, rosewood, brazilwood, &c. In the extreme south towards the interior the land rises by gentle gradations to the height of from 2,000 to 5,000 feet above the level of the sea, and in those regions European fruits and grain are reared in abundance, while the intermediate valleys are found extremely favourable for the raising of sugar, coffee, cotton, cocoa, india-rubber, tobacco, and tropical products. Its agricultural produce is abundant; maize, beans, cassava-root, and nuts are very generally cultivated; also, in some parts, wheat and other European cereals. Cotton also is being largely cultivated for export. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. India-rubber comes from the more northern provinces, especially Pará; and coffee, though also grown in the north, comes chiefly from the central portions of the country, Rio de Janeiro, Minas, and Sao Paulo. Tobacco is grown largely, especially in Bahia. The exports consist solely of the raw produce of the soil, and owing to the vast extent of the country, and the consequent very different peculiarities of the soil and climate, their nature varies considerably. The imports consist of every description of manufactured articles, as the country possesses hardly any manufactories; all articles of clothing may be said to be imported. In the neighbourhood of Rio, however, there are 16 cotton-mills. The enormous protective duties were again increased in 1887, 1893, and 1896. In 1896 there were 8,140 miles of railway open, and 4,440 miles in course of construction. Length of telegraph wires in 1896 about 10,205 miles; number of post offices, 2,862.

Public Revenue, 1896 (estimate)	£13,798,933
Public Expenditure, 1896 ,,	14,314,009
(of which £2,200,000 for the Army, and £1,950,000 for the Navy).	
Total Imports, 1895 (estimate)	36,000,000
Total Exports, 1895 ,,	36,000,000
PUBLIC DEBT, Dec. 31st, 1895:—	
Foreign Debt	£36,998,800
Internal Funded Debt	45,757,338
Internal Floating Debt	2,957,267
Paper Currency	27,972,489
Western Minas Loan (taken over by Government)	3,710,000
Conversion of Bank deposits	28,618,870
Indemnities to Banks	916,666
Treasury Bills	271,543
Deduct Assets	£24,719,463
Total	121,584,020

The main hindrance to financial stability is the limit placed on the taxing powers of the Federal Government; a patriotic surrender to the Government at Rio of some of their privileges by the different States would enable the Minister for Finance to declare a surplus annually.

Number of foreign vessels entered and cleared at Rio in 1895—1,507 (2,243,103 tons), 202 being British.

Imports from United Kingdom, 1895	£7,643,739

BULGARIA.

Prince, H.R.H. Prince Ferdinand of Saxe-Coburg, *born* 26 Feb., 1861; *elected* 7 July, 1887; *m.*, 20 April, 1893, Princess Maria Louise de Bourbon, d. of Robert, Duke of Parma; *b.* 17 January, 1870; and has issue—*Heir Apparent*, Boris, Prince of Tirnovo, *b.* 30 January, 1894 (2nd son, Prince Cyril, *b.* 17 Nov., 1895).
Premier & Minister of Foreign Affairs, M. Stoiloff.
Minister of Finance, M. Gueshoff.
Minister of Interior, M. Beneff.
Minister of War, Col. Petroff.
Minister of Ways and Communic., M. Madjaroff.
Minister of Public Instruction, M. Velitchkoff.
Minister of Commerce (vacant).
Minister of Justice, M. Theodoroff.

The Principality of Bulgaria, with which is now incorporated Eastern Roumelia, is under the suzerainty of Turkey. It was created by the Treaty of Berlin, 13th of July, 1878, and was to have been governed by a Prince elected by the National Assembly or Sobranje, with a popular legislature and constitutional government. By modification of the Constitution 1893, there is now one Deputy to each 20,000 inhabitants. On 7th July, 1887, His Royal Highness Prince Ferdinand of Saxe-Coburg was nominated, and is now recognized by the six great Powers as ruler. United Bulgaria is bounded on the north by Roumania, on the west by Servia and Macedonia, east by the Black Sea, and on the south by the Turkish province of Adrianople, the Danube forming the northern boundary line. The union of Eastern Roumelia with Bulgaria was proclaimed on the 18th September, 1885. Bulgaria contains the five famous Turkish fortresses of Widdin, Rustchuk, Silistria, Schumla, and Varna. Including E. Roumelia, it has a regular army of 39,093 men on a peace footing, and of 302,400 men, with 96 guns, in time of war. There is a flotilla of 16 steamers on the Danube. The exports consist principally of grain, wool, skins, and timber; the imports of iron, coals, and manufactured goods. A railway, 139 miles in length, connects Rustchuk with Varna; there is another between Tirnovo-Seimen and Bourgas; and a third connects Sofia with Constantinople; there are 1,734 miles of telegraphs. Nationalities and religions of the inhabitants (estimated in 1893):—

Nationalities.		Religions.	
Bulgarians	2,504,736	Orthodox Greek	2,605,905
Turks	569,728	Mohammedan	643,942
Greeks	60,018	Roman Catholic	22,617
Gypsies	51,754	Protestants	2,384
Jews	27,531	Jews	28,307
Germans	3,620	Armenians	6,643
Russians	1,379	Unknown	718
Various	91,450		

Eastern Roumelia, or South Bulgaria, a creation of the Berlin Treaty of 1878, has an area of 13,862 square miles, and 992,386 inhabitants; it was intended to form an autonomous province, but since the successful revolution at Philippopolis, of September 18th, 1885, the former autonomous province of Eastern Roumelia has been incorporated with the principality, under the name of Southern Bulgaria, and the accomplished fact was recognised by the arrangement of April 5th, 1886, at Constantinople, whereby the Prince of Bulgaria was appointed at the same time Governor-General of Eastern Roumelia. Among the products of the country are wheat, wine, tobacco, silk, and attar of roses. The live-stock is very considerable.

The Province, under the name of South Bulgaria, now forms an integral portion of the Principality, with the same rulers, laws, and mode of administration. Its representatives (92) take their places in the General Assembly at Sofia along with those from the Northern Province.

Bulgaria and Roumelia have an area of 38,562 square miles, with 3,310,713 (1893) inhabitants.

CAMBODIA. (See p. 472.)

CENTRAL AMERICA,

originally comprising one State, known, while in the possession of the Spanish Crown, as the Kingdom of Guatemala, but now divided into five independent Republics, viz., Guatemala, Salvador, Honduras, Nicaragua (including, since the treaty of 28th January, 1860, the Mosquito Territory), and Costa Rica, besides the territory of Belize, or British Honduras, situate upon the east side of the peninsula of Yucatan. It comprises the southern part of the continent of North America; and the total area is calculated in round numbers at 175,867 square miles (inclusive of British Honduras, see p. 489), with a population of 3,053,000, about a quarter of whom are whites, Creoles of European parentage, the remainder Indians and Mestizoes of mixed descent. From the year 1525, when the country was conquered by Dom Pedro de Alvarado, one of the companions of Cortes, to 1821, it remained subject to Spain, but in September of that year it effected its independence. A federal government was established, which, after some years of civil war, was upset in 1839, and the five confederated States above named proclaimed their absolute independence of each other. It possesses mines of gold, silver, copper, zinc, as well as other valuable mineral produce, with various marbles and other stone; but the real wealth of the country consists in the vegetable productions—woods, cotton, coffee, sugar, cochineal, indigo, cocoa, sarsaparilla, tobacco, &c.

Imports from the United Kingdom, 1895	£1,379,570
Exports to the United Kingdom, 1895	976,014

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 18° 28′ and 56° 35′ S., and long. 66° 30′ and 75° 40′ W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 10,000 feet above the level of the sea; but numerous summits attain the height of 18,000 feet—the highest, Aconcagua, an extinct volcano, being 22,422 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and but few of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 21 provinces and 3 territories, the aggregate area of which is estimated at 290,741 square miles, with a population (Sept. 1889) of 2,665,926, exclusive of Araucanians, Bolivian and American Indians, numbering about 50,000. The census appears to have been unsatisfactory, and the population is believed to number about 3,000,000. The boundary with Argentina has been determined by a treaty concluded at Buenos Aires on July 23rd, 1881, and recently revised and confirmed. The population increases but slowly, and immigration, although to some extent encouraged, is inconsiderable. The number of tribal Indians is small. The Araucanians on the mainland voluntarily submitted to government in 1883, but several tribes on the islands and in the densely-wooded territory of Magellanes are still virtually independent. More has been done for education than in any other state of South America. Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, hops, Chile-pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish. The mineral wealth is considerable; some rich gold mines have been discovered. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper and silver; and the south, iron and coal. There are smelting-works for copper and silver, tanneries, corn and saw mills, starch, soap, biscuit, rope, cloth, cheese, furniture, candle, and paper factories, breweries and distilleries, and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and three lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 40 days. There are 1,801 miles of railway open, 8,346 miles of telegraph, 484 post offices, and 5,250 miles of telephone, the last worked by an English Company. Contracts have been entered into for 600 additional miles in order to extend the trunk line through Araucania, and open up some of the mineral districts in the north as far as Huasco and Vallenar. These lines will be all Government property. A Revolution broke out in January, 1891, between the Congressionalists and the Presidential party, terminating, on August 28th, in the capture of Valparaiso by the former. The commercial marine numbers 191 vessels (40 steamers) of 90,738 tons. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, and guano. The imports include silks, woollens and other textiles, food, and machinery. About 40 per cent. of the foreign trade is carried on with England. The regular army annually authorised by Congress consists of 5,000 men and 600 officers; the navy consists of about 12 large and 10 small ships of war. In 1896, at the request of the governments of Chile and Argentina, Queen Victoria consented to act as arbitrator in the boundary contentions of these two countries. During 1896 the paper dollar has averaged about 12*d.*

CHINA.

Reigning Emperor, Kuang Hsü (Tsai t'ien was the name of the Emperor before he succeeded to the throne; the Emperor of China on his accession always selects a new name or *Kwo Hao*, and Tsai t'ien was exchanged for Kuang *Hsü*), *born* 15 August, 1871: *suc.* 12 January, 1875; married 26th Feb., 1889.

Minister of Foreign Affairs, H.E. Li Hung Chang, G.C.V.O.

Inspector-General of Customs & Posts, Sir Robert Hart, Bart., G.C.M.G.

Envoy Extr. & Min. Plen. in London, H. E. Kung Tajèn, 49 Portland Place, W.

Councillor of Legation, Sir Halliday Macartney, K.C.M.G., 3 Harley Place, Regent's Park, W.

Secretaries, Kingcast Tsêng; Wang Sih-Kun.

Attachés, Ou Tsong-lëen; Kung Sing Chang.

China Proper (or the Eighteen Provinces) contains an area of 1,534,953 square miles, its length from north to south being 1,860 miles by 1,520 in breadth. It is bounded on the north by Mongolia and Manchuria; on the west by Turkestan, Tibet, and Burma; on the south by Burma, Tongking and the China Sea; and on the east by the Pacific Ocean, the Yellow Sea, and Corea. The northernmost part of this area is in lat. 44° 50′ N., and the southernmost point, Yulin Bay, in the Island of Hainan, in 18° 10′ N. On the east it extends to long. 126° 10′ E., on the W. to 97° 30′ E. But the possessions of China extend far beyond these limits, and include Manchuria, Mongolia, and Dzungaria in the north, and Eastern Turkestan and Tibet in the west. To the area of China Proper must be added those of her dependent territories, the whole extending to about 4,468,750 square miles, or rather more than one-twelfth part of the entire land surface of the globe. Within these limits are four great mountain ranges, whence proceed some of the largest rivers in the world, and these, with their tributaries, furnish an unrivalled internal water-communication. The Amur, 2,400 m. in length; the Brahmaputra, which runs more than 1,000 miles within the Empire; the Hoangho, or Yellow River, which in its course of about 2,800 miles drains nearly 715,000 square miles of territory; and the great River Yangtze, which drains an area of 950,000 square miles, is said to flow nearly 3,200 miles. The most extravagant estimates of the population of this empire have been made at various times; it is generally thought that the so-called census returns of Chinese officials are untrustworthy, and that the population does not exceed a total of over 300,000,000, a recent official Yellow Book giving the number of people as 303,241,969. The density of population in some parts is very great, but the statements regarding this require to be treated with caution. Of the 10,091 foreign residents in 1895, 4,084 were British, 1,325 Americans, 875 French, 882 Germans, and 805 Portuguese; and of the 603 foreign firms in China, 361 were British and 91 German.

To this should perhaps be added Manchuria, Mongolia, and Tibet, and some other dependencies more or less closely connected with the empire.

No trustworthy statements as to revenue and expenditure exist. In 1875 the revenue was supposed to have amounted to £25,837,500, about 100,000,000 taels, of which about 20,000,000 was from foreign custom (the import duties in 1893 amounted to £1,221,000), 15,000,000 from salt revenue, 15,000,000 from inland transit duties, 12,500,000 from land tax, 9,500,000 from opium, and 5,000,000 from inland custom, but there are great irregularities about the collection. The debt was inconsiderable until after the conclusion of the recent war with Japan which has left China burdened with the payment of a heavy indemnity involving large foreign loans. The navy consisted of 3 ironclads, 7 cruisers, and 35 ironclad gunboats, 9 torpedo vessels built in England and Germany, and about 100 other vessels, some of which were built in the arsenals of Shanghai and Foochow, but the entire northern squadron was destroyed or captured in the war, and only a few vessels of no fighting value now remain in the possession of China. The mercantile marine (1893) consisted of 133 steam and 54 sailing vessels, with a tonnage of 42,448. The army at its full strength would number about 1,200,000 men. The chief imports are opium, cotton and woollen stuffs, kerosene, ginseng, and rice, whilst tea, silk, and silk manufactures, camphor, and sugar constitute the bulk of the exports. Twenty-four "Treaty" ports are thrown open to foreign commerce, and the customs are managed by European officials. In 1895 the number of vessels entered and cleared at the treaty ports was 37,132, with a tonnage of 29,737,078; of these 19,579 were British (tonnage 20,525,793), and 2,684 were German (tonnage 2,442,185).

The total foreign trade of China in 1895 amounted to 323 millions of Haikwan taels (£53,250,000), which was shared by the nations of the world as under:—

Country.	Millions.	Country.	Millions.
Great Britain	44·5	U. S. A.	20·4
Hong Kong	142·9	Europe, except Russia	28·7
India	19·7	Russia	17·4
Singapore	4·4	Japan	32·0
Australasia	1·6	Macao	4·8
Mauritius	·2	Cochin China	1·9
Brit. America	1·7	Turkey in Asia	1·1
Great & Greater Brit.	215·0	Foreign Countries	105·3

The principal exports to this country from China in 1895 were tea (£1,248,507), silk (£639,422), and straw for plaiting purposes (£343,948); while the chief articles exported to China from the United Kingdom were cottons and cotton yarn (£3,742,694), woollens and worsteds (£387,819), machinery and mill work (£297,193), and metals (£279,100).

China is at length waking up to the necessity of railway communication, and although but 200 miles, from Tientsin to Shan-Hai-Kwan, are open, several other lines are authorised, and there are about 3,000 miles of telegraph. A war broke out in 1894 between China and Japan, owing to the attempt of the latter country to put an end to the unsettled state of affairs in Corea, over which country China claimed the suzerainty. Owing to the vigorous conduct of the war by Japan and the lack of organization in the Chinese forces, a speedy result was obtained, and the treaty of Shimonoseki signed on April 17, 1895. Corea was recognized as independent; the island of Formosa was ceded to, and a large indemnity (£35,000,000) exacted by, the victors. In addition to their personal advantages, Japan obtained the opening of three new treaty ports, Shashih, Soochow and Hangchow.

Gross customs revenue, 1895	£3,564,234
Total debt, 1896, about	40,000,000
Total imports, 1895	28,616,120

Peking, distant 11,770 miles; transit, 40 days. Parcels to Treaty Ports, 1 lb., 10*d.*, then 6*d.* per lb. to 11 lbs.; telegrams, 6*s.* 10*d.* to 7*s.* 6*d.* per word.

The following statements have been drawn up for the Almanack by a gentleman long resident in the country:—

The Navy.—With the Navy, as with the Army and Revenue, it is almost impossible to draw the line between what may be called the Imperial fleet and the numerous small fleets that belong to the viceroys of the maritime provinces, for each one can have what he likes; in fact, numerous officials—such as the Salt Commissioners—keep a few well-armed gun-boats to help them in the collection of duty on the articles over which they have a monopoly. The foreign customs also possess a number of cruisers, carrying foreign officers and engineers. What is usually looked upon as the navy proper is the fleet which cruises round Chefoo, Tientsin, and Port Arthur, which is under command of a Chinese admiral. To this may be added the southern fleet, usually cruising off Shanghai or Foochow.

Shipping.—Shanghai is almost the only port in China to which steamers from Europe and Japan run *regularly*; but in the tea season steamers go up the Yangtsze to Hankow, and occasionally call at other ports—as Foochow, Amoy, and Swatow. There is a big coast trade, which is carried on mostly by British steamers; but the number of German vessels is still very greatly on the increase. The Chinese own one line of steamers, called the "China Merchants' Steam Navigation Company." This company has about fifteen steamers running on the coast, and has also a number of fine paddle-wheel boats running on the Yangtsze river between Shanghai and Hankow. Above Hankow there are small British steamers running to Ichang.

Customs.—The Imperial Maritime Customs of China, usually called the Foreign Customs, contains about 700 Europeans, of all nationalities, British predominating. The head of the service is Sir Robert Hart, Bt., G.C.M.G., who is called the Inspector-General of Customs and Posts. This service collects the customs dues and duties on all goods imported or exported in any vessel other than a Chinese junk, from or into any treaty port. It also has charge of all lighthouses and lightships, harbours, buoys, beacons, &c., and keeps its own fleet of cruisers, officered by foreigners. The head of the service resides in Peking; but at each treaty port is a resident commissioner of customs, with a staff of clerks, tide waiters, &c. The Corean customs were formerly a branch of this service, also under Sir Robert Hart.

Railways.—A railway is now open from Tientsin to Shan Hai Kuan, the point on the coast where the Great Wall touches the sea (a distance of about 200 miles), and through trains run daily. The engineers, drivers, and a few others are Europeans, but the line is the property of the Chinese Government. The line from Tientsin to Pekin, the construction of which was authorized by an Imperial edict of April 24, 1896, has been commenced, and is expected to be open for traffic in 1897. The great supporter of this, and all other railways and improvements, is Li Hung-chang, who was for some time Commander-in-chief of the Chinese army in the war with Japan (1894), and a guest of the principal nations of Europe and the United States in 1896.

Education.—Education in China cannot be said to be advanced, although all but the very lowest classes can read more or less; but of the women not ten per cent. can either read or write. Higher education consists in acquiring a knowledge of the Chinese classics. They are as a nation entirely wrapt up in themselves, and know nothing of the affairs of the peoples of other nations, whom they speak of and consider to be "barbarians;" although according to treaty that word is not, as formerly, used in official documents and despatches. There are in Peking, Tientsin, and Canton schools at which a Chinaman may obtain a fairly good foreign education, but they are little attended, in fact I think only by persons who, being required for the diplomatic service, are sent there at the expense of the Chinese Government, and are paid a small salary while there. All these schools are under the direction of Sir Robert Hart, who appoints the professors. One of them, the School for Western Learning at Peking, is financed from the Customs, and a school of medicine at Tientsin has been lately established (with an Englishman at its head) by Li Hung-chang.

Consul-Gen., Ramon Goenaga, 5 Fenchurch St.
Vice-Consul, L. Schloss, 36 Mark Lane, E.C.
Consul in Liverpool, Don Juan V. Aycardi.
Consul at Southampton, Don Pablo Solano.

Formerly New Granada—a Republic with Constitution, 5 August, 1886—consisting of 9 Departments—Antioquia, Bolivar, Boyaca, Cauca, Cundinamarca, Magdalena, Panama, Santander, and Tolima—in the most N.W. part of South America, and includes the isthmus connecting the two continents, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40′ S. to 12° 25′ N. lat. and 68° to 83° W. long., comprising an area of 502,000 square miles, and possessing an estimated population (1895) of about 5,000,000, of whom more than one-half are whites and half-castes. It has been subjected to several revolutionary changes and civil wars. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the latter is by far the largest, consisting of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic. Its forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. Its mineral productions are gold (of which the output is estimated to exceed that of any of the Central American Republics), silver, platinum, copper, iron, lead, coal, and precious stones. Its principal agricultural products are coffee, cotton, plantains, and bananas, while in some parts tobacco, which was largely grown in years gone by, is again receiving attention; also wheat and other cereals. Its manufactures, for home consumption, consist of woollen and cotton stuffs. The plains yield large quantities of hides, and jerked beef is obtained from the cattle feeding there. The chief exports are coffee (11,215 tons in 1895, value £857,800), the precious metals, and india-rubber. All religions are tolerated. The standing army consists of about 10,000 men, and the navy of 3 small gunboats and one cruiser. Railroads are in their infancy, there being but 557 miles open in 1895, including the Panama line (47 miles), with about 6,500 (1894) miles of telegraph. The currency is paper, of which £2,571,863 was in circulation in 1895, the rate of exchange averaging $12 to the £.

Revenue, 1895	£1,348,300
Expenditure, 1895	1,571,783
Debt, foreign, 1895	1,913,500

Exports to United Kingdom, 1895	434,893

CAPITAL, Bogotá. Population, about 100,000.

British Vice-Consul & Chargé d'Affaires ad int., Montagu Villiers	£1,000
Honda—Vice-Con., John Gillies	18
Medellin—Vice-Consul, William Gordon	

Distant 6,200 miles; transit, 35 days. Parcels, 3 lbs. 2*s.* 6*d.*; 7 lbs. 4*s.* 5*d.*; 11 lbs. 6*s.*; telegrams, per word, Buenaventura, 5*p.*; all other places, 5*s.* 9*d.*

PANAMA,

one of the nine Departments of Colombia, occupying the isthmus which joins North to South America. The area is 31,890 square miles, the population (1893) about 280,000. Agriculture and cattle-breeding are the leading industries. There are 97 primary schools, at which 3,500 children attend; and 8 public and private colleges, with 500 pupils. The once famous pearl-fisheries in the Gulf of Panama yield now but little, but other beds are being worked near the Cheriqui Islands, the production being about 15 tons of shells monthly. Each ton produces about £15 worth of pearls. In 1890 tax was paid on 60 gold and 12 manganese mines, but only 11 gold and 1 manganese are being worked, and the bullion shipments have not been encouraging. The prosperity of the State depends very largely upon its favourable geographical position, which facilitates transit from the Atlantic to the Pacific. The distance from Limon Bay to Panama on the latter is only 35 miles, and the highest elevation of the watershed does not exceed 278 feet. A railway 47½ miles in length, fare first class, 20*s.*, joins the two oceans, and a ship-canal was commenced in 1879 by Ferdinand de Lesseps, the diggings being begun in 1881. In March, 1889, work ceased owing to lack of funds. Up to the date of the stoppage of work 48,400,000 cubic mètres of earth and rock had been removed, leaving a balance of 30,000,000 cubic mètres to be removed *for an eight lock canal*, as proposed. The total length of the proposed Canal is 46⅓ miles; depth, 30 feet; width at bottom, 72 feet, and at surface of water, 124 feet.

The following figures taken from the report presented to the president and judges of the Court of the Seine, on July 25, 1890, by the liquidator, M. Monchicourt, will show the greatness of the enterprise:—

Total expenses at Panama	£31,330,937
Total expenses in Paris	15,628,066
Purchase of Panama Railway shares	3,730,727
Payments to the Civil Society of obligations for the lottery scheme	1,290,587
Payment to the Colombian Government	98,203
Total	£52,078,520

A new company (Compagnie Nouvelle du Canal de Panama) has been formed in Paris with a capital of 65,000,000 fr., and work was commenced at Culebra on 1st Oct., 1894. In 1897 a technical commission will proceed to the Isthmus and report on the possibility of the completion of the work. A large amount will be spent upon the wharves at Christophe Colon (Atlantic) and La Boca (Pacific), the termini.

CONGO FREE STATE.

Sovereign, Leopold II., King of the Belgians.
Governor-General, Colonel Wahis.
Secretary of State, M. van Etvelde.

The Congo Free State has sprung out of the discoveries of Mr. Stanley, and the explorations

carried on subsequently by an International Association founded at Brussels under the presidency of the King of the Belgians in 1876. The new State was in the course of 1884 and 1885 recognized by the leading Powers of Europe, and by the United States, conditional upon its maintaining the principles of Free Trade, and of only levying such dues upon shipping, or otherwise, for which there shall be returned an equivalent in facilitating the operations of commerce. The territory of this State includes the right bank of the Congo to within a few miles below Shonzo; both banks of the river thence to Manyanga; the left bank only as far as the Equator, and thenceforth both banks. In the east it extends to Lake Tanganyika. The total area included within its limits amounts to 802,000 square miles, with a population of probably not over 8,000,000. The mighty Congo, with its numerous navigable tributaries, constitutes the leading feature of this so-called State. It is navigable for large vessels from its mouth at Banana to Matodi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls, which it has been proposed to avoid by a railroad 300 miles in length, the first section of which, from Matadi to Tumba, is now open for traffic. Above Leopoldville the river is navigable as far as the Stanley Falls, a distance of over 900 miles. The population of this vast territory consists of numerous negro tribes, of whom none have as yet attained a superior degree of civilization, whilst some still practise cannibalism. There are undoubtedly many fertile tracts, more especially along the rivers; but the barren mountain-land, which shuts out the coast from the more productive interior, necessitating as it does considerable expenses for the transportation of articles of commerce ill able to bear them, must always present a difficulty in developing the resources of the country. The railway has been surveyed up to the 214th kilometre, and completed up to the 160th kil., and one year's outlay up to June, 1895, was over 6,000,000 frs. The exports consist mainly of palm-kernels, palm-oil, ground-nuts, caoutchouc, copal, ivory, wax, sesam, dyewoods, copra, hides, and a few minor articles. The coffee plant, sugar-cane, and cotton grow wild, and tobacco has been planted with success. Gold, iron, lead, copper, and other minerals have been found. The King of the Belgians has endowed this State out of his private fortune to the extent of £40,000 annually.

Receipts, 1893	£280,108

COREA.

King, Li Hsi, acceded 1846.

Corea, the bone of contention in the war between Japan and China (1894–5), is an Asiatic Kingdom consisting mainly of a peninsula lying to the north-east of China, between 34° and 43° N. lat. and 125° and 130° E. long., and measuring some 600 miles from north to south, and 135 miles from east to west. The area is estimated at upwards of 80,000 square miles, with a population variously estimated between 6 and 18 millions, but reckoned according to the "last government census" at 10,528,937. Corea has only three neighbours, China, Japan, and Russia. It possesses several good natural harbours. Off its southern coast is the island of Port Hamilton, which was occupied by Great Britain in 1885, but subsequently evacuated, China at the time guaranteeing that it should not be occupied by any other power, and Russia undertaking not to occupy Corean territory under any circumstances whatsoever. The name Corea is derived through the Portuguese from *Ko-rai* (Chinese Kao-li), the title of the previous dynasty from 920–1392 A.D.; to the inhabitants themselves the country is known as Cho-sen. Buddhism grafted on spirit and ancestor worship may be said to be the religion of the country. There are a number of American and British and other Protestant missionaries in Corea; but their following is small compared with the converts of the Roman Catholic missionaries. The people are tall, robust and good-looking. They belong to the Mongolian stock, and their language is Turanian with the addition of many Chinese words. The people are idle and unprogressive, so that the commerce of the country is falling into the hands of the Japanese. The soil is very fertile, but only partially cultivated: rice, beans, and all kinds of grain are raised, as also tobacco, hemp, pea-cotton, &c.; ginseng, a medicinal root much affected by Chinese, is an important article of cultivation and revenue under Government monopoly. Gold, copper, coal, iron, and galena abound, and a concession was recently granted to an American syndicate to work the gold mines in the neighbourhood of Ping-Yang. Native manufactures are in a very primitive condition; the only article calling for special notice being an excellent quality of paper made from the bark of *Broussonetia papyrifera*. The country until the war of 1894-5 was considered to be subject to a rather indefinite suzerainty on the part of China, and was accustomed to send annual tribute missions to Peking; but by the Treaty of Shimonoseki Corea was declared independent of China. Owing to the total collapse of China, Japan was able to enforce all her demands and to possess herself of Corea and to regulate its internal administration. The political future of the country is quite uncertain. By recent Treaties of Commerce (that with Great Britain having been concluded in 1883), the capital, Sëoul, and the three ports of Chemulpo (Jen-chuan or Jinsen), Fusan, and Wonsan (Yuen-san or Gen-san) are open to foreign trade. The seaborne trade is almost wholly carried on in Japanese bottoms, the number of Japanese vessels cleared in 1895 being 1,230, with a tonnage of 163,999, being next approached by 67 British vessels, tonnage 108,756. In 1894 the trade of Chemulpo with Japan and China amounted to $3,088,012 and $1,894,820 respectively. The Customs administration was formerly under the management of Sir Robert Hart, the head of the Chinese Customs, and the Customs revenue, which amounted in 1891, the best year for trade, to £90,000, constitutes a large proportion of the cash revenues of the kingdom. Total exports, 1895, £396,715. Imports, £875,800.

CAPITAL, Sëoul or Söul. Population, 200,000.

Brit. Min., Maj.-Gen. Sir C. M. MacDonald (Peking).
Consul-General, John Newell Jordan £1,200
Chemulpo—Vice-Cons., W. H. Wilkinson (*acting*).

Sëoul is distant 11,560 miles; transit, 40 days; telegrams, 6*s.* 10*d.* and 7*s.* per word.

COSTA RICA, Republic of.

President, Rafael Iglesias, 8 May, 1894.
Minister of Foreign Affairs, Señor R. Pacheco.
Minister to England, Belgium, France, and Spain, Señor M. M. Peralta, 85 Alcolá, Madrid.

Consul-Gen. in London, John A. Le Lacheur, 58 Lombard Street, E.C.

The Republic of Costa Rica, the most southern State of Central America, extending across the Isthmus, between 8° 17′ and 11° 10′ N. lat. and from 82° 30′ to 85° 45′ W. long., contains an area of about 23,000 English square miles, and a population (1892) of 243,205. The chief exports are coffee (174 850 bags, £790,000 in 1895-96), sugar, caoutchouc, metals, sarsaparilla, dye-woods, hides, cedarwood, tortoise-shell, and fruits. In 1895-96, 1,633,067 bunches of bananas were exported, valued at £240,000. The chief ports are Punta-Arenas, on the Pacific, and Port Limon, on the Atlantic. The imports are dry goods, hardware, provisions, and machinery for drying and cleaning coffee from the United States, Germany, and England. A railway from Limon, on the Atlantic, to San José, the capital, 118 miles, and from thence to Alajuela, a further distance of 13 miles, is now open, and the chief imports and exports of the Republic are now made at Port Limon. There is a further line of railway, about 12 miles, from Punta-Arenas to Esparta on the Pacific, and a small line (4 miles) from Limon to Rio Banano. A project is now on foot to construct a line from Guasimo Station to Rio Frio, near the Lake of Nicaragua, passing through Sarapiqui and San Carlos. The line from Alajuela to Port Limon belongs to an English company styled "The Costa Rica Railway Company," and besides this a considerable amount of English capital is embarked in large tracts of lands, mines, markets, tramways, and other industries.

Public income (Budget), 1896 ..... £564,000
Public expenditure (Budget), 1896 537,918
Public debt, foreign (consolidated 1888) 2,000,000
Total imports, 1895, £770,292; exports, £1,037,680
Imports from U.K., 1895 £185,253: exports £269,083
$11·50 = £1.

Capital, San José. Population (1892), about 20,000.
British Minister, Audley Gosling (New Guatemala).

Consul—Hull, H. Pattinson.
Consul-General—Leith, W. O. Berry.
Consul—Liverpool, A. K. Carüe.
Ditto—Manchester, P. A. Paulsen.
Ditto—Belfast, A. M. Münster.

A Kingdom of Northern Europe, and the smallest of the Northern States, with a Constitution dated 28 July, 1866; consisting of the islands of Zeeland, Fünen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34′—57° 44′ N. lat. and 8° 5′—12° 40′ E. long.; its present contracted dimensions being the result of the Dano-German war of 1864, which stripped it of the Duchies of Schleswig-Holstein and Lauenburg. It comprises an area of 14,789 square miles, with a population in 1894 of (including Faroë Islands) 2,185,325, nearly one-half of whom live exclusively by agriculture, and one-fourth by manufactures and trade. The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, and colonial produce. Its chief exports are those of agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle, the latter principally to Great Britain. Denmark possesses an army of 50,522 men on the war footing; a navy consisting of 37 steam-vessels (including 4 ironclads), mounting 227 guns, with 1,270 officers and men; and a mercantile marine of 3,675 vessels, with a tonnage of 330,911. There are 1,318 miles of railway and 8,201 miles of telegraph. Copenhagen was declared a free port on 9th November, 1894.

Revenue, 1894-95 ..... £3,741,270

San Domingo, formerly the Spanish portion of the island of Hayti, is the oldest settlement of European origin in America, having been founded in 1494 by Bartolomeo Columbus. The capital city contains the Cathedral and Columbus's residence. It comprises an area of about 20,596 square miles, with an estimated population of 350,000. The chief products are tobacco, coffee, sugar, cocoa, mahogany, and a great variety of other furniture woods, wax, honey, log-wood, fustic, turtle-shell, hides, and divi-divi. Sugar, the most recent industry, is now the most important. The minerals are gold, copper, and iron. The Revenue in 1889-90 was estimated at £593,750. The internal debt, 1886, is stated to be £312,500, but there is in addition an unacknowledged debt of £714,300, contracted in London.

ECUADOR, REPUBLIC OF.

President, General Eloy Alfaro $12,000
Foreign Minister, (vacant).

Consul-General in London, Don Celso Nevares, 3 Copthall Buildings, E.C.

A State of South America, on its western side, being that portion of the original Republic of Colombia which lies on each side of the Equator, extending from lat. 1° 38′ N. to 6° 26′ S. (according to the Ecuadorian geography, but there are boundary disputes with Peru and Colombia), and between 70° and 81° W. long., comprising an area of 120,000 English sq. miles. It has a population of about 1,270,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The giant chain of the Andes here presents the Chimborazo, 21,525 feet, the Cotopaxi, 19,613 feet, the Antisana, 19,335 feet, Cayambe, 19,186 feet above the level of the sea, and others. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with and sulphur is found in many parts. The chief exports are—cocoa, caoutchouc, silver specie and gold, cinchona bark, Panama hats, coffee, and cattle. Ecuador is divided into 16 provinces and one territory. In 1891 there were 57 miles of railway open. An arrangement was recently made with the bondholders for the conversion of the Debt, but the Dictator, in 1895, suspended payment pending a further and less onerous arrangement; meanwhile a 10 per cent. surtax upon import dues is being collected and deposited in a Guayaquil bank. Guayaquil is the chief port: population, 1896, about 50,000. In 1890 the customs duties amounted to £460,162.

The population of the other chief towns is approximately as follows: Quito, 40,000; Cuenca, 25,000; Riobamba, 12,000; Ambato, Loja, and Latacunga, 10,000.

The GALAPAGOS ISLANDS (2,400 square miles) belong to Ecuador; only about 200 miles are susceptible of cultivation.

Public revenue, 1893 ..... $4,325,701
Public expenditure, 1893 4,433,459
Public debt, 1893 ..... £750,000
Internal debt, 1893 264,000
Total imports, 1893 ..... $2,975,718
Total exports, 1893 533,769
Total receipts from Custom House, 1893 3,509,484
Imports from United Kingdom, 1895 ... £266,634
Exports to United Kingdom, 1895 117,957

Average currency exchange, 1895, $10 to the £. The $ is a paper Sucre.

CAPITAL, Quito. Population, about 40,000.

EGYPT.

Khedive or *Reigning Sovereign*, Abbas Pasha, G.C.B., G.C.M.G., *b.* 14 July, 1874; *suc.* 7 Jan., 1892.
Heir Presumptive, Mohammed Ali Bey, younger brother of the Khedive.
President of Council and Minister of Interior, Mustapha Fehmy Pasha, K.C.M.G.
Adviser on Internal Affairs, J. L. Gorst.
Foreign Affairs, Boutros Pasha Ghaly.
Minister of Justice, Ibrahim Fuad Pasha.
War and Navy, Abani Pasha.

Minister of Public Works and Instruction, Fakhry Pasha.
Minister of Finance, Mazloum Pasha.
Financial Adviser to Khedive, Sir Elwin Palmer, K.C.M.G.
Sirdar of the Egyptian Army, Major-General Sir Herbert Horatio Kitchener Pasha, K.C.B., K.C.M.G., A.D.C.
Judicial Adviser to the Khedive, Sir John Scott, K.C.M.G.
Commanding British Troops, Major-General C. B. Knowles, C.B.
Director-Gen. of Customs, Alfred Caillard, C.M.G.

The position and condition of Egypt are unparalleled. Nominally a province of the Ottoman Empire, it is also autonomous and under the rule of the Khedive by Firmans of the Sultan in 1841, 1866, 1867, 1879, and 1892, subject to the annual payment of a tribute of £695,792. It is at the same time entirely dependent for its existence as a Sovereign State upon the will of stronger Powers, England at the present moment being dominant. The title of Khedive was given by Firman of 14 May, 1867, and is hereditary. In consequence of a military revolt, headed by Arabi Pasha, which the Khedive was powerless to subdue, England was most unwillingly compelled to intervene, and is now in occupation of Egypt, and for many years to come must continue to exercise a very powerful influence over the fortunes of the country. Whilst British troops were re-establishing the authority of the Khedive in Egypt, a revolution, headed by Mohammed Ahmed, who proclaimed himself a Mahdi, broke out in the Egyptian territories in the Soudan. The Egyptian troops having been beaten in the field, General Gordon volunteered to proceed to Khartoum to withdraw the garrisons. He fell dying nobly at his post before an English expedition, sent somewhat tardily to his relief, could reach him. Since then the whole of the upper valley of the Nile and the vast territories which had been brought under Egyptian rule, almost as far as the Equator, have been abandoned. In 1896, however, in consequence of the growth in the power of the Dervishes, a military expedition under the Sirdar started for the south; the province of Dongola has been recovered, and, according to the report of the late Col. Stewart, a net revenue of about £45,000 per annum should accrue therefrom to the Egyptian Treasury. This revenue is derived mainly from heavy taxation on irrigation works and from the produce of date palms, and, under honest administration, the other districts of Berber, Suakim, and Khartoum should not be (if recovered) much less remunerative. Besides this, the Italians have been permitted to regard Abyssinia as within their sphere of influence, and part of that country forms the colony of Eritrea (see p. 528). Nubia, Senaar, Kordofan, Darfur, and other districts acknowledge the sway of Khalifa Abdullah el Taashi, whom the Mahdi appointed his successor when he died. The whole of these former dependencies of Egypt have an estimated area of 760,000 square miles with 11,000,000 inhabitants. The population in 1882 was 6,806,381, including 90,886 European foreigners (37,301 Greeks, 18,665 Italians, 15,716 French, 8,022 Austrians, 6,118 English, &c.).

The cultivated portion of Egypt is confined to the country annually inundated by the Nile, or capable of being irrigated by canals. Its agricultural products consist of cotton, millet, maize, wheat, rice, melons, gourds, sugar, hemp, &c. It has no metals; but salt, petroleum, nitre, marble, red granite, Oriental alabaster, and limestone are found. The chief imports are cotton stuffs, coals, provisions, woollens, coffee, tobacco, indigo, hardware, timber, wine and spirits, and machinery. The exports consist mainly of cotton and cotton-seed (83 per cent.), beans, wheat, sugar, maize, rice, gums, hides, wool, barley, cigarettes, ivory, and ostrich-feathers. Of the entire trade over 55 per cent. is carried on with the United Kingdom, 9 per cent. with Turkey, 8 per cent. with France and Austria. There are 958 miles of railway open to traffic.

The British army of occupation, October, 1892, numbered about 3,500 men, which was increased in January, 1893, by two battalions. There is a local military and police force of about 16,000 men. One of the beneficial effects of the English occupation has been the abolition, in 1890, of the hateful *Corvée*, or forced labour system, except in cases of emergency, such as the guarding of the Nile banks during the floods. In the same year Sir Evelyn Baring (Lord Cromer) was able to announce the Conversion of the Privileged Debt, by which large economies to the Egyptian Treasury were effected.

Egypt being now the high road to India, England is compelled to take an active part in supporting the Khedive. In consequence of gross mismanagement and extravagance, the finances of the country had got into a thoroughly disorganized condition, almost hopeless. Strenuous efforts, however, have been made to bring the Revenue and Expenditure into a state of stable equilibrium, and at the present moment Egyptian Finance stands in a position of acknowledged security.

Public revenue, 1895	£E 10,567,872
Public expenditure, 1895	9,479,795

The Suez Canal.

The Suez Canal was opened in 1869, the English Government acquiring by purchase, 25 Nov., 1875, shares to the amount of £4,000,000 (the present value being £22,627,000). The total length of the canal is 99 miles, with a width of 327 feet for 77, and 196 for the remaining 22 miles; the depth is 26 feet throughout. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war.

Traffic Returns:—

	No. of Vessels.	Nett Tons.	% British.
1890	3,425	6,783,187	77
1893	3,341	7,659,068	75
1894	3,352	8,039,175	74
1895	3,434	8,443,383	71

The Receipts in 1893 were £2,826,692; in 1894, £2,951,072; and in 1895, £3,124,148.

FINLAND.

Grand Duke, The Emperor of Russia.
Governor-General, Count Heiden.
Secretary of State, General Daehn.

A Grand Duchy on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and finally annexed in 1808, but was, nevertheless, permitted to retain its ancient native institutions. The Finns call their country "Suomenmaa," that is, "Land of Fens," and very appropriately so, for Finland is a granite plateau, about 400 feet high, abounding in morasses and lakes. The hills nowhere attain a greater height than 4,000 feet, and that only in the extreme north: the coast, considered very beautiful, is much indented, and fringed with islands and reefs. Of the total area, 11½ per cent. is covered with lakes, 54 per cent. is woodland, and only about 10 per cent. is under cultivation, and the rest waste land or coarse pastures. The area is 144,254 square miles, with a population of nearly 2,500,000 in 1895, of whom about 2,100,000 are Finns, 350,000 Swedes, and 50,000 Russians; a few Laps lead a nomadic life in the north. Nearly all the inhabitants are Lutherans. Education is well cared for, and there is a flourishing university at Helsingfors, with about 2,000 students. Swedish is the language of the upper classes. The leading crops are rye, barley, oats, potatoes; but Finland does not produce sufficient cereals for home consumption, and large quantities are imported from Russia. Most of the land belongs to peasant proprietors. Thanks to the picturesque scenery, the abundance of fish and game, and the number of good routes by rail or steamer, the country is now becoming a favourite resort of tourists and sportsmen. The live stock, in addition to horses, cattle, sheep, pigs, and goats, includes also the reindeer in the extreme north. Iron, copper, lead, and graphite are found, but no salt. The iron industry is of importance, and spinning and weaving of cotton, flax, and wool, distilling, the making of matches, sugar-refining, shipbuilding, saw mills, and other branches of industry are carried on with success. The forests are a great source of wealth. Immense quantities of timber are prepared for export, and owing to improved means of communication, and the use of machinery, the wood which formerly took two or three years to reach the ships, is now frequently felled, prepared, and exported in one year. The exports include timber, butter, textile fabrics, paper, and iron. There are 1,631 miles of railway; and (1894) a marine of 1,900 vessels, of 259,025 tons.

Finland is a constitutional monarchy of a somewhat antiquated type. The Diet consists of four estates:—nobles, clergy, burgesses, and peasants, and is convoked triennially, and the country is chiefly governed by the Imperial Finnish Senate, comprised of 22 members. There are 9 battalions of Finnish Rifles, mustering 4,933 men, with a reserve of 30,000.

Public revenue, 1892 ..... £1,673,372
Public expenditure, 1892 1,686,020
Public debt, 1895, £2,600,000; decrease of about £500,000
Imports, 1894, £5,548,000; exports, 1894 5,440,000

FRANCE.

Pres. of the Republic, Félix Faure, *born* at Paris 31 January, 1841; elected 17 January, 1895 (in place of Jean Casimir-Périer, who resigned). Formerly a member of Chamber of Deputies and Minister of Marine £24,000
Premier and Minister of Agriculture, M. Méline.*
Minister of Finance, M. Georges Cochery.
Minister of Public Instruction, M. A. Rambaud.
Minister of Justice, M. Darlan.
Minister of War, General Billot.
Minister of Marine, Admiral Besnard.

* As a general rule modern French Ministries enjoy but a short term of office. In the years since the fall of the Empire there have been thirty-five Ministries:—

1870 M. Jules Favre.
1871 M. Dufaure.
1873 Duc de Broglie.
1874 General de Cissey.
1875 M. Buffet.
1876 M. Dufaure (2).
1876 M. Jules Simon.
1877 Duc de Broglie (2).
1877 Gen. de Rochebouet.
1877 M. Dufaure (3).
1879 M. Waddington.
1879 M. Chas. de Freycinet.
1880 M. Jules Ferry.
1881 M. Léon Gambetta.
1882 M. C. de Freycinet (2).
1882 M. Duclerc.
1883 M. Fallières.
1883 M. Jules Ferry (2).
1885 M. Brisson.
1886 M. C. de Freycinet (3).
1886 M. Goblet.
1887 M. Rouvier.
1887 M. Tirard.
1888 M. Charles Floquet.
1889 M. Tirard (2).
1890 M. C. de Freycinet (4).
1892 M. Loubet.
1892-3 M. Ribot (1 & 2).
1893 M. Dupuy.
1893 M. Casimir-Périer.
1894 M. Dupuy (2).
1895 M. Ribot (3).
1895 M. Bourgeois.
1896 M. Méline.

Consul-General, M. André Lequeux.
Consuls, M. Edouard Clavery; M. Gaussen.
Chancellier, M. Nettement.

The most westerly State of Central Europe, extending from 42° 20′ to 51° 5′ N. lat., and from 7° 45′ E. to 4° 45′ W. long., bounded on the north by the Channel and Straits of Dover, which separate it from England. Its circumference is estimated at about 3,000 miles, and its present area at 204,146 square miles. The territory lost in 1871 amounted to 5,602 square miles. France is divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The head of the Government is the President, elected septennially. The principal rivers are the Seine, Loire, Garonne, and Rhône; the principal forests, Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The vine is cultivated to a very great extent, as the wines of Bordeaux, Burgundy, Champagne, &c., evidence (1894, 859,161,798 gal.). The chief agricultural products are wheat,* barley, rye, maize, oats, potatoes, beetroot for the manufacture of sugar, hops, &c. Its mineral resources are comparatively small. They include, however, coal (1894, 27,006,090 French tons), pig iron (1894, 2,077,647 French tons), copper, lead, silver, antimony, and salt. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper-making, woollens, carpets, linen, silk, and lace. Its oyster fisheries are an important industrial feature. The increase of population is very slow, as will be seen from the following table:

Year.	Population.	Year.	Population.
1700	19,660,320	1881	37,672,048
1801	27,349,003	1886	38,218,903
1821	30,461,873	1891	38,095,150
1846	36,039,364	1896	38,228,969
1871	36,102,921		

France has always been attractive to foreigners, of whom 1,130,211 are now resident there, the department of the Seine alone containing 219,003, of whom 14,970 are English, 8,276 being women; and 4,854 Americans, 2,607 being women. There are about 408,000 Frenchmen in the Colonies and in various parts of the world, and a colonial population of (according to the estimates of the French Ministry of Marine) 26,968,949; but with French protectorates 77,139,000, including France. Even the comparatively small increase of the population now shown was (as it, in fact, still is) largely due to immigration from other countries. The annual number of births has been steadily decreasing, whilst, at the same time, that of deaths has been more or less on the increase, viz.:—

	Births.	Deaths.		Births.	Deaths.
1834	937,758	—	1893	874,000	867,000
1889	880,579	794,933	1894	855,000	815,000
1890	838,019	876,000			

In 1881 there were 650,000 Protestants and about 85,000 Jews, 40,000 of whom reside in Paris.

The effective strength of the Army under the colours in 1895 was 524,509, with a gendarmerie of about 25,920 men. On a war footing the army numbers fully 2,000,000 men, with 138,301 horses and 3,000 guns. The Navy consisted in 1896 of 29 battleships (6 *building*), 9 armoured cruisers (1 *building*), 23 protected cruisers (14 *building*), 20 unprotected cruisers, 14 coast defence, 13 torpedo vessels (3 *building*), 211 torpedo boats (9 *building*), and 1 special vessel, with 2,084 officers and 43,451 men. The educational system is governmental, and presided over by a Minister of Instruction, part of the expense being defrayed by the State. In addition to the faculties of Theology, Law, and Medicine, the Lycées, the Colleges, the Naval and Military Schools, and the Ecole Polytechnique, the State supports numerous establishments for instruction in special branches of knowledge. The system of railways in France is very extensive; they are almost entirely *concédés*, and become State property after the expiration of the concession. The average length open for traffic in 1894 was 22,036 miles, the total receipts for 1894 from passenger and goods traffic, &c., being £47,149,956. The length of telegraphs is 73,550 miles. There is a mercantile marine of 15,278 vessels, of 905,606 tons.

The imports consist largely of food and raw materials; the exports of manufactured goods. The most important among the former are cereals and flour, wine (the imports of which exceed the exports), wool, raw silk, timber, hides and skins, cotton, coal, live animals, cotton yarns and manufactures. The exports rank thus:—woollens, wines, silks, hides and skins, raw silk, leather wares, haberdashery, &c., cheese and butter. Of the total trade 20 per cent. is with the United Kingdom, 12 per cent. with Belgium, 9 per cent. with Germany, 7½ per cent. with the United States, and 7 per cent. with Italy.

The chief articles exported to the United Kingdom in 1895 were:—

Brandy	£1,139,884	Fruit	£650,547
Butter	2,443,734	Gloves	779,755
Clocks and Watches	772,595	Lace	681,857
Corn, all kinds	574,536	Leather & Hides	1,067,179
Cotton Manufacts.	472,728	Silk, all kinds	11,937,145
Eggs	1,009,580	Skins and Fur	403,607
Fish, £368,060; Poultry and Rabbits	378,614	Sugar	1,736,041
Flowers, Artificial, and Feathers	699,060	Wines	2,887,409
		Wool	1,060,369
		Woollen Manftrs.	6,373,340

The chief articles imported from the United Kingdom in 1895 were:—

Coals, &c.	£2,576,210	Machinery	£1,165,933
Cotton Yarn	454,191	Metals & Hardware	994,689
Cotton Manftrs.	636,069	Silk and Manftrs.	372,750
Linen and Manftrs.	326,458	Woollen Manf., &c.	1,814,020
Leather and Hides	420,299	Yarn, Alpaca, &c.	430,800

* France is the largest wheat-growing country in the world, the average crop for the last three years amounting to 378,769,000 bushels (and for 1894, 333,967,675), whilst that of Russia only amounts to 201,280,000 bushels.

The National Debt is stupendous, the nominal capital of the Funded Debt amounting in 1894 to £1,241,410,101 (the total of the Floating Debt being £51,653,672), the heaviest debt ever yet incurred by any nation in the world.

The Interest on the Funded Debt paid in 1893 was as follows:—

Perpetual 3 per Cents.	£12,221,611
Perpetual 4½ per Cents. (now 3 p.c.)	18,257,163
Redeemable 3 per Cents.	4,813,481
Total	£35,292,255

Revenue, 1895	£136,965,970
Total Expenditure, Budget 1895 (including Military £25,080,000 and Naval 10,369,589)	£
Total value of imports, 1895	148,725,000
Total value of exports, 1895	134,480,000
Imports from United Kingdom, 1894	20,120,880
Exports to United Kingdom, 1894	38,407,840

CAPITAL, Paris. Population (1896), 2,511,955.

DEPENDENCIES.—The following extract from the *Times* of Oct. 20, 1896, shows the growth of French possessions, 1884-1896:—

	1884.	1896.
In Africa	600,000	3,100,000
In Asia	56,000	282,000
In Oceania	9,000	9,000
Total	665,000	3,391,000

It will thus be seen that her Colonial Empire has increased by 2,726,000 square miles, or to nearly four times its original extent. The province of ALGERIA in North Africa (*see* p. 528) is in several respects looked upon as an integral part of France, whilst TUNIS (*see* p. 575) is a French "Protectorate." On the SENEGAL great efforts have been made to found an African Empire. The road to the Niger has been secured by forts, a treaty of commerce and amity has been concluded with the Sultan of Sego, and a steamer has actually been launched upon the Niger. A railway, connecting the Senegal with that river, is being constructed. Senegal, and the Basin of the Casamance, and the rivers to the south, have an area of about 20,000 sq. miles and a population of about 1,000,000 inhabitants. The SOUDAN, with Fouta Djallon (about 5,000 sq. miles and 600,000 inhabitants) and the basins of the upper Senegal and the middle Niger, have a total area of about 440,000 sq. miles and a population of about 3,500,000. On the Ivory Coast France maintains the trading posts of AXIM and GRAND BASSAM with the KROO country and the basins of the San Pedro and Rio Fresco; and farther east, on the Slave Coast, she has secured a protectorate over KOTONOO (and Porto Novo and GRAND POPO. The French arms have been successful in a contest with the King of DAHOMEY, whose territory may now be considered French. The territory of the GABOON, Ogowe, and Congo as defined at the Berlin Congress, embraces 174,340 square miles, with about 1,700,000 inhabitants. In Eastern Africa France possesses the Island of RÉUNION, which has a trade of about £1,570,000 (764 sq. miles, pop. 165,915); the COMORO Islands (760 sq. miles, pop. 64,000), and the islands of MAYOTTE, Nossi Bé, Diego

Digitized by Google

Suarez, and Ste. Marie off the coast of MADAGASCAR (*see* p. 558), which large island has been lately conquered and is now a colony (1896). Farther in the north France has occupied OBOK, and the whole Gulf of TAJURA opposite Aden. Altogether the African possessions and Protectorates of France extend over 3,000,000 square miles, with about 12,000,000 inhabitants.

In Asia there remain to her PONDICHERRY, CHANDERNAGORE, and a few others of her once-important possessions in India, having together an area of 196 square miles, and a population of 283,053. In Farther India France has firmly established her rule in COCHIN CHINA (*see* p. 472), has forced her protectorate upon CAMBODIA (32,380 sq. miles, pop. 1,500,000) in 1857 (*see* p. 472), and upon the old Empire of Annam in 1884, the northern portion of which is known as TONGKING, and has been absolutely surrendered (*see* p. 565). These recent acquisitions give French Asia about 282,000 square miles, with 18,500,000 inhabitants.

In America France possesses in the small islets of ST. PIERRE and Miquelon (90 sq. miles, pop. 6,629) an excellent basis for her Newfoundland fisheries; in MARTINIQUE and Guadaloupe (1,103 sq. miles, pop. 341,017)—two of the most fertile West India islands—also the small island of ST. BARTHOLOMEW, with a portion of St. Martin, LA Desirade, Marie Galante, and Miquelon Langlade, and in CAYENNE or French Guiana (46,880 sq. miles, pop. 25,796) a wide territory in South America.

In the Pacific Ocean the French colonies consist of two groups—NEW CALEDONIA, with the LOYALTY ISLANDS, in the west (7,654 sq. miles, pop. 62,753, with a total trade of £601,272); and TAHITI, or the Society Islands (whence fibre is exported), with the Marquesas, the Low Archipelago or Tuamotu, and the Austral Isles or Tubuai (1,412 sq. miles, pop. 25,745), in the east. Also Fortuna and the Kerguelen Islands (180 sq. miles). Uver, or Wallis (37 square miles, pop. 4,000), to the N.E. of Fiji, was annexed in 1886. Clipperton, in the Northern Pacific, is merely an uninhabited islet of 2 square miles. By a convention between Great Britain and France of 24 Oct., 1887, it was agreed that the protection of persons and property in the NEW HEBRIDES (5,106 sq. miles, pop. 70,000) should be secured by means of a mixed Commission composed of naval officers belonging to the English and French naval stations in the Pacific.

The total area of French colonies, dependencies, and protectorates amounts thus to about 3,391,000 square miles, with a population of about 31,000,000; and it is worthy of note that within all these territories the number of Frenchmen does not probably exceed half a million. Algeria and Tunis are, however, excepted. The trade of the French Colonies (excepting the returns for Algeria and Tunis, which more than double these figures) in 1895 amounted to £8,760,000 for imports (of which £3,800,000 came from the home country), and £10,080,000 for exports, of which £4,720,000 went to France.

Exports from Colonies to U. K., 1894 ... £918,975
Imports to Colonies from U. K., 1894 ... £e88,739

THE GERMAN EMPIRE.

Emperor, William II. (King of Prussia), son of the Emperor Frederick and the Empress Victoria, Princess Royal of Great Britain. *Born* 27th January, 1859; *succeeded* his father 15th June, 1888; *married* 27th February, 1881, Princess Augusta Victoria of Schleswig-Holstein, *born* 22nd October, 1858 (*issue*, 6 sons and a daughter).
Heir Apparent, Crown Prince William, *born* 6 May, 1882.
Imperial Chancellor and Prussian Premier, Prince Clovis von Hohenlohe-Schillingsfürst.
Sec. of State For. Affairs, Baron Marschall von Bieberstein.
Sec. of State, Interior, Dr. von Boetticher.
Sec. of State, Navy, Vice-Admiral Hollmann.
Sec. of State, Justice, Herr Nieberding.
Sec. of State, Finance, Graf von Posadowsky-Wehner.
Sec. of State, Posts, Dr. von Stephan.

Ambassador in London, Graf von Hatzfeldt-Wildenburg, 9 Carlton House Terrace, S.W.
Councillor of Embassy, Prince Hans of Hohenlohe-Oehringen.
2nd Secretary, Ruecker Jenisch.
3rd ditto, Count H. Hatzfeldt.
Attachés, Baron Eckhardtstein; Baron W. Mirbach; Herr von Oppell.
Military and Naval Attaché, Capt. E. Guelich.
Consul-Gen., P. L. W. Jordan, 49 Finsbury Square.
Vice-Consul, Herr Lange.
Councillor and Director of the Chancery of the Embassy, William Adolph Schmettau.
Chancellers, F. R. Moebius, F. Spies, F. Fischer.

The Empire, according to the Constitution of 16th April, 1871, is confederate, under the presidentship of the King of Prussia, who bears the hereditary title of German Emperor. He has the right and the duty of representing the Empire for all purposes of international law, of declaring war, making peace and treaties, &c. He is the commander-in-chief of the whole army and navy in peace as well as in war, except the military forces of Saxony, Bavaria and Würtemberg, which form—but in *peace* time only—separate corps under the command of their respective kings. He names and dismisses the officers and functionaries of the Empire. His edicts, made in the name of the Empire, must be countersigned by the Chancellor, who, as the First Minister of the Empire, is by his signature responsible for them. The third factor of Government is the *Bundesrath*, formed of delegates of the confederated governments, and the *Reichstag*, or legislative parliament, consisting of one deputy to about every hundred thousand inhabitants of the Empire.

The departments especially belonging to the legislation, administration, or control of the Empire and its government are—all matters connected with the navy, post, and telegraphy, passports, emigration, colonization, political laws of the citizens, the whole civil law, coinage, banking, commerce, navigation, the railways, &c. The bills promulgated by the *Bundesrath* and the *Reichstag* in accordance, and sanctioned by the Emperor, are compulsory on all Governments of the Empire, and annul *eo ipso* all possible regulations contradictory to them in the different States.

This large Empire of Central Europe, situate in lat. 47° 18′—55° 52′ N. and long. 5° 50′—22° 50′ E., comprises the following 25 States, and a Reichsland (*see* p. 550):—

25. Hamburg	160	681,632	9·5
26. Alsace-Lorraine	5,668	1,641,220	2·4
Total German Empire	211,168	52,246,589	5·7

According to religious confessions there were (1890) 31,026,810 Protestants (62·8 per cent.), 17,671,929 Catholics (35·8 per cent.), 567,884 Jews (1·1 per cent.).

German is spoken by the bulk of the inhabitants, but there reside within the limits of the Empire over 3,240,000 persons of other nationalities, viz. 2,922,411 Poles and 121,345 Lithuanians in the eastern parts of Prussia; 117,883 Wends in Lusatia, 50,000 Czechians on the Bohemian frontier, 140,000 Danes in Schleswig, and 280,000 Wallones and French to the west of the Rhine. On the other hand, about 13,500,000 Germans live in Austria-Hungary, Switzerland, and Russia.

Since the close of the great European War there has been a large emigration of Germans to every part of the world; it has been computed that seven millions are resident in the United States. There are German Colonies in all the South American States, Jamaica, Australia, and South Africa; this will to some extent account for the great extension of German commerce.

There are in Germany 26 towns of over 100,000 inhabitants — viz., Berlin (1,677,135), Munich (350,594), Breslau (355,186), Hamburg (568,666), Leipzig (385,308), Cologne (281,681), Dresden (322,953), Magdeburg (202,234), Frankfort-on-the-Main (180,130), Hanover (174,455), Königsberg (161,666), Düsseldorf (144,662), Altona (143,249), Nuremberg (142,590), Stuttgart (139,817), Chemnitz (138,954), Elberfeld (125,899), Bremen (125,684), Strassburg (123,500), Dantzig (120,338), Barmen (116,144), Stettin (116,228), Crefeld (105,376), Aix la Chapelle (103,470), Halle (101,401), Brunswick (101,047).

Emigration.—Between 1871-91 1,992,188 Germans emigrated, of whom 1,896,963 went to the United States. In 1881 the number of emigrants reached the exceptional figure of 210,547; in 1886 it had sunk down to 79,875; in 1887 it rose to 99,712; sunk in 1890 to 91,925, reaching 115,362 in 1891, falling in 1892 to 112,208, in 1893 to 84,458, in 1894 to 40,964, and in 1895 to 37,498.

Education.—There are (1895) 21 universities in the Empire, with 2,430 professors and teachers, attended by about 31,556 matriculated students. Education is general and compulsory.

Germany is becoming more and more a manufacturing country. In 1882, 43 per cent. of the population were supported by agriculture, 36 per cent. by mining and industries, 10 per cent. by commerce and transportation. Of the total area in 1883 48·7 per cent. are cultivated, 20·3 per cent. consist of meadows and pastures, 25·7 per cent. are covered with forest. The agricultural produce no longer suffices to support the population. The produce of the mines was valued in 1888 at £24,735,350, in 1889 at £27,790,000, and in 1894 at £33,757,550, and included 76,741,100 tons of coal, 22,064,600 tons of lignite, 12,392,100 tons of iron ore, 2,378,500 tons of mineral salts, besides copper, lead, zinc, &c. The Lower Rhine (Crefeld, Elberfeld-Barmen), Alsace (Mülhausen), Saxony (Chemnitz), Westphalia, and Silesia are the great centres of the textile industries.

The chief articles of export to the United Kingdom in the year 1895 were the following:—

Butter	£565,003	Hides & leather	£708,570
Caoutchouc	266,887	Iron mfs.	510,662
China, &c.	216,976	Musical instruments	563,018
Chemical manufs.	852,926	Oil seed cake	180,090
Coffee (Raw)	120,350	Paper & pasteb'rd.	586,835
Corn of all kinds	971,551	Seeds of all kinds	377,905
Cotton mfs. & yarn	824,191	Sugar	9,323,370
Eggs	916,521	Wine, spirits, and beer	155,080
Farinaceous substances	277,980	Wood & timber	985,031
Flax & hemp	296,148	Wool & manufacts.	1,676,070
Glass	742,210	Zinc	414,752

During the same period the chief articles of import from the United Kingdom were:—

Apparel	£116,094	Leather	£323,521
Bags and sacks, empty	46,963	Linen (yarn, &c.)	531,818
Caoutchouc manufs.	151,967	Machinery	1,602,831
Chemical products	248,973	Manure	329,576
Coal, &c.	1,940,092	Oil, seed, &c.	369,288
Cotton yarn	1,979,511	Stationery other than paper	75,970
Cotton manufacts.	1,305,202	Stones	121,479
Hardware	100,381	Wool & yarn	4,050,490
Herrings	1,092,676	Woollen manufs.	1,027,921
Iron, &c.	1,113,966	Yarn, Alpaca, &c.	1,019,850

The mercantile marine in 1895 consisted of 3,665 vessels, with a tonnage of 1,553,902, manned by 40,984 men; of these 1,043 were steamers, with a tonnage of 893,046.

The total length of the railways in the Empire on 1st May, 1894, extended to 45,078 kilometers, of which 90 per cent. belong to the State. At the end of 1894 the length of telegraph lines was 127,240 kilometers, the number of telegraph offices being 19,896, and 56,687,915 telegrams being sent and received. In 1894 there were 30,063 post-offices, with 166,993 employés, and 2,157,593,000 letters, &c., were conveyed.

The National Debt, 1895, is £110,061,890. The funds created from the French war indemnity for building the Reichstag, and for invalids and war purposes, amounted (31 March, 1893), to about £22,609,366.

The strength of the German Army on the peace footing amounted in the year 1895 to 584,734, including the Bavarian Army, and is made up of —22,618 officers, 77,981 non-commissioned officers, 479,229 privates, 2,072 doctors, 1,102 paymasters, &c., 579 veterinary surgeons, 1,060 armourers.

Digitized by Google

93 saddlers, with 97,280 horses, and 1,914 guns, The numbers of the army on the war footing cannot be so definitely determined, but the field army has 744,031 men and 19,391 officers, 242,415 horses and 2,040 guns; the dépôt troops, "*Ersatztruppen*," number 296,614 men, 4,796 officers, with 31,373 horses and 444 guns; the garrison troops, "*Besatzungstruppen*," with 416,032 men, 11,240 officers, 38,943 horses, and 324 guns. The "*Landsturm*," a last reserve, is not included in the above, but it is not organized in time of peace. Service in the army is compulsory, and Germany is prepared to place more than 3,350,000 men in the field fully armed in time of war. In October, 1892, a new army bill was presented to the Reichstag by which 4,400,000 men will be available in 1916.

The IMPERIAL NAVY in 1896 consisted of 21 battleships (3 *building*), 1 armoured cruiser (*building*), 7 protected cruisers (6 *building*), 22 unprotected cruisers, 11 coast defence, 5 torpedo vessels, 105 torpedo boats (9 *building*), and 1 special service, with 511 guns, including 33 ironclads, mounting 168 guns, and 17 cruisers, with 22,398 men.

The North Sea and Baltic Canal, opened 20 June, 1895, cost the Empire about £9,000,000.

Total expenditure, 1896-97	£62,961,038
(£27,190,545 for the Army, and £4,372,069 for the Navy.)

PRUSSIA.

King, William II., German Emperor, *born* 27 Jan., 1859; *suc.* 15 June, 1888; *married*, 27 Feb., 1881, Augusta Victoria (*born* 22 Oct., 1858), daughter of the late Frederick, Duke of Schleswig-Holstein (*issue*, 6 sons and a daughter).

Heir Apparent, Prince Royal, William (German Crown Prince), *born* 6 May, 1882.

Premier & Minister for Foreign Affairs, Prince Clovis von Hohenlohe-Schillingsfürst.

Minister of State and Interior, Baron von der Recke.

Vice-President, Dr. von Boetticher.

War, General von Gossler.

Public Works, Herr Thielen.

Finances, Dr. Miquel.

Agric., Woods, & Forests, Freiherr von Hammerstein.

Commerce and Mines, Herr Brefeld.

Justice, Dr. Schönstedt.

Instruction and Worship, Dr. Bosse.

Prussia is an extensive Kingdom of Central Europe, comprising the larger portion of Germany, situate in lat. 49° 7′—55° 52′ N. and long. 5° 50′—22° 50′ E. On the 14th June, 1895, the population was as follows:—

Provinces.	Sq. miles, English.	Population.
1. East Prussia	14,281	1,979,387
2. West Prussia	9,851	1,469,932
3. Brandenburg	15,405	4,410,829
4. Pomerania	11,626	1,574,950
5. Posen	11,182	1,773,036
6. Silesia	15,562	4,357,555
7. Saxony	9,746	2,704,539

12. Rhenish Province	10,421	5,043,979
13. Hohenzollern	441	65,888
Total	134,531¼	31,349,795

Of the above 36·1 lived by agriculture and fishery

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Niemen, Pregel, Vistula, Oder, Elbe, Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. Its principal mountains are the Harz and the Riesen-gebirge, the latter reaching an altitude of 5,235 feet. The forests are extensive, occupying an area of nearly 10,000,000 acres, chiefly consisting of fir. Its minerals consist of iron, copper, lead, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jaspar, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant, also coal. Metallic ores, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle constitute the principal sources of employment and wealth of the rural population of the entire monarchy. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, hops, &c., are extensively cultivated and largely exported. The western division is noted for its excellent fruits and vegetables, and the Rhenish provinces stand pre-eminent for their wines. Prussia has upwards of 100 mineral springs, possessing various properties and qualities. Its manufactures consist chiefly of linens, for which Silesia, Saxony, and Westphalia have long been noted. The cotton works are extensive. Besides these there are numerous manufactories of silk,

woollen, mixed cotton and linen fabrics, including shawls, carpets, &c.; woollens are made in almost every town and large village. Next in importance are leather, earthenware, glass, paper, and tobacco manufactures, and working in metals. Brewing is a business of great importance. The principal imports comprise coffee, tea, cotton, and other produce of the colonies; wines, silk, fruit, manufactured goods, tin, furs, and dyestuffs. The principal exports comprise linens, woollens, hardware, corn, wool, timber, pitch, linseed, tobacco, mineral waters; to which may be added horses, horned cattle, hams, salt meat, &c.; and from the Rhenish provinces, wine.

For the work of education there are about 34,000 elementary schools, attended by about 4,900,000 scholars. There are also 547 high schools, in addition to numerous technical schools.

There are ten celebrated universities in Prussia, attended by about 14,635 matriculated students in 1892; and the whole of the educational establishments are under the immediate control of the "Minister of Public Instruction and Ecclesiastical Affairs." The Royal Family belong to the Evangelical Church ('Evangelical' is a sort of compromise between Lutheran and Calvinist); and the majority of the population consists of Evangelicals (Protestants), who numbered 19,232,449 in 1890; of Catholics there were 10,252,818, and of Jews 372,059.

The amount of taxable property in 1896 was £3,000,000,000, 1,150,000 persons being assessed, and property to the value of £1,000,000,000 being exempted.

Public revenue, 1895-96	£94,973,000
Expenditure, 1895-96	94,973,000
Total debt, 31 March, 1896	317,693,000

ALSACE-LORRAINE.

Statthalter, Prince Hermann Ernst von Hohenlohe-Langenburg (1894), *b.* Aug. 31, 1832.
Minister of State, Herr von Puttkamer.

Alsace-Lorraine (Elsass-Lothringen), which was annexed by France from the old German Empire between 1648 and 1697, was restored to Germany, after a sanguinary war with France, by the Treaty of Versailles in 1871. It embraces the fertile plain between the Rhine and the Vosges, and stretches beyond these mountains as far as Luxemburg. Wine, tobacco, and hops, iron, and coal are among its leading productions, and the cotton industry is most flourishing.

The new province is called a "Reichsland," or imperial territory, and is governed by a "Statthalter," appointed by the Emperor. There is an elective Provincial Committee of 58 members. The area is 5,668 square miles. The population in 1895 was 1,641,220. French was spoken by about 210,000 persons.

The principal towns are Strassburg (135,608), Mülhausen (82,986), and Metz (59,794).

Revenue (1896-97)	£2,715,581
Debt (1896-97) (Rentes £36,592)	1,219,755

ANHALT, Duchy of.

Duke, Frederick, *born* 29 April, 1831; *suc.* 22 May, 1871; *married*, 22 April, 1854, Princess Antoinette of Saxe-Altenburg, *born*, 17 April, 1838.
Heir Apparent, Prince Friedrich, *born* 19 August, 1856; *married*, 2 July, 1889, Princess Marie of Baden; *born*, 26 July, 1865.
Prime Minister, Herr von Koseritz.

A Duchy of Central Germany, in two principal portions, surrounded by Prussian Saxony, containing 906 square miles and a population of 293,298. Budget, 1895-96, £650,450; Credit (1895), £217,242.

CAPITAL, Dessau. Population, 42,375.

BADEN, Grand Duchy of.

Grand Duke, Frederick, *born* 9 Sept., 1826; *Regent*, 24 April, 1852; *Grand Duke*, 5 Sept., 1856; *mar.* 20 Sept., 1856, Louise, *born* 3 Dec., 1838, daughter of Emperor William I. of Germany.
Heir Apparent, Frederick, *born* 9 July, 1857; *m.* 20 Sept., 1885, Princess Hilda of Nassau, *born* 5 Nov., 1864.
President of Ministry, Dr. W. Nokk.

A State of the German Empire, situate in the south-western part. The Rhine forms its southern and western boundary, separating it from Switzerland and Alsace. A great part of the surface is mountainous, and includes the Black Forest and Odenwald. It is divided into four districts, viz., Constance, Freiburg, Mannheim, and Karlsruhe, and comprises an area of 5,893 square miles. 3,231 of which are under cultivation—corn, wine, fruit, potatoes, tobacco, hemp, hops, and chicory being the chief produce. The population in 1895 was 1,725,470, nearly two-thirds of whom were Catholics, and more than one-third Protestants (Jews 26,735). One-half of the people are engaged in agriculture, the other half mostly in manufactures. The principal manufactures are cigars, cotton and silk stuffs, straw hats, brushes, trinkets, clocks, chemicals, paper, and machinery. Elementary instruction is compulsory. There are 1,629 elementary schools, 56 colleges, a technical academy, and two universities, in addition to several technical, agricultural, normal, and other schools, including 2 state establishments for art. There are 946 miles of railway, almost entirely belonging to the State, constructed at a cost of over £22,000,000.

Budget, 1896	£3,369,800
Debt Jan. 1, 1894 (chiefly railways)	16,799,900

BAVARIA.

King, Otto, *born* 27 April, 1848; succeeded his late brother, Louis II., 10 June, 1886.
Regent and Heir Presumptive, Prince Luitpold, *born* 12 March, 1821, uncle of the late and present Kings; appointed Regent, 14 June, 1886; *mar.* 15 April, 1844, Archduchess Augusta of Austria-Tuscany, who *died* 26 April, 1864.
Ministers of State—President, Baron von Crailsheim, Dr. Baron von Riedel (*Finance*), Baron von Feilitzsch (*Interior*), Baron von Leonrod (*Justice*), Lt.-Gen. Freiherr von Asch (*War*), Ritter von Landmann (*Instruction*).

The second Kingdom in size and population of the German Empire. It is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16′—50° 33′ N. lat. and 9°—13° 48′ E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. Bavaria is divided into eight circles (Upper Bavaria, Lower Bavaria, Palatinate, Upper Palatinate, Upper, Middle, and Lower Franconia, and Swabia), comprising an area of 29,632 square miles, and a population (in 1895) of 5,797,414 (3,959,077 were Roman Catholics, 1,569,176 Protestants, and 53,885 Jews). Bavaria contributes two *corps d'armée* to the forces

of the German Empire, and a division at Metz; their strength is about 56,865 men on a peace footing. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. Its forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in Lower Franconia and in the Palatinate. The hop-plant is most extensively cultivated. The chief minerals are salt, coal, iron, copper, and pyrites; manganese is found in some places. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c. There are three Universities, viz., Munich, Würzburg, and Erlangen.

Budget, 1895–96 ..... £17,267,825
Public debt (including railway debt)... 66,562,516

CAPITAL, Munich. Population (1892), 350,594.

British Minister Resident, Victor Drummond £1,700
2nd Secretary, Sir B. Boothby, Bart..... 420

BRUNSWICK, Duchy of.

Regent, Prince Albrecht of Prussia, *born* 8 May, 1837; *elected* 21 Oct., 1885.
Minister of State, Dr. Otto.

A State of Northern Germany, consisting chiefly of three detached parts, comprising an area of 1,441 English square miles, and a population (1895) of 434,213, of whom 411,377 are Protestants; 19,508 Roman Catholics, and 1,836 Jews. Budget, 1896-97, Income, £646,500; Expenditure, £636,340; debt, £3,100,291.

CAPITAL, Brunswick. Population, 115,138.

HESSE, Grand Duchy of.

Grand Duke, Ernest Louis V., *born* 25 Nov., 1868; *suc.* 13 Mar., 1892; *m.* 19 April, 1894, Princess Victoria Melita of Coburg, *b.* 25 Nov. 1876.
President of Ministry, J. Finger.

A central State in the west of Germany, comprising two disconnected territories, nearly equal in size, containing an area of 3,000 square miles, and a population (in 1895) of 1,033,388, of whom two-thirds were Protestants. The southern portion is traversed by the Rhine, and the Main forms part of its boundary. The surface of the eastern portion of both parts is mountainous. The country is fertile, and agriculture is in a flourishing condition. Fruit is abundant, and the vine highly cultivated. Giessen has a university.

Budget, 1894–95 ..... £1,382,648
Public debt, 1894 (mostly for railways) 1,955,456

CAPITAL, Darmstadt. Population (1895), 63,769.

British Chargé d'Affaires, George William Buchanan (Darmstadt) £700
Consul-Gen., Sir Charles Oppenheimer (at Frankfort).

MECKLENBURG-SCHWERIN, Grand Duchy of.

Grand Duke, Frederick Francis III., *b.* 19 March, 1851; *suc.* 15 April, 1883; *married*, 24 Jan., 1879, to Princess Anastasia, dau. of the Grand Duke Michael of Russia, *born* 28 July, 1860.
Heir Apparent, Hereditary Grand Duke Fredk. Francis Michael, *born* 9 April, 1882.
Minister of State, A. von Bülow.

A maritime State of Northern Germany, on the Baltic, comprising an area of 5,197 square miles, with a population of 596,883. The Legislative power is vested in representatives of the towns, and of the Knights' estates. Revenue, £1,080,000; debt (1894), £5,153,585.

CAPITAL, Schwerin. Population, 36,388.

MECKLENBURG-STRELITZ, Grand Duchy of.

Grand Duke, Frederick William, *born* 17 Oct., 1819; *suc.* 6 Sept., 1860; *mar.* 28 June, 1843, Princess Augusta of Cambridge, *b.* 19 July, 1822.
Heir Apparent, Adolphus Fred., *b.* 22 July, 1848; *married*, 17 April, 1877, the Princess Elizabeth of Anhalt, *born* 7 Sept., 1857.

A State of Northern Germany, consisting of two detached pieces, separated by Mecklenburg-Schwerin. Area, 1,144 square miles; population, 101,513. No proper budget. Finances in good condition.

CAPITAL, Neu-Strelitz. Population, 10,343.

OLDENBURG, Grand Duchy of.

Grand Duke, Peter, *born* 8 July, 1827; *suc.* 27 February, 1853; *married*, 10 February, 1852, Elizabeth, daughter of the late Prince Joseph of Saxe-Altenburg, *born* 26 March, 1826.
Heir Apparent, Frederic Augustus, *b.* 16 Nov., 1852; *married*, Feb. 18, 1878, to Princess Elizabeth, second daughter of the late Prince Frederick Charles of Prussia.

A maritime State of North Germany, situate on the North Sea and the Weser, with an area of 2,508 square miles and a population of 373,739. Revenue, 1894, £705,000; expenditure, £550,000; debt, 1894, £2,127,655.

CAPITAL, Oldenburg. Population, 23,118.

SAXE-COBURG AND GOTHA, Duchies of.

Duke, Alfred (H.R.H. Duke of Edinburgh), *born* 6 August, 1844; *suc.* 22 Aug., 1893; *mar.* Jan. 23, 1874, to the Grand Duchess Marie, only daughter of the late Alexander II., Emperor of Russia.
Children: 1. Alfred, hereditary prince, *b.* 15 Oct., 1874; 2. Marie, Princess, *b.* 29 Oct., 1875, *mar.* 10 Jan., 1893, to Prince Ferdinand of Roumania; 3. Victoria Melita, Princess, *b.* 25 Nov. 1876, *mar.* 19 April, 1894, Ernest Louis, Grand Duke of Hesse; 4. Alexandra, Princess, *b.* 1 Sept., 1878, *mar.* April 20, 1896, the Hereditary Prince of Hohenlohe-Langenburg; 5. Beatrice, Princess, *b.* 20 April, 1884.

A State consisting of two principal and several smaller detached portions, with an area of 765 English sq. miles, and a population (1895) of 216,624, the majority of whom are Protestants. The country is distinguished by beautiful forests and castles of the Duke (Reinhardsbrunn and Rosenau, favourite retreat of Queen Victoria). The capital, Gotha (population 31,670), is the seat of the oldest life assurance company in Germany; also of the famous Geographical Institute of Justus Perthes. Coburg (the other capital) has 18,688 inhabitants. The Crown revenue for the year 1894 was £46,000; that of the State (1895) £139,940.

British Chargé d'Affaires, Sir Alexander Condie Stephen, K.C.M.G., C.B. £700
Hon. Chaplain, Rev. F. W. T. Tudsbery, B.A.

SAXE-WEIMAR.

Grand Duke, Charles Alexander, *born* 24 June, 1818; *suc.* 8 July, 1853; *married* 8 Oct., 1842, Princess Sofia of the Netherlands, *born* 8 April, 1824.
Heir Apparent, William, *born* 10 June, 1876.

Area, 1,388 square miles. Population (1895) 338,887. Income and expenditure, 1896, £402,347.

CAPITAL, Weimar. Population, 1895, 26,670.

SAXONY.

King, Albert, *born* 23 April, 1828; *suc.* 29 Oct., 1873; *mar.* 18 June, 1853, Caroline, dau. of the late Prince Gustave de Wasa, *b.* 5 Aug., 1833.

Heir Presumptive, his brother, Field-Marshal Prince George, *b.* 8 Aug., 1832; *mar.* 11 May, 1859, Maria Anna Infanta of Portugal, who *d.* 5 Feb., 1884.

Ministers of State, Dr. Schurig, Herr von Metsch, Herr von der Planitz, Herr von Seydewitz.

A Kingdom of Germany, the third in importance and population of the German Empire, comprising an area of 5,856 English square miles, with a population of 3,783,014 (1895 census), among whom are 114,198 Roman Catholics, and 9,368 Jews. More than one-half of the surface is arable, and has always been in a high state of cultivation; its agricultural products consist of the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits of all kinds suited to the climate. The potato harvest in the year 1892 yielded 28,316,465 lbs. The forests supply timber of excellent quality, and in such abundance as to render them a great source of industry and wealth. The minerals are another great source of wealth, the ores being both rich and abundant. The mines consist of silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides coal, marble, porcelain-earth, and various gems—as topazes, chrysolites, amethysts, cornelians, &c. The smelting is centralized in large establishments belonging to the State. Manufacturing industry has been greatly developed, and in some branches carried to a high degree of perfection. The special manufactures of Saxony are: Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, and bottle glass; to these may be added musical instruments, chocolates, sweets, and cigars. The government factory at Meissen continues to produce the famous Meissen porcelain. The great fairs of Leipzig, although well attended, have lost much of their former importance. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief towns are Dresden, Leipzig, the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 3,104 matriculated students in 1892); Freiberg, in the mining district; Zwickau, and Chemnitz, the Manchester of Saxony.

Saxony furnishes the 12th Army Corps of 41,226 officers and men.

Revenue and expendit., Budget, 1894-95 £10,005,000
Amount of public debt (chiefly for railways), January, 1893 33,476,000

CAPITAL, Dresden. Pop. (1894), 289,844.

Brit. Minister Resident, George Strachey ... £1,150
Consul, H. Palmié 65
Leipzig—Cons.-Gen., Baron C. C. B. von Tauchnitz 15

Transit, 32 hours; postage, &c., same as Berlin.

WALDECK.

Prince, Frederick, Prince of Waldeck-Pyrmont, Count of Rappolstein, Seigneur of Hoheneck and Geroldseck, Wasziegen, &c., *born* 20 Jan., 1865; *suc.* 12 May, 1893. His sisters are:—Pauline, *b.* 1855; *m.* 7 May, 1881, to the Hereditary Prince of Bentheim-Steinfurt; Emma, *b.* 2 Aug., 1858, *m.* 7 Jan., 1879, to the late King of Holland, now Queen-Regent of the Netherlands; Helena F. Augusta, *b.* 17 Feb., 1861, *married* 27 April, 1882, the late Duke of Albany; Elizabeth, *born* 6 Sept., 1873; and a half-brother, *b.* 26 June, 1892.

A Principality in the north-west of Germany, with an area of 438 square miles, and 57,782 inhabitants. The Budget for 1894 gives an income and expenditure of £63,092 each. There is also a Debt of £106,515.

CAPITAL, Arolsen. Population, 2,442.

Brit. Chargé d'Affaires, Sir Alexander Condie Stephen, K.C.M.G., C.B. (Coburg).

WÜRTEMBERG.

King, William II., *born* 25 Feb., 1848; *succeeded* 6 October, 1891; *mar.* 15 Feb., 1877, Princess Marie of Waldeck, who *died* 30 April, 1882; *remar.* 8 April, 1886, Princess Charlotte of Schaumburg-Lippe.

Heir Presumptive, Duke William of Würtemberg, *born* 20 July, 1828, formerly General in the Austrian service, *m.*

President of Ministry, Baron Dr. von Mittnacht.

A Kingdom of South Germany, with an area of 7,528 English square miles, and a population (in 1895) of 2,080,898, of whom 30 per cent. are Roman Catholics. Würtemberg furnishes the 13th Corps to the German Army, consisting of 23,260 men on a peace footing. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pasture-land being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, ironstone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, fire-arms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton, and linen fabrics, stays, beer, wine, &c.

Budget, 1896-97 ..... £3,587,216
Total amount of public debt, April, 1895 (including £21,260,485 for railways) ... 23,055,733

CAPITAL, Stuttgart. Population, 139,817.

Brit. Min. Res., Victor A. W. Drummond (Munich)
Consul, Albert Kaulla £25

THE HANSE TOWNS.

The Hanse Towns comprise the three Cities of Hamburg, Bremen, and Lübeck, each with a small rural territory, and are situated in the North of Germany, on the Elbe, Weser, and Trave respectively. Hamburg is the great emporium of Germany, and is 65 miles from Cuxhaven, to which port it is connected by railway. Bremen is much smaller, but very prosperous, and only second in commercial importance to Hamburg. It is connected by railway with the outport of Bremerhaven, 35 miles distant, and carries on a very extensive American trade. Lübeck is situate near the Baltic; its commerce is principally with Denmark, Norway, Sweden, and Russia.

The commerce between the Hanse Towns and Great Britain is very large; the imports from the United Kingdom to Hamburg alone in 1895 (excluding bullion) amounting to £20,005,000. In October, 1888, Hamburg and Bremen, following the example set by Lübeck several years previously, joined the German Customs Union. They

retain, however, their sovereignty and local self-government, like the other States of the Empire.

HAMBURG possesses an area of 160 square miles, and had a total population in 1895 of 681,632.

Burgomaster, 1896, Dr. Monckeberg.

Public revenue in 1895	£3,581,503
Public expenditure in 1895	3,658,055
Public debt, 1895	16,291,364
Total imports, 1895 (exclud. bullion)	142,630,000
Total exports, 1895 "	123,325,000
British Consul-Gen., Hon. Charles S. Dundas	£1,400
Vice-Consul, George Ambrose Pogson	150

Hamburg, transit, 24 hours.

BREMEN possesses an area of 99 square miles, with a population of 196,278.

Burgomaster, Dr. Pauli.

Public revenue, 1894-95	£856,159
Public expenditure, 1894-95	1,276,788

GERMAN COLONIES AND DEPENDENCIES.

The *Times* for Oct. 20, 1896, estimates the German possessions in Africa at 920,920 square miles, and in the North Pacific at 102,150, being a total of 1,023,070 square miles: German statisticians estimate their possessions to possess about the same area for 1895 in the following way:—

I. The AFRICAN POSSESSIONS: TOGOLAND (23,166 square miles, pop. 850,000) and the CAMEROONS (181,074 square miles, pop. 4,500,000) in the west. DAMARALAND with GREAT NAMAQUALAND in the south-west (324,704 sq. miles, pop. 250,000), and the large tract of country between Lake Nyassa and the Victoria Nyanza called GERMAN EAST AFRICA (384,079 sq. miles, pop. 3,750,000).

II. KAISER WILHELMSLAND, in New Guinea, with the SOLOMON ISLANDS and the BISMARCK ARCHIPELAGO (86,371 sq. miles, pop. 400,000), and the MARSHALL ISLANDS in the Pacific (144 sq. miles, pop. 16,000).

The total expenditure upon these Colonies for 1896-97 is estimated at £302,712, which is met by a revenue of £90,000 and imperial grants of £222,712, and their trade is given in the following table:—

	Imports, 1894-95.	Exports, 1894-95.
Togoland	£112,032	£144,719
Cameroons	316,260	204,056
South-West Africa	95,065	6,238
East Africa	353,080	240,242
New Guinea, &c.	12,350	23,500
	£889,387	£618,755
Imports from above to U. K., 1895		£49,238
Exports to above from U. K., 1895		82,199

GREECE.

King, George, second son of the present King of Denmark, *born* 24 Dec., 1845; *elected* King of the Hellenes, 30 (18) March, 1863; *married* 27 Oct., 1867, Olga, eldest daughter of the Grand Duke Constantine of Russia, *born* 3 Sept., 1851, issue 5 sons and a daughter.

Heir Apparent, Prince Constantinos, Duke of Sparta, *born* 2 Aug., 1868; *married* 27 Oct., 1889, to the Princess Sophia, sister of the German Emperor, *born* 14 June, 1870.

Consul-General, M. L. Messinesis, Eastcheap Buildings, E.C.
Consul and Secretary, J. M. Joannides.

A maritime Kingdom in the south-east of Europe, situate in lat. 35° 40′—40° 10′ N. and long. 18° 20′—25° 50′ E., comprising an area of 24,977 square miles, with a population (in 1889) of 2,187,208. The country is composed of a continental portion, almost separated into two parts by the Gulfs of Patras and Lepanto on the west, and the Gulf of Ægina on the east, the Archipelago of the Ægean Sea and the Ionian Islands, and is divided into sixteen provinces, called Nomarchies. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-grape. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar. Its exports consist of currants, olive oil, wine, lead from the mines of Laurium, and sponges. The army in 1896 consisted of 26,642 officers and men. The navy consists of 3 first-class ironclads, 2 training-ships, 1 torpedo cruiser, 3 minor vessels, and some 20 torpedo boats and small craft, with 3,222 men and officers. There are 582 miles of railway open for traffic. There is a ship canal, cutting through the Isthmus of Corinth. Telegraphs, 4,569 miles. The mercantile marine consists of 5,809 sailing vessels, tonnage 223,158, and 103 steamers, tonnage 58,237.

Revenue, 1896 (estimated)	£3,810,488
Expenditure, 1896 (estimated)	3,636,941
Public debt, 1896, about	33,000,000

GUATEMALA, Republic of.

President, General Reina Barrios.
Min. of Foreign Affairs, Señor Don Jorge Muñoz.
Consul-Gen., Col. José Saborio, 150 Leadenhall St.

Guatemala, the most northerly of the Republican States of Central America, is situate in N. lat. from 13° 40′ to 17° 40′, and in W. long. from 88° 15′ to 92° 30′, and comprises an area of 46,774 square miles, and a population in 1892 of 1,510,000. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea: earthquakes are frequent. The country is well watered by numerous rivers; the climate is hot and unhealthy near the coast, but more temperate and salubrious in the higher regions. There are 132 miles of railway open, and the Interoceanic Railway connecting San José (Pacific) with Port Barrios (Atlantic) was commenced in September, 1892; when completed the capital, New Guatemala, will be within 290 hours of London. About 2,219 miles of telegraph are in working order. The chief ports are San José de Guatemala, Champerico on the Pacific, and Livingston on the Atlantic side. The principal export is coffee, valued at £1,940,569 in 1894; the other articles are hides, indigo, sugar, india-rubber, mahogany, sarsaparilla, and fruits.

Revenue, 1894 ..... £1,248,200
Expenditure, 1894 1,070,544
Public debt, internal and external, 1894 2,665,800
Exports, 1894, £2,032,498; imports (1891) 1,202,046

HAWAIIAN (or Sandwich) ISLANDS.

President of Republic, Sanford B. Dole, *elected* 4 July, 1894 (for six years).

Consul-General in London, Manley Hopkins, 32 Cornhill, E.C.

A rich, beautiful, and most interesting chain of islands, situate in the North Pacific Ocean, forming the Republic of Hawaii, extending from south-east to north-west, in lat. 19°—22° 15′ N. and long. 154° 48′—160° 20′ W., discovered by Captain Cook in 1778. They consist of 13 islands, 8 of which are inhabited. All are very mountainous, and appear to be chiefly of volcanic origin: they occupy a united area of 6,587 square miles, with a population, in 1896, of 107,000, of whom 75,000 are Hawaiians, 24,000 Japanese, 15,000 Chinese, 9,000 Portuguese, and 14,000 whites of European and American descent. Hawaii (Owyhee), the largest of the group, contains two stupendous volcanic mountains, Mauna Loa, which is still in activity, and Mauna Kea, each rising to nearly 14,000 feet. In 1881 there was a vast eruption and a river of lava that threatened to destroy the town of Hilo, and a similar eruption occurred in 1887, when the lava fortunately did little damage, and found its way into the open sea. The imports are chiefly manufactured goods, while the exports consist mainly of sugar, rice, bananas, coffee, wool, hides, &c. The islands are well situated for trade, being in the route between America, China, and Australasia. There is a commercial marine of 52 vessels of 21,678 tons; railways, 53 miles. Honolulu is lighted by electricity, and is well supplied with tramways and telephones.

Public revenue, 1896 (estimated) $1,879,528
Public expenditure, 1896 (estimated) ... 1,872,409
Public debt, Jan. 1, 1896 3,764,335
Total value of imports, 1895 5,339,765
Total value of exports, 1895 8,474,138

Capital, Honolulu. Population (1896), 28,061.
British Commissioner and Consul-General, Albert George Sidney Hawes £1,400
Vice-Consul, Thomas Rain Walker.

Honolulu, transit, 20 days. Parcels, 1*s.* per lb. to 11 lbs.

HAYTI, Republic of.

President, Theresias Augustin Simon Sam, *elect.* 31 March, 1896 ..... £4,800
Minister of Foreign Affairs, P. Hane.

Minister in London, Louis Joseph Janvier, *Chargé d'Affaires*, 5 Albany Court Yard, W.
Consul, Maurice Erdmann, 32 Fenchurch Street.

The Republic of Hayti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the West India Islands. It contains 29,830 square miles, of which 9,242 square miles belong to Hayti. It lies in N. lat. between 17° 37′—20°, and in W. longitude between 68° 20′—74° 28′; and belongs to the group of the Greater Antilles. The portion belonging to Hayti contains a population of about 1,210,600. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits: it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with the United States, Great and Greater Britain, China and Japan. Puerto Plata, on the eastern side of the island, is the principal sea-port of the Dominican Republic.

Revenue, customs only, 1895-96..... £1,409,500
Expenditure, 1895-96 1,924,000
Debt (external, 1895) 886,600
„ (internal, 1895)..... 3,170,000
Imports, 1892, at Puerto Plata..... 80,465
Exports, 1892, from do. 107,777
Imports from U. K., whole island, 1895 372,528
Exports to U. K., whole island, 1895 ... 53,216

Capital, Port-au-Prince. Population, 60,000.
British Consul-Gen., Augustus Cohen..... £1,250
Aux Cayes—Vice-Consul, Ernest L. Dutton 25

Transit, 15 days.

HONDURAS, Republic of.

President, Policarpo Bonilla, 1 Feb. 1895.
Foreign Affairs, C. Bonilla.
Consulate-Gen., London, 34 Great St. Helen's, E.C.
Consul—Manchester, H. M. Langley.

The Middle State of Central America, stretching in N. lat. between 13° 10′ and 16°, and W. long. between 83° 10′ and 88° 40′; containing 42,658 English square miles, including a small portion of the Mosquito Territory, and the Bay Islands in the Gulf of Honduras. The population in 1889 was 431,917, mostly of aboriginal blood. It has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Cortez, Omoa, Roatan, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. The country is mountainous, being traversed by the Cordilleras. The products are mahogany, fruit, cattle, cotton, sugar, tobacco, coffee, indigo, sarsaparilla, hides and skins, india-rubber, cedar, fustic, rose and Lima wood. Its mineral wealth is great. The only railway (42-inch gauge) runs from Puerto Cortez to San Pedro Sula, 37½ miles, which it is intended to develop into an inter-oceanic railway connecting the Atlantic with the Pacific.

Revenue, July, 1889, to July, 1890 ..... £518,860
Expenditure, July, 1889, to July, 1890 ... 519,036
Debt (internal), 1889 227,650
Debt (exterior) (no interest paid) 5,985,108
Imports from U.K. 1895, £52,587; exports, £11,337

Vice-Consul, Cavaliere P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 66 minor islands. It is situate between lat. 35° 38′ 30″—46° 40′ 30″ N. and long. 6° 30′—18° 30′ E., and comprises a total area of 110,623 square miles (91,277 mainland, 19,346 islands), with a population in 1893 of 30,535,848. Formerly it was composed of the various States of Sardinia, the Two Sicilies, the Pontifical States, the Lombardo-Venetian provinces of the Austrian Empire, the Grand Duchy of Tuscany, the Duchies of Parma and Modena, and the Republic of San Marino. In 1870 the complete unity of the country under one crown was finally effected, and Rome became again the capital of Italy. The small community of San Marino, enclosed within the Italian Dominions, alone retains its independent form of government. The Kingdom is divided for administrative purposes into 69 provinces. The coast-line of the mainland is estimated at 1,999 miles; of Sicily, Sardinia, and Elba at 1,389 miles; of the minor islands at 557 miles; in all 3,945 miles, having several large bays and gulfs. The peninsula is traversed throughout its length by the chain of the Apennines: the Alps form its northern limits, dividing it from France. The chief rivers are the Po, the Adige, the Tiber, and the Arno. Its wines are numerous and celebrated. The finest olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari. The cultivation of silk forms an important agricultural industry. Fruits abound, and are of exquisite flavour, such as grapes, oranges, lemons, almonds, figs, dates, melons, pistachio-nuts, all of which are largely exported. The supply of sea and fresh-water fish is considerable. Sardines, tunny, and anchovies are exported. Among the principal minerals are iron, lead, zinc, copper, manganese and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly. The total mineral produce is valued at £2,972,081 (1892), of which sulphur alone absorbed £1,860,000. The railway system is making rapid progress throughout the kingdom: in 1892 there were 7,983 miles open for traffic, and 23,665 miles of telegraph wire. The commercial marine (1892) consists of 6,624 vessels (316 steamers), of 811,264 tons. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The principal exports are olive-oil, wine, candied citron, sienne earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc, and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry, chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. There is a large settled and floating population of English and Americans, with churches (one costing £40,000) and chapels belonging to Methodists, Baptists, and others. The army in 1891, including the local and active militia, had a total nominal strength of 2,448,308 men on the war footing.

The Force is divided into Regular Army in peace, 279,982, in war, 839,354; movable militia, 449,016; local militia, 1,559,938. The NAVY in 1896 consisted of 13 battleships (2 *building*), 1 armoured cruiser (5 *building*), 15 protected cruisers (1 *building*), 1 unprotected cruiser, 15 torpedo vessels (3 *building*), 1 destroyer (*building*), 140 torpedo boats (1 *building*), and 2 special vessels. Spezia is the chief naval and military port of the kingdom, and is much more securely fortified than any other port.

FINANCE.—The expenditure on the army in 1895-6 was £9,040,000, and on the navy £3,960,000, while the annual charge on the National Debt is about £23,000,000.

COLONIES.—Italy has long been ambitious to come into possession of colonies, and since the annexation of Tunis by France she looks upon Tripoli and Barca as her possible share should the Turkish Empire ultimately break to pieces. For the present, however, her colonial possessions are confined to ERITREA (see p. 528) on the Red Sea, while the whole of ABYSSINIA (see p. 528) is recognised as being within her "sphere of influence."

Consul at Liverpool, James L. Bowes.
,, *at Glasgow*, A. R. Brown.

This ancient and extensive Empire, splendidly victorious (1894–5) in a war with China, consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Honshiu, or Niphon (which in Japan gives name to the whole empire), Shikoku, Kiu-Siu, and Hokkaïdô or Yéso, situate to the north of Niphon, from which it is separated by the Tsugaru Straits, and Formosa. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, excluding the temporarily occupied

* An exhaustive article on the country after its victory over China appeared in the 1896 issue, pp. 595-602.

territory, comprises an area of 162,655 square miles, with a population in 1896 of 41,390,000.

	Kwazoku, or Nobles	Sinoku, formerly Warriors (Samurai)	Heimin (ordinary citizens)	Total.

Japan is said to possess a written history extending over 2,500 years, and its sovereigns to have formed an unbroken dynasty since 660 B.C., the present Emperor being the 121st of his race; but the authentic history begins about 400 A.D. Within the last few years Japan has made unparalleled progress in civilisation and the adoption of Western manners and customs. The feudal system under which the country was governed by numerous Lords has been abolished, and the Mikado is now absolutely the Sovereign of the State, and since the revolution of 1868 she has shown a most remarkable power of adopting Western knowledge and experience. A wise and enlightened ruler is at the head of the nation, and the first national Parliament, the outcome of the constitution granted to the people by the Emperor, promulgated 11th Feb., 1889, met for the first time in November, 1890. The feudal lords, who have lost all their powers of government, still retain their high social positions, and a new aristocracy with these as its basis has been formed; it consists of five grades, corresponding to the European titles of Prince (not imperial), Marquis, Count, &c. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tôkiô, is 12,370 ft. high, dormant since 1707. Japan is liable to frequent and disastrous earthquakes. On October 28, 1891, an earthquake occurred by which 9,960 persons were killed, 20,000 injured, and 130,000 houses destroyed; again in 1896 a tidal wave destroyed 7,475 houses, and killed 26,990 people, in addition to 25,137 injured. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, and sulphur abound, whilst agate, carnelian, and rock crystal are also found. Gold and silver mining is prosecuted on a small scale, and there is a fair supply of middling coal. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the Cryptomeria japonica, Pinus Massoniana, and Zelkowa Keaki; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat, and other cereals are all cultivated; agriculture, upon which the Japanese bestow great care, being their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied. The fruits are abundant, but for the most part of inferior quality. The chief manufactures are those of silk and cotton, japanned ware, porcelain, and bronze. The chief imports are raw cotton from China and India, and piece goods, metals, woollens, drugs, and machinery from Europe. Sugar is largely imported from China. The chief exports are silk, rice, tea, fish, copper, and matches. There were 2,118 miles of railway open March 1, 1895, and 1,072 are in course of construction.

The army consisted of 273,268 officers and men at the end of 1893; the navy at the same date consisted of 4 battleships, 8 armoured cruisers, 7 protected cruisers, and 13 other cruisers, in addition to 15 gunboats, 60 torpedo-boats, and a few miscellaneous craft; it was manned by 14,852 officers and men. The mercantile marine consists (1895) of 1,739 vessels, of which 1,017 are steamers. Under treaties with Great Britain and several other powers, the ports of Yedo (Tôkiô), Kanagawa (Yokohama), Hiogo, and Osaka (on the Inland Sea), Hakodate (in Yezo), Niigata, and Nagasaki, are open to trade. The trade of Japan in 1895 was distributed thus:—

Great and Greater Britain	£10,609,167	China	£3,833,521
United States, A.	6,819,432	France	3,218,452
		Germany	1,635,121

The principal articles imported by the United Kingdom from Japan in 1895 were:—Copper, £159,089; silk, £168,629; rice, £127,983; straw, £108,710; and the principal articles exported to Japan from this country in 1895 were:—Arms, £379,622; machinery, £458,084; chemicals, £108,608; metals, £624,823; cotton yarn, £358,516; cottons, £960,317; woollens and worsteds, £539,423.

Of the 1,528 foreign vessels (tonnage 1,993,420) that entered Japanese ports (1893), 777 were British (tonnage 1,307,838). The value of the silver yen or dollar has fluctuated greatly during the past two years, and is now equivalent to about 2*s.* 2*d.*

CAPITAL, Tôkiô, formerly called Yedo, the residence of the Emperor; population (1895), 1,312,153. Other cities are—Osaka, 490,003; Kiôto, the ancient capital, 339,836; Nagoya, 209,270; Kobé, 153,382; and Yokohama, 187,202.

The total cost of the war with China was about $225,000,000, of which $30,000,000 was repaid by indemnity.

Estimated public revenue, 1896-97	£15,000,000
Estimated public expenditure, 1896-97 (£2,411,000 for the navy, and £1,794,501 for the army)	16,460,000
Total debt, March, 1896	56,415,141
Total imports, 1895	13,526,710
Total exports, 1895	14,624,025
Imports from United Kingdom, 1895	4,638,207
Exports to United Kingdom, 1895	1,143,382

JERUSALEM—PALESTINE.

Turkish Governor, Ibrahim Hakki Pasha, appointed 10 November, 1890.

Palestine, which occupies so prominent a place in the history of human kind, and in the affections of the Christian world, has fallen upon evil days. Her ancient glories are departed, and although the country still produces wine and olives, corn and the most varied fruits, its resources remain undeveloped owing to the lack of enterprise, the want of good roads, and the poverty of the inhabitants. Its population has dwindled away, as is proved by the numerous ruins scattered over the country, until now it probably does not exceed 620,000. In and about Jerusalem, the Jews number from 45,000 to 50,000, and in the whole of Palestine from 80,000 to 100,000.

Geographically Palestine consists of a maritime lowland, the mountain region of Judah, which forms its backbone, the remarkable depression through which the Jordan wends its course towards the Dead Sea, and the elevated region lying to the east of the Jordan. The popular notion that Palestine is a barren country, not capable of yielding rich harvests, is a mistaken one. Its appearance is barren only during the dry season, when the grasses which cover the greater part of it are dried up, and the herdsmen retire with their flocks of sheep and goats to the loftier mountains. The alluvial lowland to the south of Mount Carmel is as fruitful as ever, and it only needs an honest and vigorous administration to restore Palestine to its former fruitful condition. The entire area is computed to be about 11,000 square miles.

Palestine comprises the independent Mutessariflick of Jerusalem (el Kuds), together with districts belonging to two other provinces, viz.: the vilayets of Beyrut and Damascus. The stream Nahr el Auja, which enters the sea a few miles north of Jaffa, forming the boundary between the district of Jerusalem and the first-named vilayet, the country to the east of the Jordan and the Dead Sea being subordinate to the vilayet of Damascus. Arabic is the language commonly spoken, and 80 per cent. of the population are Mohammedans. There are, however, many Greeks, Jews, and Franks of all nations and denominations. A railway was opened connecting Jaffa (Joppa) and Jerusalem in 1892.

The principal ports are Acre, Haifa, and Jaffa, and their exports amount annually to over £500,000, consisting principally of sesame, fruits, barley, olive oil, maize, and articles of Christian veneration, these latter weighing 2,700 cwts. The imports were valued at £650,000. Austria takes the lead in this commerce.

Jerusalem—Consul, John Dickson £1,150
Jaffa—Consular Agent, Haim Amzalak 15

LIBERIA.

President, His Excel. J. J. Cheesman, 4 Jan. 1892.
Vice-President, Hon. W. D. Coleman.
Secretary of State, Hon. G. W. Gibson.
Secretary of Treasury, Hon. A. Barclay.
Attorney-General, F. E. R. Johnson.
Postmaster-General, Hon. S. Ferdinand Dennis.
Con.-Gen. in London, H. Hayman, 3 Coleman St., E.C.
Consul, Sigismund Sinauer De Stein.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the river Cavalla, S.E., and Manna, N.W., a distance of about 350 miles, with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50′, a distance of 250 miles from the seaboard. The population consists of 25,000 emigrants from America and their descendants, and aborigines, numbering in all nearly 1,500,000. The principal exports are coffee, cocoa, sugar, wax, ginger, palm-kernels, palm-oil, indigo, hides, ivory, and gold-dust. About 2,000,000 lbs. of these were exported in 1891. Liberia was founded by the American Colonization Society in 1820, and has been recognised by the United States and the European Powers since 1847 as an independent State.

Revenue, 1888... £35,000. Expenditure... £33,000
Chief Town, Monrovia. Population, 6,000.
British Consul (acting), Col. Frederick Cardew, C.M.G. (Sierra Leone).

Monrovia, 3,650 miles distant; transit, 19 days. Parcel Post, 3 lbs. 1*s.* 10*d.*; over 3 lbs., under 7 lbs., 3*s.* 6*d.*; under 11 lbs. 5*s.* 2*d.* Telegrams *forwarded by post* from Sierra Leone.

LIECHTENSTEIN.

Prince, Johann II., *born* 5 Oct., 1840; *suc.* 12 Nov., 1858.

A Principality on the Upper Rhine, between the Tyrol and Switzerland. It has an area of 61 square miles, with (1896) 9,434 inhabitants, who pay no taxes and are not liable to conscription. Revenue, 1895...£10,538; debt (1890), £5,280.

LUXEMBURG.

Grand Duke, Adolphus, Duke of Nassau, *b.* 24 July, 1817; *suc.*, 23 November, 1890; *mar.* (2ndly) 23 April, 1851, Adelaide Marie, daughter of Prince Frederick of Anhalt-Dessau, *born* 25 Dec., 1833.
Heir, William Alexander, *b.* 22 April, 1852; *m.* 21 June, 1893, Princess Maria Anna of Braganza.
Minister of State, M. Eyschen.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815-66, and is still included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23rd, 1890, it passed to the Duke of Nassau. The area is 999 square miles; the population (1895) 217,583, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1895 was £416,547, and there was a debt (Jan. 1, 1896) of £472,424. There are 270 miles of railway. The army numbers about 325 men. The capital, Luxemburg (pop. 19,909), is a dismantled fortress.

British Envoy, Henry Howard, C.B. (The Hague).

MADAGASCAR.

(*French Colony.*)

Resident-General and Commander-in-Chief, General Gallieni.

The third largest island in the world, situated to the east of the African continent, from which it is separated by the Mozambique Channel, and surrounded by the waters of the Indian Ocean, in lat. 11° 57′—25° 38′ S., and long. 43° 15′—50° 30′ E. It is 975 miles in length, and 350 at

Digitized by Google

its greatest width, contains an area of about 230,000 square miles, nearly double that of Great Britain and Ireland, and has a population of between 4,000,000 and 5,000,000. There are some traditions of an aboriginal race of pigmies; but, broadly speaking, the inhabitants of Madagascar are one people, speaking one language (though with many variations of dialect) related to the Malayo-Polynesian. Excluding the aboriginal element, the Malagasy may be divided into (1) the lowland tribes, the Sakalava on the west coast and the Betsimisaraka on the east; (2) the midland or forest tribes; and (3) the highland or inland tribes, including the Hova and the Betsileo. The Hova are the dominant tribe. Their dialect was reduced to writing, about the year 1820, by missionaries of the London Missionary Society, who also introduced the art of printing, in 1826. Christian missions have been very successful in the island, the Protestants numbering about 450,000, and the Roman Catholics about 50,000. Polygamy still prevails among the less civilised tribes, but with the central tribes monogamy is the rule. An impress of Arab influence is noticeable in the native calendar, and doubtless the island was known to Arab and Indian traders hundreds of years before it was discovered, in 1506, by the Portuguese, who named it St. Lawrence. Insignificant attempts to plant establishments in Madagascar were made by the Portuguese, and subsequently by the Dutch and English. The first French colony was planted in 1642 by a company, called the "Société de l'Orient," under the patronage of Cardinal de Richelieu. In 1654 the French Company of the East Indies made Madagascar their head-quarters; but notwithstanding all efforts, the colony languished and had to be practically abandoned in 1686. France, however, retained her claims to the island. As a dependency of Mauritius the French Settlements in Madagascar passed to the British crown by the Treaty of Paris (1814), and in the year 1816 diplomatic and commercial relations were entered into between Great Britain and Radama I., King of the Hovas, who was acknowledged as sovereign of the whole island. The British claims were disputed in 1817 by the French, who in the following year occupied the island of Ste. Marie. Nosibé was occupied by them in 1840, and Diego Suarez was taken possession of as a naval station in 1885. In 1885 was the first serious attempt to establish a French protectorate over the island. At the end of this war the Malagasy agreed to pay an indemnity of £400,000, but declined to admit the political rights claimed by France. Difficulties arose in regard to the exequaturs to be issued to Consuls of other foreign nations in Madagascar, which were finally settled by the recognition of the French protectorate. A declaration, signed between Great Britain and France, August 5, 1890, recognised on the part of Great Britain the French protectorate and its consequences over the island of Madagascar, guaranteed religious tolerance and complete protection to missionaries of both countries, and maintained unimpaired the rights and immunities of British subjects. In 1894 the French Government determined to enforce its political claims on the Hova Government. A French envoy arrived at the capital on the 18th Oct. with an ultimatum, which was refused, and a force of 15,000 men was despatched to Madagascar in May, 1895, to march on the capital by the route, more than 200 miles long, from Mojunga on the west coast. After suffering great hardships and loss from fever to the amount of nearly half the force employed, the French, under General Duchesne, without meeting very serious opposition from the Hova forces, numbering 20,000 men, occupied the capital on 30 September, and the next day a treaty was signed by the queen, by which all the French claims were admitted. The establishment of a French protectorate was preferred to absolute annexation, but in 1895 the island was declared a French *Colony*, although it is rather a possession, as, apart from the officials, there are probably not 100 Frenchmen in the island. The Prime Minister, Rainilairivony, who was made prisoner and deported, died at Algiers in 1896. The island is reputed rich in minerals, and the production of gold is increasing; copper, iron, coal, galena and lead are also found. The lowlands of Madagascar are fertile, and rice is cultivated in enormous quantities, while manioc, arrowroot, sugar-cane, tobacco, hemp, cotton, which also flourishes in the uplands of the interior, and vanilla are grown with excellent results, and coffee and tea have been planted. Silk can be produced successfully. There is a large supply of india-rubber, caoutchouc and gum-copal, as well as timber of many varieties in the forests. In the interior large numbers of cattle are bred. Unfortunately the low country is very unhealthy, while the inland plateaux are not very fertile. The principal exports are cattle, hides, india-rubber, gum-copal, wax, raffia sugar, vanilla, coffee, rice, orchilla-weed, straw hats, silk shawls called *lamba*, and lamba woven of the raffia-fibre, coloured with native dyes. Amongst imports the chief are unbleached American sheetings, English imitations of the same, prints, calicoes, muslins, flannels, cheap silks, beads, plate tin, paraffin oil, and preserved provisions. There is a 10 % *ad valorem* duty on all imports. The legal coinage is the silver 5-franc piece.

CAPITAL, Antananarivo, with a population of about 100,000, distant seven days' journey, by palanquin, from the chief port of entry, Tamatave, with which there is communication by a Government telegraph, and by French mails, running weekly.

The other ports are, Mojanga, Tolia, Faradofay (Fort Dauphin), Mananjara, Mahanoro, and Vatomandry.

Estimated military expenditure, 1897	£384,000
Estimated civil expenditure	80,000

MALACCA.

Malacca, or the Malay Peninsula, has a southerly extension of about 900 miles, an area of 81,800 square miles, and about 1,250,000 inhabitants, including large numbers of Chinese. The country is hilly, densely wooded, abounding in game, and famous for its tin mines. The Isthmus of Krah, in about 11° N. lat., has been examined with a view to the construction of a ship-canal, which would much shorten the passage between India and China; but competent authorities have declared the scheme to be impracticable. The greater portion of the peninsula owns allegiance

Digitized by Google

to Siam. Along its western coast are the British "Straits Settlements," and the Protected Malay States (see p. 476). The independent portion of the Malay Peninsula is occupied by a number of Mohammedan Malay States.

MEXICO, Federal Republic of.

President of the Republic, Porfirio Diaz, acceded 1 Dec., 1884 (re-elected 3rd time 1896 *until* 1900).
Minister of Foreign Affairs, Don Ignacio Mariscal.
Minister in England, Manuel Iturbè, 87 Cromwell Road, S.W.
Chargé d' Affaires, Don Cayetano Romero.
Financial Agent, Don Luis Camacho, Bloomfield House, London Wall, E.C.
Consul, Don Adolfo Bulle, Broad St. House, E.C.
Liverpool—Consul-General, Don P. Garcia Conde.

A country in the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, situated between 15°—32' N. lat. and 87°—117° W. long., and comprising one of the richest and most varied zones in the world, but from various causes her resources have never been fairly developed. It comprises 27 states, 2 territories (Lower California, almost separated from the main portion by the Gulf of California), and the federal district of Mexico, making in all 30 political divisions, comprehending an area of 751,177 square miles, with an estimated population of (1889) 10,447,974, of whom "only about 3,500,000 are taxable." The surface consists of an elevated plateau, commencing at a few miles from the coast, and containing several volcanic summits, the highest of which, Ixtaccihuatl and Popocatepetl, rise to 17,879 and 19,784 feet above the sea. Vera Cruz, Progreso, and Tampico are the chief seaports on the Gulf of Mexico, Mazatlan and Guaymas on the Pacific. There were 6,673 miles of railway open in 1895, and 37,126 miles of telegraph. The railways have in a large measure been built by American and English companies. The "Mexican Central" joins El Paso (Texas) with the city of Mexico, by which passengers can travel in six days from New York without change of carriage. The National Railway *vid* Laredo taking five days to New York is also open. A third route *vid* Eagle Pass (International Railway) is also completed. An efficient railway system will doubtless powerfully assist in developing the vast resources of this rich country. The principal crops are maize, wheat, barley, pulse, Chile-pepper, sugar, potatoes, coffee, cotton, tobacco, vanilla, flax, indigo, grapes, and all kinds of fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque;" other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 70 per cent. consist of silver and gold; flax and hemp, coffee, hides and skins, timber, logwood, vanilla, tobacco, dye-stuffs, sugar and drugs ranking next in importance. The army in 1888 was composed of about 27,000 men. The navy is limited to 7 small vessels, of about 200 to 300 tons, used for the prevention of smuggling. The following figures are officially supplied, the reckoning in Mexico being at the old gold rate of $5 to the £, the actual value, Sept. 1895, being 26 pence to the Mexican $.

Estimated revenue, 1895-96	$45,102,000
Estimated expenditure, 1895-96	45,010,000
Total exports, 1894-95	£20,854,953
Total imports, 1894-95	34,000,440
Public debt, Internal, 1890	£10,500,000
External	6,200,000
	16,700,000
Imports from United Kingdom, 1895	1,655,567
Exports to United Kingdom, 1895	467,334

MONACO.

Sovereign Prince, Albert, *born* 13 November, 1848; *suc.* 10 Sept., 1889; *mar.* 1869, Lady Mary Douglas-Hamilton, daughter of 11th Duke of Hamilton (the Pope declared the marriage a nullity, 1880); 2*ndly*, Oct. 1889, the Duchesse de Richelieu, *born* 10 February, 1858.
Heir, Prince Louis, *born* 12 July, 1870.
Governor-General, Olivier de Ritt.

Consul-General in London, Charles Piesse, 2 New Bond Street, W.
Vice-Con., Theodore Lumley, 37 Conduit St., W.

A miniature Principality on the Mediterranean, between France and Italy, consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the gambling establishment, and comprising a narrow strip of country extending from the Monaco Cemetery on the west to St. Roman on the east; it is about 3 miles long and 1½ miles broad, with (1886) 12,548 inhabitants. The whole available ground is built over, so that there is no cultivation. There is an army of 126 men.
British Consul, Sir James Charles Harris (Nice).

MONTENEGRO.

Prince, Nicholas (or Nikita), *born* 7 October, 1841; *succeeded* his uncle, Prince Danilo, 14 Aug. 1860; *m.* 1860, Milena, daughter of Voyevod Peter Vukotich, *b.* 4 May, 1847; issue 3 sons, 6 daughters.
Heir Apparent, Danilo Alexander, *b.* 29 June, 1871.
Pres. of State Council, Voivode Bozo Petrovitch.
Foreign Affairs, Voivode Gavro Vukovitch.

Digitized by Google

A small Principality, which has always claimed to be independent, which claim was recognised by the Treaty of Berlin. It has an area of 3,486 square miles, and a population of about 220,000, of whom 10,000 are Mohammedans, 4,000 Roman Catholics, and the remainder Orthodox Slavs. The surface forms a series of elevated ridges with lofty mountain-peaks, many of which are covered with forests. Chief products are maize, potatoes, sumac, sardines, cattle, castradina (smoked mutton), hides, and tobacco. The only manufactures are coarse woollens. Agriculture is the principal occupation, but the fields are no larger than an ordinary tennis lawn.

The Prince's body-guard numbers 150 men; but in war every male above the age of 17 years is forced to serve in the army, which musters about 35,000 men. The two ports, Antivari and Dulcigno, have about 150 coasting vessels.

MOROCCO, EMPIRE OF.

Sultan, Muley Abdul Aziz, *b.* 1879, *s.* June, 1894.
Grand Vizier, Sid Hamed Abu Musa.
Minister of For. Affairs, Sid Mohammed Tassi.
Acting Commissioner for Foreign Affairs at Tangier, Sid Mohammed Libady, *app.* Sept. 1896.

The largest of the Barbary States, situate in the N.W. of Africa, between 27°—36° N. lat. and 1°—11° 40′ W. long. The Empire, which is an absolute monarchy, consists of the Kingdom of Fez and Morocco, to the north of the Atlas, and the territories of Sûs, Drâ, Wadi Tafilet, Tuat, and others to the south, which are again subdivided into 33 districts, each under the superintendence of a "Kaid;" but the semi-independent tribes are ruled by their own chiefs, and scarcely acknowledge the authority of the Sultan. Morocco contains about 314,000 square miles, of which the "Tell," or fertile regions of the mountains and coast, contains 76,000, the steppe-land 26,000, and the Sahara 217,000, with a population variously estimated at from 4,500,000 to 8,000,000. The Jews number about 300,000, and reside chiefly in the cities. Among the chief products of the country are wheat, barley, maize, beans, peas, oil, esparto, and hemp; among fruits, the fig, almond, pomegranate, lemon, olive, orange, and date are common; but agriculture is greatly neglected. Morocco is said to be rich in mineral treasures: antimony, iron, coal, copper, lead, tin—the last three in considerable quantities. Gold and silver also are found, and wool is plentiful. It is a country of great natural resources, which only need developing. The chief ports are Tetuan, Tangier (where the Representatives of fourteen nations reside), El Araish (Laraiche), Rabat, Casa Blanca (or Dar-al-baida), Mazagan, Saffi, and Mogador. There are no railways, and telegraphic communication from Tangier is by submarine cable of Eastern Telegraph Company to Gibraltar, and by Spanish Government telegraph to Tarifa. The exports are almonds (£52,174 in 1893), maize, beans (£303,166 in 1893), peas (£36,778 in 1893), oil, wool (£186,047 in 1893), dates, oxen, fowls, eggs, carpets, slippers, goat-skins, leather, grain, ostrich-feathers, gums, esparto; and the imports, cotton, linen, muslin, and woollen goods, tea, coffee, sugar, candles, cloth, silk, iron, brass, hardware, &c. The army consists of between 15,000 and 20,000, one-half of whom are negroes, Sultan's bodyguard, and a sort of militia, of various arms, amounting to 80,000 men. An English newspaper, *Al Moghreb-al-Aksa*, a French paper, *Le Réveil du Maroc*, and three newspapers in Spanish are published at Tangier. There are three capitals, of which Fez, population 120,000, is the principal; Morocco, 50,000; and Mequinez, 56,000.

Secretary, Baron Schimmelpenninck van der Oye.
Chancellor, H. N. Brouwer.
Consul-Gen., John W. May, 40 Finsbury Circus.
Consul, H. S. J. Maas, 40 Finsbury Circus.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46′—53° 34′ N. and long. 3° 22′—7° 14′ E., consisting of 11 provinces, including part of the Duchy of Limburg, and containing a total area of 12,582 square miles, with a population, on Dec. 31, 1893, of 4,732,912. The majority, about three-fifths, belong to the Dutch Reformed Church; and the remainder are

Roman Catholics, and a small number of Jews, mainly in large towns, such as Amsterdam, where there are about 70,000. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of watercourses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Scheldt. There are 1,652 miles of railway open (1894), and 12,351 miles of telegraph. The chief native products are cattle, sheep, potatoes, rye, barley, oats, wheat, buckwheat, chicory, clover, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping bricks, butterine, cocoa, chocolate, linen, rich damasks, cottons, woollens, silks, and "geneva." Diamond-cutting employs numerous hands in Amsterdam. The chief exports consist of refined sugar, flax, butter and margarine, cheese, cattle, sheep, geneva. The royal navy consisted, on Jan. 1, 1894, of 121 men-of-war (21 of them ironclads); and the army, on the war footing, of 2,688 officers and 50,966 men, with a militia (Schuttery) numbering about 43,716 more. The mercantile marine, on the 1st Jan., 1894, consisted of 154 steamers, tonnage 499,000, and 442 sailing vessels, with 335,000 tonnage, employing 17,100 men.

Holland figures largely in the trade returns of this country, a quarter of the value of which is represented by agricultural produce, but much of the merchandise sent to Holland was for distribution in Germany and other parts. The following are the chief articles imported from the United Kingdom in the year 1895:—

Animals (Horses)..	£66,972	Leather	£119,592
Caoutchouc manufs.	66,798	Linen	107,358
Chemical products	140,595	Machinery	407,171
Coal, &c.	396,922	Oil, seed, &c.	96,884
Cotton yarn	1,046,929	Sugar.....	73,236
Cotton manufts ..	907,312	Woollen manufts.	620,047
Grease, &c.	251,380	Woollen yarn	345,542
Metals, hardware	1,101,822	Yarn (alpaca, &c.)..	170,972

The chief exports to the U. K. for 1895 were:—

Books	£103,341	Iron and steel, &c.	£1,088,428
Butter	939,346	Lace	349,992
Cheese	774,790	Margarine	2,371,111
Chemical manufts.	291,447	Meat	320,821
China, &c.	233,580	Painters' colours, &c.	378,875
Cocoa, &c.	255,816	Paper, prints, &c.	1,167,458
Corn, all kinds	190,036	Skins, furs, &c.....	321,217
Cotton manufts., &c.	1,005,298	Sugar.....	1,594,464
Dye stuffs, &c.	591,101	Silk manufts., &c.	1,856,326
Farinaceous sub., &c.	178,220	Tobacco	233,130
Fish	256,797	Toys	336,783
Flax	188,695	Wool manufactrs...	2,854,651
Fruit	173,438	Wine	315,975
Glass manufrs., &c.	252,944	Geneva	58,161
Gloves	942,102	Yeast, dried	228,014
Hides and leather.	539,716	Zinc manufts., &c..	489,628

Revenue, 1896-7, estimated £10,904,858

Dependencies.—The Dutch possessions in the East Indies are very considerable, comprising the whole of the Sunda Islands, with the exception of a small portion of Borneo and Eastern Timor, together with Western New Guinea, with an area of 718,000 square miles, and a population of 28,500,000, of whom as many as 21,459,450 live in the islands of Java and Madura, and 405,727 in the Moluccas. Included in this estimate are many districts in the interior of Sumatra, where the Achin rebellion is giving the home government much trouble, Borneo, Celebes, and other islands, in which Dutch sovereignty is merely nominal. In Java and Madura the so-called "culture system" has been introduced with much success, for it has secured a sufficient supply of food for a dense population, besides furnishing coffee and other products for exportation to Europe. The "outlying" islands are frequently administered by their own princes subject to the directions of a Dutch Resident. There is a colonial army of 1,384 officers and 33,339 men, with a reserve of 393 officers and men, one half of whom are Europeans. The colonial revenue for 1895 is estimated at £10,395,976 and is largely derived from the sale of coffee, salt, sugar, bark, and tin; whilst the estimated expenditure is £11,399,133. The exports, in addition to the above, include also sugar, tobacco, indigo, gums, and spices, and amounted in 1893 to £17,916,666, while the imports for the same year amounted to £14,250,000.

In South America the colony of Surinam, or Dutch Guiana, embraces 46,072 square miles and about 57,000 inhabitants; and in the West Indies Curaçao and 5 other small islands belong to Holland, having an area of 436 square miles, with a population of 44,153.

Exports from colonies to U.K., 1895 £907,3[illegible]

The largest State of Central America, with a

long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45′—15° N. lat. and 83° 40′—87° 38′ W. long., containing an area of 51,660 English square miles, including a large portion of the Mosquito Territory, and a population of 310,000, of whom about three-quarters are mixed blood, and the rest Indians, besides the Mosquitos who are mostly in a savage state. In 1891 there were 93 miles of railway open, and several lines projected, with 1,591 miles of telegraph, connected with the Pacific cable from Mexico to Peru. A Ship Canal connecting the Pacific with the Atlantic (see p. 539) was commenced in Oct., 1890. The interest on the foreign loan has been reduced to 4 per cent.

(For SWEDEN see p. 572.)

King, Oscar II., *born* 21 January, 1829; *suc.* 18 September, 1872; *married* 6 June, 1857, Sophia, daughter of the late Duke William of Nassau, *born* 9 July, 1836 (and has issue four sons).
Heir Apparent, Oscar Gustaf Adolf, Duke of Wermland. Crown Prince, *b.* 16 June, 1858; *m.* 20 Sept., 1881, Victoria, dau. of Grand Duke of Baden, *born* 7 August, 1862.

MINISTRY (14th Oct., 1895).

I. Council of State at Christiania.

President of the Council of Ministers, Minister of State and Chief for the Department of Justice and Police, Dr. G. F. Hagerup.
Department of Defence, Col. C. W. E. B. Olsön.
Department of Ecclesiastical Affairs and Public Instruction, J. L. R. Sverdrup.
Interior, T. v. W. Engelhart.
Public Works, P. Nilsen.
Finance and Customs, B. Kildal.
Revision, H. Smedal.
State Secretary, H. Lehmann.

II. Delegation of the Council at Stockholm.

Minister of State, G. W. W. Gram; *Ministers*, F. Stang Lund; O. J. Olsen.
General Secretary, H. Schlytter.

Envoy Extraordinary in London, Count Lewenhaupt (see p. 572).

Norway, an independent kingdom, since 1814 united with Sweden under the same King of the House of Bernadotte (the fundamental law of the 17th of May (4th of November), 1814, the Act of Union with Sweden of the 6th of August, 1815). The Parliament of 114 members is called the "Storthing," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsthing" and "Lagthing." The western and northern portion of the peninsula is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or amts, and comprises an area of 124,500 square miles, with a population of 2,001,000. The coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren table-lands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains. Agriculture, though pursued with some vigour of late, is unable to furnish sufficient produce for home consumption; hence it has been necessary to import considerable quantities of corn, meat, and butter. The fisheries give employment to a large part of the population throughout the year. The most important are cod and herring; the exports of these with other sea-products and fish-oil were valued at £2,473,899 in 1895. The mineral products are similar to, but far less valuable than, those of Sweden. Timber-dressing, mechanical engineering, textile manufactures, ship-building, and pulp-making are the principal departments of Norwegian industry. The exports of forest produce were valued at £2,401,476 in 1895, the value of wood-pulp alone being £741,608. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of timber, fish, oil and other products of the fisheries, pulp, skins and furs, nails, textile manufactures, minerals, ice, condensed milk, margarine, butter, cattle, &c. The principal articles imported to Great Britain from Norway in 1895 were:

Fish	£430,707	Paper & Rags	£1,117,000
Ice	279,336	Timber	1,367,389

and the principal articles exported to Norway from this country

Coal	£489,574	Metals	£240,301
Cottons	255,178	Wool & Woollens	191,642

The navy consists of 56 steamers (4 being monitors) and 214 guns. The mercantile marine, 31 Dec., 1895, consisted of 7,270 vessels, of 1,604,965 tons. The army by law consists of 18,000 men of the line, and cannot be increased without the consent of the Storthing, but the number of trained men and officers under different names is about 36,000. Military service is obligatory and personal after the completion of the twenty-third year. The period of service is five years in the line, four years in the "landværn," and four years in the "landstorm." The administration of Norway is entirely distinct from that of Sweden, and it retains its own laws. The debt was incurred chiefly in the construction of railways (1073 miles open). The length of telegraphs belonging to the state in January, 1896, was 5,199 miles.

OMAN.

Sultan, or Sovereign, Seyyid Feysal bin Turkee, *suc.* 4 June, 1888.

Omān is a Mohammedan State in S.E. Arabia with a coast-line of about 1,500 miles along the Gulf of Persia, the Gulf of Omān, and the Arabian Sea, an area of 81,000 square miles, and a population of 1,600,000. The small territory of Gwadar on the Mekran coast also belongs to it. Zanzibar, on the African coast, was a dependency of Omān until 1856. The country rises from a bare and burning coast until in Jebel Akhdar it attains an elevation of 10,000 feet. In the interior, however, among the Bedouins, the authority of the Sultan is hardly even nominal.

The population of Omān is chiefly Arab, but there is besides a considerable foreign element, consisting of Banians and Khojas from Western India, Persians, East Africans, and Nubians. The chief productions are dates, grain, fruit, and sugar; and the fisheries are very productive. The revenue is about 180,000 dollars. The exports consist of dates, cloth, salt, fruits, pearls, dried fish, and matting. The imports are—sugar, rice, piece-goods, coffee, wheat, raw silk, cotton, &c. Omān has no independent coinage; the East India rupee and (Austrian) Maria Theresa dollar are the current coins, the latter being the most used. The rainfall is very scanty, averaging about 6 inches annually.

Muscat, the capital, with 60,000 inhabitants, trades with India, the Persian Gulf, Batavia, Zanzibar, and Yemen, but has little direct intercourse with Europe.

Total exports, 1895–96 ..... $1,419,450
,, imports, 1895–96 2,288,760

ORANGE FREE STATE.

President, M. T. Steyn, 21 Feb., 1896, for 5 years.
Government Secretary, P. J. Blignaut.
Chairman of the Volksraad, C. W. H. van der Post.
Chief Justice Supreme Court, M. de Villiers.

Consul-General in London, Sir William Dunn, Bart., M.P., 43 Broad Street Avenue, E.C.

A South African Republic, situated to the N. of the Cape Colony, and bounded, E. by British Basutoland and Natal, N. by the Transvaal, and W. by Griqualand West; it has an area of 48,326 square miles, with a population of 207,503, of whom 77,716 are whites. It was founded by Dutch emigrants from the Cape Colony. The country was proclaimed British territory by Sir Harry Smith in 1848, but, by the convention entered into on the 23rd of February, 1854, between Sir George Clerk, Her Majesty's special commissioner, and the representatives of the people, the inhabitants were declared "to all intents and purposes a free and independent people and their Government to be treated thenceforth as a free and independent Government."

The Orange Free State is essentially a pastoral country, but the eastern part especially is admirably adapted for the cultivation of grain. Diamonds, garnets, and other precious stones are found, and rich coal and gold mines exist. The chief exports are wool, ostrich feathers, hides, diamonds, grain, &c. It possesses State property valued at nearly £1,000,000.

The legislative power is vested in the Volksraad, comprising 58 members, elected by the various constituencies into which the State is divided.

Public revenue, 1894–95 ..... £306,[illegible]
Public expenditure, 1894–95 ..... 319,22[illegible]
Public debt, 1895 ..... about 55,00[illegible]
Exports, 1895 ..... 1,515,[illegible]
Imports, 1895 ..... about 1,000,00[illegible]

Capital, Bloemfontein. Pop. (1892), 5,817.

A fund of £200,000 has been established, the interest of which, amounting to £12,000 yearly, is devoted solely to educational purposes, while the Government is also a shareholder to the amount of £70,000 in the National Bank, a flourishing institution with a paid-up capital of £100,000.

PARAGUAY, Republic of.

President, Señor Egueguiza, (25 Nov., 1894). £1,900
Foreign Secretary, José Segundo Decoud.
Minister Plenipotentiary to London and Paris, Señor Eusebio Machain.

Consul-General in England, Christopher James, 28, Eldon Street, E.C.
Consul in London, A. F. Baillie.
Consul-General, Glasgow, John Galloway.

One of the most rising States of South America, and, except Bolivia, styled by some as the "Garden of South America," the only one without any seaboard, situate between 22° 4′—27° 30′ S. lat. and 54° 32′—61° 20′ W. long. Its area is computed at 145,400 square miles, or about one-fifth larger than the United Kingdom, enclosed within the rivers Parana and Paraguay; and contains a population of about 600,000. Now that it has a settled government, Paraguay may be considered one of the most promising countries of South America; its capabilities are practically exhaustless, and the climate favourable to Europeans; the average of the thermometer for 1887 was 73°. The chief

Digitized by Google

crops are maize, rice, coffee, manioc, tobacco, sugar-cane, and oranges. Among its principal trees are several species of dye-wood, and many yielding juices or gums, as the caoutchouc or india-rubber; there is also the valuable tree Quebracho, used for tanning, and the valuable shrub called "Yerba Mate," or Paraguay tea-plant—one of its principal articles of commerce; there are an immense number of hardwood and other timber trees; medicinal plants also are very numerous. Stock-raising is the chief industry, and, there being excellent pasturage, it is capable of great development. The chief articles of export are oranges, hides, tobacco, yerbamaté, and timber. The army, 60,000 men strong in the war of 1865-72, has been reduced to 30,000 men, but there is at present no navy. A railway, 155 miles in length, belonging to an English Company, is open, but is said to be unprofitable. Revenue, 1895, $5,120 247; Expenditure, $4,992,006. Imports, 1895, £492,010; Exports, £424,290.

CAPITAL, Asuncion. Population, 35,000.

Consul in London, Don Eduardo Lembcke.

Vice-Consul, Don Eduardo Higginson.

Consul-General at Southampton, H. Guillaume.

Do., Liverpool, F. Alfonso Pezet.

Peru is an important maritime Republic of South America, situated between parallels 1° and 19° S. latitude and between 68° and 81° 20′ 45″ longitude W. On the west it is washed by the Pacific Ocean, having a coast-line of 1,300 miles. It is bounded on the north by the Republics of Ecuador and Colombia, on the east by the Brazils and Bolivia, and on the south by Bolivia and Chile.

The most northern port on the Pacific is Tumbez. *The boundary line commences a short distance north of that port; it runs southwards as far as the river Macara, following its course until about lat. 3°, long. 79° W.; thence it rises in a north-easterly direction by Andoas to Santa Rosa, which is the extreme northern part of Peru. The line then passes from the river Napo to the Brazilian frontier, which commences at the confluence of the Apaporis with the Yapura 1° 31′ 29″ S. lat., 69° 24′ 55″ W. long., thence to the point of juncture of the river Catüché with the Putumayo 2° 55′ 12″ S. lat., 69° 40′ 28″ W. long.; it thence descends, cutting the Putumayo three times, to San Antonio, 4° 13′ 21″ S. lat., 69° 54′ W. long., as fixed by the Peruvian-Brazilian Commission of 1873. The Commission of 1874 fixed the eastern boundary as follows:—The line descends the river Guaporé and Mamoré, which form the Madera, to a point half-way between the Amazon and the mouth of the Manoré, 65° 2′ S. lat.; thence it passes east to west to the river Yavari, 6° 59′ 29″ S. lat., 74° 26′ 6″ W. long., ascending that river to the Maranon (Amazon). The boundaries between Peru and Bolivia are not definitely fixed, but it is understood the line follows the river Beni to the Andes, traversing Lake Titicaca, and thence follows the Andes until it reaches the river Camerones, which river now forms the boundary between Peru and Chile, as determined by the treaty of peace between those countries in 1883.

The total area of Peru is about 455,000 square miles, being as large as England, France, Spain, and Portugal together; and its population, of which no census has been taken since 1876, is about 2,972,000, including 350,000 Indians. The country is traversed throughout its length by the Andes, running parallel to and about 60 miles distant from the Pacific coast. The region between is sandy desert, except where watered by transverse mountain streams, but capable of cultivation in the highest degree by irrigation. The valleys running to the coast are very fertile, and the mountains are rich in minerals, among which silver, quicksilver, copper, coal, and petroleum are conspicuous. The interior provinces, i.e., those on the eastern side of the Andes, are of vast extent and fertility, with a climate ranging from temperate to tropical. These regions are intersected by numerous fine rivers, forming the head streams of the Amazon, by which there is uninterrupted communication with the Atlantic. Gold is found in most of the interior and southern regions. The medicinal productions of the interior are of great value, comprising cinchona or Peruvian bark, sarsaparilla, copaiba, &c. Coffee, cocoa, india-rubber, &c., are indigenous to the country. Important mines of gold, silver, and copper exist, some of which are now being worked. The Lobos and other islands on the Pacific coast are famous as the sources whence Europe has been supplied with Peruvian guano. The deposits at Huanillos in Chile, conceded to the Peruvian Corporation, are being worked, and give a high-class guano.

An arrangement was concluded in October, 1889, by the Peruvian Government for the cancelling of its external debt, in pursuance of which the State railways, the guano, the large silver mines of Cerro de Pasco, and vast tracts of land are vested in the Peruvian Corporation. The total length of the railways held by the Peruvian Corporation and now open and working is 772 miles. There is also water communication on Lake Titicaca with Bolivia, the Peruvian Corporation owning 3 steamers, the largest being 571 tons; the navigation of the lake and of the river Desaguadero has been improved, two dredgers being at work. About 46 miles of railways are held by private companies.

The army on a peace footing consists of about 3,500 men, with a police force of about 2,400, and there are 4 war-ships. The principal imports are cotton manufactures, ironware and cutlery, woollen goods, and machinery. The chief exports are guano, cotton, hides, goat skins, sheep, and alpaca wool, sugar, silver, coffee, cocoa, vanilla, rubbers, and cinchona.

*The Republic has boundary questions with Chile (see p. 590), Bolivia and Ecuador.

The most westerly Kingdom of Europe, and a part of the great Iberian Peninsula; it lies in 37°—42° 8′ N. lat. and 6° 15′—9° 30′ W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 34,606 square miles, with a population in 1890 of 5,082,247, exclusive of the colonies. The Azores and Madeira (1,237 square miles, pop. 401,624) form part of the kingdom, which thus has a population of 4,708,178. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, and almonds. There are extensive forests of oak, chestnuts, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last from its hardness and purity is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. There is a commercial marine of 36 steamers and 433 sailing vessels, about 110,000 tonnage. Railways, 1,420 miles in extent, were open for traffic in 1892, and there are 8,079 miles of telegraph wire. For many years the national income has been considerably less than the expenditure; this deficiency has added to the national debt, which now amounts to about £31 a head of the population.

In January, 1892, the King announced that, in view of the financial condition of the country, his Majesty had resolved to relinquish, for the benefit of the Treasury, one-fifth of the amount of his civil list.

The army in 1896 consisted of about 30,000 men on a peace footing, and of 125,057 men with 264 guns on a war footing; and the navy of 39 steamers and 16 sailing vessels, many scarcely seaworthy, and about 4,898 sailors.

Estimated revenue, 1896–97	£11,044,305
Estimated expenditure, 1896–97	10,972,401

DEPENDENCIES.—These, in proportion to the mother-country, are of very great extent. The island of MADEIRA, on the N. W. coast of Africa, is much frequented by invalids from England, and is especially recommended for consumptives: there are excellent hotels, communication with the country is frequent, and there is every convenience in the way of English doctors, chaplains,

Digitized by Google

and other English necessaries. Other Portuguese possessions are the CAPE VERD ISLANDS, off the West Coast of Africa (population 107,026); PORTUGUESE GUINEA (11,600 sq. m., pop. *circ.* 1,500,000), between the Casamanca river and the "Rivière du Sud," includes the BISSAGOS ISLANDS (capital, Bolama, where there is a governor and a garrison). BISSAO, at the mouth of the river Jeba, is the principal trading depôt, and at WHYDAH, the seaport of Dahomey (French), there is a Portuguese fort; the fertile islands of ST. THOMAS and PRINCIPE, in the Gulf of Guinea (417 sq. miles, pop. 22,000); the Kingdom of ANGOLA, on the west coast of South Africa, which includes the territory of Landana and Cabenda to the north of the Congo, and the whole of the coast to the south of that river as far as Cape Frio, and has Loanda for its capital (517,000 sq. miles, pop. 3,500,000); the Province of MOZAMBIQUE, with the Lower Zambezi river, SOFALA, and DELAGOA Bay, on the East Coast of Africa (310,000 sq. m., pop. 1,500,000); GOA, DAMAN, and DIU in India (1,516 sq. miles, pop. 637,426); part of the island of TIMOR, in the East Indian Archipelago (6,294 sq. miles, pop. 300,000), and MACAO, in China, at the mouth of the Canton river (5 sq. miles, pop. 68,086). The possessions enumerated have an area of 204,848 square miles, with 2,548,872 inhabitants. In this estimate account is taken only of territories within which Portugal actually exercises some jurisdiction. Thus, whilst official statements give an extension of 659,000 square miles to Angola and Mozambique, the area is here reduced to 195,200 square miles.

The Kingdom of Roumania consists of the Moldo-Wallachian provinces formerly belonging to Turkey, but which by the Treaty of Berlin, 13 July, 1878, were recognised as an independent State, and the territory of the Dobruja added to them. On the 26th March, 1881, Roumania was raised to a Kingdom. The entire area is 46,314 square miles, with a population of about 5,500,500. The dominating religion is that of the Greek Church (4,529,000); Roman Catholics, 114,200; Protestants, 13,800; Jews, 400,000. The soil is among the richest in Europe, and, but for the fearful summer droughts, would be also the most productive. The climate is extreme, for summer heats and winter colds are intense. The agricultural produce consists of wheat, maize, millet, barley, rye, beans, and peas. Vines and fruits are abundant. The forests are of great extent and importance, but the riches of the country consist mainly in its cattle, sheep, and horses, of which immense numbers are reared on its far-stretching pastures. Minerals and precious metals are said to be abundant, but only salt and petroleum are obtained. The imports are chiefly the manufactured goods of Western Europe; the exports consist principally of wheat, barley, maize, rock-salt, spirits, hides, wood, and cattle. The total length of railways is nearly 1,700 miles, and there are 223 telegraph offices with 9,915 miles of wire.

An International Commission, created by the Treaty of Paris, 1856, and whose powers were enlarged by the Treaty of Berlin, 1878, has its seat at Galatz, and exercises sovereign powers over the navigation of the Danube: the British representative is Lieutenant-Colonel Trotter, Consul-General. Its income, principally derived from shipping dues, amounts to about £60,000 per annum. On November 10, 1892, a large dock was opened at Ibraila (Brahilov), and in 1896 a canal through the "Iron Gates" rendered the hitherto dangerous part perfectly navigable.

The field army consists, on the peace footing, of 30,000 men, but in time of war this can be raised to 158,000, and there is a militia in addition. There is also a small navy of 12 steamers.

An Empire comprising one-sixth of the territorial surface of the globe, stretching over a large portion of its northern regions, and approaching very nearly in extent to the dominion under British rule. In addition to Russia in Europe (exclusive of the Caucasus), situate between lat. 44° 28′—76° 33′ N. and 17° 40′—64° 30′ E. long., and embracing more than half of that continent, it comprehends one-third of Asia, and until lately included also a large section of North America. The empire comprises:

	English Square Miles.	Population in 1885.
Europe in Russia:—

	8,450,681	108,787,235

Total population at close of 1893, 124,000,000.

In the European parts of Russia alone the population increases annually at the rate of nearly a million and a half. The largest towns are St. Petersburg (861,303), Moscow (753,469), Warsaw (454,298), and Odessa (240,000). The various nationalities in 1882 were represented about as follows:—Russ, 69,770,000; Poles, 6,010,000; Lithuanians, 2,910,000; Germans, 1,120,000; Swedes, 270,000; Tajiks (Persians), &c., 1,125,000; Armenians, 800,000; Jews, 2,954,000; Caucasians, 2,850,000; Finns, 2,000,000; Turks and Tartars, 7,700,000; Mongols, 530,000; various, 584,000. The established religion of the empire is the Russo-Greek Church, officially called the Orthodox Catholic Faith. According to religions there are:—Greek Catholics (including Dissenters), 72,990,000; Roman Catholics, 8,910,000; Protestants, 4,766,000; Jews, 2,954,000 (a very competent authority gives the number of Jews as being nearer four millions); Mohammedans, 11,814,000; and Pagans, 450,000. European Russia consists of an immense plain; throughout its vast extent it does not contain a single mountain. The principal rivers are the Volga, Ural, Dnieper, Dniester, Don, Dvina, Duna, and Neva. The Volga is the largest river in Europe, and is navigable almost to its source. In Siberia, the Ob, Yenisei, Lena, and Amur are each larger than the Volga, with many important tributaries; and the surface along the southern borders is mountainous, rising in many places far above the limit of perpetual snow.

A great portion of Russian territory is totally unfit for cultivation; in the north the barren *tundras* are almost constantly frozen, producing only moss; of Finland lakes, see description in Almanack, p. 544; and in the south, round the head of the Caspian Sea, is an immense sandy desert steppe; whilst all the interior provinces and nearly the whole of Siberia are clothed with forests. The country between the Baltic and Black Seas, however, is eminently fertile, producing abundance of grain. The chief cereals raised are wheat, barley, oats, buckwheat, millet, and especially rye, the staple food of the inhabitants. Hemp and flax are extensively cultivated, and of late years potatoes and tobacco. The forests of European Russia are extensive, occupying an area of 460,000,000 acres. The fir, pine, birch, oak, lime, maple, and ash trees predominate. The Ural Mountains (forming the boundary between Europe and Asia), which contain nearly all the mineral riches of the country, are the principal seat of mining and metallic industry; producing gold, platinum, copper, iron of very superior quality, rock-salt, marble, and kaolin, or china-clay. Silver, gold, and lead are also obtained in large quantities from the mines in the Altai Mountains. The naphtha springs on the Caspian are annually increasing in importance, and already flood certain European markets with petroleum. An immense bed of coal, both steam and anthracite, apparently inexhaustible, has been discovered in the basin of the Donetz (between the rivers Donetz and Dnieper). Mariupol, Rostoff, and Taganrog being the outlets.

England is an excellent customer; nearly all her purchases are articles of native produce. The exports in 1895 to the United Kingdom amounted to £24,736,919, the chief articles being:—

Butter	£633,696	Hides and leather	£57,3[illegible]
Corn, wheat	5,788,941	Oil-seed cake	402,4[illegible]
,, oats	2,763,851	Ore	144,8[illegible]
,, barley	2,634,256	Petroleum, &c.	635,4[illegible]
Bristles	124,880	Seeds, all kinds	1,163,[illegible]
Flax	2,152,175	Wood and timber	3,[illegible]
Hemp	316,325	Wool, &c.	3[illegible]

On the other hand, Russia purchases but a small amount of goods produced in the United Kingdom, the total amount for the year 189[illegible] being but £10,686,333; the chief articles were:—

Alkali	£62,084	Implements & tools	£[illegible]
Coals, &c.	892,978	Machinery, all sorts	[illegible]
Chemical products	118,098	Manure	[illegible]
Cotton yarn and manufactures	336,256	Metals, all kinds	[illegible]
Herrings	236,746	Wool yarn and manufactures	[illegible]

With metallurgical and engineering factories Russia possesses many extensive manufacturing establishments for weaving, tanning, fur-dressing, &c. Linen is largely manufactured by hand-looms, the chief operations consisting in spinning and weaving flax and hemp. Woollen and worsted stuffs, fine cloths, and mixed fabrics are also produced. The chief imports are cotton, tea, and other colonial produce, iron and machinery, wool, wine, fruits and vegetables, oil, &c. The chief exports are grain (56 per cent.), raw and dressed flax, linseed, timber, hides and skins, hemp, tallow, wool, spirits, tow, and bristles.

The Russian Army has been reorganised since the Turkish War. On a peace footing over 800,000 men, with 3,400 guns, are supposed to be under arms; in European Russia, 420,000 combatants, with 2,800 guns; in the Caucasus, 250,34[illegible] combatants and 300 guns; and in Asia, 131,1[illegible] combatants, with 196 guns. On a war footing it includes altogether 2,532,496 men, with 3,400 guns. The Navy (for which an expenditure of £6,200,000 was estimated for 1897) consists of the Baltic fleet, that of the Black Sea, and of certain flo-

tillas comprising 10 battleships (8 *building*), 9 armoured cruisers (2 *building*), 2 protected cruisers (3 *building*), 3 unprotected cruisers, 12 coast defence (4 *building*), 16 torpedo vessels (1 *building*), 5 torpedo-boat destroyers, 152 torpedo boats (20 *building*), and 4 special vessels (1 *building*), with an armament of 1,348 guns.

Of railways, there were open, November, 1892, 18,670 miles. There are 5,980 post-offices, carrying, in 1887, 280,000,000 letters, &c. Of telegraphs there are 3,790 offices, with 91,000 miles of line.

The sea-going commercial marine consisted in 1893 of 948 sailing vessels and 242 steamers, of 100 tons and upwards, with a total tonnage of 492,201.

SALVADOR, REPUBLIC OF.

President, Rafael A. Gutierrez, *elected* June, 1894.
Minister for Foreign Affairs and Public Instruction, Dr. Jacinto Castellanos.
War and Marine, General Estanislao Perez.
Finance, Dr. Cornelio Lemus.
Interior, Dr. Prudentio Alfaro.
Minister in England, M. Crisanto Medina.
Cons.-Gen., Luis A. Campbell, 8 Jeffrey Sq., E.C.
Vice-Consul, Man. de Montis, 8 Jeffrey Sq., E.C.

Salvador, the smallest, though in point of population the second, of the Central American Republics, extends along the Pacific coast for 170 miles, with a general breadth of 43 miles. It contains an area of about 7,228 English square miles, and a population in 1886 of 651,130. The principal exports are coffee, indigo, tobacco, sugar, silver, balsam (known as balsam of Peru), rice, hides, cedar, and fustic. Its mineral resources are being developed, and in Cabañas gold has been discovered, carrying 79 ounces of free-milling gold to the ton. A railway 34½ miles in length connects Acajutla with Ateos, 21 miles from capital, and is being extended to Sta. Ana, the coffee centre; another line has been commenced from the port of La Union to San Miguel. The only river of importance is the Lempa. Earthquakes are frequent; the capital (now rebuilt) was entirely destroyed by one in 1873.

Revenue, 1895	£876,985
Expenditure, 1895	846,670
Imports, 1895	350,000

SAMOA (NAVIGATORS ISLANDS).

King, Malietoa Laupepa, reinstated 9 Nov., 1889.	
Chief Justice, Henry Ide (American)	£1,200
Municipal President,	£1,000

A group of islands in the Southern Pacific, near Fiji and Tonga, the largest of which are Upolu, Savaii, and Tutuila. The group has an area of 1,076 square miles and 36,240 inhabitants. Apia in Upolu, is the seat of government and the centre of trade, which is mainly in the hands of a German firm. The only export is copra.

By a treaty signed at Berlin, 14th June, 1889, Great Britain, Germany, and the United States have guaranteed the independence of Samoa, and provided for its government, the Chief Justice and Municipal President being nominated by the three Treaty Powers. The Municipality of Apia is under an elected Municipal Council of six members, whose resolutions have to be submitted to the Consuls of the Treaty Powers sitting as a Consular Board. A Land Commission, appointed by the Treaty Powers for two years to investigate all titles and claims to land in Samoa, completed its work in 1894. There is steamship communica-

tion monthly from America, and three times a month from Australia and New Zealand.

Total imports, 1895 ..... £83,768
Total exports, 1895 51,351

SAN MARINO.

A small "Republic" in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60 (20 nobles, 20 townsmen, and 20 peasants), of whom two act jointly as Regents. The area is 33 square miles, the population 8,000. There is an "army" commanded by several "generals," and titles and decorations, it is said, are bestowed freely for a consideration. The village of San Marino (pop. 1,500) occupies the slope of Mount Titan, and has a castle, fortified by King Berengar of Lombardy, a fine church, and a theatre. Agriculture and viticulture flourish. By a treaty concluded in 1872 the Republic has placed itself under the protection of Italy.

SERVIA.

King, Alexander (Obrenovitch), *b.* (2) 14 August, 1876; succeeded his father, King Milan (who abdicated), 6 March, 1889. Took royal authority into his own hands (1st) 13th April, 1893.
Premier and Minister of Foreign Affairs, M. Stojan Novakovitch.
Interior, M. Dimitri Marinkovitch.
Public Works, Col. Kosta Radisavljevitch.
Finance, M. Stefan D. Popovitch.
Justice, M. Aaron Ninchitch.
Public Instruction, M. Lioubomir Kovachevitch.
War, Colonel Dragoutin Franassovitch.
Commerce, M. Vouchko Stoyanovitch.

Envoy Ext. and Min. Plen. in London, M. Chedomille Mijatovitch, 27 Pembroke Gdns., S.W.
Consul-General in London, H. W. Christmas, 42A Bloomsbury Square, W.C.
Consul in Manchester, Otto Baerlein.

A Kingdom of Eastern Europe, governed by an hereditary sovereign. By the constitution of 1889 a "Skupstchina," a parliament elected by ballot, represented the people. This constitution was suspended 21 May, 1894, by Royal decree and that of 1869 provisionally restored. It is separated from Hungary by the Danube and Save. By the Berlin Treaty, 1878, it received a large accession of territory, and now has an area estimated at 18,757 square miles, with a population in 1895 of 2,314,153. The surface of the country is mountainous, containing the remains of formerly extensive forests and uncultivated heaths. Agriculture is carried on in a somewhat primitive fashion. The principal crops are maize for home consumption, and wheat for export; flax, hemp, and tobacco are also grown, and silk-culture is carried on to a limited extent. The production of wine has suffered severely from Phylloxera and bad seasons, and of late the country has been compelled to import grapes and wine from Macedonia. The cultivation of prunes is very extensive, and these are sent chiefly to Austria-Hungary, Germany, and the United States. The live stock (1895) included 166,940 horses, 910,726 cattle, 3,566,713 sheep and goats, and 894,564 pigs. Lead, zinc, quicksilver, antimony, copper, iron, and coal are found. Carpet-weaving and embroidery, and the making of jewellery and filigree work, are of some importance. The imports consist in the main of cottons, sugar, and colonial goods, hardware, woollens, &c.; the exports of dried prunes (11·6 per cent.), pigs and wool, besides wheat, wine, hides, cattle, and horses. The bulk of the trade is with Austria. The direct trade of Servia with the U. K. is small: the imports in 1895 were valued at £97,400, and the exports nil. There were (1894) 624 kilometres of railway, and 3,174 kilometres of telegraph, with 111 post offices and 392 kils. of telephone. The army, on a peace footing, numbers 13,000 men, with 144 guns. On a war footing it includes a field force (70,000 men, 264 guns), dépôts (25,000 men, 36 guns), a reserve (58,000 men, 220 guns), and a levy-en-masse. Every man between 18 and 50 years of age can be called to arms. Education is compulsory and free, and has been making rapid strides of late years.

Financial Delegate, Nicasio E. Jauralde, 37 New Broad Street, E.C.

A Kingdom situate in the south-west of Europe, between 36°—43° 45′ N. lat. and 4° 25′ E.—9° 20′ W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic. It was formerly divided into 14 kingdoms (now forming 49 provinces); the Ancient Provinces, still best understood, are New Castile, La Mancha, Old Castile, Leon, Asturias, Galicia, Estremadura, Andalusia, Murcia, Valencia, Aragon, Catalonia, Basque Provinces, with the Canary and Balearic Isles, comprising an area of 196,173 English square miles, and a population in 1887 of 17,550,216. The Constitution upon which the present government is formed is dated 30 June, 1876. The interior of the peninsula consists of an elevated table-land, surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho. Spain is rich in minerals, especially iron, copper, and lead, and as capital is attracted its resources will be developed. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jeres, the well-known sherry, and tent wines are made; in the south-east, the Malaga and Alicante; these are the best known, but there are many others which only require to be brought before the English public in order to secure a market. Now that the country is in a more settled condition, there is little doubt that it will attract travellers, and then become better known. Most of the principal towns now possess very fair hotel accommodation. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery, and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, cattle, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c.; trade was for many years mostly confined to France and Great Britain, but Germany and the United States are now competing for a share. Home trade is rigidly protected by high customs duties.

The principal exports to the United Kingdom in 1895 were:—

Copper ore	£1,372,234	Nuts	£145,909
Cork and wood	135,890	Quicksilver	273,525
Almonds	181,320	Esparto, &c.	296,540
Grapes	353,569	Wine	882,167
Iron ore	2,431,134	Onions	211,386
Lead	894,349	Pyrites (iron and copper)	952,253
Oranges & lemons	1,860,202	Silver ore	210,441
Raisins	461,922		

And the chief imports from the United Kingdom:—

Alkali	£109,920	Linens, &c.	£197,095
Chemical products	76,500	Machinery, all sorts	411,390
Coal and coke	856,936	Manure	341,081
Cotton manufacts.	268,270	Metals, all sorts	303,027
Jute	72,627	Wool, &c.	306,690

The army on the peace footing consists of 120,000 men. On a war footing it is raised to 180,000 men, with 510 guns. The colonial forces, including militia, number 236,000. Service is compulsory on all for 8 years in Spain, or 4 years in the colonies. The navy consists of 126 steam vessels, including 7 ironclads, and about 22,000 men. During 1895, 36,965 vessels (tonnage 25,779,442) entered and cleared at Spanish ports.

Nearly all the 49 Provinces are now connected by railways, of which about 6,070 miles have been completed, and there are 14,710 miles of telegraph.

The national debt has of late years been in a large measure consolidated, and now amounts to £237,658,372, on which interest is paid mostly at the rate of 4 per cent. In 1836 an Extraordinary Budget was passed, appropriating a sum of £8,842,000, realisable in six years as follows: £2,880,000 for the navy; £2,229,027 for the army; and £2,489,929 for the payment of the railway subventions; the remainder to pay off the Rothschild advance of 1870, and the Tobacco Company's advance of 1887. The total sum is derived from an advance of £3,562,000 from the Rothschilds on the security of the Almaden quicksilver mines; £2,400,000 from the Tobacco Company for a renewal of this concession, and from a new tax on navigation calculated to produce £2,880,000 in six years, the proceeds of which are to be devoted exclusively to naval expenditure.

DEPENDENCIES.—The Spanish Colonial Empire is but a shadow of what it was in former times; still it is of considerable importance to the mother-country; CUBA (where about 200,000 Spanish troops under General Weyler are, apparently without much success, endeavouring to stamp out a revolution) is an island of the Antilles, with Havanna as its capital, having a national debt of $325,348,000, on which Spain pays $20,653,763 annually; the maximum revenue of the colony is only about $20,000,000, and after the revolution is ended, there will be for some years an annual deficit of about £6,000,000; and PORTO RICO (3,473 square miles, population 2,275,997) possesses capabilities which are very considerable. In Africa, Spain possesses but a small territory, for the "protectorate" declared in the year 1884 over the coast of the barren SAHARA between Capes Bojador and Blanco may prove of service to her Canarian fishermen, and lead to some trade at one or two factories, but is not otherwise of much importance. In Morocco, Spain holds CEUTA and a few other places, included under the name of "Presidios," as well as the small town of IFNI on the west coast; in the Gulf of Guinea, the islands of FERNANDO PO and ANNOBON, with the coast around CORISCO BAY (in all, 1,500 sq. miles, with a population of 50,000). Far more important are the PHILIPPINE ISLANDS in the East Indies (114,360 sq. miles, pop. 7,636,000), whence the United Kingdom imports sugar and hemp, and here, too, an attempt at autonomy has assumed serious dimensions, and many troops were sent monthly (in 1896 to Manila to reinforce the effective of 17,000 men. In the Pacific, Spain is the acknowledged owner of the MARIANA ISLANDS (440 sq. miles, pop. 8,665), and her claim to the PELEWS (Palao) and to the CAROLINAS (1,450 sq. miles, pop. 36,000) has recently been allowed by Germany. These islands were discovered by Spanish navigators in the 16th century, and have always been included in Spanish documents as a portion of the Colonial Empire, but they were never effectively occupied. The conflicting claims of Spain and Germany were referred to the arbitration of the Pope, and an amicable arrangement effected. Including these islands, the colonial dependencies of Spain have an area of 167,230 square miles, with a population of 8,007,000.

Exports from U. K. to Spanish col., 1895, £2,148,961

(For NORWAY, see p. 563.)

King, Oscar II., *born* 21 January, 1829; *succ.* 18 September, 1872; *married* 6 June, 1857, Sophia, daughter of the late Duke William of Nassau, *born* 9 July, 1836 (and has issue, 4 sons).

Heir Apparent, Oscar Gustaf Adolf, Duke of Wermland, Crown Prince, *b.* 16 June, 1858; *m.* 20 Sept., 1881, Victoria, dau. of Grand Duke of Baden, *born* 7 August, 1862.

MINISTRY FOR SWEDEN.

Prime Minister, E. G. Boström.
Min. Foreign Affairs, Count L. Douglas.
Justice, P. L. L. Annerstedt.
War, Baron A. E. Rappe.
Marine, J. C. E. Christerson.
Interior, T. E. von Krusentjerna.
Instruction, G. F. Gilljam.
Finance, C. R. Wersäll.
Ministers sans porte feuille, Baron A. L. E. Åkerhielm, S. H. Wikblad.

Envoy Ext. and Minister Plenipotentiary in London, Count Carl Lewenhaupt, 52 Pont Street, S.W.
Secretary of Legation, O. Gude.
Consul-General, Carl Juhlin-Dannfelt, 24 Great Winchester Street, E.C.
Vice-Consul, C. M. Fallenius.

The Kingdoms of Sweden and Norway, now united under one sovereign, embrace between them the entire north-western peninsula of Europe, usually called Scandinavia, situate between lat. 55° 20′—70° 12′ N. and long. 4° 37′—31° E., bounded by the Baltic Sea and Gulf of Bothnia on the east, and the Atlantic on the west.

Digitized by Google

Sweden comprises the eastern half of the peninsula, and, except the capital, is divided into 24 governments, "Län," with an area of 172,877 square miles, and a population, Dec. 1895, of 4,919,260, nearly all of whom are Protestants, and for the most part well educated. About 60 per cent. of the population are devoted to agriculture, about 270,000 being owners of the land they cultivate. The coast-line is about 1,550 miles in extent. The country for the most part is flat, with pleasant undulations, rising in the north-west to the Kölen Mountains, which separate Sweden from Norway, and may be divided into three separate districts; the northern, forest; central, mining; the southern, agricultural. The lakes cover about one-twelfth of the surface. The climate in the south is favourable for producing grain. The principal articles of cultivation are the various cereals—oats, rye, barley, wheat—and potatoes; a large quantity of oats are annually exported. The forests are very extensive, covering nearly one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, as supplying not only pitch and tar, but also the chief fuel. The mineral products are extremely rich; iron of excellent quality, that known as the Dannemora iron being converted into the finest steel; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Lulea to Gellivare, *i.e.*, about 120 English miles. Considerable mines of coal are being worked in Scania. The chief imports are coffee, sugar, wine, tobacco, and other ordinary colonial produce, coals, cloth, yarn, wool, cotton, hides, salt; oils, wheat, rye, pork, and machinery. The chief articles of export are timber, oats, cattle, butter, iron, steel, paper, matches, iron and zinc ores, &c. The chief exports to Great Britain in 1895 were:

Butter	£1,644,111	Matches	£203,196
Corn	320,697	Paper & rags	891,317
Iron & manufact.	1,335,036	Timber	3,654,450

and the chief imports from Great Britain in 1895 were:

Coal	£878,433	Metals	£344,317
Cottons	391,701	Sugar	71,049
Machinery	183,743	Wool & Woollens	565,169

Commercial travellers in Sweden are compelled to take out a licence costing 100 crowns a month, or they incur the risk of being fined.

Railways 6,058 miles in length (of which 2,030 are the property of the State) were open in January, 1896; and 5,339 miles of telegraph (except the railway telegraph), 166 stations, and 1,030 railway telegraph stations. Of telephone wires there were in 1896 58,562 miles.

The field army of Sweden numbers 39,553 officers and men, with 240 guns and 6,852 horses; the militia and Landstorm, 413,000 more. The navy consists of 55 steamers and 218 guns, 16 being ironclads, and 13 for coast defence, with 6 sailing vessels. The officers and men of the navy number about 6,500, with a reserve of 110 officers.

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50′—47° 84′ N. lat. and 5° 58′—10° 30′ E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,469 square miles, with a population of 2,933,334 in 1888, who are divided between Roman Catholics, 41 per cent., and Protestants, 59 per cent., Jews numbering 7,400, and others 11,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romanshe (in the Grisons),

Digitized by Google

1½ per cent. The most important cities are Zürich, pop. (1896) 147,877, Geneva, 80,778, and Basle, 88,853. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along the whole of its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-sixth of the whole surface. The manufactures consist chiefly of silks, cottons, linen, lace, thread, woollens, &c.; clocks and watches have long been the staple products of Geneva and Neufchâtel, while leather, gloves, pottery, tobacco, and snuff, cheese, &c., are made. Being an inland country, the direct trade with the United Kingdom is comparatively small. In 1894 there were 2,407 miles of railway in working order, and 4,693 miles of telegraph.

The military establishment on a war footing, including Landwehr, consists of 209,603 men—staff 1,035, infantry 160,966, cavalry 6,048, artillery 29,597, engineers 7,357, others 4,600. To this number must be added the Landsturm, or final reserve, of 276,161 more.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 147 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for three years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of £540; the Vice-President and other members of the Federal Council £480 each. The members of the Federal Council are elected for three years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for three years. Not more than one of the same canton may be elected member of the Federal Council.

Public revenue, 1895	£3,240,223

TIBET (see p. 472).

TONGA ISLANDS (FRIENDLY ISLANDS).

King, Jioaji Tubou II., *b.* 18 June, 1874.

A group of islands in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and 17,500 inhabitants. The limits of the kingdom are between 15° and 23° 30′ south, and 173° and 177° west, and it is composed of three groups of islands, called Tongatabu, Haapai, and Vavau. At the former is the seat of government. Soil generally is fertile; the principal exports are copra, green fruit, kava, and whale oil. Most of the imports come from British ports, whilst the majority of the export trade is shipped in foreign bottoms.

Total imports, 1894	£82,830
Total exports, 1894	67,632
Imports from British Possessions, 1894	76,351
Exports to do. do. 1894	48,090
H. M. Deputy Commissioner and Vice-Consul, R. B. Leefe (*allowance as V.-Cons.*)	£50

TONQUIN (see p. 472).

TRANSVAAL, or S. AFRICAN REPUBLIC.

President of the Republic and Chairman of the "Uitvoerend Raad" (Executive), Stephanus J. Paul Krüger, *b.* 10 Oct., 1825; *re-elected* April, 1893, for five years.
Vice-President, General P. J. Joubert.
Chairman of 1st Volksraad, F. G. Wolmarans.
Do. 2nd do. S. Malherbe.
Secretary of State, Dr. W. J. Leyds.

Consul-General in England, Montagu White, Amberley House, Norfolk Street, Strand.
Vice-Consul, Baron A. Quarles de Quarles.

The larger portion of the South African Republic lies to the west of the Drakenberge (Mt Mauch 8,725 feet) and slopes down to the Limpopo river and Bechuanaland; a smaller section lies to the east of that range towards the Indian Ocean. The Republic is shut in by British territory on all sides, except along the greater part of its eastern frontier, where it is closed in by Portuguese territory from having direct access to the sea. The area (including Swaziland, 5,560 sq. m.) amounts to 119,200 sq. miles; the population probably exceeds 750,000, of whom only 150,000 are whites. The latter include 63,000 Transvaal Boers and 87,000 Uitlanders, 80 per cent. of whom are probably British subjects. In 1896, 451,801 natives paid the hut-tax.

Steppes and bush predominate and favour pastoral industries, whilst agriculture labours under many drawbacks. Gold, first discovered in 1871, constitutes the wealth of the country, coal and silver are also found, whilst iron ores and other metals are known to exist. Railways connect the Republic with Delagoa Bay, Durban and the Cape: total length open for traffic (1896) 809 miles; building 159 miles. Of the commerce 70 per cent. is with Cape Colony.

The legislative power is vested in a First Volksraad, elected by first class burghers, and a Second Volksraad, of no actual power, elected by the second class burghers. The privileges of First Class burghers are confined almost exclusively to white persons, who resided in the Republic prior to 1876, and their descendants. Naturalised aliens and their children enjoy the very restricted privileges of Second Class burghers, whilst the bulk of the white population are without political rights. The President is elected for 5 years by the First Class burghers.

The Transvaal or South African Republic was founded in 1840 by Boers who, dissatisfied with

Digitized by Google

British rule, had migrated from Cape Colony, and its independence was recognised by the British Crown in 1852. In 1877, when Sekukuni had defeated the Boers, and it was feared that the whole of South Africa might become involved in a disastrous native war, Sir Theophilus Shepstone was despatched to the Transvaal. He found the public treasury empty, and the country in a state of anarchy; to save it from further disaster he proclaimed it British territory. Protests against this usurpation were unheeded, and on Dec. 16, 1880, at Heidelberg, the flag of the Republic was once more hoisted, and after the battle of Majuba Hill (Feb. 27, 1881) Britain once more recognised its independence. By the convention of Feb. 27, 1884, Britain merely retains the power of vetoing any treaty which the Republic may make with all foreign powers, except the Orange Free State. Swaziland was placed under the administration of the Republic in 1894, the rights of the natives (who retain their King) being safeguarded. Dr. Jameson's invasion of the Republic, in support of an expected rising of a portion of the foreign population at Johannesburg, speedily came to an end with the surrender of the invaders on January 1, 1869.

The chief towns are Johannesburg, population (1895), 102,714, of whom 51,225 are Whites, 44,396 Kaffirs, and 7,063 half-breeds; Pretoria, 12,000; Potchefstroom, 4,000; and Klerksdorp, 2,500.

The Budget for 1896-7 is full of interest, for the incursion above referred to ended in the addition of £212,000 to the Transvaal treasury. Of the total revenue the *Times* estimates that seven-ninths are contributed by the Uitlanders. The war expenditure amounts to £943,510.

Public revenue, 1893, £1,702,685; 1896-7	£4,462,193

TRIPOLI.

Governor-Gen., Narnyk Bey, *appointed* June, 1896.

A Vilayet, or province of the Ottoman Empire, on the northern coast of Africa, and the most easterly of the States of Barbary, comprises the four sub-provinces or Mutessarafliks of Tripoli, Khoms, Jabel and Fezzan. Benghazi, which formerly was part of the vilayet, was placed, in 1875, for administrative purposes, directly under Constantinople. It has an area of 399,000 square miles, and a population of 1,000,000, but this is uncertain. There are no rivers in the country, and, the rainfall being precarious, an average harvest can only be reckoned on every four or five years. The ancient ruins in Cyrenica, *i.e.*, Leptis Magna, Cyrene, Barca, Ptolemais, and Apollonia, are interesting to explorers. The military force of the country now numbers about 10,000 men. The revenue is chiefly raised by a poll-tax, regulated according to the wealth of each individual, and by tithes. Principal articles of import: metals, British and other European manufactures, tea, beads, wines and spirits, besides a number of articles for barter in Wadai, Bornu, and the Soudan, whither caravans proceed regularly from Tripoli. The principal articles of export are ostrich feathers, ivory, skins, sponges, hides, esparto grass, cattle and horses. The town of Benghazi has a population of about 15,000, consisting of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests.

Total imports, 1895	£407,000
Total exports, 1895	345,380
Imports from United Kingdom, 1895	73,889
Exports to United Kingdom, 1895	229,982

CAPITAL, Tripoli. Population, about 40,000.

TUNIS.

Bey, H.H. Sidi Ali Pasha; *born* 1817; *suc.* 28 October, 1882.

Heir Presumptive, his brother, Taib Bey, *born* 1821.

French Resident General, M. Millet (14th Nov. 1894).

The Regency of Tunis, formerly a tributary dependency of the Ottoman Empire, may now be considered an informally annexed dependency of France, nominally under the dominion of the Bey, but in reality under the control of a French Resident. By treaty, 12 May, 1881, "the occupation is to cease when the French and Tunisian authorities recognize by common accord that the local government is capable of maintaining order." By a convention signed 10 July, 1882, France administers the country and collects the taxes in the name of the Bey, who is granted a civil list of £37,500, and the princes a sum of £30,000. It is in the north of Africa, situated on the Mediterranean, east of Algeria, between lat. 32° 20′—37° 25′ N. and long. 7° 40′—11° 15′ E. It comprises an area of 44,920 square miles, and has about 1,500,000 inhabitants, of which there are about 25,000 Europeans.

The chief town, Tunis, is the largest and most commercial city of Barbary, with a population of 145,000, of whom 45,000 are Jews and 28,000 Christians (8,000 Italians, 7,000 Maltese, and 3,000 French). It possesses considerable manufactures of silk and woollen stuffs, shawls, carpets, mantles, fez caps, bernouses, also otto of roses and jessamin. The chief exports are grain, oil, wool, and esparto grass. N.E. of Tunis is the site of the ancient city of Carthage. There are 258 miles of railway and 1,245 of telegraph.

TURKEY (The Ottoman Empire).

Sultan, Abdul Hamid II., *b.* 21 September, 1842; *proclaimed* 31 August, 1876.
Heir Presumptive, his brother, Mehemmed Reshad Effendi, *born* 3 Nov., 1844.
Prime Minister (*Grand Visier*), Khalil Rifaat Pacha.
Foreign Affs. (*Khardjié-Nazири*), Tewfik Pacha.
Interior, Memduh Pacha.
Finance, Ahmed Nazif Pacha.
Justice, Abdurrahman Pacha.
Public Instruction, Zuhdi Pacha.
Marine, Hassan Pacha.
War, Riza Pacha.
Public Works, Mahmud Djelaleddin Pacha.
Pious Foundations (*Evkafs*), Garlib Pacha.
President of Council of State, Said Pacha.
Governor Gen. of Crete, Georgi Pacha Bérovitch.

Ambassador in London, Costaki Pacha Anthropoulos, 1 Bryanston Square, W.
Councillor of Embassy, Rifaat Bey.
1st Sec., Phédon Enotiadis Bey.
Naval Attaché, Captain Ghalib Bey.
Consul-General, Emin Effendi Férédjullah, 7 Union Court, Old Broad Street, E.C.

This Empire (about which so little good has been said lately owing to the disturbances in Armenia, see p. 591, and throughout the dominions, which from the decadent state of internal machinery, have been allowed to go on unchecked or perhaps encouraged, consists of the following districts:—

I. Turkey in Europe, formerly very extensive, is now reduced to 66,500 square miles, with a population of 4,668,000. (This, however, does not include Bulgaria, Eastern Roumelia, and Bosnia, which jointly have an area of 58,739 square miles, and a population of 4,320,110.) The total population includes about 700,000 Turks, 1,500,000 Albanians, and 1,300,000 Greeks, Bulgarians, and Wallachians. About 2,000,000 are Mohammedans. A great part of the surface is covered with mountains of moderate elevation. Since the Balkans no longer lie within the limits of the empire (although Turkey is entitled to occupy their passes in case of war), the loftiest mountains are those of the Rhodope or Despoto Dagh (7,464 ft.) in the east, and the mountain-ranges of Albania in the west. To the latter belongs the Skhar Dagh (10,007 ft.), the culminating point of the whole Balkan peninsula. Rivers are numerous, the principal of which are the Vardar, the Struma, and the Maritza. The soil is for the most part fertile, but owing to various causes little progress has been made in agriculture. The cultivated products are maize, rice, cotton, barley, millet, sesame and other oil-seeds, and tobacco; the natural products are the pine, beech, oak, lime, and ash, with the palm, maple, sycamore, walnut, chestnut, carob, box, myrtle, laurel, &c., south of the Balkans; large forests of pine and fir in the north-west; the olive, orange, citron, vine, peach, plum, and fruit trees in Albania. The breeding of sheep is carried on extensively, and wool constitutes an important article of trade. The mineral products are iron in large quantity, lead blended with silver, copper, sulphur, salt, alum, and coal. Its manufactures are almost entirely domestic, such as woollen and cotton stuffs, carpets, shawls, leather, firearms, with dyeing and printing works. In Europe, 838 miles of railway are being worked, and 1,136 in Asia, and about 1,000 miles are being constructed in Europe and Asia.

II. Turkey in Asia, the larger of the two divisions, comprises Asia Minor, Syria, including Palestine, the greater part of Armenia (where the recent massacres and reprisals originated), and Kurdistan, Mesopotamia (the valley of the Euphrates and Tigris), and the western portion of Arabia, bordering the Red Sea, with the district of El Hasa on the eastern side of the Persian Gulf; having a total area of 680,000 square miles, and an estimated population of 16,333,000 inhabitants. To this number must be added the autonomous island of Samos (180 sq. miles, pop. 40,513), and Cyprus (see p. 526), which pays an annual tribute. Of the total population about 6,800,000 are Turks, 5,300,000 Syrians and Arabs, 1,000,000 Greeks, and 12,000,000 Mohammedans.

In Africa, Turkey rules Tripoli and Barka (399,000 sq. miles, pop. 1,010,000), and levies a heavy tribute upon Egypt.

Nominally, therefore, the Turkish Empire has an area of 1,710,000 square miles, with about 39,500,000 inhabitants, but of the vast territories only 1,145,500 square miles, with 22,011,000 inhabitants, are under the direct rule of the Turks, the rest paying a tribute or merely acknowledging the suzerainty of the Porte.

The exports include tobacco, cereals, fruits, silk, opium, mohair, cotton, coffee, skins, wool, oil-seeds, valonia, carpets, &c., and are largely derived from the Asiatic provinces. Recently large quantities of wine and of raisins for the manufacture of wine have been exported. Among the imports, cotton and woollen manufactures take the foremost rank.

The principal imports to the United Kingdom in 1895 were:—

Corn	£1,739,466	Opium	£183,291
Dye-stuffs	322,329	Seeds	262,387
Figs and raisins	561,990	Wool	1,368,291
Olive oil	119,152	Woollens	227,633

and the chief articles sent by this country to Turkey in 1895 were:—

Coal	£237,122	Machinery	£90,647
Cotton yarn	577 020	Metals	229 170
Cottons	3,387,654	Woollens	344,879

The finances of Turkey are in anything but a satisfactory condition. In 1876 (5 Oct.) the Empire declared itself bankrupt, but the creditors came to an arrangement, and certain revenues (stamps, duties on salt, spirits, silk, fish, and a portion of the duty on tobacco) were assigned to them in payment of interest on a very much reduced scale, and towards a sinking fund. In March, 1889, the debt included priority bonds held by Galata bankers (£6,071,260); consolidated stock (£80,621,120); debt guaranteed by France and England, or secured upon the Egyptian tribute (£13,739,250); railway bonds (£13,868,623), an internal debt (about £18,000,000), and the balance of £32,000,000, which Russia claims as a war indemnity.

Russian War Indemnity, payable by yearly instalments of £318,180 sterling	£Stg.32,100,000	
Indemnity to Russian Subjects, payable by yearly instalments of £T.50,000	318,180	
Original Total		£32,418,180
Russian War Indemnity, paid to Oct. 13th, 1889, £Stg.1,323,700		
Indemnity to Russian Subjects, paid to Oct. 13th, 1889	90,910	1,614,610
Balance due		£30,803,570

It was arranged by the Berlin treaty that Bulgaria, Servia, Montenegro, and Greece should take upon themselves a portion of the Turkish debt, but

Digitized by Google

little appears to have been received from these emancipated or aggrandized States. The tribute from Eastern Roumelia, fixed by Organic Statute at £218,180, but since reduced to £138,200, is, as a rule, punctually paid by the Bulgarian Government.

The active army on a peace footing numbers (actually) 10,000 officers and 170,000 non-commissioned officers and men, and is composed of 292 battalions of infantry, 202 squadrons of cavalry, 165 field batteries, 46 mountain batteries, 15 horse batteries, 31 companies of engineers, and 1,338 guns, besides 132 companies of garrison artillery. These are formed into seven army corps, with headquarters at Constantinople, Adrianople, Monastir, Erzeroum, Damascus, Baghdad, and Sana (Turkish Arabia), an independent division at Tripoli, another in the Hedjaz, and a brigade in Crete. In time of war these can be supplemented by twelve army corps of redifs, and an indefinite quantity of *mustahfiz*. It is also proposed to form 60 regiments of local militia (Hamidieh cavalry) of which 60 are already enrolled, and in case of emergency it is probable that over 1,000,000 men of all categories could be called to arms.

The navy consists of 102 steamers (including 18 ironclads) and 25 torpedo-boats, with a total peace strength of about 15,000 men.

No statistics of the commercial marine of Turkey exist. There are but three companies of sea-going commercial steamers, viz.:—the "Makhsoussé," the "Courtdji," and the "Esrayan."

A Federal Republic, consisting of 44 partially independent States, 1 Federal District, 5 organized and 1 unorganized Territory, occupies the central portion of North America, between the Atlantic and Pacific Oceans, in lat. 25°—49° N. and long. 67°—124° 30′ W. The area is estimated at 3,581,885 square miles, of which rivers and lakes cover 38,400 square miles. This area includes the vast district of Alaska, in the extreme north-west of the continent, purchased from Russia, 18th October, 1867, comprising 577,390 square miles. About one-third of the country is estimated to be in a state of cultivation. The population of the whole of the States and Territories, according to the Census of 1890, was 62,622,250. In 1892 the Indians on reservation numbered 133,382; off reservation, 115,891 (not including 58,806 civilized Indians); Chinese, 107,475; Japanese, 2,039; and Alaska, 31,795 (23,274 Indians); in addition to which figures no official data will be given before the census of 1900. Every country under Heaven is represented. The increase in the ten years, 1880-1890, was 12,466,467.

Its coast-line on both oceans is reckoned to have a length of about 13,200 miles, excluding the numerous bays and sounds, besides 3,620 miles on the great lakes. The principal river is the mighty Mississippi-Missouri, formed by the confluence of these two noble streams, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico; with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high tableland, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward, the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilization. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance copper, iron, coal, lime, salt, and lead, which in Missouri, Colorado, and Idaho appear inexhaustible; there are also rich lead-mines in Illinois and Wisconsin. California produces silver, copper, and lead, and gold in great abundance; it is also the largest producer of quicksilver in the U.S.; quicksilver is also found in Oregon and Utah, and coal, the supply of which is said to equal that of any country in the world. A correspondent writes to say that in California the increase in the produce of wine is so great that the value will probably equal that of the minerals. Nitre is found in Kentucky, Tennessee, and Virginia. The salt-springs are numerous and copious, and appear almost inexhaustible.

The financial condition of the United States of America exerts a great influence on that of other nations. The extensive trade transacted by the Union with all parts of the world necessarily reacts on the exchanges of the countries with which business is engaged in. The following is a statement of the debt on the 1st October, 1896:—

Two per cent. bonds	$25,364,500
Four per cent. bonds and certificates	721,999,760
Five per cent. bonds	100,000,000
Pacific Railway Bonds, at 6 per cent.	64,623,512
Debt on which interest has ceased since maturity	1,621,790
Debt bearing no interest	372,471,636
Certificates and Treasury notes, offset by cash	564,524,323
Total debt	1,850,605,521
Less cash and reserve in Treasury	805,678,778
Actual indebtedness	$1,044,926,743

Digitized by Google

On Oct. 1, 1895, the actual indebtedness was $985,713,148.

The total decrease in the debt since August 31, 1865, when, after deducting the cash in the treasury, it amounted to $2,756,431,571, to Oct. 1, 1896, has been $1,711,504,828.

Balance Sheet for Year ending June 30, 1896.

RECEIPTS.

Customs	$160,021,752
Internal revenue	146,762,865
Miscellaneous sources	20,191,583
	$326,976,200

EXPENDITURE.

Civil service and miscellaneous	$87,216,235
War department	50,830,921
Navy department	27,147,732
Indians	12,165,528
Pensions	139,434,001
Interest on public debt	35,385,029
For the sinking fund	5,333,350
	$357,512,796

The total income for the previous year was $313,390,075, and the expenditure, including sinking fund, $357,331,664.

The NAVY of the United States on the 1st November, 1896, consisted of 5 battleships; 2 armoured, 13 protected, and 10 unprotected cruisers, 19 coast defence, 2 torpedo vessels, and 3 torpedo boats, with 6 battleships and 19 torpedo boats building. Enlisted men (active list), 11,000; commissioned officers (active list), 1,243; warrant officers (active list), 206.

Marine Corps:—Commiss. officers (active list), 76; privates & non-comm. officers (do.), 2,600.

The ARMY (June 30, 1896) consists of 2,169 officers and 24,869 enlisted men.

The Government of the United States is, by the Constitution, intrusted to three separate authorities—the Executive, the Legislative, and the Judicial. The Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the legislature thereof directs, a number of electors, equal to the whole number of Senators and representatives to which the State may be entitled in the Congress; but no Senator or representative, or any one holding office under Government shall be appointed an elector. The Electors for each State meet at their respective State Capitals on a day appointed, and there vote for a President by ballot. The ballots are then sent to Washington, and opened by the President of the Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex-officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, and others, so that the State can never be without a Head or Ruler.

AREA AND POPULATION OF EACH STATE AND TERRITORY IN THE UNITED STATES, AND DATE OF ADMISSION OF NEW STATES INTO THE UNION.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. Two Senators from each State are elected by the Legislature thereof for the term of six years; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population, at present 1 for 173,901. The Senate consists of 90 members, and the House of Representatives, 1896, of 357 representatives and territorial delegates.

The Supreme Judicial Authority is vested in a Chief Justice and eight Justices, who are appointed by the President by and with the advice and consent of the Senate, to hold their offices during good behaviour.

Our trade with the United States is to that country of the most satisfactory kind, as nearly all the goods received from there are of native growth or manufacture. England is her best customer. The chief articles received from the U.S. in the year 1894 were:—

Animals, living	£6,031,418	Iron and steel mfs.	£694,261
Bacon and hams	7,283,575	Lard	2,830,785
Beef (fresh)	3,450,184	Leather	2,725,930
Cheese	1,099,283	Manures	379,203
Copper, &c.	1,968,284	Oil, &c.	912,732
Corn, wheat	7,760,967	Oil seed cake	855,515
„ Maize	3,501,308	Paraffin	718,208
Wheatmeal & flour	5,384,658	Petroleum	2,683,174
„ Other kinds	611,562	Skins and furs	621,658
Cotton	22,766,427	Sugar	74,685
Fish	750,270	Tallow & Stearine	101,688
Fruit	431,987	Tobacco	2,547,252
		Wood, all kinds	2,112,856

And the chief items imported from the United Kingdom in the year 1895 were the following:—

Alkali	£769,644	Glass manufts.	124,854
Apparel	158,832	Hardwares, &c.	191,006
Bleaching mater'ls	317,089	Jute	1,045,964
Books	301,448	Linen, &c.	858,691
Cement, clay, &c.	344,586	Machinery	584,808
Chemical products	645,407	Metals, all kinds	3,705,701
Coal, &c.	853,202	Materials for paper	820,693
Cotton manufts.	2,601,456	Salt	134,658
Earthen and china ware	955,593	Silk and manufts.	354,809
Fish	180,569	Skins and furs	812,830
Flax & Hemp	174,631	Wool and yarn	810,019
		Woollen manufts	6,683,638

Postal.—The number of Post Offices in the United States, June 30, 1896, was 70,360. The postal revenue was $82,499,208. The number of inland money orders issued was 23,962,053, and the amount $172,100,649·02.

Of international money orders the number issued was 985,799, and the value $13,852,615·74.

Railways.—The total mileage of railways in the U. S. on June 30, 1895, was 180,657·47, being an increase during the year of 1,948·92 miles.

Mercantile Marine.—On July 1, 1896, it consisted of 22,908 vessels, of which 6,595 were steamers, and 16,313 other than steamers.

Mines.—In 1893 the U. S. produced 60,000,000 ounces of silver, as follows:—

Arizona	2,935,700	Nevada	1,561,300
California	470,100	New Mexico	459,400
Colorado	25,838,600	Utah	7,196,300
Idaho	3,914,600	All other States	674,000
Montana	10,945,000		

The total imports and domestic exports, and imports and exports, to and from the U. K., for the year ending June 30, 1896, were as follows:—

Total imports (merchandise)	$779,724,674
Total domestic exports	863,200,487
Imports from United Kingdom (1896)	169,963,434
Domestic Exports to U. K. (1896)	401,145,205

COMMERCE OF THE UNITED STATES.

URUGUAY.

President, Don Juan Idiarte Borda, *elected* 21 March, 1894, for four years.
Minister of Foreign Affairs, Dr. Jaime Estrazulas.
Interior, Dr. Miguel Herrera y Obes.
War and Marine, General Diaz.
Finance, Don José Vidiella.
Education and Public Works, Don Juan J. Castro.

Minister Plenipotentiary and Envoy Extraordinary, Dr. Alberto Nin.
Secretary of Legation, Dr. Alfonso S. de Zumaran.
Consul-Gen., Col. E. C. Abella, 83 Victoria St.

A Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°—35° S. and long. 53° 25′—57° 42′ W., containing an area of 72,172 square miles, and an estimated population of 787,053 (1894); was formerly a dependency of Spain. United to the Argentine Confederation early in the present century, it was afterwards annexed by Portugal, and became later a province of Brazil; but through the bravery of the patriotic "thirty-three" it succeeded in throwing off the Brazilian yoke, declared its independence 25th of August, 1825. A war in consequence ensuing between Brazil and the Argentine Confederation, both the Powers agreed, through the mediation of Great Britain, to recognize Uruguay as a sovereign and independent State. The imports from the U. K. are numerous, the principal being woollen and cotton goods, hardware, and coals. The chief exports are wool, hides, horn, hair, tallow, and jerked beef. Wheat, barley, and maize are cultivated, but the wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (5,205,272 in 1895) and sheep (12,820,736 in 1895), the wool of which is of excellent quality. Gold mines exist at Cuña pirú. The principal river is the Uruguay and its affluents, of which the Rio Negro is the chief. There are 1,002 miles of railway open, and 4,025 miles of telegraph in 1891. Revenue, 1893–94 £3,271,700; Expenditure, £2,765,957; Public debt 1893, £25,047,598; Brazilian, £744,680; Total imports, 1895, £5,401,200; Exports, £6,924,180. Imports from United Kingdom, 1895, £1,385,941. Exports, £460,946.

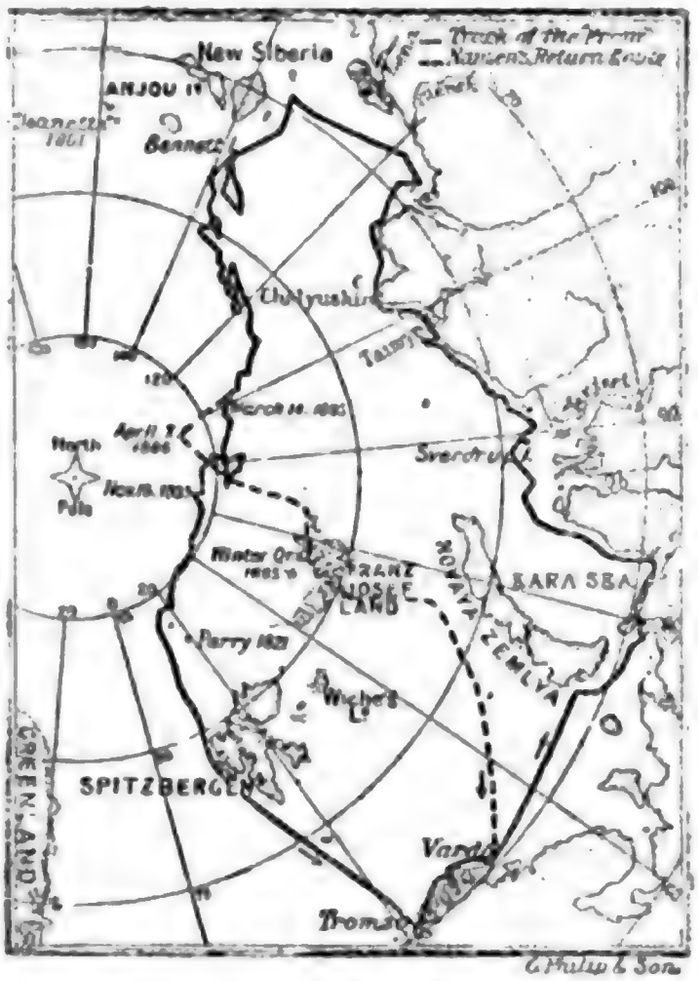
VENEZUELA, REPUBLIC OF.

President, General Joaquim Crespo, assumed office 14 March, 1894, for two years.
Minister of Foreign Affairs, R. Ezequiel Rojas.
Interior, J. Francisco Castillo.
Finance, Henrique Perez.
War and Marine, R. Guerra.
Instruction, Frederico Chirinos.
Public Works, Claudio Bruzual Serra.

Consul-General in London, Carlos A. Villanueva, 11 Montague Street, W.C.
Consul in London, N. G. Burch, 31/32 King Wm. St.
Vice-Consul, Walter White.
Consul at Southampton, Marco Antonio Saluzzo.
Consul at Liverpool, Ramon Oderig.

The most northerly Confederation of South America, situated between 1° 40′ S. lat. and 12° 26′ N. lat. and 59° 52′—73° 15′ W. long. It consists of 8 States, an area of 566,159 square miles, and a population, in 1891, of 2,323,527. The chief imports are manufactured goods, provisions and wine. The principal exports in 1894 were:—

Coffee	£3,680,000	Hides	£90,000
Cocoa	60,000	Other	110,000
Gold	180,000	Total	£4,110,000



The railways opened and under construction have a length of 370 miles. For the boundary difficulty (British Guiana—Venezuela) see p. 587.
Rev., 1894–95, £1,927,002; Expenditure, £1,738,278
Debt, Foreign, 1896, £2,652,150; Internal £2,485,908
Imports from United Kingdom, 1895 ... 812,495

Dr. Nansen's return to Vardö after an absence of three years and 23 days forms the great event in a history of exploration during 1896. Dr. Nansen has been exceptionally successful. It is true he did not reach the Pole, but he got 170 miles nearer to it than any of his predecessors; he made no discoveries of land, but the ocean area beyond the 80th parallel, proved by him to be without land or even small islands, is more extensive than the area of land and water combined revealed to us by all former expeditions combined; and lastly, although the hardships undergone were not inconsiderable, there was no loss of life, and the *Fram* now lies in her native waters as fit for service as ever.

The *Fram* stood out to sea from Vardö on July 21, 1893. Sailing along the coast of Siberia a few small islands were discovered; on September 15 the expedition was off Olenek river, where 26 sledge-dogs, taken thither by Baron Toll, awaited the explorer, but owing to the lateness of the season Nansen thought it best to make at once for the North in search of that return current which was to carry him across the Pole towards the eastern coast of Greenland. Already on September 22 he was shut in by ice. For nearly eighteen months the little vessel drifted at the mercy of the currents, at first towards the north-east and then, to Nansen's great relief, towards the north-west.

On March 14, 1895, when the *Fram* was in lat. 83° 59′, Nansen conceived the bold plan of deserting his ship and travelling with his dog-sledges across the ice towards the Pole. The *Fram*, in the able charge of Capt. Sverdrup, still shut in by the ice, was left to drift with the current, which safely carried her far to the North (85° 57′) past Franz Josef Land and Spitzbergen into open water (83° 14′ N., 14° E.), and she arrived at Hammerfest on August 21. Nansen took with him only one companion, Lieut. Johannsen. After 25 days of arduous labour these bold men had reached 86° 14′ N., 95° E., when they found, as Parry travelling over the ice to the north of Spitzbergen had found 75 years before them, that the whole pack was slowly drifting to the South, their daily progress thus scarcely exceeding four or five miles. They turned back, reached Franz Josef Land on August 26, and wintered in 81° 13′ N. In the spring they started with the intention of making their way over the ice to Spitzbergen, but when passing near Elmwood, Mr. Jackson's winter quarters, they were discovered and taken home in the *Windward*.

Mr. M. F. G. Jackson, the leader of the expedition fitted out by Mr. Harmsworth, is persistently continuing the exploration of Franz Josef Land. Having, in the summer of 1895, explored the coast towards the north-west in a whaleboat, he again left his winter quarters at Cape Flora in March, and pushing northward for seventy miles, reached a broad expanse of open water, which he christened Queen Victoria Sea. These explorations show that Franz Josef Land really consists of a group of comparatively small islands. The *Windward* arrived with fresh supplies and Mr. W. S. Bruce in August, and took away four members of the expedition, in addition to Dr. Nansen. The voyage out and home was performed in less than three months.

Spitzbergen may almost be included now among tourist resorts, but much scientific work still remains to be done there. Sir Martin Conway, with a party of scientific men, including Dr. Gregory, Mr. A. Trevor-Battye, and Mr. E. J. Garwood, established his headquarters in Ice Fiord, and for the first time crossed the inland ice to Agardh Bay in Stor Fiord or Wybe Jans Water. On his return home he passed through Hinlopen Strait and visited Wiche's Land (King Charles Land). His companions, Trevor-Battye and Garwood, in a small steam-launch, visited the Horn Sound and ascended the Horn Sound Tind, the highest summit in Southern Spitzbergen (4,560 feet).

Among other explorers who visited Spitzbergen in the course of last season may be mentioned Prof. Degeer, who examined the fiords and glaciers of Ice Fiord; Dr. Grönberg, Mr. Russell Jeaffreson and Dr. S. A. Andrée, whose adventurous scheme of crossing the Arctic Ocean in a balloon we referred to last year. The balloon was duly filled, but the wind proving persistently unfavourable, the expedition was postponed for another year.

In Arctic America, Lieut. Peary once more took the field, his object being to secure a 40-ton meteorite discovered by Sir J. Ross in 1818 on an island 20 miles from Cape York. He failed, owing to the inefficiency of his tackle. The *Hope*, which took him out, landed two parties of American scientists, headed by Professors Tarr and Burton, in Northern Greenland.

Nothing whatever appears to have been done in the Antarctic regions.

In Asia, numerous expeditions have been engaged in the exploration of the vast dominions of Russia, quite as much for immediate practical, as for purely scientific, purposes. M. Kulachef

has been exploring the Altai mountains, MM. Brusnitzyn and Feigin, two mining engineers, have extended their researches to the Aldan and Amgun, tributaries of the Lena; M. Bogdanovich and M. Lemiakin are still engaged in an exploration of Kamchatka and the shores of the Sea of Okhotsk, and have already reported the discovery of valuable goldfields on the river Aikashra; and lastly, Dr. Slutin is active in the same region with the view to suggesting means for the development of its fisheries, which is much needed by the poverty-stricken inhabitants of this remote part of the Empire. We may at once mention that similar researches have been carried on by British and American experts in the neighbouring Bering Sea, with a view to the preservation of the seal. The reports shortly expected from Mr. D'Arcy Thompson, of Dundee, and Dr. Jordan of California, will no doubt prove valuable geographical contributions.

The Arctic coasts of Siberia were to have been explored this summer by M. Hansen, a Norwegian in the employ of the Russian government, who left Irkutsk in June, and proposed to examine the entire coast, from the Yenisei mouth to the Anjou Islands and New Siberia, in search of traces of Dr. Nansen.

The natural history of the basin of the Amur is engaging the attention of MM. Komarof and Ahnert, who are travelling on behalf of the Russian Geographical Society, whilst M. Levat, a French mining engineer, is devoting himself more especially to the geology and ethnography of the same region. The neighbouring province of Manchuria is being explored by M. Murakin, whose object it is to discover the easiest route for building a railway connecting Siberia with Vladivostok.

The broad belt of land lying immediately to the south of Siberia is not being neglected. In the extreme west General Glukhovsky is making a careful survey of the Amu Darya or Oxus, in the hope that it may be possible to divert that river to the Caspian, or, at all events, to devise means for improving it as a navigable highway. The mountains of Hissar, a province of Bokhara, have been explored by M. Barshchevski, who has paid especial attention to their glaciers. A young Dane, Lieut. O. Olufsen, left Samarkand in March, his intention being to cross the Pamirs, Afghan Turkistan, and Kafiristan, on his way to India. But more important than either of these explorations are those being conducted for some time by Dr. Sven Hedin. His last year's campaign was a most successful one. Leaving Kashghar on Dec. 14, 1895, he travelled by way of Yarkand, Karghalik, and Khotan, to Kiria, discovering the ruins of two ancient towns. He then crossed the vast desert encircled by the Khotan and Tarim Darias, in which herds of wild camel were met with, reaching Shah Yar on Feb. 24, 1896. Then following the course of the Tarim to Lob Nor he discovered a group of lakes lying to the north of the lake just named. Ultimately he returned to Khotan, along the foot of the Kwen Lun.

Passing on to Mongolia, we have to record that Capt. Roborovsky had returned to Russia, early in the year, after having covered 10,000 miles. The zoological and botanical collection made by him are spoken of as most valuable. The French travellers, MM. Chaffongeon and G. Mangini, have at length completed this great "traverse" of inner Asia, from the Caspian to the Pacific. In December, 1895, they reached Irkutsk, coming from Urga, and have since then explored the Amur region and Sakhalin Island. They are expected home in March next. A Russian traveller, M. Clementz, proposes to devote ten years to an exploration of Mongolia. His first good achievement was the ascent of the Otkhon Tengri in the Hangai range in June last, up to a height of 14,000 feet.

In Tibet excellent work has been done by Mr. and Mrs. Littledale and Mr. W. A. L. Fletcher. Starting from Cherchen, at the northern foot of the Kwen Lun on April 12, 1895, these travellers ascended and crossed the Tibetan plateau, and got within a couple of days' journey of Lhasa, when they camped for four weeks at an altitude of 17,000 feet, vainly endeavouring to obtain permission to enter the sacred city. British patience and tenacity might finally have defeated Tibetan obstructiveness had not the illness of Mrs. Littledale rendered retreat advisable. On Nov. 2, 1895, the travellers reached Leh in Kashmir. They had spent six months at altitudes exceeding that of Mont Blanc. Captain Deasy, who left Kashmir in April with the intention of crossing Southern Tibet and China as far as the Mekong, has been obliged to turn back owing to the difficulty of finding transport. Capt. Wellby and Lieut. Malcolm, on the other hand, who started about the same time, are actually reported to have reached Lang-chau on the Upper Hwang-ho.

South-western China, since the commercial treaty of 1895, has attracted a large number of French travellers. A "commercial expedition," under M. Emile Rocher and M. Grenier, left Lyons on Sept. 15, 1895, reached the capital of Yunnan, coming from Tongking on Dec. 23. It then separated. M. Rocher went north into Su-chwan, and visited its capital, Ching-tu, whilst M. Grenier travelled through Kwei-chau to Chung-king on the Yang-tse-kiang, where he rejoined his colleague. M. Madrolle also entered Yun-nan from Tongking, spent three months there, and then went to Hai-nan, the interior of which island he was exploring when last heard from (March, 1896). M. Marcel Monnier, special correspondent of the "Temps," entered Yun-nan coming from Peking, and again left it at the Tongking frontier post of Lao Kai (June 8, 1896). Of far greater scientific interest appears to be the journey of M. C. E. Bonin. He left Tali, in Yunnan, on Nov. 8, 1895, had reached Ching-tu, in Su-chwan, in March, 1896, was last heard of from Tachienlu, and is now traversing the territories of semi-independent tribes separating him from Lang-chau, the capital of Kansu, on the Upper Hwang-ho. These French travellers, however, had in a measure been forestalled by that intrepid lady Mrs. Bishop (Isabella Bird), who returned to Shanghai in January after she had visited the coal-fields of Su-chwan, Ching-tu, and the country of the independent Man-tsze, a people with Caucasian features, quite different from the Chinese. The Chinese authorities did little to promote the objects of this lady, who on more than one occasion was allowed to be stoned by the people. Lastly, we have to place on record the remarkable journey of Prince Henri of Orleans, who left Talifu in May, 1895, and arrived at Sadiya in Upper Assam at the beginning of this year. This important journey has finally settled the question of the sources of the Irawadi, which does not rise on the Tibetan plateau, as was maintained as recently as 1894 by the late

General Walker, but in a range of snow-clad mountains in 28° 50′ N.

The Mekong has been thoroughly explored by a "Hydrographic Mission," under Lieut. Geo. Simon (1893-5), who managed to take his gunboats up to the Tang-ho cataract.

The geographical exploration of India is carried on more systematically by a number of government departments, and it is only on the frontiers of that vast empire that new facts of importance are being brought to light. The demarcation of the western frontier by boundary commissioners has already been referred to. We must content ourselves with registering the new surveys which are being conducted in the interests of railway construction between Assam and Burma (by Mr. Way and Mr. McIntyre), and in the direction of the Burma-Chinese frontier.

Before leaving Asia, reference should be made to the publication of Mr. Douglas Freshfield's monumental work on the Caucasus; to the explorations now carried on in that mountain range by MM. Poggenpol, Rosikof, and Busch; to the scientific expedition recently sent by the Japanese Government to Formosa; and the discovery of the Towuti lake on Celebes by the cousins P. and F. Sarasin.

The facilities of travel have increased so immensely in AFRICA that even tourists can now visit districts far in the interior, the discovery of which has made the fame of a Livingstone and a Stanley. Even a journey across the entire continent has become almost an ordinary event, and during the last year three expeditions which started from Zanzibar or the Lower Zambezi, have arrived at the mouth of the Congo, namely, M. Mist, M. M. Versepuy (with Baron de Romans) and MM. Descamps and Chargois.

Beginning our survey with the north, we meet once again with M. Fourcau, who, notwithstanding the unsettled state of the country, has been able, between December, 1895, and February, 1896, to make extended excursions into the sand desert (Er Erg) to the south of Biskra. Another French traveller, the Marquis de Morès, who intended to go from Gabes to Darfur, was murdered by his Tuareg companions on June 8 at El Utia, on the road to Ghat. In Tripoli, Mr. H. S. Cowper has again expended a short holiday in exploring the interesting district of Msalata.

The Niger has been descended for the first time from Timbuktu to its mouth by Lieut. Hourst, with whom were Lieut. Bluzot, M. Baudry, Dr. Taburet, and Father Hacquard. The expedition left Kabara, the port of Timbuktu, on January 21, and reached Akasa on October 13. The memory of Dr. Barth was still alive among the Tuareg along the middle course of the river; and the good reputation left behind him helped the progress of the expedition which followed in his footsteps. Almost equally interesting is the first determination of the source of the Niger, by Col. J. K. Trotter, of an Anglo-French boundary commission. The river is now known to rise in lat. 90° 5′ N., long. 10° 50′ E., at an elevation of only 2,500 feet above the level of the sea. The work done by various boundary commissions in this part of Africa is referred to elsewhere (*see* p. 586). An expedition to Kano and Sokoto carried out by Rev. Ch. H. Robinson, on behalf of the Hausa Association, should likewise be mentioned.

In the German Camarons Colony, an exploration of the Sanaga River has been conducted by Lieut. Brauchitsch (Dec. 1895 to Feb. 1896), who declares it to be unsuitable as a navigable highroad, whilst Dr. Woldtmann is exploring the Camarons Peak with respect to its agricultural capabilities.

An expedition under Lieut Gentil, which left Loango on July 27, 1895, is now on its way to Lake Tsad, conveying a steam-launch which it is proposed to float on that lake.

In the Congo State little scientific work has been done. The report issued in February by the Government Congo Railway Commission contained valuable geological information furnished by Mr. J. Cornet. Dr. Snyder, an American missionary, claims to have discovered a "vast" lake only three days' journey from Luebo.

A most important expedition into the country of the Mashukulumbure to the north of the Zambezi, and to Barotse Land, has been successfully conducted by Capt. Gibbons, and a smaller incursion into the same region has been effected by Mr. Percy C. Reid. Equally important is the work now being carried on by Major Lugard on Lake Ngami and in the region to the north of it. Dr. A. Penther returned in February to the Transvaal, after extended journeys through Mashonaland and a visit to the Victoria Falls.

In Nyasaland and British Central Africa, the country to the west of the lake has been further explored by the late Dr. Moloney and Mr. Paulett Weatherley, who visited Lakes Tanganyika, Mweru and Bangweslo. The fish and fresh-water Meduse of Lake Tanganyika are being studied by Mr. Moore, whilst Mr. Whyte continues his botanical researches in Nyasaland. Reference should also be made here to the excellent reports on Nyasaland by H.M.'s Commissioner, Sir H. Johnston.

In German East Africa the inquiry into the resources of the country is being conducted with much system. Mr. Bornhardt, a mining engineer, who travelled from Lindi to Lake Nyassa, has discovered a bed of excellent coal on the latter. Another geologist, Dr. F. M. Stapf, has not been equally successful in his search for gold-reefs reported to exist in Usambara. A third expedition, under the lead of Lieut. Werther, is at present engaged in a thorough exploration of Iranji, whilst Mr. Schmitt has been charged with a survey of the Rufiji, which promises to become a valuable commercial highway.

In British East Africa likewise most excellent work is being done. Meteorological returns have been received and published by the British Association for quite a number of stations, and since the beginning of this year careful observations on the fluctuations of the level of the Victoria Nyanza are being made, under the supervision of Mr. E. J. L. Berkeley, by Dr. MacAllister and Mr. W. Grant. Recent military expeditions have considerably improved our knowledge of Uganda and Unyoro. Capt. Slater is making most welcome improvements in our maps in the course of his search for the most advantageous route for the Uganda railway. Mr. Hobley has paid a visit to Mount Elgon. Mount Kenya is reported to have been ascended to its summit by Dr. Kolb, a late member in the ill-starred "Freeland" Company. Cape Rudolf, in the extreme north of the British sphere, has been reached by Mr. A. H. Neumann from the south and by Capt. Bottego from the east. The latter left Barawa on Oct. 11, 1896, and having established a post at Lagh, proceeded up the Dana.

Northern Somaliland is annually attracting a number of sportsmen and others, whose work steadily increases our geographical knowledge of

this region. Among recent visitors of this kind have been Prince Demeter Ghika Comanesti, and Prince Henry Liechtenstein, and Count Potocki. Mr. Parkinson, a geologist, is confining himself to the unexplored country of the Habr Tutjaleh, to the east of Berbera.

Recent events in Abyssinia have been referred to at some length on p. 589. The Emperor Menelik, in the course of the year, was visited at his new capital, Adis Abeba (Entotto) in Shoa, by Mr. Ilg (July 27), the members of a mission of mercy despatched by the Russian Red Cross Society, headed by Col. Choedof (Aug. 7), Msgr. Cirillo Macario, the coptic patriarch, as an ambassador from the Pope (Aug. 14), Major Nerazzini (Oct. 6), and General Valles.

Lastly there remains to be mentioned the short visit paid to parts of the west coast of the Red Sea by Mr. and Mrs. Theodore Bent, Lieut. N. M. Smyth, and Mr. A Cholmley, in the course of which the ruins of the city of Aidab, mentioned by early Arab geographers, were discovered.

The only "Expedition of Discovery" now in the field in AUSTRALIA is that fitted out by Mr. A. F. Calvert. Its commander is Mr. L. A. Wells, of the "Elder Expedition," and it starts from the Murchison River in Western Australia. Another expedition, under S. G. Hübbe, has explored the routes between South Australia and the Coolgardie goldfields with a view to the transport of cattle.

In British New Guinea Sir W. Macgregor is still carrying on the work which won him the gold medal of the Royal Geographical Society, and he is reported recently to have crossed the eastern end of the island. A German expedition under Mr. Ehlers failed in a similar endeavour, and its leader met his death by drowning when attempting to descend the Lakemumu or Heath River (Oct. 3, 1895). Another German expedition under Dr. C. Lauterbach, with whom are Dr. Kersting and Lieut. Tappenbeck, seems to promise greater success, and when last heard from had already established a post 60 miles inland from Astrolabe Bay.

In the Pacific the flora, fauna and coral formations of the Ellice Islands are being thoroughly explored by Professors Solas, Gardiner and Hedley. Similar work in connection with the great Australian Barrier Reef is being carried out by Prof. Alex. Agassiz.

AMERICA no longer presents opportunities for making geographical discoveries of importance, although much still remains to be done before our knowledge of that vast twin-continent can be called complete.

In Canada the attention of the Survey Department is directed just now to the vast territories in the north-west, and Mr. W. Ogilvie was employed last season on the Upper Yukon in delimiting the boundary between the Dominion and Alaska.

In the United States, the publication of topographical maps is steadily going on. Mexico, too, has its Topographical Department, which turns out excellent work, specimens of which were recently exhibited in London. The work recently carried on in that republic by Dr. Edward Seler and Teobart Maler is archæological rather than geographical, but it is difficult sometimes to draw the line between the two. The latter has discovered fresh ruins on the Usumacinto, with pyramids and inscriptions resembling those of Palenque. Prof. F. Starr of Chicago reports the discovery of an interesting race of dwarfs near Lake Chapala.

The Count J. de Brettes has returned to France after three years' work in the Columbian Republic, where he devoted himself more especially to an exploration of the Sierra Nevada de Santa Marta. Dr. F. Regel has recently begun an exploration of the Province of Antioquia.

Dr. Max Uhle has been compelled to discontinue his exploration of the ruins of Lake Titicaca, owing to the obstacles placed in his way by the Bolivian authorities, and has returned to the coast, where the ruins of Pachacamacan near Lima promises rich results.

Among various expeditions into the frontier districts of Chile, that of Dr. Hans Steffen to the Upper Puelo and its tributary, the Manso (see Map, p. 588), presents most features of interest. The mountains along the watershed here exceed 6,000 ft. in height, but the "main range" of the Cordilleras seems to lie much nearer the Pacific. Even more interesting results may be looked for from Mr. E. A. Fitzgerald's promised ascent of Aconcagua, the highest mountain in America. Mr. Fitzgerald has proved his qualities as a mountaineer in the Australian Alps. He is accompanied by Mr. Vine (geologist), Mr. Philip Gosse (naturalist), and Mr. de Trefford (surveyor).

Tierra del Fuego was explored in the course of the year by Dr. Otto Nordenskjöld, by M. Albof (botanist) and M. Latille (zoologist). M. Henri de Vaulx, who left Buenos Aires in the early part of the year for Patagonia, proposed subsequently to visit Tierra del Fuego.

The Argentine slope of the Andes is being thoroughly explored and surveyed since 1895 by Dr. F. P. Moreno, the director of the Museum of La Plata, who is accompanied by a large staff of surveyors and specialists. Already numerous lakes have been discovered. The survey, in the course of 1836, was continued southward as far as lat. 47°, and its results must prove of great value to the boundary commissioners.

M. H. Coudreau ascended the Xingu and some of its tributaries. Dr. Ranke and Dr. Herman Meyer also are bound for the Xingu, but before starting for their ultimate destination they paid a visit to the forest tribe of the Bulgres in the Serra do Mar, now numbering hardly 500 souls.

The voluminous Bluebooks published in connection with the Venezuelan boundary dispute contain much to interest geographers, but the only new work is a survey of the Upper Cuyuni by Lieut. Godfrey Faussett R.E. In that part of Brazilian Guiana which is claimed by France an exploration of the navigable rivers has been carried on by M. G. Croisé.

Oceanography has been much promoted by the work carried on by H.M.S. *Penguin*, Capt. A. F. Balfour, who sounded 5,155 fathoms to the east of the Kermadec Islands, the greatest depth up till now reached by the lead. The Austrian Government have sent the "Albatros" on a scientific mission into the Pacific, and the "Pola" into the Red Sea. A landing party from the former was attacked by the natives of one of the Solomon Islands, and several lives were lost. The "Pola" is continuing its work during this winter under the direction of Drs. Steindachner, Natterer and Luksch.

In the Atlantic the Prince of Monaco in the "Alice" discovered a rocky bank 50 miles S. of the Azores rising within 3 feet of the surface. Further north, in Davis Strait, the Danish exploration vessel "Ingolf," Capt Wandel, has discovered a range of submarine "mountains."

E. G. RAVENSTEIN.

ARGENTINA. (*See also* CHILE.)

SOUTH SHETLAND ISLES.—It is reported that an expedition was to have left Buenos Aires in the course of December, to take possession of these islands. They lie off the coast of Graham Land, to the south of Cape Horn, and were discovered in 1819 by W. Smith, who took possession of them in the name of England. The group consists of twelve large islands, having a total area of 850 sq. m. The highest summit is Mount Foster on Smith island (6500 feet), and there is an active volcano on Bridgman Island. The vegetation is restricted to mosses and lichens; but coal is found. There are no inhabitants.

BOLIVIA.

CHILE AND BOLIVIA.—It is contemplated to reward Bolivia for her friendly attitude at the time of the Congressist Revolution, by the cession of a port on the Pacific, but up till now no such cession has been made. A treaty, ratified on May 1, 1896, deals exclusively with commercial and not with territorial affairs.

BRAZIL.

TRINIDAD ISLAND (see last year's Almanack, p. 585).—Portugal, who acted as arbitrator between Britain and Brazil, has pronounced in favour of the latter. The island, on further examination, has proved unsuitable for landing an Atlantic cable.

THE BRITISH EMPIRE.

(*See also* BRAZIL, SIAM.)

GAMBIA.—Boundary Commissioners appointed by Great Britain and France have traced the treaty boundary to the north of the river, postponing the completion of their work until next year.

SIERRA LEONE.—The limits between Sierra Leone and the French Possessions have been traced by a Commission upon which Britain was represented by Col. Trotter, Capt. Tyler and Capt. Sharpe; and France by Capt. Passaga, Capt. Cayrade, and Lieut. Millot. The Commissioners met at the sources of the Niger on January 13, 1896, and their work proved of considerable geographical interest.

Major Grant about the same time demarcated the boundary between Sierra Leone and Liberia.

ASHANTI.—All efforts to induce King Prempeh to conform to the terms of the treaty of Fomanah (1874) having failed, Capt. Stewart and Mr. Vroom were despatched to his capital with an ultimatum (September 23, 1895), requiring him to receive a British Resident, to pay the 50,000 oz. of gold which he owed, to abolish human sacrifices, and to remove all hindrances to legitimate trade. The King had sent ambassadors to England, whom he knew had been refused recognition, and as he clearly appeared to evade a settlement, it was resolved to despatch a military expedition. A small force, commanded by Sir F. C. Scott, was landed on Dec. 28, 1895, and so carefully had everything been prepared by Governor Maxwell, that Kumasi was speedily reached and occupied on January 17, 1896. The King was carried away a prisoner, a Resident was installed, a fort was built. From fever contracted while on the march H.R.H. Prince Henry of Battenberg expired on board H.M.S. *Blonde*, on January 20, 1896. Friendly relations have since been established with neighbouring tribes, and an end put to one of the most bloody despotisms surviving until then in Africa.

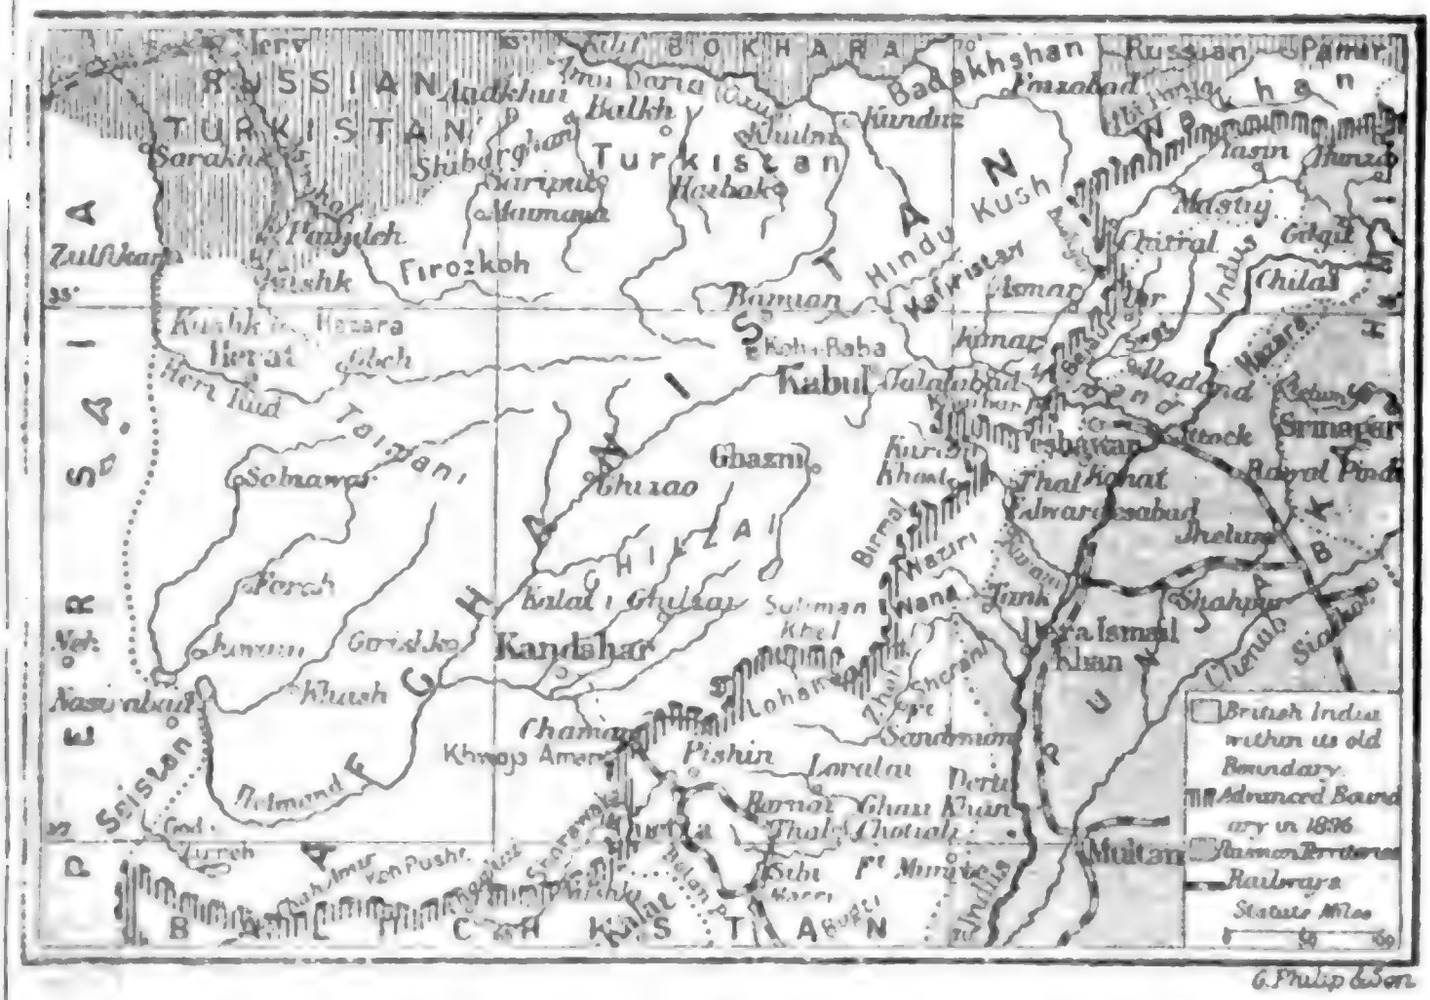
LAGOS.—A Boundary Commission appointed in accordance with a treaty of Aug. 10, 1889, has demarcated the boundary towards Dahome as far as lat. 9° N. The Commissioners were Messrs. Fuller and Fowler on the one side, and Capt. Plé and Lieut. Brisson on the other. Their work occupied them from January to March, 1896.

THE NIGER TERRITORIES.—Art. 5 of an agreement, of January 15, 1896, with France, provides for the appointment of Commissioners for settling the much-disputed boundary between the British and French spheres to the west of the Niger. The Commissioners, Mr. H. Howard, of the Paris Embassy, and Sir A. W. Stemming, representing Britain, and Messrs. Larrouy and Roume, France, had their first sitting on February 2, at Paris. (*See* last year's Almanack, p. 580.)

ANGLO-PORTUGUESE BOUNDARY QUESTIONS.—All these are in a fair way of settlement, and no difficulties are expected to intervene. Major Gould and a Portuguese Commissioner are at present in the Barotse country, and should they fail to agree, the question of this boundary is to be referred to arbitration. In the meantime the *modus vivendi* of 1893 has been prolonged for two years by an agreement signed on January 20, 1896, according to which the Zambezi and its tributary, the Kabompo, form the boundary.

The question of the Manica frontier has been referred to Signor Vigliani, the Italian Senator, as arbitrator, Major Leverson and Senhor Ennes having furnished him with all necessary information.

UGANDA.—In the course of 1895, Major G. Cunningham led an expedition against King Kabrega of Unyoro, who had broken the truce, and drove him beyond the Nile. Forts were built at Masindi (Baker's old place) and Mruli. On June 30, 1895, Unyoro, as also the region to the west of it, and of Uganda as far as the boundary of the Congo State, were included within the limits of the British Protectorate of Uganda.



ANGLO-AFGHAN FRONTIER.—The frontiers described in the agreement made by Sir H. Durand, Nov. 12, 1893, and in the supplementary agreement concluded in December, 1895, by Mr. Udney (which surrenders the Bashgol valley to Afghanistan), have since then for the most part been demarcated on the ground by Captain A. H. MacMahon, Captain Mackenzie, and the late Lieut. Macauley, who was killed by the Waziris in Wana. One gap still remains to be demarcated on the ground, between the Kabul and Kunar rivers, where the Mohmands occupy both sides of the new frontier.

In August last a body of Afghan militia crossed this line into Bajaur and demanded the payment of taxes. This was distinctly an infraction of the Durand agreement, by which the Amir bound himself not to interfere in "Swat, Bajaur, and Chitral."

The zone between the old and the advanced boundary of India (including the whole of Baluchistan) covers an area of 170,000 sq. miles. This is not, however, altogether a recent annexa-

Digitized by Google

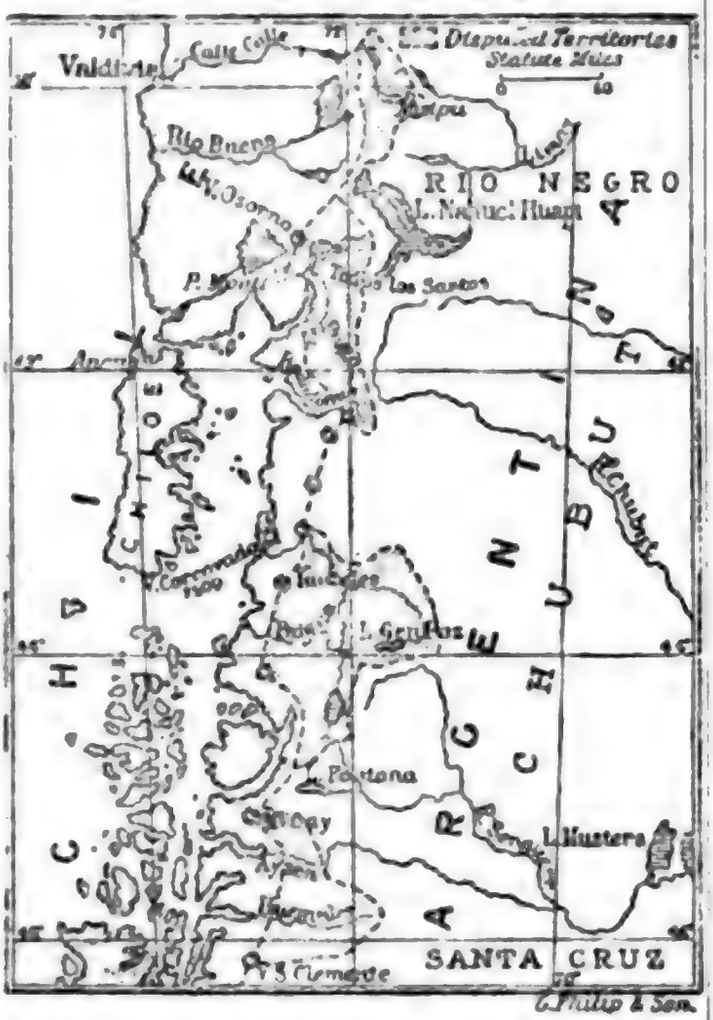
tion, for the Khan of Baluchistan has been a feudatory since 1854, Quetta has been administered by British officials since 1877, whilst Chitral has always been looked upon as a dependency of Kashmir. Much of this territory has still to be brought into subjection, for there live within the two frontiers numerous tribes who defy the authority of the Indian Government.

G. Philip & Son

BALUCHISTAN AND PERSIA.—The northern part of the frontier which separates Baluchistan from Persia has been demarcated by Colonel T. H. Holdich, the southern portion having already been traced by the late Sir Oliver St. John twenty-five years ago.

KATAR PENINSULA, in the Persian Gulf, and near the Bahrein Islands, has been declared a Protectorate by the British Resident at Bushire.

BRITISH GUIANA AND VENEZUELA.—Mr. Olney's extravagant exposition of the Monroe doctrine and its application to the case of the Venezuelan boundary, has met with a dignified reply from Lord Salisbury (Nov. 25, 1895). When, in February, 1896, President Cleveland appointed a "Commission to investigate and report upon the true divisional line between the Republic of Venezuela and British Guiana," Lord Salisbury (February 7, 1896) declared his readiness to place at its disposal "any information at the command of Her Majesty's government." This Commission, which its president, Mr. Justice Brewer, declared to be "in no view an arbitral tribunal," is expected to present its report before the close of the year. Venezuela was represented before it by counsel; Great Britain, indirectly, by means of blue-books, and an early settlement of this question may now be looked for. Venezuela acting upon the advice of Mr. Olney, is willing to exclude from arbitration all "settled districts" on either side. This concession, has met with a cordial response on the part of Lord Salisbury. The Court of Arbitrators will include two Judges of the High Court of Justice, and two of the Supreme Court of the United States, a President being eventually appointed by the King of Sweden.



With reference to the "Schomburgk line" shown on the map in last year's ALMANACK, it should be stated that it is taken from a report written in 1839. By a curious oversight it found its way into all the official maps of British Guiana, although Sir R. Schomburgk's final report, made in 1841, after a thorough exploration of the country, recommended a line lying much further west, and including the whole of the territory marked B upon our little map (1896 issue, p. 584). The total area originally claimed by Britain amounts to 109,530 sq. m. Of this total Britain was willing to surrender 4,120 sq. m., and to submit to arbitration an additional 8,330 sq. m., all being outside the Schomburgk line of 1841. Venezuela, on the other hand, claimed the whole of the territory as far as the Essequibo (65,400 sq. m.), whilst Brazil claims 9,900 sq. m., thus reducing British Guiana, should these exaggerated claims be conceded, to 34,230 sq. m.

CHILE.

(*See also* ARGENTINA, BOLIVIA AND PERU.)

CHILE AND THE ARGENTINA.—Ever since the establishment of the penal settlement of Punta Arenas in Magellan Straits by Chile, in 1843, these two South American Republics have been quarrelling about their boundaries. The good offices of the United States led to the conclusion of a first boundary treaty in 1881, in which the Argentina relinquished her claim to the whole of

the Pacific sea-board, conceded a fair division of Tierra del Fuego, and accepted the Cordillera de los Andes, as far south as lat. 52° as her boundary. The Andes, unfortunately, do not consist of a single chain, and in their southern portion rivers rising to the east of what may fairly be considered the main range or "Cordon Central" find their way to the Pacific. A second treaty, Dec. 21, 1893, was intended to remove all doubts, but it only made confusion worse, by assigning all to the east of the "main range" to the Argentina, whilst instructing the boundary commissioners to trace the boundary across the highest summits *or* along the watershed. These instructions it was impossible to carry out, and hence, up to 1895, the Boundary Commissioners had been able to do no more than to demarcate the boundary of Tierra del Fuego, and to place four iron boundary pillars upon some passes which lead across what is undoubtedly the "main range" of the Andes. The two countries were on the eve of war when happily better councils prevailed. By an agreement signed April 17, 1896, all disputed points are referred to Queen Victoria as arbitrator, and this trust was accepted —in clear defiance of the Monroe doctrine, as defined by Mr. Olney—on July 16, 1896.

Our little map shows the territories more especially in dispute. They cover an area of 12,000 sq. m. We have forborne to indicate the "main range" of the Andes, for before this can be done with confidence, further surveys are needed. These will probably be made by officers appointed by the arbitrator.

EGYPT.

The Egyptian Sudan.—A successful attempt to recover at least a portion of the vast territory lost through the uprising of the Mahdi has at length been made, partly, no doubt, with a view to diverting the attention of the Dervishes from Kasala, which appeared to be in danger consequent upon the disastrous defeat of the Italians at Adowa, on March 1, 1896. The expeditionary forces under the command of Sir H. Kitchener, numbered about 15,000 men, including a battalion of the North Staffordshire regiment, and were supported by four gunboats. The forward movement began on March 18, when Akashe was occupied, where supplies were then collected. A cavalry skirmish took place near that town on May 1, and on June 7, the Dervishes were driven out of Ferket after a gallant action and pursued to Suarda. Some delay was caused by an outbreak of cholera and the destruction of 28 miles of the railway by two terrific storms. But when the four gunboats had been passed over the cataracts and arrived at Kosheh, a final start was made. Hafir, after a short bombardment, was abandoned by the Dervishes, and on September 20, the whole of the army crossed over to the left bank. Dongola was occupied on September 23, after a feeble resistance, and the gunboats at once steamed up the river and landed garrisons at Handak, ed Debbeh, Korti and Merawi.

Thus was recovered, without a single mishap, one of the wealthiest provinces of the Sudan, including 420 miles of the River Nile. The Egyptian troops were hailed as deliverers along the whole line of their advance, and it is evident that the power of the Khalifa is waning fast.

FRANCE.

[*See also* British Empire (Gambia, Sierra Leone, Lagos, Niger), and Siam.]

Futa Jallon, which had been declared a French "Protectorate" in 1881, was formally annexed on March 18, 1896, by M. de Beeckmann, who had gone to Timbo, its capital, with a military escort. This native state covers 26,670 sq. m., with a population of about 600,000.

Madagascar.—A fresh treaty was signed on January 18, 1896, by which the Queen admits a French Resident, who is to control the internal administration, grants France the right of maintaining a garrison, leaves the conduct of all

foreign relations to France, and undertakes to contract no loan without the express consent of the French government. On June 20, the French Chamber adopted the proposal of M. Hanotaux, and Madagascar was declared to be a French "colony," although the Queen and the native authorities are to be maintained. This, it is understood, will enable France to denounce all treaties previously made with foreign powers.

In the meantime the island continues in a disturbed state. Europeans have been murdered by armed bands, and missionary stations burnt. M. Laroche, the French Resident, proved unequal to cope with this rebellion, instigated, it has been asserted, by the Queen and her advisers. General Gallieni, who succeeded M. Laroche in September, inaugurated his reign by an act of vigour; he sent the Hova minister and an uncle of the Queen before a court-martial, and when they were convicted of complicity in the rebellion, he caused them to be executed.

Society Islands.—Raiatea, one of the Windward Islands, whose people had long been strongly in favour of British protection, has been occupied by a French force landed from a gunboat despatched from Tahiti.

GERMANY.

Togoland.—In the spring, Lieut. von Carnap founded a station at Sansanne Mangu, on the great trade route connecting the Gold Coast with Sai on the Niger, and also annexed, on behalf of Germany, those parts of Yendi which lie outside the "neutral zone" agreed upon in 1893. (*See* map in last year's Almanack, p. 579).

ITALY.

Eritrea and Abyssinia.—Italy, ever since the occupation of Asab in 1882, seemed to be steadily extending and consolidating her African Colony of Eritrea. By the treaty of Uchali, May 2, 1889, and Feb. 6, 1891, King Menelik not only surrendered Hamasen and the coast to the Italians, but he also undertook to entrust the conduct of his foreign relations to the Italian Government. This, at least, was the interpretation put upon the treaty in Italy, but as King Menelik read "may" where the Italians read "shall," he formally denounced the treaty in 1893, and after what happened recently, Abyssinia can no longer be looked upon as an Italian Protectorate.

The last success achieved by the Italians in Africa was the occupation of Kasala on July 17, 1894, which they have held ever since "in trust" for Egypt. Troubles began before the close of the year. In December a chief of Okule Kusai, at the instigation of Ras Mangasha of Tigre, made an attack upon Halai. He was slain, and General Baratieri at once marched upon Adoa, the capital of Tigre, which he occupied on Dec. 30, 1894. Ras Mangasha promised to disarm, but no sooner had the Italians retired than he took the field. He was defeated in an obstinately contested battle at Koatit, which lasted two days (Jan. 13 and 14, 1895). The Italians started in pursuit; they occupied Addigrat, March 25, 1895, Antalo, Oct. 12, and established an outpost on the Amba Alaji, still further south.

There was much rejoicing. The whole of Tigre was already being looked upon as a portion of Eritrea when King Menelik advanced with large forces from the south. On Dec. 7, 1895, his advanced guard, under Ras Makunen, surprised and annihilated the garrison of Amba Alaji, under Capt. Toselli. The fort which the Italians had built at Makalle was invested in January, and its garrison surrendered, after a gallant defence, on the 20th of that month. King Menelik escorted it as far as Hausen and then allowed it to join General Baratieri at Adagamus

the King himself proceeding to Aksum, where he was crowned Emperor of Ethiopia on Feb. 6, 1896.

The Italians repulsed an attack upon the outposts at Addigrat on Feb. 19, but in a great battle at Abba Garima, to the east of Adoa, on March 1, 1896, they met with a crushing defeat. Only remnants of an army, which included 15 Italian battalions and 12 batteries of artillery, succeeded in making their escape, while 5,600 Italians were killed and 1,550 (including General Albertone) were carried away prisoners to Shoa.

General Baldissera, appointed Governor of Eritrea on Feb. 2, 1896, arrived too late on the spot to put a stop to his predecessor's foolhardy proceedings.

M. Ilg and the Coptic Patriarch Macario arrived in August at Adis Abeba to treat for the release of these prisoners, but they failed. Major Nerazzini, who reached Adis Abeba on Oct. 6, was more successful. On Oct. 26 he signed a treaty, the terms of which were far more favourable than could possibly have been expected. The absolute independence of Abyssinia is recognised, but Italy is allowed to advance her frontier above thirty-five miles to the south of that laid down in the treaty of Uchali, viz., to a line formed by the Mareb, its tributary Belesa and the Ma

Martinez Campos, in 1878, have not been kept, and high export duties on Cuban produce and monopolies in favour of Spanish commerce and industry have been maintained to the present day. A fresh rebellion, which broke out in March, 1895, has been the result. Spain poured troops into the island—in November her garrisons numbered nearly 200,000 men—but military operations up till now have been a complete failure. The agricultural districts, whence the wealth of Cuba is derived, are completely under rebel control, and there is no protection for life and property except in the immediate neighbourhood of military stations. Unless Spain can force on a general battle there is no hope of an early settlement. The government of the United States, in the belief that Spain is unable to quell the rebellion by force of arms, and anxious to protect the property of American citizens and the interests of commerce, offered its good services in October last, but these were rejected.

PHILIPPINE ISLANDS.—The revolt of the native population of Luzon, towards the end of August, was provoked by the arbitrary deportation of 400 members of a secret society, and the increase of taxes. The soldiers despatched against the insurgents turned upon their officers and joined the revolt. General Blanco at once issued a decree confiscating the property of the insurgents, many of whom are persons of wealth, and on the arrival of 10,000 men from Spain, he took the field and won a victory on Nov. 9, at Noveleta. Still further reinforcements, under General Polaviejo, were despatched in November from Barcelona, and this revolt will no doubt be stifled in blood, as was done on former occasions.

TURKEY.

TURKEY.—Philesius, a writer of the 16th century, in commenting upon a map of Europe by his friend Hylacomilus, deplores the fact that the Christian Powers should be waging war upon each other, whilst "they leave the Turk to spill Christian blood, destroy cities, devastate countries, burn churches, carry off our daughters, violate our wives, and commit the greatest crimes." The Christian Powers are no more united now than they were in 1509. The Sultan and his advisers have treated the notes and remonstrances of the European Powers with contempt, and not a single wrong, whether committed upon Armenian Christians or Mohammedan subjects, has been redressed; yet Europe, by presenting a united front, could impose her will upon the decaying power of the Osmanli. This is proved by the result of concerted action in the case of *Crete*, an island inhabited by 294,000 Greeks, of whom 88,000 are the descendants of fathers who abandoned their faith when that island fell into the ruthless grasp of the Turk. Crete has been granted a Charter the provisions of which are to be carried out under the supervision of the Powers (Sept. 1896). A Christian Governor-General, acceptable to the Powers, is to be appointed for five years; two-thirds of the officials are to be Christians; a representative Assembly is to meet every second year; the administration of justice is to be reorganised, and so forth. All these reforms will of course remain dead letters unless the Powers satisfy themselves that they are honestly carried out.

As for the rest of the Empire, we have as yet nothing but promises of reform. As the Powers are not prepared to proceed to dismemberment, and isolated action might involve the whole of Europe in war, only palliative measures, such as that applied to Crete, appear to be practicable. But even these would immensely benefit Christian and Moslem alike, if carried out under European control.

VENEZUELA.

[*See* BRITISH EMPIRE (British Guiana).]

E. G. RAVENSTEIN.

Immigration and Emigration, 1881—1895.

The following tables give the number of persons who entered or left the British Isles during the period of fifteen years 1881–1895. In the first case the countries from which the Immigrants set out is given, and, in the second (which deals with British and Irish Emigrants only), the destinations of those who left this country:—

IMMIGRANTS.

Year.	Nationality.			
	British and Irish.	Foreigners.	Not distinguished.	Total.
1881	52,707	24,398	—	77,105

Imports and Exports of Merchandise,

EXCLUSIVE OF BULLION, INTO AND FROM THE UNITED KINGDOM, 1894 AND 1895.

The total amount of the year's Trade for 1895 was £702,522,065, against £682,130,677 for the year preceding, and £748,944,115 in 1890, which was the largest amount ever known. The Exports of British produce amounted to £225,890,016, our chief customers being the United States for £27,948,112, France £14,550,148, Holland, &c., £9,466,682, Germany £20,052,847, Belgium £7,324,871. India imports to the value of £24,706,569, Australasia £17,313,923 (an increase of more than £1,000,000), British North America £5,533,585, while the British West Indies now accounts for £2,104,374.

The total Imports in 1881 amounted to £11 7*s.* 4*d.* per head of the population, and in 1895 to £10 19*s.* 3*d.*, the total Domestic Exports for the same years being £6 14*s.* 0*d.* and £5 18*s.* 10½*d.*

Imports by Parcel Post in 1895 were £978,191, and the Exports £1,337,931, a total increase of £398,094.

The following is a summary of the business done during the year. In the case of both imports and exports there is a considerable increase.

The totals for the years 1894–95 were :—

Total Imports (1894)	£408,344,810
" " (1895)	416,089,658
Increase in 1895	£8,344,848
Total Exports (1894)	£273,785,867
" " (1895)	285,832,407
Increase in 1895	£12,046,540

Putting exports and Imports together, the total Foreign Trade of the United Kingdom was :—

Total Imports and Exports (1894)	£682,130,677
" " (1895)	702,522,065
An increase in 1895 of	£20,391,388

The total value of the Trade carried on with the following countries in 1894 and 1895 is thus stated :—

Total Imports.

Total to Foreign Countries and Brit. Possessions	£273,785,867	285,832,407

BRITISH PRODUCE AND MANUFACTURES.—During the year 1895 the following were among the most important articles of British Produce and Manufacture exported to our Colonies and to Foreign Parts, giving the total value:—

		1895.
Alkali (soda chiefly)		£1,557,533
Apparel, ready-made		4,525,313
Arms, ammunition, &c.		2,493,487
Bags and sacks, empty		443,262
Beer and ale		1,523,703
Biscuit and Bread		553,296
Books, printed		1,228,183
India-rubber manufactures		1,190,885
Railway Carriages, Trucks, &c.		790,719
Cement		641,551
Chemicals and dye-stuffs		3,233,222
Coals, &c.		15,433,803
Naphtha, and similar products		1,573,731
Corn, grain, and meal		393,162
Cotton yarn		9,291,195
Cotton manufactures—		
,, White or plain	£27,340,526	
,, Printed, &c.	19,418,832	
,, Lace, &c.	1,961,812	
,, Stockings, &c.	220,414	
Sewing Cotton	3,160,556	
Hosiery and small wares	2,353,128	
Total of all cotton manufactures, &c.		54,455,268
Cycles		1,386,420
Earthen and china ware		2,170,322
Furniture, cabinet, and upholstery		517,430
Herrings and other Fish		2,282,406
Glass, plate, flint, bottles, &c.		789,708
Haberdashery, &c.		1,352,778
Hardware and cutlery		1,856,532
Hats		1,090,281
Implements and tools of industry		1,240,327
Leather, tanned, unwrought		1,422,747
,, Boots, &c.		1,580,680
Linen manufactures		5,351,025
,, Yarn		965,926
Jute manufactures, including yarn		2,524,766
Manures, including chemical manures		1,949,049
Medicines, drugs, &c.		1,048,310
Oil, Seed		990,311
Painters' colours and materials		1,556,579
Paper and stationery		2,296,728
Pickles, vinegar, confectionery, &c.		1,236,962
Skins and furs of all sorts		1,087,269
Soap		756,704
Spirits		1,559,462
Sugar, refined		574,013
Steam-engines		2,783,042
Machinery (not steam-engines)		12,367,480
Other iron and steel manufactures, including raw material		19,680,923
Copper, brass, lead, tin, zinc, &c.		4,244,636
Telegraphic wires and apparatus		782,375
Silk manufactures, yarn, &c.		1,731,456
Wool, sheep and lambs'		858,560
Woollen and worsted yarn		5,372,313
,, manufactures		19,737,944

Comparative Table of Food Imported into the United Kingdom from Foreign Countries and Greater Britain.

The United Kingdom is largely dependent upon foreign nations for its food supplies. The following table, prepared from returns issued by the Government, shows the value of the principal articles of food imported therein in each of the years from 1885 to 1895, distinguishing the value of articles from foreign countries from the value of articles from Greater Britain (i.e., British Possessions abroad).

Year	Wheat.		Other Cereals.*		Wheaten and other Flour.		Butter, Lard, Cheese and Eggs.		Dead Meat.†		Live Animals.‡		Sugar.		Fruit, Nuts, and Vegetables.§		Fish, Poultry, and Rabbits.

THE WEATHER IN THE BRITISH ISLANDS DURING THE YEAR ENDING 31ST OCTOBER, 1896.

This summary of the weather experienced in the British Islands during the year commencing November 1st, 1895, and ending October 31st, 1896, has been mainly compiled from data contained in the Daily and Weekly Reports issued by the Meteorological Office. It is hoped that the remarks on each month will be useful for purposes of reference and comparison, especially when considered in relation to the daily results of the Greenwich observations as given for each month in the Calendar of the Almanack.

November, 1895.—The weather was very mild, especially in the south-west of England. There were occasional frosty mornings. The highest temperature, 65°, was reported at Cambridge on the 16th; the lowest, 21°, at Fort Augustus on the 3rd. At 8 A.M. Greenwich time, on the 1st, while the temperature at Scilly was 52°, Nairn had only 29°; 2nd, Spurn Point, 48°, Nairn, 24°; 3rd, Scilly, 52°, Nairn, 25°; 4th, Dungeness, 53°, Parsonstown, 27°; 16th, Oxford, 61°, Parsonstown, 37°; 17th, Pembroke, 52°, Loughborough, 32°; 18th, Valentia, 53°, Loughborough, 30°; 23rd, Shields, 45°, Nairn, 24°. Fog was prevalent on six days in east England, mist on three in central and south England. On the 5th, 1·35 inch of rain fell at Donaghadee; 10th, 1·5 at Churchstoke, 1·4 at Belmullet, 1·5 at Killarney; 15th, 1·4 at Holyhead, 1·1 at Roche's Point; 16th, 1·54 at Holyhead. Snow and hail showers were experienced in the east and south-east of England on the 23rd. Aurora was seen in Great Britain on the 9th, and on several nights in north Scotland. Atmospherical pressure was least, 28·1 inches, on the 11th; greatest, 30·55, on the 25th. Several cyclonic disturbances passed over these islands, having the centres in the northern parts, so that the gales were chiefly from S to SW. On the 22nd a severe NE gale occurred in the Channel. Bright sunshine, estimated in percentage of its possible duration, was rather deficient, varying between 31 in south Ireland and 15 in north-west England.

Autumn for the first part was a prolongation of summer, warm, dry, and sunny; the middle part was cold, windy, with moderate rain and many rainy days; the latter part was mild, windy and similar rainy weather.

December, 1895.—The weather was variable, dull, gloomy, almost sunless in many districts; fog or mist prevalent from 14th to 31st. On 21st a dense fog covered trees and shrubs with rime. A harsh gale from ESE on 24th and 25th raged over the southern parts from Ireland to the North Sea. The highest temperature, 58°, was reported at Cambridge on the 5th; the lowest, 12°, at Braemar on the 21st. At 8 A.M. 11th, while the temperature at Scilly was 51°, at Oxford it was only 25°; 14th, Scilly, 53°, London, 34°; 25th, Scilly, 53°, Oxford, 33°; 27th, Scilly, 51°, Oxford, 31°; 28th, Valentia, 53°, London, 32°. On the 4th, 1·9 inch of rain fell at Glenlee, 1·8 at Fort Augustus and at Glencarron; 12th, 1·3 at Wick and at Aberdeen; 17th, 1·0 at Prawle Point; at Roche's Point, 1·3 on 21st, 1·4 on 22nd, 1·8 on 23rd, same day 2·3 at Falmouth, 1·9 at Killarney; on 25th, 1·2 at Valentia. Atmospherical pressure was least, 28·5 inches, on the 5th; greatest, 30·5, on the 28th. A thunderstorm with snow and hail occurred in Scotland on the 5th. Aurora was seen in Ireland and Scotland on the 7th, in north Scotland on the 9th. Bright sunshine varied between 20 per cent. in south Ireland, and 6 in north-west England; for the United Kingdom it was less than 3 in the week ending 28th.

January, 1896.—The weather was mild, gloomy, quiet, with very little frost or snow, and small amount of rain. The highest temperature, 57°, was reported at Dublin on the 2nd; the lowest 17°, at Glenlee on the 23rd. At 8 A.M., 14th, while the temperature at Valentia was 52°, at Sumburgh Head it was only 27°; 16th, these stations had 50° and 28° respectively; 20th, Roche's Point, 45°, Loughborough, 25°; 21st, Scilly, 46°, York, 26°; 22nd, Scilly, 48°, Cambridge, 28°; 23rd, same two places, 48° and 22°. On the 18th, 1·17 inch of rain fell at Stornoway. Fog was prevalent on eleven days in east England. Aurora was seen in north Scotland on the 19th and 26th. The Weather Chart for 6 P.M., 8th, was the first in the British Islands that ever showed atmospherical pressure above 31 inches. The station was Stornoway, and by the next morning all over the northern portion of Great Britain and Ireland the barometers were above 31; at 9 A.M. at Glasgow, 31·119. Pressure attained 30·9 on the 30th. The least pressure, 28·6, occurred on the 15th. The mean pressure has not been so high in January since 1852, when the weather of the month was similar. Bright

Digitized by Google

sunshine varied between 19 per cent. in north-east England, and 8 in east Scotland.

February, 1896.—The weather was decidedly mild and dry, two conditions which seldom coincide at this season. The highest temperature, 59°, was reported at Cullompton on the 12th; the lowest, 15°, at Stamford on the 26th. At 8 A.M., 2nd, while the temperature at Valentia was 50°, at Oxford it was only 27°; 10th, Valentia, 52°, Cambridge, 32°; 24th, Valentia, 46°, Oxford, 27°, Cambridge and Loughborough, 24°; 25th, Valentia, 50°, Oxford and Cambridge, 26°; 26th, Valentia, 46°, Oxford, 24°, Cambridge, 26°; 27th, Belmullet, 50°, Loughborough, 25°. Atmospherical pressure was greatest, 30·7 inches, on the 3rd; least, 29·3, on the 19th. Fog or mist was prevalent in the east and south of England. Frost intense enough to form thin ice on standing waters occurred in Great Britain between 25th and 28th. On the 7th, 1·03 inch of rain fell at Valentia, and 1·08 on the 25th. Bright sunshine varied between 27 per cent. in east England, and 9 in west Scotland.

The *Winter* was mild and dry; there was next to no snow; trifling frost occurred on few days; and rain was scanty. Such a mild winter is usually a stormy season, this being an exception.

March, 1896.—The weather was mild, rainy, changeable, very deficient in sunshine, very stormy, very little frost. The highest temperature, 68°, was reported at Greenwich on the 22nd; the lowest, 20°, at Nairn on the 14th. On the 2nd, 1·06 inch of rain fell at Fort Augustus, 1·27 at Fort William; 7th, 1·12 at Stonyhurst, 1·50 at Arlington: 15th, 1·35 at Laudale; 20th, 1·04 at Southampton, 1·07 at Plymouth; 23rd, 1·15 at Glencarron. The least atmospherical pressure, 28·3 inches, occurred on the 3rd; the greatest, 30·3, on the 10th and 31st. Aurora was seen in many places in Great Britain on the 4th. in north Scotland on the 6th and 9th. The University boat race on the 28th was rowed in rough water owing to a strong gusty wind and a squall with hail. Bright sunshine varied between 32 per cent. in east Scotland, and 21 in north-west England.

April, 1896.—The weather was mild, dry, and windy. The highest temperature, 69°, was reported at Ochtertyre on the 21st; the lowest, 23°, at Braemar, on the 1st. Thunderstorms were experienced in central England at the end of the month. On the 7th, 1·25 inch of rain fell at Glencarron. The least atmospherical pressure, 29·3 inches, occurred on the 11th and 28th; the greatest, 30·5, on the 19th. Bright sunshine varied between 42 per cent. in south-west England, and 23 in north Scotland.

May, 1896.—The weather was hot and very dry, with the exception of showers between 18th and 21st. Some days were cloudy and dull; most days had brilliant sunshine, while the shade was chilling from the dry fresh wind. Several nights were harshly cold. The highest temperature, 85°, was reported at Llandovery on the 12th; the lowest, 28°, at the same place on the 4th. Aurora was seen in north Scotland on the 2nd and 3rd. Thunderstorms occurred in south England on 6th and 7th, in the north and east on the 12th. The least atmospherical pressure, 29·7 inches, occurred on the 20th; the greatest, 30·55, on the 25th. Bright sunshine varied between 65 per cent. in south-west England, and 39 in north-east England. Sunshine was abundant, rain was very deficient.

The *Spring* was warm throughout, the first part rainy, the middle part dry, the latter part droughty with much sunshine.

June, 1895.—The weather was fine and seasonable, but with deficient rainfall. The highest temperature, 87°, was reported at Greenwich on the 10th; the lowest, 33°, at Geldeston on the 1st. On the 9th, 1·37 inch of rain fell at the North Foreland: 11th, 1·30 at Dungeness. Thunderstorms occurred in England daily from the 3rd to 9th, also 15th and 17th; in Scotland on the 4th; in Ireland on the 5th. Aurora was seen in north Scotland on the 22nd and 24th. The least atmospherical pressure, 29·4 inches, occurred on the 9th and 17th; the greatest, 30·35, on the 20th and 29th. Bright sunshine varied between 53 per cent. in south-west England and 24 in north Scotland.

July, 1896.—The weather generally was seasonable, but heat and drought were experienced in east England. Mist or fog was reported on 5 days in south-west England. The highest temperature, 91°, was reported at Greenwich on the 14th; the lowest, 35°, at Braemar on the 25th. A series of thunderstorms occurred over central England on the 7th, and the Ashmolean Museum at Oxford was struck by lightning; north-east England experienced one on the 24th. On the 8th, 1·21 inch of rain fell at Holyhead, 2·4 at Edgeworthstown, 2·1 at Armagh, 1·33 at Donaghadee, 1·08 at Parsonstown, 1·15 at Belmullet; 9th, 1·24 at Holyhead; 24th, 1·15 at Scilly, 1·38 at Pembroke, 2·0 at Dublin, 1·18 at Donaghadee, 1·79 at Parsonstown; 25th, 1·45 at Malin Head, 1·01 at Aberdeen, 1·09 at Wick. Atmospherical pressure was greatest, 30·4 inches on the 14th; least, 29·55, on the 4th and 26th. On the 29th a cyclonic disturbance, which threatened north-west Ireland all the day, travelled during the night across the country south-eastward to Waterford. Bright sunshine varied between 51 per cent. in south England, and 21 in north Scotland.

August, 1896.—The weather was fair, cloudy, cool. The highest temperature, 81°, was reported at Southampton on the 13th; the lowest, 33°, at Braemar on the 9th. On the 8th, 1·01 inch of rain fell at the North Foreland; 18th, 1·02 at Stornoway; 28th, 1·10 at Sumburgh Head, 2·00 at Stornoway. Atmospherical pressure was greatest, 30·4 inches, on the 10th; least, 29·4, on the 30th. Bright sunshine varied between 44 per cent. in south-west England and 24 in north-east Scotland.

The *Summer* was seasonable, though the latter part was rather dull, and the rainfall was throughout deficient in quantity.

September, 1896.—The weather was excessively wet and overcast, insomuch that sunshine was unprecedentedly deficient; nevertheless the mean temperature of the month was normal. The highest temperature, 75°, was reported at Londonderry on the 4th; the lowest, 31°, at Braemar on the 21st. Thunderstorms occurred in England on the 8th, 12th, 13th, 20th; in Scotland on 15th and 16th. On the 10th 1·09 inch of rain fell at Greenwich; 11th, 1·10 at Roche's Point; 12th, 1·02 at Oxford, 1·05 at Cambridge; 17th, 1·11 at Stornoway; 21st, 1·45 at Roche's Point, 1·03 at Pembroke, 1·03 at Scilly; 24th, 1·04 at Valentia, 1·24 at Dungeness; 25th, 1·28 at Sumburgh Head. Atmospherical pressure was least, 28·8 inches, on the 22nd; greatest, 30·4, on the 30th. Cyclonic storms passed over the Kingdom rapidly, without scarcely any intermission, between the 22nd and 27th, but with very destructive violence.

Digitized by Google

Bright sunshine varied between 31 per cent. in south Ireland and 17 in north-west England.

October, 1896.—The weather was wet, stormy, frequently cold, occasionally very fine. The rainfall was excessive in the north of Scotland and in the south of England, normal in the west of Ireland and in the east of England; and rainy days were numerous in all districts. The highest temperature, 64°, was reported at London on the 9th; the lowest, 18°, at Ochtertyre on the 23rd. On the 7th 1·07 inch of rain fell at Belmullet, 1·78 at Holyhead, 1·55 at Roche's Point; 11th, 1·26 at Spurn Head; 13th, 1·19 at North Foreland; 18th, 1·09 at Aberdeen. Snow fell in Scotland and north England on the 11th. Thunderstorms occurred in north England on the 10th; in east England on the 14th and 24th; in south-west Ireland on the 24th. Aurora was seen in north Scotland on the 11th. Atmospherical pressure was least, 28·5 inches, on the 8th; greatest, 30·55, on the 14th. Gales and blusterous winds were frequent. On the 8th the lightship at Daunt's Rock was sunk and the crew perished, that in the Solway dragged its moorings. During the month, many wrecks occurred, and much damage was done to property in various parts of the Kingdom. The 13th, 14th, and 22nd were the finest days, though cold. The 21st had fair weather, which was favourable to the Trafalgar celebration. Bright sunshine varied between 37 per cent. in south-west England and 23 in north Scotland.

The Year's Weather and the Crops.—The autumn had been favourable to farming work, except during the frost in October, though the sodden soil checked the sowing of wheat in November. "As regards vegetation generally, seldom has a year ended (with November) under conditions so favourable for the one succeeding it."—*Mawley*. The fine weather of the opening year permitted the sowing of wheat to a later date than usual. During the mild though gloomy weather of January, the intervals of frost and cold were short, still they imposed a check on too forward vegetation. February brought the wheat-plant forward thick and vigorous. There was no frost in spring capable of effecting mischief. March was very mild, though frequent rains allowed little sunshine. April made up for sunshine, was a drying month, the wheat was in active growth and its appearance prosperous. May hot, dry, and dusty, was suitable to the wheat though injurious to the hay crop. The local and temporary showers were too scanty to make an impression on the drought and the long deficiency of water-supply. The winter had been favourable to insect-life, and the spring to the growth of weeds. Sunshine with dry air caused the corn to ripen quickly so that harvest was early in July and was completed in England before the month ended. Such an early harvest has not happened since 1868, when the crop was also good. Sir J. B. Lawes in his report on the wheat crop says:—"Altogether the season from beginning to end may be considered highly favourable for the wheat; a good seed bed, a warm and dry winter, and a hot and dry summer, while the rainfall in June was a great benefit to the wheat, preventing the grain from ripening too rapidly, and giving us a crop which for quality and quantity combined has rarely been exceeded." But the heavy rains of September came on the top of the harvest in Scotland and greatly delayed as well as damaged the crop. Ireland fared better, and had a good crop. Up to the end of August, the drought in England had been injurious to the roots and other green crops. Notwithstanding the duration of the drought in the winter followed after a short interval by drought in spring extending through the summer, September came in so wet that by the mid-month all interests had had enough of rain, both in the south-eastern part of the Kingdom and in the north-western, where, indeed, the drought had not been so much in evidence. During this month there was practically no harvest weather. Barley and oats suffered from the wet, but pastures had plenty of grass, which could not be made into hay. Thus though the wheat crop attained a maximum of excellence, this was far from being the case for all other crops. "The best indication of the character of the season is to be found in the wonderful plot at Rothamsted which, for half-a-century, has grown wheat, year after year, without any manure. The very high yield, at the rate of 16¼ bushels per acre, shows how well the season of 1895-6 was suited to the requirements of the wheat crop."—*Times*.

The effect of the weather upon health may be judged from the mortality in the metropolitan district, the most populous in the Kingdom. The death-rate per thousand per annum was 21·2 during the week ending November 9th; it fell to 17·3 December 7th, rose to 20·1 January 4th, fell to 17·8 February 1st, ascended to 21·7 March 7th, descended to 17·9 March 28th, up to 20·3 April 11th, down to 16·2 June 27th, highest 25·3 July 25th, lowest 14·6 September 19th, and was 16 in October.

The deaths from diarrhœa which during the week ending April 25th were only 3, were 503 for July 25th; and those due to diseases of the respiratory organs, though 447 November 9th, were 118 September 12th. A glance at the Registrar-General's Weekly Returns is sufficient to show that deaths from diseases of the respiratory system rise to a maximum in cold weather; the more intense the cold the greater the mortality. Those from diarrhœa attain a maximum during a period of intense heat in summer.

On December 25, 1895, a sharp earthquake, lasting 60 seconds, was experienced in Samoa. A portion of the Roman Catholic Church on Vaca Mountain was destroyed, and numerous cracks appeared in concrete buildings. On Dec. 26, earthquake shocks were experienced at Orense, Viana, Puebla de Tribes, La Gudina and Valdcorras in the Province of Galicia. The disturbance moved from east to west, and several houses collapsed, though no loss of life is reported. A shock was also announced as having occurred at same time, from La Baneza, in the Province of Leon. On Dec. 28, a violent earthquake shock visited the village of Cicciano Ular Nola, when a number of the inhabitants were injured and several killed. On Dec. 30, a smart shock was felt at Wiener Neustadt, in Austria, at 2 A.M. On Jan. 22, 1896, a shock of earthquake was felt throughout West Switzerland and at many places in South Germany, from Ulm to Strasburg. At Basel the shock was strong enough to awaken many persons, and a crackling noise was heard by almost all observers. The direction of the shock was from N.E. to S.W. On March 2, a well-marked earthquake passed over the capital of Mexico at 0*h.* 22*m.* A.M., in the direction of N.E. to S.W.; duration 11 seconds. It was felt at many places. On March 28, several violent earthquake shocks occurred at Valparaiso, and numbers of people left the city. In the *Bulletin Mensuel Seismologique* for Feb., Mar., and April, 1896, no less than 147 earthquake shocks are reported as having occurred in Greece and the Ionian Islands. Many of these shocks affected districts which have recently been visited by destructive earthquakes, no less than 66 having been felt in Zante alone. Hardly a day passes without an earthquake being felt somewhere in Greece. Thirty-four were recorded in January alone. A seismological department has been established at the Observatory at Athens, and Dr. Paparasilon has been appointed Director. On May 29, at about 4·45 A.M., a distinct shock of earthquake was generally experienced in the Annandale district of Dumfriesshire. The shock was not severe, but it sufficed to slightly shake buildings, rattle articles of furniture, and wake sleepers, who heard a noise as of distant thunder. No material damage appears, however, to have resulted, and no life was lost. In June, a terrible earthquake and tidal wave were reported from Yokohama as having occurred in the N. Province of Japan,—nearly the whole town of Kam Aishi was destroyed, and a thousand lives were lost. The seismic disturbances lasted for twenty hours, during which time there were 150 shocks. The earlier estimates of the disaster were, however, underrated, for advices from Yokohama on June 24 says the total loss from the tidal wave following the earthquake was 27,000, while the number of injured amounted to 8,000 more. On June 30, earthquake shocks were felt at Larnaca, and on the same date Cyprus became the seat of active disturbance. The houses were shaken, but no serious damage resulted. A despatch on July 6 stated that violent shocks of earthquake continued to affect the Island, and that a general panic prevailed at Limassol. The government and military authorities were providing tents for the people. Mr. Chamberlain received the following telegram from Sir Walter Sendall, the High Commissioner for Cyprus:—"We are having incessant earthquake shocks for over a week, causing great alarm and interruption to business, but not, as yet, serious damage." On July 8, an earthquake shock occurred at Giliccio, Bracchia, Gruto Montale and Piastre. In July, Vesuvius broke out into an active state of eruption, and about 12 months after the previous outbreak on July 5, 1895. A correspondent, writing to the *Daily News*, thus describes the scene witnessed near the volcano:—"At night the spectacle was very beautiful. Above the observatory one could see the precipitous side of the cleft opened by the burning lava, showing black against the intense brightness of the lava itself. Hundreds of small cracks in the mass of the incandescent lava radiated in all directions, while to right and left the lava, reaching steeper ground, rolled more rapidly in long horizontal lines, from the fiery edge of which pieces broke and slid. Where it reached the edge of the old lava, streams came among the bushes and small trees. One after another these caught fire, and blazed up with a white light easily distinguishable from the white light of the lava. From the distance it seemed that, if the mouth of this fatal stream were to emit the lava still more powerfully, the eminence on which the observatory stands must be taken by storm, the building be invaded, and destroyed. But even while we looked the eruption seemed to diminish in intensity, the intermittent jets from the top of the mountain were less high and powerful. To add to the beauty of the sight, the moon shone gloriously in the south, and the sea at the foot of the mountain reflected the red fire." On July 26, a tidal wave inundated the coast at Hai-chau, in the north-east of the Province of Kiang-su, China. Several villages were destroyed, and it is estimated that 4,000 of the inhabitants perished. Large numbers of cattle were also lost, and the rice fields are under water. A famine is consequently feared in the autumn.

Storms and Floods in 1895-96.

This record of the most notable storms and floods embraces the period from the beginning of November, 1895, to the end of October, 1896. At the end of November recent storms occasioned floods in the district of Odessa, where about 500 persons lost their lives, some being drowned, others perishing from the severe cold. Between Dec. 21st and 25th more than 8 ins. of rain fell at Cork; and the heavy rain in the South of Ireland produced floods extending from Tralee to Clonmel, which led to some loss of life, in addition to much suffering, and serious damage to property. On the 24th, two life-boats were capsized by the boisterous sea off Kingstown and one of them lost its entire crew.

On January 25th, a hurricane swept over the northern part of Queensland, and Townville suffered severely; the damage done to the harbour alone being estimated at £30,000, while few houses escaped destruction. This storm was accompanied by floods, and the loss of life was considerable, in addition

Digitized by Google

to enormous damage to shipping. The entire loss of property was reckoned at not less than half a million sterling. On February 3rd it was reported that fifty miles of the Northern Railway in Queensland had been submerged by the recent flood and 20 persons drowned.

On February 6th a storm swept the Atlantic coast of the United States, causing inland floods, numerous casualties, and considerable loss of life.

On March 2nd it was reported that torrential rains falling for some days in Mesopotamia caused the Tigris to overflow its banks. A vast tract of country in the Arma district was under water, and more than 3,000 cattle perished, the damage to property being beyond estimation. A nomad tribe of 600 Arabs was drowned.

By March 9th the melting of snow aided by heavy rain produced floods in several parts of Switzerland. At Basle, the Rhine rose three metres. Locle and Marteaux were inundated, and some inhabitants had to abandon their houses; the train service to Besançon was suspended, and the mail-coach service interrupted. About the same time the St. Gothard Railway became blocked by an avalanche.

On April 20th heavy floods in the Panjkora Valley broke the bridge at Chutiatan and destroyed all the bridges above Dir.

On May 15th a terrific tornado struck Sherman, in Texas, destroyed an iron bridge, lifted houses bodily from their foundations, uprooted tall trees, and killed about 150 people. About the same time a water-spout burst over Howe, Texas, when 8 people were killed and many injured. On the 27th, a tornado devastated St. Louis, in Missouri. During the day the weather had been calm, sultry, and oppressive, and about 4 p.m. the western horizon was banked up with clouds tinged with yellow; then a little wind sprang up, followed by ominous darkness like midnight. At 5 p.m. the storm burst, pouring down torrents of rain in pitch darkness, save only for a few brief intervals of terrific lightning and marvellous electrical displays. The staunchest buildings, even iron-girders and braced roofs, were hurled down. The destruction of telegraph material was phenomenal, and the wires being broken down, electricity caused fires and loss of life. The Missouri itself was like a raging whirlpool, in which large steamers and all smaller craft were scattered, some of them being capsized, and others sunk. About 500 people were killed, while some 700 were injured. All this havoc was effected within one hour, over a tract about half-a-mile wide and four miles long. Property worth 20 millions of dollars was destroyed.

On June 15th Japan was visited by a calamity of almost unprecedented magnitude. At 8.30 p.m. a wave invaded about 200 miles of the north-east coast, latitude 38° 30′ to 40° 30′ N., and in five minutes 27,000 people were killed and 7,475 houses destroyed in the provinces Aomori, Iwati, Miyagi, the brunt of destruction falling to Iwati. A large portion of the coast was swept away, and several thriving towns and numerous hamlets were practically blotted out. There was no presage of the disaster except slight shocks of earthquake and a booming sound from the sea. The noise rapidly increased to resemble the din of a great park of artillery, then in a moment waves 20 to 30 feet high thundered on the shore. It was estimated that over 50,000 people were killed or injured, and more than 7,000 houses entirely destroyed.

On July 7th the Frazer River, British Columbia, submerged the adjacent low-lying land, entailing a great loss of crops and goods. On the 27th of the same month, a great wave, five miles wide, inundated the coast of Hai-chaw in the province of Kiang-su, destroyed a number of villages, and caused an estimated loss of 4,000 lives. About the same date, owing to abnormally heavy rains, disastrous floods in Bombay Presidency interrupted traffic on railways.

About August 11th continuous rain brought about destructive floods in many parts of Switzerland. On the 14th heavy floods in the River Kishna wrought immense damage. A breach seven miles long was made in the Nizam Railway, and thousands of people were rendered homeless. On the 19th the River Lammbach at Brientz, owing to a succession of severe rainstorms, overflowed and damaged the adjacent country. On the 25th, during a violent storm, a torrent 100 yards wide and 6 feet deep swept away Ferkeh village and the railway camp near Sarras. It swept away the sleepers and rails of eight miles of railway, but notwithstanding the fact that it was the culminating point in a series of adverse circumstances it only delayed the Egyptian advance to Dongola for a couple of weeks. The army experienced heavy rains of frequent occurrence till the 31st, such as were phenomenal for the country.

At Paris, September 10th, 3 p.m., following several heavy showers, a tornado did much havoc in about a minute, carrying away or upsetting everything in its path. Vehicles were overturned, barges sent adrift, trees blown down, and buildings damaged. The destruction altogether was very serious, and several people were killed. A violent tempest raged over the United Kingdom during the 24th and 25th. Trees, walls, and buildings were laid flat, and numerous wrecks and personal injuries were reported, in addition to which there was a considerable loss of life. Dover, in particular, was very roughly treated by the storm. On the 29th a West India hurricane prevailed along the Atlantic coasts of the United States. From Cuba to New York the storm swept over a path 1,000 miles wide. Telegraph and railway traffic was disorganised. A bridge over the Susquehanna was wrecked, and vast destruction was done to buildings, while many people were killed.

By October 15th recent storms with rains caused destruction to property in various parts of Europe. Trieste was flooded, a palace at St. Sebastian was struck by lightning, lives and craft were lost from the Ostend fishing fleet, and a barque was wrecked at Dunkirk. Later on, serious floods resulted from prevalent rain in the Rhone, Tiber, and other rivers. On the 18th an extensive flood occurred in the valley of the Soar, near Leicester. Meanwhile, in Nova Scotia, the season had been the most rainy on record, and great damage was done throughout the province by freshets. Towards the end of the month, all parts of France experienced the effects of the heavy rains that had taken place, and the rivers Seine, Ardèche, Saone, Rhone Durance, and many others of lesser importance, overflowed their banks and did havoc among the low-lying districts. Torrential rains in the north of Spain caused the Ebro to overflow in many places, and railway communication was interrupted by a series of landslips between San Sebastian and the frontier.

This brings to a close a more than usually disastrous period both in its destructiveness to property and the accompanying loss of life which it entailed.

THE ASTEROIDS AND PLANETS.

To the end of September, 1896, 417 minor planets have been discovered. The three planets discovered by Charlois on March 21, May 18, and June 20 in 1895 have been numbered 402, 403, and 404 respectively. Permanent numbers have also been assigned to the five planets discovered between July 23 and December 9 of the same year; 405, 406, 408, discovered by Charlois and 407, 409, by Wolf. Subsequently eight more planets received permanent numbers: four of these were discovered by Charlois and four by Wolf.

According to the investigations of Dr. Berberich, (401) Ottilia has a period almost exactly half that of Jupiter.

An examination of the elements of (391), according to M. Coniel, shows that of all the minor planets this one makes a closer approach to the Earth than any other yet discovered.

Names have been given to the following:—

No. 324. Bamberga.	No. 342. Endymion.
,, 330. Adalberta.	,, 343. Ostara.
,, 337. Devosa.	,, 351. Yrsa.
,, 338. Boudrosa.	,, 352. Gisela.
,, 340. Eduarda.	,, 385. Ilmatar.
,, 341. California.	,, 391. Ingeborg.

The name now given to No. 385 had been used for another of the minor planets which was afterwards found to be identical with Baptistina (298).

Till the year 1890, the period of rotation of Venus had, on the authority of such experienced observers as the elder Cassini, Bianchini, De Vico, &c., been assumed to be 23*h*. In 1890, Schiaparelli, who had been prosecuting his observations at Milan, published, as the result of his investigations, that the observations could only be satisfied by a rotation period of seven or eight months, and this led him to suggest that in all probability the period of axial rotation was the same as that of the planets' sidereal revolution round the Sun, and that therefore the same point of Venus would be always turned towards the Sun.

Professor Mascari's observations at the Astrophysical Observatory of Catania point to the conclusion that, whatever may be the true period of rotation of Venus, it cannot be anything like so short as 24*h*., because the dark patches observed by him on two occasions did not seriously change while the planet was under observation for two hours. Had the period been about 24*h*. a change would certainly have been noticed in the course of two hours. Professor Tacchini, observing at Rome, says that his observations also tend to confirm the results arrived at by Professor Schiaparelli.

Herr Brenner, on the other hand, deduces a period of rotation of very nearly 24*h*. The question must for the present be considered in abeyance, though the evidence up to the present time leans more towards the longer than the shorter period.

M. Antoniadi announced, in April, 1896, that he had discovered one new and well-defined division and two fainter ones on the inner bright ring of Saturn. The first (and darker) lies nearly midway between the Cassini division and the Crape ring. This, he says, is quite obvious; the other two he could do no more than glimpse, using a 9¼-inch equatorial carrying a power of 300. The former one he believes accessible to a 6½-inch refractor. M. Antoniadi concludes that the divisions of the ring are variable, and may possibly be affected by the attraction of the satellites.

Professor Keeler's spectroscopic proof of the meteoric constitution of Saturn's rings, to which reference was made last year, has recently received confirmation from the observations of Dr. Belopolsky with the spectrograph attached to the 30-inch refractor at Pulkowa. The velocities obtained for the inner and outer edge of the ring were 21 and 15¼ kilometres per second, deduced from observation against 21 and 17 kilometres computed on the assumption that the ring consisted of discrete particles moving in accordance with Kepler's third law.

Professor Pickering has remarked that when observing the Moon near to the time of New Moon, the shadows thrown by the mountain ranges always appeared fringed by a penumbra, and hence he infers that this affords some evidence in favour of a lunar atmosphere with a density equal to that of the Earth at an altitude of about 43 miles. The photographs of Jupiter, immediately before and after occultation, showed a halo round his disc, probably caused by the same atmosphere. The black band, so frequently observed in occultations of Jupiter, at right angles to his belts, was also photographed, and Professor Pickering argues that this effect may be due either to water, vapour, or mist.

It was announced by telegram from Kiel that Professor Holden had observed a bright prominence on the terminator of Mars, on the 27th of August, 1896. From the Lowell Observatory the news comes that two of the well-known canals on Mars have again been observed double.

Total eclipse of the Sun, 1896, August 9. It is unfortunate that at the places most favourable for observation, the weather was generally cloudy or foggy, and the more important expeditions could make no observations. It will be remembered that the central line of totality passed from the extreme north of Norway, across Nova Zembla, Siberia and Manchuria, to Yesso in Japan. The expedition to Vadsö, under the auspices of the British Astronomical Association, failed entirely to obtain observations of any scientific value owing to an overcast sky. The Sun was glimpsed for a few seconds after the commencement of the eclipse, but the sky then became clouded before totality, and so continued till that phase was passed, when a few more glimpses of the Sun were obtained. It was noticed that the darkening at totality was much less than had been expected. The figures on a watch could be read without difficulty, and one of the observers thinks it unlikely that even first magnitude could have been seen.

At Nova Zembla, the party taken out by Sir George Baden Powell, in his yacht, were quite successful. The weather being quite clear throughout, all the required observations were most satisfactorily obtained.

The Russian expedition to North Finland experienced magnificent weather, and were enabled to obtain ten good photographs of the Corona. In Western Siberia, and on the River Amur, in the extreme east, the weather was quite fine during totality. At another station on the Amur, the state of the weather prevented any observations being taken.

At Bodö the totality was well seen. The Corona was observed to extend to the length of the Sun's diameter towards the N.E., and to the S.E. about half the diameter. To the N. the Corona was very slight indeed. On the S.W. edge a large red spot

was visible until totality had entirely ceased. Another observer noted two small spots on the eastern side. It was remarked here, that the obscurity during totality enabled Jupiter, Venus, Mercury, and Regulus to be seen. It appears that the Corona of 1896 is of a character intermediate between that exhibited by the Corona of years of maximum and minimum Sun spots.

At Yokohama and Tokio the eclipse was clearly visible, but in the north, where the British, American, and Japanese expeditions were located, the conditions were altogether unfavourable, and, except that the American party were partially successful, no satisfactory observations were obtained.

Professor Kaulbars, one of the observers attached to the Russian expedition in Finland, reports that the Corona was unusually large. An observer, stationed on a mountain near Bodö, noted three red prominences, one of them being visible to the naked eye.

Although many of the most important expeditions failed to obtain any observations of value, we have reason to hope that enough has been secured to increase in some measure our knowledge of the Corona.

c (1895). A new Comet, discovered by Perrine, at Lick, on November 16, in R.A. $13^h.\ 44^m.$ and Decl. 1° 40′ N., and observed at Edinburgh on the 18th in R.A. $13^h.\ 48^m.\ 15^s.$ and Decl. 0° 43′ 19″ N. This Comet was observed at Greenwich on the mornings of December 6 and 7. Its appearance is described as being very bright, and, on December 6, a distinct tail was seen pointing westwards from the nucleus. A telegram from the Cape reported that the Comet was a conspicuous object in the evening sky. Several photographs were obtained at the Lick Observatory in November, 1895. The main tail, which was 1° in length, had on the 18th increased to 5°, and on the 26th, another shorter but brighter tail was observed, making an angle of 30° with and on the north side of the main tail. The spectrum appeared to be of the usual type, that is, a faint continuous spectrum of reflected light, with the bright bands of incandescent carbon and nitrogen. Numerous photographs were also obtained at Prague, of the Comets *c* (1895) and *a* (1896). The first showed a stellar nucleus and tail 2° in length. The second Comet had been registered on the same plate as the first before its discovery was made known.

d (1895). Discovered by Brooks on November 21, 1895. Was well observed in Europe up to December 15. Appeared as a large and diffused patch of light without any sign of central condensation.

a (1896). A rather bright Comet discovered by Perrine, of the Lick Observatory, and by Dr. Lamp, at Kiel, on February 16, in R.A. $19^h.\ 27^m.$ and Decl. 1° 2′ S., only 4° distant from Perrine's Comet *c* (1895). There is no connection between them, their motions being quite different. This Comet is known as the "Perrine-Lamp" Comet. It was under observation at Greenwich up to April 13.

Faye's Comet, re-discovered at Nice in September, 1895, was observed at the United States Naval Observatory up to the middle of the following January, and was described as being very distinct, with a central condensation having a diameter of 30″.

b (1896). Discovered by Swift on April 15. Bright, with a tail. This Comet was circumpolar, and was observed many times at Greenwich, being plainly visible in spite of its low altitude. On April 18 it was very close to the Pleiades. It was very bright in May. Towards the end of April two tails were seen—the shorter and brighter pointing to the S.E., the longer and fainter to the N.E. On the 28th of April the longer one only was visible.

A curious point about the two comets *a* and *b* 1896 is, that the major axes of the orbits lie almost exactly on the plane of the ecliptic. Swift's comet has a sensibly parabolic orbit.

c (1896). This is a re-discovery of Brooks' periodic comet (1889 V.) which was observed at Nice by M. Javelle in June last, and showed an error of 6′ only from the predicted place. The perihelion passage occurred on the 3rd of November, 1896.

d (1896). Discovered by Mr. Sperra, of Randolph, Ohio, on August 31. This is the comet previously announced as having been discovered by Brooks, on September 4. It was *observed* by Brooks on September 4 after he had heard of its discovery. It is described as a faint telescopic comet.

e (1896). Discovered by Giacobini, of Nice, in R.A. $17^h.\ 14^m.\ 8^s.$ and Decl. 7° 49′ S. Is, like the preceding comet, described as a faint telescopic object. Appears to move in an orbit within the solar system, having a period of about 6½ years.

Mr. Lewis Swift announced the discovery of a small bright comet, on the evening of September 20. It was situated 1° East of the Sun and accompanied by a much fainter companion, about 30′ North. Both objects were seen by several other persons. On the following day, one of them was seen with a comet-seeker for a few seconds. No later observation has been made, and it is unlikely that further identification of them will be obtained.

THE STARS.—Recent observations of the short-period variable star U Pegasi, discovered by Mr. S. C. Chandler, and then stated to be of the Algol type, is now found to be quite different from that type of variable, having equal times of increase and decrease. The period is given as $5^h.\ 34^m.$ The place of this interesting star, for 1897, is R.A. $23^h.\ 52^m.\ 44^s.$ and Decl. 15° 23′ N.

Another variable, having a period very similar to the above, was announced two or three years ago by Dr. Gill in the southern constellation Vela. The period, $5^h.\ 22^m.\ 20^s.$, was determined from examination of the image on the photographs, the magnitude varying from 7·7 to 9·3.

It would appear, if we may credit the evidence given by photographs of star clusters taken at Arequipa, that a large number of the stars are variables of short period. In the cluster M. 3, it is said that at least 87 of the stars photographed have been proved to be variable, to the extent, in some cases, of two magnitudes, the periods of some of them being only a few hours. Professor Pickering has carried out some further investigations on the stars in the cluster M. 5 Serpentis, and, as a result of the measurement of 45 photographic plates, has determined the periods of many of those known to be variable, and has also added others to the list. The periods are in general very short, one of them being only 11 hours.

A new star was discovered by Mrs Fleming, in Centaurus, its approximate position being in R.A. $13^h.\ 34^m.\ 18^s.$ and Decl. 31° 8′ S. It was discovered on comparing photographs of the same region taken at different times. It did not appear on the plates taken before June 14, 1895, but was first observed on one taken on July 8

Digitized by Google

following, it being then of the 7th magnitude. It appears on many plates taken afterwards, the magnitude gradually diminishing until December 19, when it appeared of the 11th magnitude. There is no doubt that, as the comparison progresses of the stellar photographs, taken for the international chart of the heavens, similar discoveries will continue to be made.

The companion to Sirius, discovered in 1862 by Alvan Clark, junr., was seen by Dr. See, of the Lowell Observatory, Arizona, in August, 1896. Bessel inferred the existence of this companion from the irregularity in the proper motion of the larger star, and this inference was confirmed by Alvan Clark, who observed it in June, 1862.

Dr. E. E. Barnard, searching for Hind's variable nebula near the star τ Tauri in September, 1895, was surprised that he could find no trace of it. Subsequent examination of the place with the 36-inch refractor failed to show it under the most favourable conditions.

A new nebula was discovered by Mr. H. Wilson, situated in R.A. 21*h*. 6*m*. 5*s*. and Decl. 2° 28′ S. It is described as very faint, small and round, with a somewhat sharp condensation.

A new annular nebula was discovered by Mr. W. F. Gale, in the southern constellation Grus, on the 4th of June, 1894. It was at first supposed to be a comet, but subsequent observation proved it to be a ring nebula. Its approximate position is given as 21*h*. 52*m*., and Decl. 39° 59′ S. It is about 45″ by 35″ diameter, the major axis lying nearly parallel with the meridian. The central vacancy does not appear to be entirely devoid of nebulous matter. It may be found about 1° preceding and 10′ N. of the star λ Grus.

Another new nebula was found by Mr. Innes, situated in R.A. 19*h*. 25*m*. and Decl. 46° 5′ S. about 3″ by 5″, very condensed, and equal to a star of the ninth magnitude.

Stellar Photography.—The question has been raised as to the permanence of the measures of stellar photographs, that is, will a plate measured, say, on January 1, give the same values when measured again on December 1? This important question has been investigated by Professor Harold Jacoby, who, after careful measurements on the Rutherford plates, has shown that the values remain sensibly the same after a period of twenty years.

In May, 1896, the third meeting of the Permanent Committee for the International Chart of the Heavens was held at Paris. Progress was reported from the various co-operating Observatories, showing that the catalogue series of plates was well-nigh completed, except that in three of them, in South America, owing to political disturbance, nothing had been done. The Catania Observatory had stopped for want of funds. Among the resolutions adopted, it was agreed that all Observatories should publish results in a volume of uniform size, and that it should be the same as the catalogue of the Paris Observatory. For the chart-plates, the method of photogravure on copper was accepted for the reproductions, the original plates to be enlarged twice. For computing the constants of the catalogue plates, a minimum of ten fundamental stars is to be used. Rectilinear co-ordinates to be published as soon as possible, the probable error of measurement not to exceed 0″·20″. A uniform system of constants to be used to reduce to the epoch 1900. What that system should be, was not agreed upon then, but was left to be the subject of subsequent discussion. The Observatories will be asked to furnish a precise account as to how the photographic magnitudes had been determined so that the different scales can be reduced to a common system. For the chart, a scale of density shall be printed on the plates at the same time as the réseau, which shall allow of the determination of the sensitiveness of each plate for stars of different magnitude. Each Observatory is to make two positives on glass, of which one shall be deposited with the Bureau International des Poids et Mésures. The first instalment of this great undertaking may, judging from the resolutions passed, be expected at no very future date.

Observatories.—At Greenwich, after some delay, the North Wing and Central Dome of the Physical Observatory are now completed, and the 26-inch photographic telescope, and the Cassegrain Reflector, are in course of mounting under the Dome. The East and West Wings, which will complete the design, will shortly be commenced. The instrument in the new Altazimuth Pavilion is ready for work. The site for the Magnetic Pavilion has not yet been decided on. The want of a free circulation of air around the standard thermometers, owing to the nearness of the new buildings, will also necessitate the removal of these with the magnetometers. The staff of the Royal Observatory has recently been reorganised and will, in future, consist of two chief assistants and five assistants forming the upper staff. The lower staff will comprise two higher grade established computers, six established computers, and a temporary staff consisting of as many non-established computers as may from time to time be found necessary.

The Royal Observatory at Edinburgh, recently erected on Blackford Hill, was officially opened in April last, by Lord Balfour of Burleigh. He alluded in his speech to the munificent bequest of Lord Crawford, and the manner in which the Government had acted, and said that Edinburgh was now in possession of the largest and best furnished Observatory in the Kingdom. The buildings cost £35,000.

The Cape.—Much progress has been made in clearing off arrears of reduction and publication. This, owing to the small staff available, could only be carried out by limiting current observations as far as possible. At the date of the last report only 15 plates of the photographic catalogue series required to be taken, and 34 had been completely measured. Of the chart series in the even degrees, 503 have been taken, leaving 253 to be done. None have been taken in the odd degrees. The instruments presented by Mr. McClean are ready, and the buildings to contain them will shortly be completed. The staff will no doubt have to be increased and reorganised, as at Greenwich, before the newer and more powerful instruments required to satisfy the demands of modern practical astronomy can be made full use of.

The legislature of Minnesota has granted a sum of £2,000 for the erection of an Observatory for the use of the students in the University. It will be furnished with a visual and photographic equatorial, and the necessary accessories, and, when completed, placed under the management of Professor Leavenworth for instruction in advanced astronomy.

Yerkes.—Professor Keeler has tested the lens of the 40-inch objective for this observatory, and pronounces it equal to that of the Lick, with an almost identical colour correction. Professor

Keeler remarks that the character of the images varies according to the position of the objective as a whole in its cell, and thinks we have here evidence that we are approaching the limit of size in the construction of great objectives. Owing to delay in construction, the Observatory will not be opened till the summer of 1897. The tube of the telescope, with its attachments, will be 75 feet long, the dome 90 feet in diameter, and 110 feet in height.

The State University at Champaign, in the state of Illinois, has voted money to build an observatory, and this, with those of the universities of Ohio, Minnesota, and Pennsylvania, makes four observatories established within the past year.

A new observatory, for meteorological work chiefly, is about to be built on the summit of the Jungfrau.

The Swiss Federal Meteorological Commission propose to erect a new Alpine meteorological station, and have been prospecting on the Rochers-de-Naye for a suitable site.

Some important experiments have been made with the Gambey Circle of the Paris Observatory on the effect of the unequal distribution of lights about the instrument, and the heat radiated from the body of the observer. They show that the sources of illumination may be so unequally arranged as to cause an error of several seconds of arc, and the heat from the body of the observer one amounting to some tenths of a second. Experiments made with lights at different distances shewed that the error produced was nearly proportional to the inverse square of the distance. Much will of course depend on the material used in the telescope tube, and it is suggested that copper possessing great heat conductivity would be the best for the purpose.

In South Africa, a uniform time system has been adopted, based on the Greenwich meridian, that now in use being 2*h*. earlier than Greenwich, and in Cape Colony 1½*h*. earlier than Greenwich.

The time signal from the Natal Observatory is now sent at 1*h*., Natal uniform time corresponding to 11 *h*. Greenwich Mean Time, and 12*h*. 30*m*. Cape Colony uniform time.

The Valz prize of the Paris Academy of Sciences has been awarded to Mr. Denning, of Bristol, for his observations of shooting stars, discoveries of comets, and other astronomical work.

The Gold Medal of the Royal Astronomical Society was presented to Mr. Barnard, for his researches on, and theory of, the variation of latitude.

Obituary.—John Russell Hind, F.R.S., died on December 23, 1895; was born in Nottingham in 1822, and, when quite young, joined the staff of the Royal Observatory at Greenwich. At Mr. Bishop's observatory in Regent's Park, and afterwards at Twickenham, he devoted himself to the search for small planets, and discovered there several of the earlier ones, for which he received a pension from the Government. Dr. Hind was also well known as an author on Cometic orbits, as well as an observer. In 1853 he was appointed Superintendent of the Nautical Almanac Office, which post he resigned in 1891; was elected President of the Royal Astronomical Society in 1880.

Professor Kruger, Director of the Kiel Observatory, died on April 21, at the age of 64 years. In early life he was appointed assistant to Argelander—then Director of the Bonn Observatory—and worked chiefly at the "Durchmusterung." In 1862, Kruger was made Director of the Helsingfors Observatory, and undertook the meridian zone observations for the catalogue of the Astronomische Gesellschaft, extending from 55° to 65° of North declination; appointed Director of the Gotha Observatory in 1877, he there continued the work begun at Helsingfors. He was the author of many astronomical investigations, among which were his researches on the Orbit of Themis, for determination of the mass of Jupiter, and various investigations relating to comets, small planets, and variable stars. He succeeded Dr. Peters at the Kiel Observatory, and at the same time became editor of the *Astronomische Nachrichten*, now under the editorship of Dr. Kreutz.

Charles Chambers, F.R.S., Director of the Magnetical and Meteorological Observatory of Colaba, Bombay, died in the past year. Mr. Chambers was born in 1834, and was first appointed to the Kew Observatory, and afterwards took service with the Indo-European Telegraph Company, and was permanently appointed to the Colaba Observatory in 1868. In a paper on "The Nature of the Sun's Magnetic Action upon the Earth," he sets forth the result of his investigations into the relation between solar and terrestrial phenomena. Was elected a Fellow of the Royal Society in 1869.

General J. T. Walker, F.R.S., died on February 16, in his 71st year. General Walker's work in astronomy is more particularly connected with those branches which refer to geodesy. He joined the Indian Trigonometrical Survey in 1852, and became Superintendent of that work in 1861. Became Surveyor-General of India in 1878. General Walker's scientific knowledge was wide, and caused him to be frequently appealed to by the Government on matters connected with science in India. In 1889, he superintended experiments with the Indian invariable pendulums for determination of the relative gravity between Greenwich and Kew, and took great interest in geographical science generally.

Mr. G. P. Bidder, Q.C., whose death was announced in the past year, was an amateur astronomer and a Fellow of the Royal Astronomical Society, to the "Notices" of which he formerly communicated papers on astronomical subjects. Mr. Bidder was a son of the engineer known to the past generation as "the calculating boy," a talent which was in part inherited by his son.

Dr. H. A. Newton, Professor of Mathematics at Yale College, was known as an astronomer by the active interest which he took in meteoric astronomy. Professor Newton predicted the beautiful shower so generally observed in 1866, and wrote much on the connection between meteor streams, and comets; and further showed it to be probable that the periodic comets were brought into their present orbits from outer space by planetary attraction. Professor Newton was born at Sherburne, N.Y., in 1830.

M. Tisserand, Director of the National Observatory at Paris, died somewhat suddenly on the 20th October, in the 52nd year of his age. M. Tisserand entered the Paris Observatory—then under the direction of Leverrier—as assistant astronomer, soon after obtaining his degree as doctor of science in 1868. At the reorganization of the Observatory in 1871, he was appointed to the Chair of Astronomy at Toulouse, and Director of the observatory there. Was one of the observers who went to Japan in 1874 to observe the Transit of Venus. After the death of Admiral

Mouchez, M. Tisserand was transferred from Toulouse to Paris, to fill the more important post of Director of the National Observatory. Among writers on the higher mathematical astronomy, M. Tisserand had few equals, and hardly a superior.

TIME SYSTEMS.

The time systems in use at present over the globe are based generally on the Greenwich Meridian. Going eastwards, we find "West European time," which is the same as "Greenwich time," used in Belgium and Holland. "Mid-European time" (1*h*. earlier than Greenwich) used in Germany, Austria-Hungary, Switzerland, Italy, Servia, Denmark, Norway, and Sweden. "East European time" (2*h*. earlier than Greenwich) used in Bulgaria, Roumania, and Turkey (East). "Paris time" is used in France, "Lisbon time" in Portugal, "Athens time" in Greece, "St. Petersburg time" in Russia generally, but local times for Moscow, Warsaw, &c., "Madrid time" in Spain. In Italy the time is counted to 24*h*., a great help to the traveller when consulting railway time-tables.

In the year 1895, the Australian Colonies adopted a time system based directly on the meridian of Greenwich. Not divided into zones accurately by meridians 15° apart, the time zones follow exactly territorial divisions of the continent. In Western Australia the meridian 120° east of Greenwich is adopted—that is, their time is 8*h*. earlier than Greenwich. In South Australia and the western part of Victoria, a meridian 135° east of Greenwich has been chosen, 9*h*. earlier than Greenwich. In Queensland, New South Wales, Tasmania, and nearly all Victoria, a meridian 150° east, or 10*h*. earlier than Greenwich.

In Canada also, the zone system, based on Greenwich, has been legalized, counting up to 24*h*.; but the old notation 1*h*. to 12*h*. with the letters A.M. and P.M. remain valid. In that part of the province of Ontario east of the meridian 87° West longitude, the standard time is reckoned 5*h*. later than Greenwich; that part which lies west of 87° is to be reckoned 6*h*. later than Greenwich.

The Variable Star Algol (*Beta Persei*).

This is one of the most conspicuous and noteworthy variable stars in the heavens. Its changes of lustre are so considerable and performed in so brief a period that a special degree of interest is attached to this object. Its remarkable fluctuations of light were discovered as long ago as 1669 by Montanari, but the period was not accurately determined until long afterwards. The apparent magnitude of the star oscillates between 2·2 and 3·7, and it passes through its various gradations of brilliancy in 2*d*. 20*h*. 48*m*. 50*s*. The period is becoming shorter, for it has decreased nine seconds since 1782, when it was 2*d*. 20*h*. 48*m*. 59*s*., according to Goodricke. The star is usually a little fainter than 2nd mag.; and remains so for 2*d*. 10¼*h*., when it rapidly declines in lustre, and within some 5 hours becomes about 3¼ mag. It continues at this minimum about 15 minutes, then it suddenly acquires greater brilliancy, and in 5 hours recovers its ordinary magnitude. The following are the computed times of minima for 1897. From the end of March until the beginning of August the star is not favourably visible, being immersed in the vapours and twilight of the northern horizon, but in the autumn and winter months it may be viewed with advantage:—

January.			February.			March.			August.			September.			October.			November.			December.

Summary of Celestial Objects and Phenomena for Observation, 1897.

The following summary is intended to describe the most interesting astronomical occurrences of the year, and to point out the positions and configurations of the planets. The information thus presented in a popular form will, it is hoped, afford a useful guide to those persons who either occasionally or habitually apply themselves to the contemplation of the heavenly bodies, and find a pleasure in viewing their attractive appearances and interesting changes. We have necessarily confined our descriptions to those particular objects and events which are capable of definite prediction. There are, of course, many others which are irregular and occasional in their appearances; amongst these may be included new comets, temporary stars, displays of Aurora Borealis, and brilliant meteors or fireballs. Examples of some, if not of all, of these phenomena

Digitized by Google

will be sure to offer themselves for observation in 1897, but it is not possible to specify the exact times and positions of their appearances. Those persons who are most vigilant in observing the sky are likely to be the most successful in detecting objects of the kind alluded to. We make reference to them in the hope that amateur astronomers will maintain a diligent watch of the firmament, and record and publish anything they may notice of special interest. New comets are usually announced in the newspapers a few days after they have been discovered, and such references are often accompanied with information which will enable other persons to detect them; but a telescope is generally necessary in the observation of comets. Transitory objects, such as large meteors, confine their apparitions to a few moments of time; Aurorae are more lasting, and are sometimes displayed for several hours without intermission under a series of changeful aspects. It is obvious that spectacles of this character cannot be announced beforehand as they are irregular in their occurrence; they are therefore usually witnessed by such persons only as are favourably situated for such observations and maintain a frequent look-out for them.

Eclipses.—In the year 1897 no eclipse, either of the Sun or Moon, will occur which will be visible in the British Isles. This is a most unusual circumstance. There will, it is true, be two eclipses of the Sun during the year, but they happen under conditions which effectually prevent their being witnessed from this country. The first will be an annular eclipse of the Sun, which takes place on the evening of February 1, after the Sun has set in England. The second takes place on July 29, and forms another annular eclipse of the Sun. The time of its occurrence will be between 1 and 7 P.M., but it may only be watched from latitudes far south of Greenwich. The eclipse-phenomena of 1897 may therefore be summarily dismissed from our notice, since there is nothing of the kind visible during the year to a resident in this country.

Occultations.—The following is a short list of the principal occultations that will be observable during 1897:—

Date	Object.	Mag.	Disappears.	Reappears.
			H. M.	H. M.
Jan. 17	ϵ Geminorum		7 6 A.M.	7 30 A.M.
,, 30	ϕ Sagittarii.		5 32 ,,	6 34 ,,
Mar. 13	ϵ Geminorum		1 49 ,,	2 14 ,,
April 9	Mars		8 12 ,,	9 2 ,,
,, 21	σ Sagittarii		4 48 ,,	6 3 ,,
May 16	π Scorpii ...		9 15 P.M.	10 20 P.M.
June 16	σ Sagittarii		12 0 A.M.	12 47 A.M.
,, 24	17 Tauri ...		12 17 ,,	1 10 ,,
July 9	σ Sagittarii		6 10 P.M.	6 56 P.M.
Oct. 13	17 Tauri ...		11 59 ,,	13 6 ,,
,, 14	27 Tauri ...		2 41 A.M.	3 35 A.M.

No very conspicuous stars, such as Aldebaran or Antares, will be occulted during the year, but τ Sagittarii (2·3 mag.) will be obscured by the Moon on three occasions. The most notable event of this character will occur on the morning of April 9, when our Satellite will hide the planet Mars for a period of 50 minutes. It is unfortunate, however, that the phenomenon occurs several hours after sunrise, and that it will be quite invisible even if a pretty good telescope is employed, for the circumstances are all unfavourable. The Moon will be 7 days 4 hours old at the time, and the apparent diameter of Mars will be only 6·2″. The beginning of the event cannot possibly be observed in England, as at 8.12 A.M. both the Moon and planet will be below the horizon, and these bodies will be only just rising when Mars reappears from the bright side of the Moon. Occultations of stars are extremely numerous, but they are generally difficult to observe owing to their small magnitude. The stars given in the foregoing list are all brighter than 4th magnitude and are therefore easily observable in a telescope, though the great lustre of the Moon considerably detracts from their appearance. Fainter stars, such as those of 6th and 7th magnitude, when approaching occultation are quite overpowered by the glare from the Moon unless the telescope is fairly large. Particulars of some of the occultations of small stars are given in the Calendar part of this Almanack.

Every year many instances occur in which the Moon passes very close to planets and stars, without, however, actually hiding them from view. Thus our Satellite passes 8′ N. of Mercury on Jan. 4, will be near β Tauri on Jan. 15, α Scorpii on Jan. 27, β Tauri on Feb. 12, α Scorpii on Feb 24, Venus on Mar. 7, Mars on Mar. 11, α Scorpii on Mar. 23, Venus on April 4, Mars on April 9, α Scorpii on April 19, Venus on May 1, Vesta on May 6, Mars on May 7, α Scorpii on May 17, June 13, July 10, Aug. 7, Sept. 3 and 30, Oct. 28, Ceres on Nov. 13, and Mercury on December 25. Occultations of one planet by another are rare, but conjunctions of these bodies are comparatively frequent. Thus on June 18, Saturn and Uranus will be separated by an interval of only 2° 3′, on July 23 Venus and Ceres will be close together, on July 25 Mars and Jupiter will approach each other within 8′, on July 28 Venus and Neptune will be distant only 1° 22′, on August 13 Mercury and Jupiter approach within 1° 14′, on Aug. 25 Saturn and Uranus will be only 1° 48′ apart, on Oct. 6 Mercury and Jupiter will be in close conjunction, the interval between them being only 12′, on Oct. Venus and Jupiter make a very near approach, and so will Mercury and Mars on Nov. 12, Mercury and Uranus on Nov. 16, Mars and Uranus on Nov. 21, Venus and Uranus on Dec. 8, Venus and Saturn on Dec. 12, and Venus and Mars on Dec. 30. These various conjunctions are extremely interesting and attractive in many respects; they are generally visible without telescopic aid, and under an aspect so definite and conspicuous as to compare favourably with many other kinds of observation. An opera-glass is a particularly effective appliance in displaying the Moon and planets in a conspicuous character, and everyone interested in watching their conjunctions and alterations of position should be provided with an instrument of this kind. It is especially serviceable in looking for an object not readily observable with the naked eye, such as Mercury, Vesta or Uranus.

Jupiter's Satellites.—To those amateur astronomers whose telescopes are of moderate dimensions, four of the satellites of Jupiter offer a most attractive group of objects for study. They can be distinctly perceived in any small glass, and the circumstance which, more than any other, renders them so interesting is that their relative places vary from hour to hour. The different configurations they successively assume are so entertaining that the observer experiences none of the monotony that would result from a stationary aspect. And the satel-

lites not only change their positions at short intervals, but they frequently become eclipsed in the shadow of Jupiter or occulted by the large globe of the planet. They also make transits across the disc, and it is then they are sometimes visible as circular, dark spots projected on the bright surface of Jupiter. The shadows of the satellites are also to be seen on the face of the planet at such times, and a telescope will sometimes reveal the gratifying spectacle of two or three black spots coursing along the line of the Jovian belts and imparting quite an abnormal appearance to the planet's scenery. The satellites are not generally known by distinguishing names, it being customary to refer to them by the Roman numerals I., II., III., IV., and V. Satellite V. is the one nearest to Jupiter, and it is extremely faint and small as compared with the other four. It was discovered as lately as September 9, 1892, and is the most important addition to our knowledge with which the great 36-inch telescope at the Lick Observatory in California has supplied us. The satellites III. and IV. are the two outermost from Jupiter, and they are frequently seen transformed into dark spots when in transit. Under such circumstances they are fairly conspicuous objects even in small instruments. Appended are a few dates when Satellites III. and IV. may be observed in transit:—

Sat.	Date.	Ingress.	Egress.
	1897.	H. M.	H. M.

In this table astronomical time, counting from noon to noon, is employed.

Though we have only given the times of transits of the satellites, the shadows will also generally be perceived on the disc of Jupiter. When the planet is far from opposition, however, the difference is considerable. Prior to opposition, the shadows precede the satellites in crossing the disc, but after opposition the satellites take precedence: about two months after opposition, as on April 21, 1897, the shadow of satellite III. follows the satellite 4*h*. 25*m*., and the shadow of satellite IV. follows the satellite 10*h*. 43*m*. on April 25. The shadows may be readily identified from the satellites by remembering that they are both larger and darker.

Satellite V. is an extremely difficult object, and far outside the boundary of popular observation. Apart from its diminutive size, its proximity to Jupiter offers a serious impediment to its visibility. Its motion is very rapid, for it completes a revolution in slightly less than half a terrestrial day, or more exactly in 11*h*. 57*m*. 23*s*. The other four satellites are comparatively very bright and conspicuous even in a small telescope. Usually they are ranged in a line parallel with the belts and with the equator of the planet, but there are exceptions. Sometimes the four bright satellites are symmetrically placed, two on each side of Jupiter. Sometimes they are grouped three on one side and one on the other, and occasionally they are all four placed on one and the same side. The following are some of the dates when they may be observed in the latter position:—

Satellites on East side of Jupiter.	*Satellites on West side of Jupiter.*

A telescope will exhibit the four bright satellites grouped together in unusually close contiguity to the planet on Jan. 31, Feb. 1, March 23, May 19, 29, July 1, 18, 25, Aug. 3, Nov. 5, 12, 29, and Dec. 25. On rare occasions Jupiter appears to be attended by one satellite only, the other three bright ones being either eclipsed, occulted, or in transit, but in 1897 no favourable opportunity will occur for viewing the planet under this aspect. More rarely still, all the satellites are invisible; this happened on Sept. 27, 1843, and Aug. 2, 1867. These facts are mentioned to prove that if an observer on turning his telescope on Jupiter fails to perceive all the satellites usually visible, he must not blame the glass, for it is highly probable that the missing satellite or satellites may be undergoing temporary eclipse or obliterated by the bright disc of the planet. A telescope of about three inches aperture is usually found to possess amply sufficient power for the successful observation of the four bright satellites, and of the various phenomena resulting from their motions. Of course the instrument must be mounted on a suitable stand, and it may be placed at a window commanding a good southern aspect. It will afford the observer some hours of agreeable recreation to note the positions of the various satellites on successive nights, and delineate their changes in a series of diagrams. Two of these bodies will frequently approach very near to each other, and present an aspect very similar to that of a close double star, which is only separable with high magnifying power. Sometimes there is a conjunction of three of these bodies, and the observation of these variable and picturesque appearances never fails to prove entertaining to the possessors of small telescopes.

The Sun presents many features of singular interest to us. As the great central source of light and heat, and the mainstay of life, it is natural that everything connected with the solar orb should receive our attention in a special manner. Everyone has heard of the "spots on the Sun," and will evince curiosity to observe and perhaps to learn the meaning of these wonderful formations. That an object so dazzlingly luminous as the Sun should exhibit dark blemishes, is a fact of almost startling import, and when it is stated that these blemishes are of enormous size

Digitized by Google

and that they change rapidly, sometimes appearing or disappearing in a few hours, the attention becomes riveted on phenomena so strange. The spots are sometimes sufficiently large to be detected with the unaided eye; indeed they were occasionally seen many centuries prior to the invention of the telescope. When this instrument is employed on the Sun it becomes necessary to employ deeply tinted glass in front of the eye-piece to limit the intense light and heat of the image, for unless a precaution of this kind is taken serious damage may result to the observer's eye. A very convenient plan of effecting solar observations is to detach the coloured glass from the instrument and to allow the Sun's image formed by the telescope to fall upon a piece of white cardboard. The details of the spots may be readily perceived in this manner, and the speckled appearance of the whole disc is brought out most satisfactorily. There is also no danger of injury to the eye. For critical examination of Sun-spot structure and variations we must, however, resort to the method of direct vision as the most effective in its results. The present is not a favourable epoch for watching solar phenomena, as the spots are likely to prove comparatively rare in 1897. They attain a maximum degree of abundance every 11 years, and this interesting period recently occurred. During the ensuing few years we may anticipate that the Sun-spots generally will be few and of small dimensions. There will, however, be sure to be some notable exceptions. Some fine spots were seen in 1889, when we were near the time of minimum of these phenomena. One important feature in connection with these objects has received much attention during the last few years, for the theory that the spots represent cavities or hollows in the solar atmosphere is often contradicted by observation. The point cannot yet be regarded as settled; it is one which requires many new and reliable observations.

The Moon is admitted to be the most diversified, distinct and attractive object in the firmament for telescopic study. Her permanent features offer a strong contrast to the evanescent formations presented in the luminous atmosphere of the Sun. The lunar landscape shows many apparent changes, it is true, but these are due to the constantly varying angle at which the sunshine falls upon them. We know that the manifold objects upon the Moon are permanent markings on her surface, and are liable to no rapid alterations of shape, though possibly undergoing slight modifications in a gradual way. Evidences of great activity in ages long past are scattered broadcast over the lunar orb, but the features as they are now displayed appear to be perfectly immutable. The most suitable period at which to view the craters and mountainous regions of the Moon is when her disc is only partly illuminated, and she is either in a crescent form, near first quarter, or slightly gibbous. At such times the shadows of the inequalities of landscape near the terminator are strikingly manifested, and the diversified character of the formations are pleasingly portrayed. This is far from being the case at the period of full Moon, for her features are then displayed under a high Sun and their shadows have disappeared, so that the inequalities of the landscape have lost their distinctive and varied character. The great refulgence of the full Moon is also an impediment to successful observation. Let the observer avail himself therefore of the period near the first quarter, for our satellite is then very conveniently placed in the evening sky, and many of the conditions are favourable.

Planets.—Mercury.—The most promising opportunity for obtaining a naked-eye view of Mercury will occur at the close of April, but the planet will also be presented in the evening sky at the opening of the year. He will be at his greatest elongation, E. (19° 8′) on the night of January 6, and will set about one hour and a half after the Sun. This interval is not, however, sufficiently great to enable that planet to appear as a conspicuous object. At the time mentioned, he will be situated in Capricornus and about 5 degrees S. of the pretty bright star β Capricorni. Venus and the crescent of the new Moon may be observed about 24 degrees to the eastwards. We must wait until April, however, in order to view Mercury under the best circumstances, for on the 28th he again arrives at his greatest elongation E. (20° 33′) and will be quite conspicuously presented as an evening star between about April 23 and May 2. He sets more than 2 hours after the Sun during this interval, as the following figures prove:—

Date.	Sun sets.	Mercury sets.	Interval.
	H. M.	H. M.	H. M.
April 23	7 8	9 13	2 5
,, 24	7 10	9 17	2 7
,, 25	7 11	9 20	2 9
,, 26	7 13	9 23	2 10

,, 28	7 16	9 27	2 11
,, 29	7 17	9 29	2 12
,, 30	7 19	9 30	2 11
May 1	7 21	9 31	2 10
,, 2	7 23	9 30	2 7

At this period the planet will be placed in Taurus and close to the well-known cluster called the Pleiades. On April 27 Mercury passes about 1° S. of this cluster, and a small telescope or opera-glass will display both planet and stars in the same field of view, but the twilight on the W.N.W. horizon will be rather strong and the stars somewhat faint. On May 3 Mercury will be in conjunction with the new Moon and may be detected a few degrees S W. of our satellite at about 9 P.M. If the weather is clear at this time an excellent opportunity will be afforded of detecting the planet. The observer should search for him at a low altitude in W.N.W., where, if the sky is free from mist and clouds, a small flashing, starlike object will be detected without difficulty, and the observer need entertain no doubt as to the identity of the orb. As a morning star Mercury will shine at his best on about October 7, when he will attain his greatest western elongation (17° 57′) and rise about 1¾ hours before the Sun. He will be very close to the bright planet Jupiter at this period. On October 6, just after sunrise, the two bodies will be in conjunction and separated by a space of only 12′ or 1-fifth of a degree. The proximity of Jupiter to Mercury will guide the eye to the position of the latter and enable him to be readily picked up. Venus may also be observed about 14 degrees W., and will form the most brilliant of an exceedingly interesting trio of objects. At this time Mercury will be in the preceding part of Virgo; on Oct. 5 he will be 12 degrees S. of the bright star β Leonis, and on

Digitized by Google

the same date will be less than 1 degree distant from β Virginis. A telescope with a low-power eye-piece having a large field will show Jupiter, Mercury and the star β Virginis at one view. The spectacle is a rare one and should not be allowed to pass by anyone who appreciates the observation of unique configurations of this character. The great drawback will be that it necessitates the intending observer rising at an early hour, for the best time to witness it will be at about 5·15 A.M., when the objects implicated will be very low on the eastern horizon. The view of Mercury is in itself sufficient recompense for any inconvenience the observation may occasion, for this orb is rarely seen by anyone outside the band of regular astronomical observers. The planet is so near to the Sun that he is generally obliterated in the glare from that luminary; the greatest distance between the two bodies being 28 degrees. It follows, therefore, that this planet can only be discerned when near the horizon about an hour before sunrise or the same interval after sunset, when the twilight is strong and the low sky seldom free from mist or fog. And it is only on a few succeeding days that this object admits of possible observation, for after reaching his greatest elongations from the Sun he quickly retraces his path, and is again lost amid the glare of the solar rays. It is often stated that Copernicus, who was one of the greatest astronomers of the sixteenth century, made many vain endeavours to obtain a view of Mercury, and it must be admitted that many difficulties bar the way to success. In a favourable climate, however, and from a position commanding good views of the E. and W. horizon, there is really no serious obstacle to prevent the planet being seen if the intending observer is careful to utilize his opportunities. Of course it is necessary to know just where to look, and the attempt must be made at a suitable time of the year and hour of the night. A celestial globe is of great assistance in work of this character, for the position of the planet can be obtained from an ephemeris and marked on the globe, and the latter being set for the hour of the intended observation, the place of the object relatively to the E. or W. horizon, and its altitude, can be readily determined. Preparation of this kind, and the assistance of an opera-glass, will enable the planet to be identified without much trouble. At Bristol, in May, 1876, Mercury was observed with the naked eye on 13 different evenings, and between April 22 and May 11, 1890, the planet was similarly noticed on 10 nights. He was also observed on two occasions in January, 1896, and on four evenings in May of the same year, but was only just visible in the strong twilight. This fugitive object may be detected with the greatest facility at such times as he is presented as an evening star in the spring months of the year. His position is also an auspicious one when perceptible as a morning star in the summer and autumnal months; but of course it is often inconvenient for observers to be on the alert before sunrise. Near the periods of his greatest elongations east, his position in the first half of the year is far north of the Sun's place, and thus he remains above the horizon in the absence of the Sun for a comparatively long period (about two hours). He sometimes appears brighter than a 1st mag. star, and would display a conspicuous lustre but for the bright twilight and obscuring vapours which contend against him. Observers must remember that this planet appears brightest a few evenings *before* his greatest eastern elongations in the first half of his year, and a few mornings *after* his western elongations in the last half of his year.

Venus has from the earliest times upheld her title to be considered the most resplendent and the most beautiful of all the planetary members of our system. In 1897 she will be visible under a most favourable aspect, and shines conspicuously nearly all the year. As a brilliant evening star she will gild the western sky in the winter and early spring, but at the close of April temporarily leaves the sky to reappear as a morning star at the opening of June. For the rest of the year she remains visible before sunrise, though in December she will be rapidly nearing the Sun, and will have lost much of her wonderful lustre. On Feb. 15 the planet will be at her greatest eastern elongation (46° 38′) and sets 4½ hours after the Sun. On March 22 she will attain her greatest degree of brilliancy, and on April 23 arrive at inferior conjunction with the Sun. On June 3 she will again present herself at maximum brilliancy, and on July 7 will reach her greatest western elongation (45° 38′), rising about 2½ hours before the Sun. This interval increases, goes on increasing until during the last half of August she precedes the Sun above the horizon by 3*h*. 38*m*. Venus will be near the Moon on the evening of Jan. 6, Feb. 5, March 7, and April 4, and on the mornings of June 26, Aug. 25, Sept. 24, Oct. 24, and Nov. 23. She will be close to Ceres on the morning of July 23, in conjunction with Neptune on July 28, with Jupiter on Oct. 19, with Uranus on Dec. 8, with Saturn on Dec. 12, and with Mars on Dec. 30. Her path in the heavens during the year may be briefly indicated as follows:—Early in January she will be situated in Aquarius and 3 degrees N.E. of Delta Capricorni; thence moving rapidly eastwards, she passes through Pisces and enters Aries with the opening of March. On March 9 she will be 6 degrees S. of α Arietis. In July her position will be in Taurus; she traverses Gemini in August, and on Sept. 1 we shall find her in Cancer. On Sept. 25 she will be placed very near indeed to α Leonis, and on Nov. 7 will occupy a position 4 degrees N. of α Virginis. When observed in a telescope, the most striking feature is formed by the Moon-like phase of the planet. This will be evident in any small glass and will be much easier to detect than the phase of Mercury, the latter planet being not only much smaller in size, but more distant than Venus from the Earth. Indefinite markings of a dusky irregular appearance are sometimes to be distinguished on this orb, but they are delicate appearances and probably represent differences of density in the cloud envelopes of the planet. The actual surface markings are not visible owing to atmospheric interference. At the beginning of the year, the image of Venus will be in a gibbous form, in February it will be like the Moon in her first quarter, in March she will be seen as a beautiful crescent narrowing day after day. In June she will still be crescented, in July her aspect will be similar to the Moon in her last quarter, and in later months, she will be gibbous or more than half illuminated, approaching nearer to the circle as the year goes on. The apparent diameter of Venus varies greatly according to her position; thus on Jan. 1 it is 16·4″, which increases to 58·6 on April 28 and then decreases to 10·1″ at the close of the year. An interesting result of the relative motions of the Earth and Venus is that the

Digitized by Google

elongations of Venus are repeated on nearly the same dates as before, every eight years, so that in 1897 we shall see the planet under nearly the same conditions as prevailed in 1889. On the whole 1897 may be considered extremely favourable as regards the apparitions of Venus, and regular observers as well as casual sightseers will find the planet a singularly attractive object and one that will repay all the observation that may be bestowed upon it.

Mars will be visible to the best effect at the opening of the year, when he will be above the horizon nearly all night. His opposition to the Sun occurred, however, on the morning of Dec. 11, 1896, so that in January, 1897, the planet will be losing his favourable aspect. As his distance from the Earth increases rapidly, his apparent diameter becomes much smaller, for while on Jan. 1 it is 14·6″, it is only 10·8″ at the end of that month, and will have further declined to 8·2″ at the beginning of March. Telescopic observations of Mars to be successful must therefore be made early in January, before the disc becomes too small for the details to be seen. The position of the planet in the heavens is a favourable one, his northern declination being more than 25°, hence his altitude when passing the meridian (which he does at 9 P.M. at about the middle of January) is about 63°. His path amongst the stars during the year will be as follows:—On Jan. 1 he will be in the eastern region of Taurus and moving slowly westwards, but after the middle of the month he will begin travelling eastwards, so that on March 1 he will be found between the stars β and ζ Tauri. On April 1 he will be in Gemini, and on April 8 will almost occult the star ϵ Geminorum. On May 1 he will be a few degrees S. of the bright pair Castor and Pollux. On June 1 his position will be in Cancer, and, still pursuing an easterly course, he soon after enters Leo, and on Sept. 1 will be found in Virgo. During the first six months of the year he will be perceptible as an evening star, but during the last six months he will be quite invisible, his position being near that of the Sun. He will be near the Moon on Jan. 14, Feb. 11, March 11, April 8, May 7, and June 4. On July 25 in the afternoon he will make an exceedingly near approach to Jupiter, and a telescope will reveal the two planets distant only 8′; but they can hardly be seen in the evening, as they will set about one hour and a half after the Sun, and will be practically obliterated by the strong twilight prevailing at this season. On April 9, at the time the planet is placed near ϵ Geminorum, he will suffer occultation by the Moon, but as this phenomenon occurs under very unfavourable circumstances (the Moon and planet rising at the concluding stage) it will scarcely be observable in this country, though it may be well seen in longitudes far East. Though Mars will be tolerably well presented at the opening of the year, he cannot be said to offer special inducements to the observer at any period of 1897. His place in the sky could be scarcely more auspicious, it is true, but his distance from the Earth is much greater than it is when the planet is displayed to the best advantage. Thus, on Jan. 1 it will be about 60,000,000 miles, while on Aug. 6, 1892, it was only 35,000,000 miles. It will be quite possible to obtain some excellent telescopic views of Mars during the first half of January. The supposed "double canals" on the planet and many of the fainter and more difficult markings have been observed under circumstances not favourable to their appearance, and attempts should be made to recover these forms. Of all the planets of the solar system, the Earth alone excepted, Mars is essentially the one which has enabled his rotation period to be ascertained with the greatest degree of accuracy, and this period is 24*h*. 37*m*. 22·6*s*., which is slightly longer than that of the Earth. This element being so accurately known, the markings on the disc are not studied as a means to redetermine it, but rather with the object of ascertaining their real character and precise outlines. Several charts of Martian features have been published (among which may be instanced those of Schiaparelli, Green, and Proctor), and our knowledge of the visible aspect of this orb may be considered as pretty extensive, though serious discordances are presented when the results of different observers are compared. As to the two satellites of Mars, they are not objects for ordinary instruments—they are so small and faint that only the largest telescopes will show them.

Minor Planets or Planetoids.—These objects are remarkable for their small size and for their numbers. At the end of 1895 about 408 of these bodies had been discovered. In these notes we only propose to refer to the four principal objects of this class—viz., Ceres, Pallas, Juno, and Vesta, which were detected in the early years of the present century. *Ceres* will be well situated for observation at the end of the year, and will arrive at conjunction with the Sun on Christmas Day. This planet may be easily found on about Dec. 11 being on that date 1¼° S. of the bright star ϵ Geminorum and moving slowly westwards. On the morning of July 23 Ceres will be only 6′ S. of Venus, and may be observed just before sunrise. On Nov. 13 at midnight this planet will be only 20′ S. of the Moon. *Pallas* will arrive at opposition to the Sun on Oct. 22, and may be seen to advantage during the last quarter of 1897. On the date of opposition the planet will be close to the stars τ_1 and τ_2 Eridani. It is most unusual to speak of a planet so far off the ecliptic, but we must remember that Pallas has an inclination of 34½°, and is often enabled to stray a long way from the planet zone of the zodiac. *Juno* passed through opposition to the Sun on Dec. 17, 1896, and will therefore be well visible in January, 1897, and placed a few degrees above the belt of Orion at the end of January this planet will be about 4° N. of δ Orionis, the northernmost star in the belt. On Feb. 3 Juno has the same right ascension as Vesta, but is 18° S. *Vesta* came to opposition on Dec. 21, 1896, and, like Juno, will be best visible in the early months of 1897. On Jan. 1 her position will be in the club of Orion and between the stars ζ Tauri and μ Geminorum. The planet will be 1¼° S. of the former star on Jan. 25, and may be readily picked up at about this period. Vesta is the brightest, though not the largest of the minor planets, and near the time of opposition may be seen by the naked eye like a star of 5½ magnitude. In the observation of these minor planets a telescope will be desirable, and the only way for amateur observers to identify them from small stars will be by their motion. A diagram should be made of the suspected object and the stars in the field, then a few nights later the region may be re-examined, and the planet will betray itself by its motion. Formerly these planets were discovered by telescopic observation, the observer comparing the sky with reliable star charts and detecting minor planets by their changes of position. This method is now, however, quite supplanted by photography, which is at once more

expeditious and effective. It was formerly supposed that Vesta was much the largest of the minor planets, but recent measurements at the Lick Observatory show that Ceres considerably exceeds any other of these bodies in point of size. An ephemeris of the minor planets Ceres, Pallas, Juno and Vesta appears on page 81.

Jupiter will shine brilliantly in the evening sky during the first half of the year. In the first four months he will gild the East, while Venus, even more resplendent, gilds the West. Mars will also be visible, emitting an intense ruddy light at a great altitude in the South, so that the winter and early part of the spring of 1897 will display the three most brilliant planets in the evening hours. In January Jupiter does not rise very early, for on the 1st he surmounts the horizon at 9*h*. 11*m*.; but he presents himself sooner every night, so that by the 29th he rises at 7*h*. 11*m*., or two hours earlier than on the 1st. He will be in opposition to the Sun on Feb. 23, and at this period will present the finest appearance, being perceptible during the whole night, and having an apparent polar diameter of 41·2″. This will decrease in later months, until at the middle of July it will be only 30″. His path in the heavens may be described as follows:—At the beginning of the year he will be in Leo and moving very slowly westwards. In April and May he will be situated about 3° E. of *α* Leonis (Regulus), and in June will be 4° E., the distance increasing as time goes on. The planet will reappear as a morning star in October, after temporary disappearance in August and September, and will then be in the head of Virgo about 13° S. of *β* Leonis. In November he will be further East, near the star *η* Virginis. He will be in conjunction with the Moon on Jan. 21, Feb. 17, March 17, April 13, May 10, June 7, July 4, Oct. 23, Nov. 20, and Dec. 18. He will make a very close approach to Mars at 3 P.M. on July 25, to Mercury on the morning of October 6, and to Venus on October 19. As an object for telescopic study, Jupiter is the most interesting of all the planets, from the facility with which his surface markings may be distinguished and their very diversified and changeable character. The belts and spots on the disc of this planet are very distinctly visible in moderately powerful telescopes. One spot has, during the last 17 years, by its durableness and definite oval outline, attracted a large amount of attention, and will doubtless continue to do so. It appeared amid the southern belts of the planet in July, 1878, and was of an intensely red colour. This particular object was rather more distinct in 1895 than in 1894, but it was extremely faint in 1896, though there seems no reason to anticipate its complete disappearance. Since October, 1885, the mean rotation period of this marking equalled 9*h*. 55*m*. 41*s*., and it was slightly less in preceding years. For the guidance of those observers who may feel desirous of examining this extraordinary spot, we give a list of a few of the times when it may be expected to present itself on or very near the central meridian of Jupiter in January and February, 1897:—

1897.	H. M.		1897.	H. M.	
Jan. 20	7 34	P.M.	Feb. 8	8 13	P.M.
,, 22	9 12	,,	,, 10	9 52	,,
,, 24	10 50	,,	,, 13	7 21	,,
,, 27	8 19	,,	,, 15	9 0	,,
,, 29	9 57	,,	,, 17	10 40	,,
Feb. 1	7 27	,,	,, 20	8 9	,,
,, 3	9 5	,,	,, 25	7 18	,,
,, 5	10 44	,,	,, 27	8 57	,,

The observer may readily compute for himself the times of transit for other nights, if he requires to know them, by adopting the rotation period of 9*h*. 55*m*. 41*s*., which is equivalent to the interval elapsing between successive transits of the same spot. It is also useful to remember that every twelve days (which include twenty-nine rotations) the spot becomes central on Jupiter at nearly the same times as before. These remarks only have a special reference to the red spot, for it is found that different spots furnish different periods of rotation. Some of the markings have exhibited a proper motion so rapid that they complete a circuit of Jupiter in 7¼ minutes less time than others. These features are doubtless of an atmospheric character, and probably influenced by currents of different velocity operating far above the sphere of Jupiter. As to the red spot, it is desirable that it should continue to be watched and its further changes of tint and motion duly recorded. Though it cannot be a formation cohering with the actual surface of Jupiter, it must be a feature possessing elements of remarkable permanency. During the next few oppositions this planet will not be so favourably placed as in 1897, for his declination will be far to the South and his altitude not nearly so great when culminating. Students of the Jovian surface will therefore find it advisable to devote special attention to the various markings in the early spring of 1897. Notwithstanding the large amount of observation which in past years has been given to the planet, there still remain a great number of interesting facts to be gleaned respecting his atmospheric currents and the many curious light and dark spots carried along at different velocities in them.

Saturn will appear as a morning star at the beginning of the year, rising 3¼ hours before the Sun, and in opposition 12° N.W. of the red star Antares in Scorpio, and 4° N.W. of *β* in that constellation. In April the planet will become visible in the evenings, rising at 8*h*. 46*m*. on the 29th, and remain in view all night afterwards. He will arrive at opposition to the Sun on the morning of May 18, and at this time will exhibit a conspicuous appearance in the nocturnal sky. One circumstance, however, will militate against the successful observation of this object, and it is that his declination is 17° S., so that even when passing the meridian his altitude is only about 21°. Some tolerably good views may, however, doubtless be obtained, and especially at stations S. of Greenwich, where the planet's elevation will be more considerable. The rings are now widely open, and their northern side exhibited to the best effect. To show the outer minor axis of the outer ring during the oppositions in 1894 and three following years the following figures may be quoted:—

Opposition.	Minor axis of outer ring.
1894, April 11	″ 9·46
1895, April 23	12·64
1896, May 5	15·70
1897, May 18	17·48

The planet will be an evening star during the whole of the Summer, and in part compensate for the withdrawal of Venus, Mars and Jupiter, so brilliant in the evenings of the early months of the year. In October Saturn will practically leave the evening sky, having drawn too near the Sun to be visible, and will be in conjunction with that luminary on November 25. At the end of Decem-

ber, however, he will again become visible, appearing as a morning star, and rising more than 2½ hours before the Sun. The motion of Saturn is extremely slow, as his orbit is at a vast distance from the Sun and Earth. During the first half of the year the planet is within a few degrees of the bright star β Scorpii, the nearest approach of the two bodies occurring during March. After being stationary on March 10, Saturn travels leisurely westwards until the end of July, when he again directs his path eastwards. On November 11 he will again approach β Scorpii very closely, and will be less than 1° N. of that star. At the close of the year he will have assumed a position 6° N. of α Scorpii (Antares). He will be in conjunction with the Moon on Jan. 27, Feb. 23, March 23, April 19, May 16, June 13, July 10, and Aug. 6, the distance of the two orbs at the times it occurs being about 7¼°. On August 25 at midnight the planet will be 1° 48′ N. of Uranus. Saturn is a beautiful object when surveyed under telescopic power, but the details of his appearance are not so easily discovered as those of Jupiter. This is accounted for by the greater distance and smaller size of Saturn. Much disputation has taken place in recent years as to the exact appearance of the markings both on Saturn and Mars. As to the former planet, many observers with small, and some of them with indifferent telescopes, assert that both dark and light spots are to be seen in the dusky belts and bright zones which mark the globe of the planet; but others, with better instruments and better facilities for detecting such features if existing, are confident that there are no spots of the character alluded to. For the present the matter remains in abeyance, and it must be confessed that on the evidence before us many of the alleged markings and abnormal appearances of the planet have an extremely dubious existence. In the spring of 1897 it will be well for observers to reinvestigate this question in a practical way, and to settle it in a satisfactory manner if possible. Saturn has eight satellites, but all of them cannot be seen, except in telescopes of the very largest kind. The brightest satellite, appropriately designated Titan, is visible in any small glass, and Iapetus is sometimes to be glimpsed with very small instruments, but Mimas and Hyperion require far greater power. Instances are recorded where these fainter satellites have been detected with telescopes apparently quite inadequate for the purpose, but such instances may be generally dismissed as pure efforts of the imagination. All observers of the phenomena of Jupiter and Saturn and of their satellites will find Mr. Marth's ephemerides in the Monthly Notices of the Royal Astronomical Society of the greatest possible use to them in carrying out their researches successfully.

Uranus will arrive at opposition to the Sun on May 17, and only 11 hours before the opposition of Saturn. He may be well observed in the spring months, though his position will be inconveniently low, being 19½° S. of the equator. His apparent diameter is only 3·8″, and he is only just visible to the naked eye, shining like a star of the 5½ magnitude. His position on Jan. 1 is about 1¼° S. of Saturn and 5° W. of β Scorpii (magnitude 3). At the close of the year he occupies a place 5° E. of that he had at the beginning, and will be less than 1° S. of β Scorpii. This star will afford an excellent guide to the place of Uranus during 1897; the position of the star is at

R.A. 15*h*. 59*m*. 27*s*., Dec. S. 19° 31′ 24″.

The position of Uranus is as follows:—

		h.	*m*.	*s*.		°	′	″
March 2.	R.A.	15	47	30	Dec. S.	19	43	42
April 3.	,,	15	45	49	,,	19	38	18
May 1.	,,	15	41	57	,,	19	25	54
June 2.	,,	15	36	32	,,	19	8	8
July 4.	,,	15	32	13	,,	18	53	48

On March 2 Uranus will be 3° W. of the star, on April 3 3½° W., on May 1 4½° W., on June 2 5½° W., and on July 4 6½° W. A field-glass, or, better still, a small telescope, will reveal the planet without difficulty. He will be near the Moon on Jan. 27, Feb. 23, Nov. 24, and Dec. 21. Uranus is not a difficult object to discern without telescopic aid, but the night must be dark, and the atmosphere very clear, to enable him to be identified to the best effect. If the observer entertains any doubt as to the object he should note its exact place relatively to stars near, and then watch it on subsequent nights for traces of motion. This will soon become manifest, though it will be small in extent if the suspected object is really Uranus. The best season for any observations of this character will be April and May; in June the strong twilight will interfere with satisfactory views of a faint planet like this. His four satellites are too small to come within the powers of ordinary telescopes, but the two outermost, Titania and Umbriel, have occasionally been glimpsed with moderate appliances. The planet himself shines with a pale blue light, and telescopic power will immediately reveal the distinction between his disc and that of the surrounding stars.

Neptune will be observable to the best advantage during the first and last quarters of the year. He will be in opposition to the Sun on the evening of December 12, at about which period he will be visible during the whole of the long winter nights. His declination being 21½° N. of the equator he will remain above the horizon during periods of about 16 hours. But this planet is wholly invisible to the naked eye; his orbit is placed on the confines of the solar system, and though he has a real diameter of 33,000 miles, his apparent diameter, as seen in the telescope, is only 2·43″, so that his disc is scarcely recognizable from that of a star in a small telescope. His brightness is approximately equal to that of a star of the 8th mag., and his motion is exceedingly slow. At the date of his opposition in December he will be placed 3° WNW. of the bright star ζ Tauri, and will be travelling slowly westwards in a direction away from that star. At the end of 1897 the planet will be only 3° E. of the position he occupied at the beginning. By the great majority of observers this object is disregarded on account of his faintness and small apparent size; but the interesting circumstances attending his discovery in 1846, and the fact that he revolves on the extreme boundaries of the solar system, sometimes lead observers to gratify themselves with a view of his minute disc. As to the satellite attending him, it is only an object for our best telescopes, and it is surprising, considering the great distance separating Neptune and the Earth, that such an object can be discerned at all.

An ephemeris of the distant planets Uranus and Neptune will be found on page 81.

Periodical Comets. These objects are strikingly interesting from the mystery which, in a great measure, surrounds them. Many additions to

our knowledge concerning them have been gleaned in recent years. Thus, during the 12 years from 1884 to 1896, there were no less than 12 comets of short period discovered. The diligence of modern astronomers has enriched this section of the science with some notable discoveries, but it appears that though new comets of short period are being introduced by means of planetary perturbations (for which Jupiter is mainly responsible) there are others which encounter vicissitudes of a character sufficiently powerful to endanger if not to terminate their existence. Biela's double comet appears to have disappeared, and it is very probable that Brorsen's comet has followed the same fate, for it could not be found at its predicted returns in 1890 and 1895. No doubt the materials of which these presumably lost comets were constituted still exist, though in a more scattered form, and continue to obey the laws of gravitation, but in the guise of comets they will probably never be seen again.

In 1896 astronomers anticipated the reappearance of two periodical comets, viz., Faye's and Brooks's (1889, V.), and they both returned agreeably to prediction. The latter was first seen by M. Javelle with the 30-inch refractor at Nice on June 20, when it was only 6′ from the place predicted from the observations in 1889. The redetection of this comet is not only another triumph for mathematical astronomy, but it also supplies us with another well-determined and fully veriled member of the solar system. In 1897 four periodical comets are due to return to perihelion. Of these, two are the well-known comets of D'Arrest and Tempel-Swift, and their reappearance may be certainly expected; but in the case of the other two, Spitaler's and Brooks's (1886, IV.), there are considerable doubts, as they have only been seen at one return. Moreover, Spitaler's comet is very faint, and may easily escape detection unless the largest instruments are employed in attempts to recover it. Whatever success is attained in rediscovering the four expected comets, we may be assured that no endeavours to this end will be wanting on the part of practical astronomers. The periodical comets whose returns are computed up to 1902 are as follows:—

Returns to Perihelion.	Period in Years.	Name of Comet.
1897. Mar. ...	6·378	Spitaler (1890, II.)
May.....	6·691	D'Arrest.
May.....	5·534	Tempel-Swift.
Aug. ...	5·595	Brooks (1886, IV.)
1898. April ...	5·818	Pons-Winnecke.
May.....	3·303	Encke.
June ...	8·534	Swift (1889, VI.)
June ...	6·821	Wolf.
Sept. ...	6·507	Tempel (1867, II.)
1899. Jan.....	8·687	Denning (1881, V.)
Mar. ...	33·178	Tempel (1866, I.)
April ...	6·309	Barnard (1892, V.)
May.....	6·609	Tuttle (1858, I.)
May.....	6·909	Holmes (1892, III.)
July.....	5·211	Tempel (1873, II.)
1900. Feb.....	6·627	Finlay.
July.....	5·800	De Vico-Swift.
Oct.....	5·398	Barnard (1884, II.)
Dec.....	5·456	Brorsen.
1901. Aug. ...	7·480	Denning (1894, I.)
Aug. ...	3·303	Encke.
1902. Sept. ...	7·059	Swift (1895, II.)

A proportion of these must be regarded as uncertain, as they have been observed at one apparition only, but the majority will undoubtedly return at the computed times. It forms a most entertaining branch of astronomical work to trace a small comet threading its way amongst the neighbouring stars from night to night. Large comets appear promiscuously and with more or less suddenness, and in the present state of our knowledge it is impossible to definitely predict the times of their apparitions. The only intimation of their approach is that given by those persevering observers who regularly sweep the firmament in quest of such objects and are sometimes fortunate enough to sight them before they have visibly developed the conspicuous features which belong to comets of the largest class.

Meteors, also known as Shooting Stars, Bolides, Fireballs, &c., are to be seen at all times and seasons, though they vary considerably in regard to numbers. This branch of astronomy is increasing both in interest and importance, and has made rapid advances during the last half a century. It is a department in which co-operation amongst observers is essential, and in which accuracy of observation, though very difficult of attainment, is absolutely desirable. Whenever a meteor is seen its apparent path amongst the stars should be noted; also an estimate formed as to the duration of its visible flight. Other details are of far less consequence. The meteors belonging to every shower take their flights from a certain definite centre of radiation; this is called the radiant point. If the paths are carefully noted down it will be found that they converge on this point like the spokes of a wheel upon the axle. Many of these radiants of meteor showers are visible on the same night, so it is sometimes difficult to distinguish one from another, and to allot the individual meteors seen to their correct centres. With regard to the more brilliant forms of meteoric phenomena these should always be recorded as accurately and fully as possible. It is especially important that the observed paths of all large meteors and fireballs should be described, for, without this element accounts of these bodies are practically useless. If the path of a meteor as seen at two distant stations is available for discussion it becomes possible to compute its height, distance, and radiant point. On the other hand, an elaborate description referring only to the brightness of a meteor, and giving but a rough estimate of its position in the E, W, N, or S, is of no utility whatever for scientific purposes. The majority of the known meteoric systems are probably annual in their manifestations, though influenced by periodical changes in richness. Below is given a list of 40 prominent meteor showers, also some details concerning the great August shower of Perseids. The data are based on observations made during the last 20 years at Bristol:—

No.	Epoch.	Radiant Point. R. A	Radiant Point. Dec.	Name of Shower.
1	Jan. 2—3	230°	+53°	Quadrantids.
2	Jan. 1—11	97°	+29°	ε Geminids.
3	Jan. 14—20	295°	+53°	κ Cygnids.
4	Jan. 18—28	233°	+31°	θ Coronids.
5	Feb. 1—4	211°	+69°	α Draconids.
6	Feb. 15—20	236°	+11°	α Serpentids.
7	March 4—15.....	175°	+10°	β Leonids.
8	March 24	161°	+58°	β Ursids.

METEOR SHOWERS—*continued.*

No.	Epoch.	Radiant Points. R. A.	Radiant Points. Dec.	Name of Shower.
		°	°	
9	March 27	229	+32	α Coronids.
10	April 17—21.....	218	+33	ε Bootids.

34	Nov. 13—14	150	+23	Leonids.
35	Nov. 13—28	155	+40	Leo Minorids.
36	Nov. 20—28	63	+22	ε Taurids.
37	Nov. 26—27	25	+43	Andromedes.
38	Dec. 1—14.....	108	+33	Geminids.
39	Dec. 7—12.....	119	+29	α Geminids.
40	Dec. 18—29	194	+67	κ Draconids.

The Leonids, No. 37, should be specially looked for in 1897 and few following years, as they form splendid showers of streak-leaving meteors at intervals of about 33 years. There were fine displays of these meteors between 1864 and 1869, and the maximum occurred in 1866.

The Perseids, No. 22 in the foregoing list, display some singular characteristics, for they are probably visible for more than a month, during which period their radiant point is in constant motion to the eastward. The place of the radiant on alternate days during four weeks of the chief activity of the shower is as follows:—

EPHEMERIS OF THE PERSEID RADIANT POINT.

Date.	Position. R. A.	Position. Dec.	Date.	Position. R. A.	Position. Dec.
	°	°		°	°
July 19	19	+51	Aug. 2	36	+55
,, 21	22	+52	,, 4	38	+56
,, 23	25	+52	,, 6	40	+56
,, 25	27	+53	,, 8	42	+57
,, 27	30	+54	,, 10	45	+57
,, 29	32	+54	,, 12	47	+57
,, 31	34	+55	,, 14	50	+58

Large meteors should be particularly looked for on the following nights:—

January 2, 21, 31; February 3, 7, 10; March 1, 2, 4; April 11-12, 19-20; May 2, 4, 15, 31; June 6-7, 22, 29-30; July 11, 20-21, 25-30; August 3, 5, 7-13, 15, 19-22; September 1-2, 6-7, 11-13, 25; October 13, 15, 17-18, 22, 24, 29; November 1-2, 4, 6-9, 11-15, 19, 27; December 8-9, 11-12, 21. The most noteworthy dates are in heavy type.

TELESCOPIC POWERS NECESSARY FOR CELESTIAL OBJECTS.

LARGE Nebulæ such as those in Orion and Andromeda, and bright comets, require very low powers and an extensive field of view, so that the object may be presented in its entirety and its light not so much dispersed as to obliterate the fainter portions. If it is desired to critically examine the structure of a comet's nucleus or details of a nebula, then powers of 150 or 200 may be used. The cluster in Hercules (Messier 13) is splendidly resolved with 100 on a 10-in. reflector.

The spots on the Sun may be very distinctly seen in any small telescope, care being taken to protect the eye with deeply-tinted glass. A 3-in. refractor, powers 70 and 100, reveals the spots in great variety of form and grouping.

The craters, mountains, and plains of the Moon are satisfactorily seen with 100, though for very minute features powers of 300 and 400 are necessary on a 12-in. glass. Solar and lunar eclipses are best visible under powers of 50 and 75. The power used should not be too high to enable the whole of the Sun or Moon to be seen in the field of view.

The phases of Mercury may be discerned with 75; those of Venus are plain with far less power. To see these planets with the best effect examine them near the times of sunrise or sunset.

The most conspicuous spots on Mars, such as the *Syrtis Magna* (Kaiser sea of Proctor and Green's charts), may be discerned with 90 on a 2-in. refractor, but powers of 300 and 350, and a 8-in. refractor or 10-in. reflector, are essential to display the outlines of the more delicate markings.

Jupiter's belts are perceptible in a 1½-in. telescope, power 40, but for studying their different forms and variable appearances and the different motions of the bright and dark spots a larger telescope and powers of 250 and 300 are requisite. The four bright satellites are visible in an opera glass. Transits of the satellites III. and IV. and their shadows may be observed with a 3-in. refractor and power of 150. Satellite V. has never been seen in a glass smaller than 18½-in.

Cassini's division in Saturn's ring and his principal dark belt are to be readily glimpsed with 2½-in. glass, power 120. But magnifiers of 300 and 350, and a much larger aperture, are essential to reach the delicate features of the planet. A good 4½-in. refractor will sometimes show Encke's division in the ring, also the interior crape ring and five of the satellites, but the air must be good. Titan, the largest of the Saturnian moons, is visible in any small telescope; and Iapetus is also an easy object, though sometimes unduly faint; but Tethys, Rhea, and Dione are much more difficult, requiring care and attention. Enceladus can be seen in a 6½-inch refractor or an 8-inch reflector, but Mimas and Hyperion will need telescopes of at least 10 inches.

Occultations of stars by the Moon may be well observed with a 3-in. glass, power 75.

For very close pairs of double stars, high powers such as 300 or 400, and even more, are sometimes desirable, but in cases where the components are distant and the magnitudes differ considerably, as in ε Lyræ, then a moderate power, such as 100, will give excellent results. For very difficult and close double stars, large apertures are necessary, because separating power is a function of aperture. For showing variable stars a good field-glass is to be recommended. For groups of stars, a comet eyepiece, power 30 and field of 1½, will be best.

In New General Catalogue.	In Messier.	Position 1890. R.A. h.	m.	Dec. °	′	Description.
224	31	0	36·7	+40	32	Great nebula in Andromeda. Visible to naked eye. Triple.
288	...	0	47·3	−27	11	Globular cluster, little extended. Stars 12–16 mag.
598	33	1	27·6	+30	5	Bright and exceedingly large. West of α Trianguli.
650	76	1	35·4	+51	1	Very bright, double nebula. Near θ Andromedæ.
1952	1	5	27·9	+21	56	The "Crab" nebula, near ζ Tauri. Resolvable.
1976	42	5	29·9	− 5	28	Great irregular nebula surrounding θ Orionis.
2183	...	8	45·9	+34	3	Bright and large. Very elliptical.
3031	81	9	46·5	+69	35	Exceedingly bright and large. In head of Ursa.
3034	82	9	46·7	+70	13	A bright ray. In field with preceding.
3242	...	10	19·5	−18	5	Bright, blue. Planetary nebula. Diameter 45″.
3587	97	11	8·4	+55	37	Fine planetary nebula. Diameter 3′, near β Ursæ Majoris.
3627	66	11	14·5	+13	36	Large elliptical nebula near β Leonis.
4254	99	12	13·3	+15	2	Very fine spiral nebula with 3 branches.
4321	100	12	17·4	+16	26	Very fine spiral nebula with 2 branches.
4472	49	12	24·2	+ 8	37	Bright, round nebula. Resolvable.
4486	87	12	25·6	+12	58	Very bright and large, much brighter in centre.
4565	...	12	30·9	+26	36	A ray of bright nebulosity.
4590	68	12	33·7	−26	9	Compressed globular cluster. Stars 12th magnitude.
5024	53	13	7·5	+18	45	Globular cluster 3′ diameter. Stars 12th magnitude.
5194	51	13	25·2	+47	46	Great spiral nebula. Double. Near η Ursæ Majoris.
5236	83	13	30·8	+29	18	Large and bright nebula. Spiral, with 3 branches.
5272	3	13	37·1	+28	56	Fine globular cluster, visible to naked eye. 7′ diameter.
5904	5	15	13·0	+ 2	29	Fine globular cluster, visible to naked eye. 5′ diameter.
5907	...	15	13·0	+56	44	Large elliptical nebula. Another lies very near.
6093	80	16	10·5	−22	42	Globular cluster of stars of 14th magnitude.
6205	13	16	37·7	+36	40	Fine globular cluster, visible to naked eye. 6′ diameter.
6218	12	16	41·5	− 1	45	Cluster of stars, 10th magnitude, and fainter. 4′ diameter.
6333	9	17	12·8	−18	24	Compressed globular cluster of stars. 4′ diameter.
6341	92	17	13·8	+43	15	Fine globular cluster, 14th magnitude stars.
6402	14	17	31·8	− 3	11	Fine globular cluster, 15th magnitude stars. 4′ diameter.
6514	20	17	55·7	−23	1	Bright large trifid nebula. Double star involved.
6543	...	17	58·6	+66	38	Excessively bright, pretty small planetary nebula.
6618	17	18	14·4	−16	13	Bright, and extremely large.
6656	22	18	29·7	−24	0	Globular cluster of stars, 11–15th magnitude.
6720	57	18	49·5	+32	54	The bright ring nebula between β and γ Lyræ.
6779	56	19	12·5	+30	0	Bright globular cluster of stars.
6853	27	19	54·9	+22	25	The "Dumb-bell" nebula in Vulpecula.
6960	...	20	41·1	+30	19	Bright, large and irregular. The star χ Cygni involved.
7078	15	21	24·7	+11	41	Globular cluster of small stars. 5′ diameter.
7089	2	21	27·8	− 1	19	Globular cluster of small stars. 5′ diameter.
7099	30	21	34·1	−23	41	Globular cluster. 12–16th magnitude stars. 3′ diameter.
7662	...	23	20·6	+41	56	Small. Very bright. Planetary or ring nebula.

NUMBER OF PAUPERS (exclusive of Vagrants) in RECEIPT OF RELIEF in the several Unions and Parishes in ENGLAND and WALES on the 1st of January in each Year.

It will scarcely be considered an exaggeration to say that, in the home educational world of the past twelve months, everything else has been absolutely dwarfed by the now famous Government Education Bill of 1896. This measure, which was drastic to a degree and would, if it had become law, have effected a complete revolution in the educational system of the country, was introduced by Sir John Gorst, Vice-President of the Education Department, in the closing days of March, passed its second reading in the House of Commons on May 12 by a majority of two hundred and sixty-seven, and after a prolonged debate in Committee was withdrawn on June 22. As the Government intend to bring in a new Education Bill in 1897, it would be obviously out of place here to do more than put on record the principal causes which probably led to the withdrawal of the measure:—(1) The want of unanimity in the voluntary schools' party as to the source whence the special aid grant was to be drawn, i.e., whether rate-aid or state-aid; (2) The comprehensive and novel changes proposed; and (3) The difficulties surrounding the working of the twenty-seventh clause, dealing with the question of religious instruction in elementary schools. The superannuation and registration of teachers, and the reconstitution of London University are once more relegated to the future, the Government measure dealing with the last-named matter being withdrawn on account of the theological question in connection with appointments to the staff of King's College, London.

With a view to the presentation of a greater amount of information to the readers of the Almanack, and in a more convenient and accessible form, it has been deemed desirable to effect a material change in the arrangement of the present survey. It will, therefore, be found that, in the adoption of the tables given below, statistics have been furnished referring to a longer period of time than has hitherto been possible. It had been hoped, moreover, that the retrospect might have been made under the heads of (1) Elementary, (2) Secondary, (3) University, and (4) Technical; but this has not been practicable, owing, generally speaking, to the lack of unity in the entire educational system of the country, and, in particular, to the way in which these different divisions overlap and interlace with each other and to the absence of any complete official statistics on certain branches of the subject, as, for example, the secondary schools and the public schools. When the English educational system is organised from top to bottom and from end to end, returns for every recognised school and college throughout the kingdom will be available, not less complete than those now issued for, say, the elementary schools of England and Wales or the schools under the control of the National Education Commissioners of Ireland. Meanwhile, there is nothing else to be done but to wait on and hope.

Elementary Education.

It may be convenient to gather together here a few of the more noticeable events of the past year in connection with elementary education and to arrange them in chronological order:—The Rev. C. J. Sewell, one of H.M. Inspectors of Schools, died suddenly from apoplexy by the roadside (April 14); knighthood conferred on Mr. Joshua G. Fitch, M.A., late H.M. Inspector of Training Colleges (May); retirement of Dr. John Kerr, H.M. Chief Inspector of Schools and Inspector of Training Colleges for Scotland (Sept. 16); Mr. Francis R. Jamieson, M.A. (Edin.), appointed one of H.M. Inspectors of Schools for Scotland; Rev. G. H. S. Walpole, M.A. (Cantab.), appointed Principal of Bede College, Durham, in succession to Canon Barradell Smith (Sept. 28); Mr. Cyril Jackson, member of the London School Board, appointed Inspector-General of Education in Western Australia (Oct.).

Secondary Education.

Mr. George S. Farnell, M.A., Principal of Victoria College, Jersey, found dead under the shore cliffs (Nov. 6, 1895); Dr. J. T. Dunn appointed Principal of the Northern Polytechnic Institute, Holloway (Nov. 1895); Mr. C. Purdon Clarke, C.I.E., F.S.A., appointed Director of the South Kensington Museum in succession to the late Dr. Middleton (June, 1896); Professor Judd, F.R.S., appointed Dean of the Royal College of Science in succession to the late Professor Huxley; Mr. A. J. R. Trendell, C.M.G., appointed (Sept.) Assistant-Secretary of the Science and Art Department in succession to Mr. G. F. Duncombe (retired); Mr. J. W. B. Adams, B.A. (Oxon.), appointed Head-master of the Tenby Intermediate and Technical Schools (Sept.).

The Oxford Local Examinations were held in July at 137 centres, the total number of candidates examined, 7,314 (viz., 2,141 preliminary, 3,626 juniors, and 1,547 seniors), showing an increase of 1,258 as compared with the year 1895, and an increase of 5,351 in the last ten years. The number of candidates who were successful was 5,312, viz., 1,505 preliminary, 2,642 juniors, and 1,165 seniors.

Higher Education—The Universities.

Rev. F. W. Welldon appointed Head-master of Uppingham Public School in succession to the Rev. William Campbell, retired (Oct. 1895); Mr. F. V. Dickins, M.D., appointed Registrar of the University of London in succession to Mr. Arthur Milman, M.A., LL.D., retired (May, 1896); Rev. J. P. Way, Head-master of Warwick School, appointed Head-master of Rossall School, in succession to the Rev. C. C. Tancock, resigned (May 8); the Dean of Llandaff resigned the Presidency of the University College of South Wales (May); H.R.H. Prince of Wales installed Chancellor of the University of Wales (June); death of Mr. A. H. Green, M.A. (Oxon. and Cantab.), F.G.S., F.R.S., Professor of Geology in the University of Oxford; death of the Rev. W. M. Campion, D.D., Master of Queen's College, Cambridge (Oct.); Marquis of Bute gives a donation of £10,000 to the University College of South Wales (Oct.).

The complete lists resulting from the 1895 autumn examinations of the University of London show the following:—B.Sc. Examination—196 candidates (28 women), 95 passed (13 women), 25 in the first division, 70 in the second division. B.A. Examination—494 candidates (136 women), 217 passed (78 women), 53 in the first division, 164 in the second division; M.B. Examination—101 candidates (7 women), 67 passed (5 women). The 1896 Mathematical Tripos List at Cambridge completes some interesting details as to the comparative results of the various colleges; thus, out of 154 senior wranglers, St. John's has had 51 and Trinity 44, while Caius comes third with 13 and Queen's fourth with 9. But Trinity makes up in classics, having obtained altogether nearly twice as many honours as any other col-

lege, and more than three times as many as any other college except St. John's; while King's is third with twice as many honours as any other college except Trinity and St. John's. A special feature in the University examinations of 1895 was the remarkable success of many of the lady candidates; thus, Miss Elizabeth A. S. Dawes gained the D.Lit. degree at the University of London, Miss Grace Chisholm, who in 1892 and 1893 took first-class mathematical honours at both Oxford and Cambridge, became the first lady graduate of the University of Göttingen, Miss Florence E. E. Higgins, the first lady Mus.Bac. of the University of London, and Miss Jane Harrison received the LL.D. of Aberdeen University. Again, in the Moral Sciences Tripos at Cambridge, Miss Jemmet and Miss Ramsay gained first-classes, an honour obtained by only one man; and at the Royal University of Ireland, two junior Fellowships—in modern literature and in English and History respectively—were won by Miss K. Murphy, M.A., and Miss M. T. Hayden, M.A. Four ladies, too, took the M.D. degree at London University, six the M.B. and B.S. degrees, one the D.Sc., and about a hundred the B.A. and B.Sc. degrees. But, perhaps, most remarkable of all was the result of the Mediæval and Modern Languages Tripos at Cambridge in June, 1896, for which there were sixteen men candidates and ten women, of whom only two men gained a first-class, while four women (Newnham, 3; Girton, 1) were similarly honoured.

The Government Education Bill of 1896.

This Bill, which was entitled "A Bill to make further provision for Education in England and Wales," contained in all thirty-three clauses, arranged in three parts, the first of which constituted the county councils as its new education authorities and defined and laid down the duties which it proposed to entrust to them, the second described certain general amendments of the existing Elementary Education Acts, and the third consisted of definitions of terms used and a list of enactments repealed. It may be convenient to give here, with a view to future reference and to the forthcoming educational legislation of 1897, a brief summary of the principal clauses of the defunct Bill. Under the first and second clauses, every county council was to appoint, either alone or in conjunction with one or more other county councils, an education committee whose duty it would have been to supplement "such existing organizations for educational purposes as for the time being supply efficient instruction." The third clause empowered the new education authority to make an arrangement with the Education Department for taking over the administrative and inspection duties hitherto exercised by that department with regard to the grants voted by Parliament, but this was always to be done in accordance with the provisions of the Elementary Day School Code. Under the fourth clause, a special aid grant was to be made by Parliament to the extent of four shillings for every child in voluntary schools and in the schools of certain necessitous School Boards as laid down in the Education Act of 1870. The fifth to the tenth clauses provided for the audit of the accounts of schools receiving the special aid grants, laid upon the new education authorities the *ultimate* duty of supplying public elementary schools, gave the Education Department the power of constituting the borough council in boroughs to be the school board, and gave power to the education authority to take over public elementary schools, to take the place of defaulting school boards, and to delegate to local bodies of managers their own powers as school boards. Clause eleven provided for the necessary expenses incurred by the education authority when acting in its capacity as a school board; while clause twelve permitted the education authority to organize and control certain branches of education other than elementary. The fifteenth clause gave power to the Education Department to arrange for the carrying out of the duties entrusted to the education authority in the event of the latter failing to perform them. The nineteenth clause repealed the famous "seventeen-and-sixpenny limit" to the annual Parliamentary grant, and substituted for it the greater of these two sums:—(1) Twenty shillings (in infant schools, seventeen shillings); or (2) the amount per scholar given in respect of the twelve months ending July 31, 1896. Clauses twenty-five and twenty-six respectively gave the county councils powers to lend money for the purposes of public elementary schools and set certain limits to the amount of the rates levied by school boards; while the twenty-seventh clause laid upon school managers the duty of permitting, so far as practicable and on the request of a reasonable number of parents, separate religious instruction to be given to their children, the final decision as to what was "reasonable" and "practicable" being left with the Education Department.

INTERMEDIATE EDUCATION BOARD FOR IRELAND.

The nearest approximation to any official return as to the state and general efficiency of secondary, as distinguished from elementary schools, is in Ireland, where there is an Intermediate Education Board which supervises, and conducts the examination of, a number of schools of a somewhat more advanced character than those under the control of the National Commissioners of Education. The subjects of the examinations conducted by the Board are as follows:—Greek, Latin, Précis Writing, French, German, Italian, Celtic, Spanish, Domestic Economy, Elementary Mechanics, Plane Trigonometry, Algebra and Arithmetic, Euclid, Algebra, Arithmetic, Book-keeping, Natural Philosophy, Chemistry, Drawing, Shorthand, Music, and Botany; and the brief table below will be found to give the leading figures of the last five years according to the most recent report:—

Particulars.	1891.	1892.	1893.	1894.	1895.
No. of students presented for examination:—					
Boys	3,856	4,294	5,265	5,816	6,267
Girls	1,300	1,465	1,709	1,866	2,056
Total	5,156	5,759	6,974	7,682	8,323
No. of students who passed the examinations:—					
Boys	2,304	2,539	3,041	3,419	3,783
Girls	774	784	955	1,104	1,190
Total	3,078	3,323	3,996	4,523	4,973
Percentage of candidates who were successful:—					
Boys	59·7	59·1	57·7	58·8	60·4
Girls	59·5	53·5	55·9	59·2	57·9
Total	59·6	57·7	57·3	58·9	59·8

DEPARTMENT OF SCIENCE AND ART (GREAT BRITAIN AND IRELAND).

Before proceeding to the more important tables of gross results in the departments of science and art teaching, it may be of interest to give here a few items of information of special interest for which those tables do not conveniently provide space. Under the head of science, there were 214 competitors for the seven Royal Exhibitions, twenty-two National Scholarships, and six Free Studentships to the Royal College of Science, London, and the Royal College of Science, Dublin, the awards to these being made on the results of the May examinations. Under the well-known scholarship scheme, founded and endowed by the late Sir Joseph Whitworth in 1868, the competi-

tion in 1895 was for four scholarships of £125 a year each, tenable for three years, and thirty exhibitions of £50 each, tenable for one year, the total number of competitors being 117, as compared with 107 in 1894, and the customary high standard of attainment being shown by the candidates.

Technical Education.

Technical education proceeds apace, yet it is probable that a comparatively small section of the public are aware that the annual expenditure on the subject in Great Britain and Ireland is now something like three-quarters of a million of money. Although the official recognition of technical instruction as a branch of the national system of education is a product of the last nine or ten years, there is now issued a very full Return "showing the extent to which and the manner in which, local authorities in England, Wales, Scotland, and Ireland are applying funds" (under the Local Taxation [Customs and Excise] Act, 1890, the Technical Instruction Acts, 1889 and 1891, the Welsh Intermediate Education Act, 1889, the Technical Schools [Scotland] Act, 1887, the Technical Instruction Amendment [Scotland] Act, 1892, and the Public Libraries Acts) "to the purposes of technical education (including Science, Art, Technical, and Manual Instruction)." The leading figures from the most recent edition of this return available will be found incorporated in the tables given on p. 623. It may, however, be of interest to furnish here a few further particulars as to the action of the various local bodies with whom the question of technical education at present very largely rests. Thus in England (excepting the county of Monmouth) forty-one out of the forty-nine county councils are applying the whole of the residue received under the Local Taxation Act of 1890 to technical education, and the remaining eight county councils a part of it to the same purpose. Out of the sixty-one county borough councils, fifty-five are devoting the whole of the residue, and five a part of it, to technical education, while in a single case only, the county borough of Preston, the residue is not being applied to educational purposes. Further, the councils of eleven county boroughs, fifty-one boroughs, and eighty-six urban districts are making grants out of the rates under the Technical Instruction Acts; while eight local authorities are devoting funds to technical education out of the rate levied under the Public Libraries Acts. In Wales and Monmouth the thirteen county councils and the three county borough councils are devoting practically the whole of the residue grant to intermediate and technical education (chiefly under the Welsh Intermediate Education Act, 1889); while in addition, the councils of seven counties, one county borough, two boroughs, and six urban districts are making grants out of the rates under the Technical Instruction Acts, and one local authority is devoting part of the Public Libraries' Rate to technical education. With regard to Scotland, out of the thirty-three county councils, twenty-one are applying the whole of the residue, and nine a part of it, to technical education, the remaining three applying it to the relief of rates. Out of the one hundred and ninety-five burghs and police burghs, thirty-two only are devoting the whole, and fifty-five a part, of the residue to technical education, while one hundred and one are applying the whole to the relief of rates, and the remaining seven have either not made returns on the subject, or have the matter under consideration. In the case of Ireland, nine local authorities are making grants out of the rates under the Technical Instruction Acts, and two of these authorities are also applying part of the rate levied under the Public Libraries Acts to technical education, while several other local authorities have decided to put the Technical Instruction Acts in force. So much then for statistics, but the ordinary reader may ask, What then is technical education? And it must be confessed that, at the first blush, it would almost seem to be an easier task to say what it is *not*. Fortunately, however, the Science and Art Department (South Kensington), which has taken technical education under its wide-spreading wings, answers the question, so far as it can yet be answered, in a tolerably complete list of subjects which it is prepared to recognize as falling under the head of Technical Instruction. This seems of sufficient interest to be given at length; it runs thus:—Agricultural engineering (including driving and working steam engines and machinery); agriculture (practice of) and agricultural processes (including demonstrations and experiments for agricultural instruction, practical farm work, vegetable and fruit growing, fruit-storing, market-gardening, glasshouses, management of live stock, dairy-work and cheese-making, thatching, fence and mow-making, sheep-shearing, hedging, ditching, rick-making, shepherding, under-draining, stacking, ploughing); alkali manufacture; ambulance work; art-needlework; bacon and ham curing; baking and confectionery; banking (principles of) and financial science; bee-keeping; bent-iron work; bleaching, dyeing, and printing; boat-building; book-binding; book-keeping and commercial terms—office work; boot and shoe manufacture and repairing (including pattern-cutting and clicking); bread-making; brewing; bricklaying; brickmaking; cabinet and furniture making and design; carving in wood, stone, and other materials; carpentry and joinery; carriage-building (road and rail); casting and moulding in plaster, gelatine, &c.; cider and perry making; civil engineering; coal-tar products; commerce, principles of; commercial law, history, geography, arithmetic, and correspondence; cookery; designing for porcelain, pottery, and glass; designing for textile fabrics, silks, and calico; designing for printing and lace; designing for metal work and vases; designing for book-binding; domestic economy; dressmaking (including household sewing and cutting-out; economic science; elastic web manufacture; electrical engineering—electric lighting and transmission of power, electrical instrument making, electro-metallurgy; enamelling; engraving; entomology; etching; farriery; fish culture, fishing, and subjects connected therewith (including the manufacture and preservation of nets, tackle, and apparatus for catching fish); forestry; framework-knitting and hosiery; fretwork and turning; fuel; gardening; gas manufacture; general tool-making; gilding; glass manufacture; goldsmiths' work and manufacture of personal ornaments; hand-spinning and weaving; hat manufacture; horticulture and arboriculture; hosiery manufacture; house painting and decoration; illuminating and heraldic painting; insurance; iron and steel, the manufacture and working of; iron and brass founding; kindergarten, theory and practice of; lace-making and manufacture; laundry work; leather preparation and leather industries; machine knitting; manual and theoretical instruction in wood, stone, brick, metal, leather, glass, clay, basket, wicker, and fancy straw work; marquetry-work; mat and rug making; millinery; milling (flour

Digitized by Google

manufacture); mechanical and architectural drawing; mechanical engineering; metal-colouring and bronzing; metal-plate work; mine surveying; mining (including quarrying, raising, preparation, and dressing of ores) and prospecting; modelling in various materials; modern languages—French, German, Spanish, Italian, Portuguese, Norwegian, Swedish, Danish, Russian, Irish, Welsh; music—singing and musical notation, instrumental and orchestral music; needlework—embroidery and crochet; netting; nursing; oils and fats, including candle manufacture; oils, colours, and varnishes, manufacture of; oyster culture; paper manufacture; pattern-making; pharmacy; photography; plasterers' work; plumbing; political economy; pottery and porcelain manufacture; poultry-keeping; précis writing; principles of education as applied to the teaching of technical subjects; printing (including typography, lithography, &c.); repoussé work; road-making, principles of; rope-making; sail-making; sanitary science and engineering; seamanship; ship carpentry and joinery; silversmiths' work (including plate and plated wares); shorthand; sloyd; soap manufacture; spirit manufacture and rectification; sugar manufacture; surveying, levelling, and taking out quantities; tailors' work and cutting-out; teaching, science and art of; telegraphy and telephony; textile fabrics (spinning, weaving, and silk throwing); tools, use of; turnery; type-writing; upholstery; veterinary science; watch and clock making; wool, the preparation and treatment of.

Among the more important divisions of this branch of education, to which separate attention cannot conveniently be given elsewhere, is the administration of the parliamentary grant in aid of agricultural education, the administration of which is entrusted to the Board of Agriculture. The total sum distributed in the year ended March 31, 1896, was £7,850, of which £5,850 went to England and Wales as follows:—University College of North Wales, Bangor, £800; Yorkshire College, Leeds, £800; Durham College of Science, Newcastle-on-Tyne, £800; University College of Wales, Aberystwith, £800; University Extension College, Reading, £700: University College, Nottingham, £450; Cambridge and Counties' Agricultural Education Committee, £400; S. E. Agricultural College, Wye, £150; Eastern Counties' Dairy Institute, Ipswich, £300; British Dairy Farmers' Association, £300; Bath and W. and Southern Counties' Society, £350; and the remaining £2,000 to Scotland as follows:—Glasgow and W. Scotland Technical College, £650; University of Edinburgh, £550; University of Aberdeen, £150; Scottish Dairy Institute, Kilmarnock, £300; Highland and Agricultural Society, £100; Aberdeen Agricultural Research Association, £100; Royal Botanic Garden, Edinburgh, £150. These grants are expended for the most part in the technical training of capable teachers, in the provision of practically valuable instruction to farmers and of experts for giving courses of instruction in particular branches of work, *e.g.*, dairying, horticulture, poultry-keeping, &c., and in the conduct of stations of field demonstration and experiment.

The amount and extent of the work in technical education now carried on by the London County Council through the Board specially appointed for its supervision entitle it to some brief separate mention. For the year ending March 31, 1897, the net probable expenditure is estimated to amount to £120,000, of which £9,000 is for the equipment and £16,000 for the maintenance of technical departments of various Polytechnic institutes. The remaining items of the estimate are as follows:—Shoreditch, Wandsworth, and other technical schools, £9,680; technical departments of public secondary day schools (including the allowance for the fees of the Board's county scholars, £7,500), £20,000; higher education, £4,000; county scholarships, £26,070; art teaching (including art scholarships), £14,440; science teaching (including science exhibitions and pioneer lectures, technology, and manual instruction), £8,985; domestic economy, £4,200; commercial subjects, £1,500; museums, £1,000; expenses of administration (including cost of inspection), £5,550. The quarterly report of the Board for the quarter ended June 30th, 1896, showed that the expenditure of the Board had then reached £28,072; grants of £1,500 a year to University College and £1,000 to King's College had been promised, while £500 had also been promised towards the cost of providing extra facilities for technical instruction at Bedford College.

It may not be out of place here to record the opening, during the early part of October, 1896, of the new Agricultural and Horticultural College, which has been established at Holmes Chapel by the Cheshire County Council at a cost of £10,000. The students, none of whom is to be taken for a shorter period than a year, are to receive a sound technical instruction in agriculture, and the complete course will extend over three years.

This brief summary of the present state of organized technical education in Great Britain and Ireland may be suitably supplemented and concluded by an extract from the official report of Mr. P. G. Craigie, presented to the President of the Board of Agriculture, on the administration of the Parliamentary grant in aid of agricultural education in Great Britain. "Central institutions receiving aid from the Board of Agriculture . . . are therefore now available, or in process of equipment, for the counties lying in the centre, south-east, and south-west of Scotland, for all those in Wales, with the exception of Glamorganshire, for the three Ridings of Yorkshire, for the counties of the north of England, and for the counties of Berks, Oxford, and Hants, in the valley of the Thames, as well as, in a less perfect form, for the East Midland and Eastern counties of England. Some extension of the areas directly benefited by several of these institutions may yet be looked for in several instances, by including in their sphere of work other contiguous counties. Other counties which have not yet the same facilities within reach may eventually find it to their interest to co-operate for the establishment of centres, either of the type which Kent and Surrey are maintaining at Wye, or such as the county of Lancaster has provided for itself. The cases are, however, rare where establishments of this nature can be economically managed by single counties."

FUNDS APPLIED BY LOCAL AUTHORITIES IN ENGLAND, WALES, SCOTLAND, AND IRELAND TO THE PURPOSES OF TECHNICAL EDUCATION (INCLUDING SCIENCE, ART, TECHNICAL AND MANUAL INSTRUCTION).

* Exclusive of the amount devoted to Intermediate and Technical Education under the Welsh Intermediate Education Act, 1889.

The total amount of the residue paid to the councils of counties and county boroughs in England and Wales in respect of the financial year 1893-4 was £786,768 12*s.* 3*d.*, out of which £634,837 5*s.* 8*d.* was appropriated to educational purposes, £288 1*s.* 11*d.* remained unappropriated, and £151,643 4*s.* 8*d.* was devoted to the relief of rates. This last-named sum includes £115,758 17*s.* 11*d.* devoted by the London County Council to the relief of rates. The estimated total amount to be devoted annually to intermediate and technical education, under the Welsh Intermediate Education Act, 1889, is £42,861. In some cases (in Wales and Monmouth) the amount allocated by the councils each year out of the residue is accumulating, pending the erection of schools, &c., and the levying of the rate under the Welsh Act is in the meantime deferred. During the year 1894-5, the ½*d.* rate under that Act was really levied (wholly or in part) by the councils of nine counties and county boroughs.

NOTE.—The amounts in Tables (*a*), (*b*), and (*c*) under the head of Technical Education, above are given to the nearest whole £.

THE NEW PHOTOGRAPHY.—The past year will be memorable in the history of science for the remarkable discovery of a means for taking photographs of unseen objects for example, coins inside a purse, or bones in the living body. Mr. William Crookes, the celebrated English chemist, had found that when the electric current from an induction coil is passed through a glass bulb highly exhausted of air by the Sprengel air-pump, certain dark or invisible "rays" are emitted from the cathode or negative electrode of the bulb which is connected to the negative pole of the coil. When these rays fall on certain phosphorescent or fluorescent substances in the bulb—for instance, diamonds, rubies, or sulphide of calcium, and even on the glass of the bulb itself, they excite phosphorescence or fluorescence in them, and they are also capable of making an impression on a photographic plate. Heinrich Herz, the famous German electrician, found that these rays passed freely through a thin foil of aluminium, and Lenard, a Hungarian pupil of Hertz, succeeded in letting them pass through the glass of the Crookes' bulb by inserting in it a small "window" of aluminium. He was thus able to take photographs with them in the dark by leading them from the bulb into a closed box containing a photographic plate and the object to be photographed. It remained, however, for Professor Röntgen, of Würzburg, to discover that these rays when passed through the hand or any other part of the body would imprint a silhouette, or shadow picture, of the bones on a sensitive photographic plate. The publication of this discovery in January last created a sensation, not only in scientific circles, but in the public at large. Its importance from a medical point of view was at once recognised, and physicists, surgeons, and photographers have since done a great deal to develop it. The real nature of these mysterious "X" rays, as Röntgen called them, has not yet been proved beyond cavil or dispute; but it would appear that they are not so much invisible rays of light, such as the ultra-violet rays of the spectrum, as electrical waves or oscillations in the ether. It was known before Röntgen's discovery that invisible electrical oscillations produced in the ether by electric sparks were able to take photographs resembling those of light, which, we may remind the reader, is itself believed to be a wave-motion in the ether. There are some who think that these dark rays do not act directly on the sensitive plate, but indirectly by exciting fluorescence—that is to say, light—in the collodion film; but this point is still somewhat obscure. It is certain that when the rays are allowed to fall, not on a sensitive film, but on a flat surface coated with a highly fluorescent material, such as tungstate of calcium, we can see them. It is not, therefore, necessary to take a photograph of the bones in the living body in order to examine them. It is sufficient to pass the rays through the body, and then receive them on a fluorescent screen or cryptoscope, as invented by Signor Salvioni, of Perugia. As the flesh is more transparent to the rays than are the bones, the latter cast a shadow, as it were, upon the screen. When a photographic plate is substituted for the screen, the bones appear on it as a shadow photograph. The new photography thus enables medical men to examine the skeleton of the living subject in a painless and bloodless manner, which was impossible before. As iron, lead, and other metals are more or less opaque to the rays, it follows that bullets, needles, splinters of steel, and such-like, embedded in the flesh can be localised by surgeons before extraction. Calcareous or silicious matters are also more opaque than carbonaceous, and hence it is that the bones cast a shadow, while the flesh does not. For the same reason the rays have been applied to the detection of true gems, such as pearls and diamonds from paste. They have also been used to discover flaws in metal-work, and to photograph the blood-vessels by injecting a mineral solution into them; and other applications will doubtless be found out.

EDISON'S FLUORESCENT LAMP.—Mr. Edison has utilised the Röntgen rays in a new form of electric lamp. He lines the interior of a small Crookes' vacuum bulb with little bits of tungstate of calcium or other material, which becomes brightly fluorescent in the rays, and when the tube is excited by the current from an induction coil these become luminous; but so far the fluorescent lamp has not come into practical use.

ELECTRICITY AND BACTERIA.—MM. D'Arsonval and Charrin have tried the effect of passing "high frequency" electric currents, or currents rapidly see-sawing in direction, through liquid containing bacteria, and found that a current of three-fourths of an ampère weakened the toxic effect of the bacteria very decidedly. Guinea-pigs inoculated with the toxine before and after it had been subjected to the electrical current showed that the electricity had robbed it of its virulence. Even when the microbes were frozen they lost their virulence under the electric action; and so did the venom of snakes. M. D'Arsonval ascribes this result to the rapid chemical decomposition and recomposition of the toxine effected by the see-sawing currents.

ELECTRICITY AND WEIGHT.—M. D'Arsonval has also found that when guinea-pigs were kept inside a spiral of wire through which high frequency electric currents were passing, they lost six times more weight than when the current was stopped. A rabbit lost twice as much weight under the electric influence as in its normal state. M. D'Arsonval has not yet determined the effect of such currents on men, however, and it would be premature to conclude that we have in these experiments the germ of a new system for the reduction of obesity.

REFLECTING TELEGRAMS.—It is well known that electrical induction, which causes "overhearing," on telegraph and telephone wires, is due to the electrical impulses of the message in a wire, setting up waves in the surrounding ether, which travel to the neighbouring wire, and excite corresponding impulses in it. Taking advantage of this fact, electricians, and notably Mr. W. H. Preece, of the Post Office, have telegraphed through the air, or rather the ether, from one wire to another a distance of 5 miles. Hitherto, we have had no means of directing these electrical waves through the ether; but now Signor Marconi has found a way of reflecting them from one parabolic mirror to another, after the manner of light. He has already succeeded in reflecting telegrams over a mile through the air, and receiving them on a Morse instrument.

LIGHTNING RODS.—There is a difference of opinion among experts as to whether a thin or a

Digitized by Google

thick lightning-rod should be employed, but according to actual observations recently made on the rod attached to the Tour St. Jacques, Paris, a stout rod, one having a large diameter of metal, is the safer. MM. Mildé and Grenet have watched this rod during a severe thunderstorm, and seen it made red-hot for a space of 18 inches by the electrical discharge passing down it. If, then, a rod is too thin, it may be fused by the current, and leave the building at the mercy of the lightning which follows.

Electricity from Niagara.—The electric power derived from the Falls of Niagara has been utilized this year, and a portion of it was successfully distributed to works in Buffalo, 25 miles distant, on November 16th; the achievement being celebrated by a salute of 21 guns.

Motor Cars.—The advent of self-moving carriages has been the principal event in engineering circles during the year. Another great race was run from Paris to Marseilles and back at the end of September, and the first, second, and third winning vehicles, all of which were made by MM. Panhard and Levassor, covered the distance in from sixty-seven to seventy-five hours at an average speed of 14 to 15 miles an hour. In the United Kingdom a trip from London to Brighton was made on Saturday, November 14, and the distance covered in three hours. An Act has been passed permitting the use of horseless carriages on the public highway under certain regulations, and there is no doubt that the new vehicle will henceforth become common in this country.

The Aerodrome.—Professor S. P. Langley, Secretary to the Smithsonian Institution of Washington, U.S., has constructed a working model of a flying-machine on the aeroplane principle like that of Mr. Maxim, which he calls an aerodrome. It is built of steel, and resembles a bird with outspread wings. During the summer the machine was tried without any passengers on board, in presence of Professor Graham Bell, inventor of the telephone, who reported that after rising to the height of half a mile, at a speed of about 20 miles an hour, it returned to the ground without injury.

Acetylene.—This new illuminant is about to be made from carbide of calcium prepared in electric furnaces at the electricity works of the Falls of Foyers, in the Highlands. When the carbide is put into water it yields acetylene gas, which promises to become suitable in country houses, and wherever coal-gas or electric light is inconvenient. A small gas generator and holder, a supply of carbide and a little water, are the stock required for producing it. The system will be comparatively cheap; but a word of caution is necessary as to the explosiveness of the gas. One volume of acetylene to nine volumes of air is the most explosive mixture. There is danger of explosion through over-heating of the generator, as well as through accidental ignition, but inventors will doubtless be able to reduce the risk to a minimum.

The Cinematograph.—The kinetoscope of Edison was an improvement on the zoetrope or wheel of life, by the substitution of photographs for pictures, and the cinematograph of M. Lumière of Lyons, which is now to be seen in London, is virtually a kinetoscope with the combined photographs projected on a screen by means of an optical lantern. Successive instantaneous photographs of an object, say a man at work, a horse-race, or a busy street, are projected on the screen so rapidly that the image of one has not faded from the eye before the image of another appears, and hence they are blended to the sight. An effect of animation is thus given to the photograph. M. Michael Corday has applied the cinematograph to represent the growth of plants. He has taken instantaneous photographs of a rose-bush from the time of its budding to its flowering, and by combining these on the screen is able to show the rose budding, growing, and blooming in a few minutes. Obviously his method will be useful to lecturers, scientific and other. It can be applied to show the development of a person, the changes in a landscape during the seasons, and many gradual processes in art or nature.

A Cure for Snake-bite.—Dr. Armand Calmette, of the Pasteur Institute, Lille, has been remarkably successful with his new anti-toxic method of curing the bites of serpents by inoculation. The lymph or serum used for inoculating the bitten person or animal is taken from the blood of an animal which has been rendered "immune" or proof against the venom of the snake by the process of Pasteur in the anti-toxic treatment of diphtheria. Mr. Hankin of Agra, has tried the Calmette serum on cattle bitten by snakes in India, and found it very efficacious in preventing their death. An Annamite bitten by a naja snake was cured, although he was not inoculated with the serum until an hour after he was bitten. A patient bitten in the leg or arm should have a string tied round the limb on the side next the heart, and a quantity of serum, according to the weight of the individual, injected. After this, a solution of chloride of lime is injected into the system near the bitten place. It is interesting to learn that some of the East African negroes, and also the viper hunters of Mexico, have been in the habit of inoculating themselves with snake poison to make themselves proof against snake-bite. We may add that Dr. Yersin, of Annam, has discovered a successful anti-toxic method of preventing and curing the bubonic plague of the East.

Sleeping after Food.—Dr. Schule, of Fribourg, has analysed the contents of healthy stomachs after meals, and finds that when sleep follows a meal, the movement of the stomach is weakened, and the acidity of the gastric juice is increased. Sleep on a full stomach is, therefore, unfavourable to digestion. On the other hand, merely to lie or rest in a horizontal position stimulates the movement of the stomach without increasing the acidity of the gastric juice. The old adage, "after dinner rest a while, after supper walk a mile," would, therefore, seem to be salutary, but in resting after a meal one should take care not to fall asleep.

Light and Vegetation.—M. Camille Flammarion has observed that plants grow taller under red than green, blue, or clear glass; and M. Armand Gautier finds that vegetables grow better under red than yellow or violet light, and that they died under green light. Pots containing flowering plants were traversed by the electric current from three Bunsen cells for two and a half months, and found to give far more vigorous plants than similar pots without electricity. A farmer near Boston, U.S., has succeeded in forcing lettuces under glass for the winter market by means of the electric arc light. He gets three crops in the winter, and gains a week on each crop by the use of the electric light.

Chône.—In New Caledonia there is a tree known to botanists as the Cerbera manghas, and to the Kanaks as "chône," which has been found

to yield a gum with the impermeable properties of india-rubber, but which can be dissolved in hydrocarbon essences without heating them. It is, therefore, well adapted for making things waterproof.

Bacteria and Farming.—Drs. Hale, Riegel, and Nothe have made experiments in Germany which tend to show that bacteria which assimilate nitrogen can be sown in the soil with great advantage to the farmer, and especially to the grower of leguminous plants. They consider this plan better than the older method of inoculating the soil with bacterial earth.

Permeable Soil.—M. Dehérain, a French experimental agriculturist, has found that chalk, or salts of calcium, by coagulating the clay, renders soil permeable to water. In ordinary soil the combustion of humus, or vegetable mould, produces carbonic acid, which forms carbonate of lime, which in turn coagulates the clay mixed with the sand. As long as the soil contains the salts of lime, it will be permeable, and hence, if soil is too impermeable, the remedy is to add lime or chalk.

Forcing Potatoes.—The Rhode Island Agricultural Station, U.S., has published a bulletin giving the results of experiments made by planting potatoes in pots in a greenhouse, then transplanting them out-of-doors. Another method was to expose small potatoes as large as hens' eggs to heat and light for six weeks, to develop a strong bud and roots before planting them. Both plans gave a better yield, especially the last, which resulted in a gain of 32 bushels per acre.

Tarring Seed Corn.—The Howard process of tarring seed corn to keep the birds from picking it has been improved by M. Neuville, who dilutes the tar with an equal weight of pure petroleum, and adds a sufficient quantity of hot-water. The seed corn is well coated with the solution.

Gold in the Transvaal.—Geologists have been busy this year examining the gold deposits of the Transvaal, which are said to be the richest in the world. They are near the surface for 30 miles about Johannesberg, and this part is believed to contain 1½ billion of dollars' worth of gold; but some geologists believe that they extend for 1,200 miles at a greater depth. The rock is a conglomerate and quartzite, cemented with auriferous clay, which yields from 150 to 750 grains of gold per ton. The gold is so fine as to be invisible to the naked eye, and is associated with pyrites, which is remarkably pure. It is supposed that the gold and pyrites (sulphide of iron) once existed in solution in the water of a lake, of which the quartz and conglomerates formed the shore, and that they have been precipitated by chemical action.

The Kite in Meteorology.—The U.S. Weather Bureau have made experiments to find out the best kite for carrying self-recording meteorological instruments into the upper air, and have fixed on a modification of that devised by Mr. Hargrave, of Australia, which is box-shaped, with open ends, and silk sides. The string used at the Blue Hill Observatory, U.S., is a pianoforte-wire, and the tailless kites of Eddy and Hargrave are preferred. On one occasion, recently, one of the kites attained to a height of over a mile above the observatory, which makes the record. We may add that a society has been started in Boston, U.S., for the scientific study of kites.

The Hardest Mineral.—M. Moissan, the well-known French chemist, who isolated fluorine, has succeeded in making a chemical substance which is still harder than the diamond. It is a compound of boron and carbon, fused together in an electric furnace. It is a shining black, and will probably supersede the diamond in boring drills and glass-cutters.

The White Race.—We have all been taught to believe that the ancestors of the White Race in Europe came from Central Asia. This hypothesis, based on the unsafe ground of speech, and the fact that most of the modern languages of Europe are akin to Sanscrit and Hindustanee, has been accepted by writers and lecturers for a generation, and the "Aryans," as our supposed ancestors were named, have become almost a household word. Alas! for anthropological theories based on language which is no part of a man, and has been changed again and again by peoples through trade or conquest, the great Aryan hypothesis is now discredited by the leading anthropologists. Further study of the so-called Aryan languages—Greek, Latin, Celtic, Teutonic, Sanskrit, and so on—have not borne out their Central Asian origin, and anthropologists now suppose that the white race was developed in a hypothetical area called "Eurafrica," which comprised the Mediterranean, the North of Africa, a great part of Europe, and the West of Asia. Professor Sergius, an Italian anthropologist, has also maintained, with good reason, that part, at least, of the Mediterranean white race originated in what is now Somaliland.

Origin of European Art.—It is a commonplace to say that all our culture comes from the east, but M. Salomon Reinach has opposed the current notion, and proved the rise of an independent culture in pre-historic Europe, that is, before Greco-Roman and Egyptian influence. The earliest art of Europe shows no trace of Assyrian or Egyptian influence. The animals figured in it are wholly European: the female figures are not representations of the Babylonian Astarte as was surmised, but are indigenous, and so far from having come from the Euphrates probably found their way there. It was only in a later period, and to a limited extent, that Europe became dependent on the older civilisations of the Orient. There were many centres of creative art, and the Rhine or Danube have claims to be regarded as such, but Greece, especially Attica, and the Islands of the Ægean, were the main centre.

Israel in Egypt.—Professor Flinders Petrie, the well-known Egyptologist, in excavating at the Rameseum and other funeral temples of ancient Thebes, has discovered a tablet of black syenite inscribed with the deeds of Merenptah (the supposed Pharaoh of the Exodus), and containing the words: "The people of Israel is spoiled: it hath no seed: Syria hath become (a weak) as the widows of Egypt." As the date of the tablet is about 1200 B.C., this is the earliest, if not quite the only, allusion to the Israelites yet found in ancient Egypt. It is not certain whether the passage refers to the Israelites then captive in Egypt or to a branch which remained in Palestine; but Professor Petrie inclines to the latter view.

Lake Dwellers of Florida.—Mr. F. H. Cushing has made an examination of the Pine Island keys in Florida, and discovered the remains of villages, and numerous relics of ancient lake-dwellers, whose racial affinities are still unknown. Judging from their shell and copper implements or weapons, their pottery, masks, and

modes of sepulture, they appear to be akin to the ancient Mexican peoples.

Psychology.—At the recent International Congress of Psychology held in Munich, the President, Herr Carl Stumpf, delivered an interesting address on the relations of the soul and body, a subject which has infinite charms for the German mind, and seems to have been made for it. The new experimental school of psychology does not content itself with introspection and mere observation, but aims at discovering the truth about the mind and soul, even in its most sublime efforts, by accurate measurement and statistics, as far as possible. Fechner is regarded as the founder of "psycho-physics," according to which the bodily and intellectual phenomena are only two faces of the same whole. While the physical phenomena, however, can be weighed and measured, the intellectual cannot, and the relation between them is unknown. Herr Stumpf believes that the physical and mental worlds do not act parallel or side by side, but that they interact, and that the law of cause and effect holds between them, and he has suggested the establishment of a "psycho-physico-mechanics," which will bring all the intellectual phenomena under the general laws of reciprocal causality.

Suggestion in Crowds.—M. Gustave Le Bon and Professor Bernheim have gathered much evidence to prove that crowds of people, whether in drawing-rooms or public meetings, are victims of mental "suggestion," and act on impulse, not by reason. The intelligence of a crowd, according to these observers, is not that of its superior but its inferior members. It loves catchwords, symbols, colours, and costumes. It prizes a badge above a syllogism, and is easily taken with absurdity.

Growth of the Head.—From measurements made on the growth of the head in the Massachusetts Institute of Technology, it appears that between the ages of 18 and 24 the head, of American children at least, grows in length, but scarcely in breadth. Hence the ratio of breadth to length, or "cephalic index," tends to diminish at this period from 78·6 to 77, or thereabout. There is also a slight diminution in the cephalic index of American children between the ages of 5 and 18. Of course this change only affects the shape of the head, which may be growing larger on the whole. In Europe it has been found that Austrian and North German children have narrower heads than adults, as a rule. In Bohemia the head would appear to keep its shape from childhood to maturity, and in Italy, among the broad-headed people, at least, there is an increase of the cephalic index in childhood.

Retrospect of Sport in 1895–96.

AQUATICS.

Rowing.—The past season of 1896 has been a very eventful one both as regards amateur and professional aquatics. The amateur regattas have been better supported and have produced better racing than has been the case for several years, and under the control of the Amateur Rowing Association pure and genuine amateur sport has flourished without a single hitch or unpleasant incident, which cannot be said of any other body charged with the management of amateurs and their doings. Indeed, rowing appears to be the only pastime left which can be indulged in by a gentleman who does not wish to be contaminated by uncongenial associates and surroundings. Of course a most important factor in this very desirable state of things is, that rowing being a rather expensive amusement, only the better class of athletes indulge in it, and also gate-money being an impossibility, there are no means of any commercial speculator taking the sport in hand to make money for himself, and, at the same time, to offer bribes to the exponents of the art and mystery of oarsmanship. The National Amateur Rowing Association appears to have ceased its efforts to oppose the real and genuine amateurism of the A.R.A. and is now content to foster and encourage rowing amongst those who cannot afford to be amateurs, but at the same time object to be styled professionals, although why the N.A.R.A. cannot join hands with the Tradesmen's Association and combine their forces, is a problem beyond the comprehension of any reasonable being who understands the present condition of aquatic matters. The season commenced as usual in February at the Universities with the spring eights. In the previous year, both at Oxford and Cambridge, these races had been abandoned owing to the long and severe frost. At Oxford, the Torpids (as these events are termed) resulted as follows, the crews rowing in gigs in three divisions, the boats starting 160 feet apart:—In the first division, New I. finished head of the river, displacing B.N.C., the previous leader. In the second division, New II. were the leaders vice Exeter; and in the third division Wadham remained top in place of Oriel, the 1894 victors. These results proved what a strong club New College possessed for the aquatic events of the year. At Cambridge, the Lent crews race in only two divisions, First Trinity retaining their headship as before and Clare displacing Peterhouse from the top of the second division. The Oxford and Cambridge Boat Race took place on March 28th, on a cold, wet, and most unpleasant day. The Cantabs, with five old Blues, had progressed so well with their training and had done such good times in their trials on the tideway that everything pointed to a turn of fortune in their favour. The Oxonians had lost their famous stroke, C. M. Pitman, and had but three of the old guard in the boat. Their times on the tideway were certainly not so good as those of Cambridge, and on the day when Cambridge, for a change, won the toss and selected Surrey, an immense advantage with the coming off that shore, odds of 7 to 4 were freely offered on the Light Blue. In wind, rain, and waves, the two crews rowed a splendid race up to the old Soap Works, there being hardly anything in it. Cambridge then began slowly to go away, and directly after passing Hammersmith Bridge they drew clear up to Barnes. Oxford managed to prevent the leaders adding to their advantage, and then, when the station began to help them, Oxford by a series of grand spurts got up almost on the post and won by a few feet. A better or more ex-

citing race has never been witnessed for this world-renowned classic contest for the blue ribbon of the river. The crews' schools and weights were:—*Oxford*: J. J. de Knoop (Eton and New) (bow), 11st. 1½lb.; (2) *C. K. Philips (Eton and New), 12st. 5½lb.; (3) E. C. Sherwood (Magdalen College School and Magdalen), 12st. 12lb.; (4) *C. D. Burnell (Eton and Magdalen), 13st. 10lb.; (5) E. R. Balfour (Edinburgh Academy and University), 13st. 6lb.; (6) R. Carr (Eton and New), 12st. 8½lb.; (7) *W. E. Crum (Eton and Magdalen), 12st. 3lb.; H. Gold (Eton and Magdalen) (stroke), 11st. 5½lb.; H. Pechell (Eton and Brazenose) (cox), 7st. 13½lb. *Cambridge*: *T. B. Hope (Eton and Trinity Hall) (bow), 11st. 1lb.; (2) *H. A. Game (Harrow and First Trinity), 12st. 4lb.; (3) D. Pennington (Bath and Caius), 12st. 6lb.; (4) *R. Y. Bonsey (Forest School and Lady Margaret B.C.), 12st. 10lb.; (5) W. A. Bieber (Clifton and Trinity Hall), 12st. 12lb.; (6) *T. J. G. Duncanson (Harrow and Emanuel), 13st. 11lb.; (7) *A. S. Bell (Eton and Trinity Hall), 11st. 13lb.; W. J. Fernie (Malvern and Trinity Hall) (stroke), 11st. 13lb.; T. R. Paget-Tomlinson (Aldenham and Trinity Hall) (cox), 8st. 2¼lb. During April most of the big clubs were very busy with trial eights for Henley, and on April 30th the C.U.B.C. held their usual spring meeting to arrange the fixtures for the term and elect officials, A. S. Bell, of Trinity Hall, being selected as president; vice, T. B. Hope, and D. Pennington hon. sec. The O.U.B.C. meeting, May 1st, re-elected W. E. Crum (New College) president and C. K. Philips (New College) hon. sec. On May 13th, A. S. Bell and W. J. Fernie (stroke), Trinity Hall, won the C.U.B.C. Pairs, and on May 16 the same pair could only make a dead heat with H. B. G. Macartney and J. F. Beale (First Trinity) for the Lowe Double Sculls. On May 21st the O.U.B.C. summer eights commenced. On the first night New College bumped Magdalen and went head of the river, and during the whole of the other five nights racing was never in danger. Christchurch retained their headship of the second division, under Dudley Ward's captaincy; bumping races were first rowed at Eton during the last week of May, but with the excellent reach at Datchet at their disposal the alteration seems to be unnecessary. M. J. Slack about this time won the Amateur Sculling Championship of Queensland. The O.U.B.C. Pairs were won by those two sterling New College oarsmen, C. K. Philips and W. E. Crum, on June 9th, and in the same week C. K. Philips also won the O.U.B.C. Sculls. The four nights' racing for the C.U.B.C. Summer Eights commenced June 10th, Trinity Hall (I.) easily retaining the head of the river, and Caius (II.) were left at the top of the second division. It is rather a pity that there should be only four days' competition for these eights; the six days at Oxford is a much better test of the relative positions of the various college crews. Henley Regatta took place July 7, 8, and 9. A record entry of 58 at one time indicated the necessity of adding another day's racing to the carnival, but the withdrawal of a good many crews at the last moment and the non-arrival of several foreigners fortunately enabled the draw to be arranged for the usual Tuesday, Wednesday, and Thursday. The entry of Yale University for the Grand added immensely to the interest in the meeting, and the attendances on both the Wednesday and Thursday must have been records. The Tuesday was a fine, calm day until the late afternoon, when it rained heavily, but the two following days, although fine, were quite spoilt by a strong head wind for racing and record purposes. The Grand was won by Leander after they had beaten Yale and New College in trial heats. New, the head Oxford boat, had easily beaten Trinity Hall (the holders) and head Cambridge eight. The Yale men could only stay three-quarters of a mile and then they collapsed. Eton College won the Ladies' Plate, and Emmanuel College, Cambridge, won the Thames Cup. The London Rowing Club with the Nickalls, Guy and Vivian, won the Steward's Fours easily; Trinity College, Oxford, won the Thames Cup; and Caius College, Cambridge, took the Visitors'; G. and V. Nickalls won the Silver Goblets, and Nickalls Challenge Cup now added; and the Hon. R. Guinness, Leander B.C., had a very easy task to retain the Diamond Scul Messrs. F. Willan, O.U.B.C., and F. J. Pitman, C.U.B.C., in the place of the late J. H. D. Goldie, umpired from the fast launch *Hibernia*. After Henley, the most important event decided, was the annual contest for the Wingfield Sculls, the amateur championship of the Thames, which took place on July 17th over the Thames Championship course. Vivian Nickalls, the holder, was challenged by the Hon. Rupert Guinness. After a close and brilliant struggle to Chiswick Church, where Guinness for the first time drew clear, the Diamond Sculls holder won easily by 2½ lengths in 24 mins. 11 secs. The regattas following the premier gathering conclusively proved the Thames R.C. to be far superior to the London R.C. when the brothers Nickalls retired, as they did, after Henley. At Walton, on the Saturday of the Henley week, Thames beat London for the Senior Eights and also Kingston for the Senior Fours; London (W. J. Thompson and H. W. Stout) won the Senior Pairs; H. T. Blackstaffe won the Senior Sculls, and J. W. Duckett, of the London, won the Junior Sculls. At Kingston, on July 18th, Thames again won the Senior Eights and Fours; the Hon. A. Guinness the Senior Sculls; H. C. Rabbidge, of the London, the Junior Sculls, and J. Crisp and G. C. Hodgson (Kingston) the Senior Pairs. In the following week, at Staines Regatta, Thames won the Senior Eights, Fours, Pairs (Hons. R. and E. A. Guinness), and Sculls (G. McHenry). At Chester Regatta R. K. Beaumont won the Dee Sculling Championship, and the Mersey R.C. the Senior Fours Challenge Cup. At Molesey Regatta, on July 25th, Thames again won the Senior Eights and Fours; Hon. E. A. Guinness won the Senior Sculls, and J. Crisp and G. C. S. Hodgson, of the Kingston, the Senior Pairs; G. P. Forrester, of the Twickenham, was the Junior Sculls winner. The Metropolitan Regatta was held on Monday, July 27th, Thames, with the brothers Guinness in the crew, won the Senior Eights and also the Senior Fours. The Hon. E. A. Guinness won the Senior Sculls and J. Beresford, of the Kensington, won the Junior Sculls. At Bedford Regatta the Hon. E. A. Guinness won the Senior Sculls Challenge Cup and R. W. Broadrick (First Trinity, Cambridge) the Junior Sculls. At Windsor and Eton Regatta, on the Saturday before the Bank Holiday, Crisp and Hodgson, of the Kingston, won the Senior Pairs; R. K. Beaumont the Senior Sculls; P. C. Low (London R.C.) the Junior Sculls, and Kingston the Senior Fours. At Reading Regatta, on the Augus

* Old Blues.

Bank Holiday, Kingston won the Senior Eights and Fours, and F. Beddington, an old Thames sculler, beat R. P. Croft, of Trinity Hall, for the Senior Sculls. The regatta season practically ended on August 8th with the rising and most successful Goring and Streatley Regatta: R. K. Beaumont, of the Thames R.C. and Burton R.C., won the Senior Sculls. A mixed eight of Oxford, Cambridge, and Eton oarsmen, rowing as Orkney Cottage, won the Challenge Eights from Kingston, but the latter club wound up the most successful season they have had for many a long day by winning the Senior Fours and Pairs. In October R. P. Croft, of the Thames and Trinity Hall clubs, went over to Paris and defeated F. Boudin for the Amateur Championship of France on the Marne. Boudin had appeared at Henley on several occasions. After a long and dreary interval a Championship of the World sculling race—indeed, two—took place on the Thames during the year 1896. Exhibitions and barefaced swindles, both in America and Australia, had practically killed professional rowing in both those centres, and as we in England seemed unable to produce anything in the shape of a really first-class sculler, the question as to the genuine champion sculler of the world was a most open one, but England's chance of having a voice in the matter seemed very slight indeed. Early in the year, in March, W. A. Barry conceded the veteran Wallace Ross 5 seconds from Scotswood Suspension Bridge to the Redheugh Bridge on the Tyne for £50 a-side. W. Barry naturally won easily. On March 30th G. Bubear gave Wallace Ross 7 seconds over the Tyne championship course for £100 a-side, the Englishman winning easily. These two matches savoured considerably of the exhibition order of things. In the meantime C. R. Harding, the diminutive champion of England, after his defeat of T. Sullivan, began to fancy that his chances for the World's Championship were not quite hopeless; J. Gaudaur, the Canadian, was rapidly approaching the "sere and yellow"; and James Stanbury, the Australian, was reported several stone above his proper weight. Articles had been signed for a match over the Thames championship course on Dec. 30th, 1895, between Harding and Stanbury, to take place on July 13th for £500 a-side, and the Australian arrived in England early in May by the *Austral*, and before the day considerable interest was aroused in the match. Harding only scaled 9st. 8lb. to J. Stanbury's 12st. 10lb. Harding was born July 1st, 1867, and Stanbury Feb. 25th, 1868. The betting was 11 to 10 on Stanbury, who led from the very first stroke and won easily by 14 secs. in 21 mins. 51 secs., as against G. Bubear's record time of 21 mins. 44 secs. Tide, wind, and water were all in favour of very fast times; Mr. J. C. Gardner, the old Cambridge stroke, was the umpire. Directly after this victory Stanbury challenged J. Gaudaur, of Canada, and articles were soon signed for the pair to scull from Putney to Mortlake on Sept. 7th for £250 a-side. Gaudaur, a very tall man, was born April 4th, 1868, and therefore ten years older than Stanbury. On the day of the race Gaudaur scaled 12st. 7lb. and Stanbury 12st. 13lb. Odds of 9 to 4 were laid on Stanbury, but Gaudaur took the lead after half a mile, and when Stanbury had made a desperate spurt for a foul opposite the Doves at Hammersmith he virtually collapsed, and Gaudaur won as he liked in 23 mins. 1 sec. by 45 secs. Stanbury claimed the foul, but the umpire, Mr. W. J. Innes, refused to allow it. As Gaudaur can scarcely be better now than he was ten years ago when Beach beat him on the Thames, the general decadence of professional sculling seems to be amply demonstrated, more especially that of the English representatives. Bubear and an English crew visited Halifax in July for a couple of regattas in Canada, but the prizes seemed to be well distributed amongst the various competitors, and the racing was not of any importance.

ATHLETICS.

Decidedly the feature of the past athletic year was the action of the Amateur Athletic Association in suspending, just before the Championship meeting, several of the most notable champions of the previous season, viz., C. A. Bradley, A. R. Downer, F. E. Bacon, G. Crossland, and H. Watkins. These men had been running for several years as amateurs under A.A.A. laws, and each man, at his own special distance, was certainly a marvel of speed and endurance combined, and decidedly superior to any of the previous amateur champions whose names appear in the lists of previous holders of the titles, if we except W. G. George, who eventually became a professional. During the last five seasons athletic meetings had been increasing in number and importance, and as the A.A.A. rules fixed a limit of ten guineas for handicap prizes it was impossible for the more wealthy organizations to offer extra inducements to these champions to compete unless they put up an extra big prize for a level race (there being no limit under A.A.A. rules to the value of prizes in level races), or else *sub rosa* tendered "expenses," which is distinctly against the rules and laws of the governing body. For a long time it had been notorious that certain athletes were in the habit of demanding and receiving various sums in the way of expenses for competing at sports held under A.A.A. laws, in fact, they seldom appeared anywhere unless they were paid for so doing. But proof was difficult, almost impossible, to obtain until, at last, some of the sports promoters turned Queen's evidence. The men implicated admitted the charges on being summoned before the governing body and were, of course, suspended from competing in future under the laws they had broken. The absence of these champions from the chief events of the year of course resulted in the performances at the championships and elsewhere being below the standards and records of the previous seasons, but for a time, at least, the amateur athletic world has been purified and the status of its best men, as amateurs, cannot be called in question. At one time, early in the season, it seemed likely that the New York Athletic Club would be asked to visit England for a return match with the object of our trying to wipe out the New York fiasco of 1895. Although the L.A.C. and the Sports Club were both willing to issue a challenge the Universities would have nothing to do with it and the idea had to be dropped. The New York A.C., however, will probably be represented at the 1897 championships, and with Wefers, Chase, Burke, and Kilpatrick to oppose them our men will have all their work to hold their own. The high wind spoilt all the times at the Championship Meeting at Northampton, but Sturgess made a record in the four miles walk, and with the wind and downhill Godfrey Shaw in the hurdles did better than record, but, of course, these conditions preclude the time being accepted. W. J.

Sturgess was undoubtedly the hero of the year and he added several records to his name; E. C. Bredin was out of training during the whole of the season; and beyond his Inter-'Varsity quarter, W. FitzHerbert did nothing to uphold his reputation, as he was palpably unfit when he ran in the championships. Altogether the season was neither exciting nor sensational, if we except the suspensions above alluded to, and everything points to an era, not very far distant, when the modern amateur will have to be allowed some portion of his expenses, or the prizes will be in money value and not the present somewhat useless articles which the amateur of to-day does not appreciate and cannot afford to retain. This is the result of the current far too wide amateur definition, which includes a class of runner ar too poor to be anything but a money-making professional. The year's athletics opened as usual with the cross-country events. The Southern Counties Cross-Country Association again ran their Senior and Junior Championships at Wembly Park over the same ten miles course, both on the same day—the seniors starting about twenty minutes before the juniors. The day, Feb. 22nd, was cold but fine. Ten clubs started for the Senior Championship: the Finchley Harriers winning with 101 points, the Ranelagh Harriers being second with 123, and the Essex Beagles third with 156. G. Martin, Essex Beagles, was the first man home in 64 mins. 7¾ secs.; P. Tiller, of the Thames Valley Harriers, was second; and T. Bartlett (E. B.) third. Eighteen clubs, nearly all with their full complement of twelve runners, came to the post for the Junior Championship. The Bristol Harriers won easily with 59 points, the Tee To Tum were second with 73, and the Bath and Somerset A.C. third with 115 points. T. Pavey, Bristol, was first man home in 63 mins. 6 secs. (a minute faster than the seniors), J. Webb, of Bath, was second, and H. Gibbs, T. T. Tum, third. On the same day the Northern Counties Association held their Cross-Country Championship: G. Crossland, of the Manchester H. being first man home, and the Salford H. the winners. The race took place at Rochdale. On the following Saturday the Midland Counties Cross-Country Championship was held at Fernhill Heath, Worcester, the Birchfield Harriers winning and S. J. Robinson, of Northampton, being first man home. On March 7th, the National Cross-Country Championship was decided at Minworth, near Birmingham, over a supposed ten miles course. The arrangements were disgracefully bad, and of the ten clubs starting the Salford H. won with 116 points, the Birchfield H. second with 121 points, and the Finchley H. third with 145. G. Crossland (Manchester H.) won in 57 mins. 45 secs.; W. Harrison, of the same club, was second, and W. Bullen, a Londoner, third. On the same afternoon, in London, at Norbury, the South of the Thames Junior Inter-Club race was won by the Southwark H. with 64 points; A. Baker, of the Weybridge H., was first man home in 50 mins. 17 secs. The distance was seven miles, and twenty-four clubs started. Nothing in the way of frost interfered with athletics at Oxford and Cambridge this season, and both clubs decided their club meetings and the Inter-'Varsity sports in the spring as usual. The winners at the O.U.A.C. Sports in March were:—100 Yards, J. S. Mayne (B.N.C.), time 10⅖ secs.; Hammer, A. Dowson (New), 92 ft.; 120 Yards Hurdles, W. J. Oakley (Christ Church), time, 16⅖ secs.; One Mile, W. H. Whitelaw (New), time, 4 mins. 36⅖ sec..; Long Jump, G. Mordaunt (University), 21 ft. 7 in.; High Jump, A. D. Skyte (New), 5 ft. 9 in.; Putting the Weight, W. J. Oakley, 36 ft. 3½ in.; Half Mile, H. S. Bickham (New), 2 mins. 1⅖ secs.; Quarter Mile, G. Jordan (University), time, 50⅖ secs.; Three Miles, J. M. Freemantle (Hertford), time, 15 mins. 10 secs. At Cambridge, the 'Varsity Sports results were as follows:—100 Yards, H. F. E. Wigram (Trinity), 10⅖ secs.; High Jump, S. G. Lubbock (King's), 5 ft. 7½ in.; 120 Yards Hurdles, W. H. Maundrell (Corpus), 18 secs.; Putting the Weight, J. Bullock (Trinity), 36 ft. 5 in.; Mile Race, H. J. Davenport (Trinity), 4 mins. 28⅖ secs.; Hammer Throwing, A. Johnston (Pembroke), 94 ft. 1 in.; Long Jump, E. Batchelor (Caius), 20 ft. 3 in.; Quarter Mile, W. Fitzherbert (Trinity Hall), 51 secs.; Three Miles, W. V. Wood (Clare), time, 15 mins. 22 secs. Everything pointed to a very close match when the Dark and Light Blue met at the Queen's Club, Kensington, March 27th, on a dull, cold day. The attendance was much larger than when held in the summer, as in the previous year, and Cambridge just won with the odd event. The Quarter was the brilliant performance of the day. The winners were:—100 Yards, G. Jordan (Oxford), 10¼ secs.; High Jump, E. O. Kirlew (Oxford), 5 ft. 8½ in.; 120 Yards Hurdles, E. T. Garnier (Oxford), time, 16⅖ secs.; Three Miles, J. M. Freemantle (Oxford), time, 15 mins. 12 secs.; Putting the Weight (10 ft. square), J. H. Bullock (Cambridge), 38 ft. 2 in.; One Mile, H. F. Howard (Cambridge), 4 mins. 29⅖ secs.; Quarter Mile, W. FitzHerbert (Cambridge) 49⅖ secs.; Long Jump, E. Batchelor (Cambridge) 22 ft. 7 in; Throwing the Hammer (30 ft. circle), A. B. Johnston (Cambridge), 107 ft. 7in. In the previous month (Feb. 28th) the Eton College School Mile had been won by C. K. Hutchinson in 4 mins. 49⅖ secs. Athletics proper may be said to have commenced in London with the South London Harriers' Meeting at the Oval, and the London Athletic Club's First Spring Meeting, both held on April 11th. At the Oval C. A. Bradley beat A. R. Downer in a level 75 yards race. Bradley also, after a dead heat from scratch in the 100 Yards Handicap final, was beaten in running off the tie. In a Four Miles Inter-Club Race F. E. Bacon, running for the Essex Beagles, won easily in 29 mins. 45⅖ secs. At the L.A.C. Meeting, the Public Schools' Challenge Cups were the most interesting items. C. C. Holland, of Giggleswick, won the Quarter Mile in 53⅖ secs.; H. Elliott, of the same school, dead-heated in the Mile with O. M. Dyke, of Sherborne, in 4 mins. 42⅖ secs. The Hurdles, a new cup presented by Mr. Godfrey Shaw, the champion, fell to W. N. Pilkington, of Clifton, in 17⅖ secs., who went up to Cambridge in October. On the same day, and clashing with these two meetings, the Ten Miles Amateur Athletic Association Championship was held at Belgrave Park, Leicester. Bacon, the holder, did not defend his title, and the attendance was small; only three runners started, G. Crossland, H. Watkins, and P. Biss, of the Highgate H. The two former ran together until a lap from home when Crossland came away and won by twenty yards in 52 mins. 5 secs. Early in April a very badly managed revival of the Olympic Games took place in the Stadium, at Athens, as the result of an Athletic Conference held at the Sorbonne, Paris, in 1894. The Paris executive left the Greek committee to manage the affairs as they

Digitized

liked, and beyond a few Americans, about three Englishmen, and several Frenchmen. the international features of the meeting were conspicuous by their absence. It is expected that the next Olympic Festival will be held in Paris in 1900. May was altogether uneventful in the way of any remarkable performances except that C. A. Bradley and A. R. Downer were meeting once or twice a week at 100 or 120 yards, Bradley generally proving the winner, indeed, the pair mutually avoided the Northern Counties' Hundred Yards Championship, the inducements held out to them elsewhere proving more attractive. One of the classic meetings of the year, the Civil Service Athletic Sports, took place at Stamford Bridge, June 13, and was as well attended as ever. H. C. Woolyatt, L.A.C., the scratch man, won the Open 120 in 12¼ secs.; B. Lawford, S.L.H. (45), won the Open Mile Handicap in 4 mins. 25⅘ secs. —his last race before the One Mile Championship, which he won. The A.A.A. Championships were held at the County Cricket Ground, Northampton, on July 4th. A tremendously strong wind spoilt all the times, in fact, it was the exception for the winners to do more than beat the standards. The Hundred was, of course, very open with Bradley and Downer suspended; the winner proved to be N. D. Morgan, of Belfast, uphill, in 10⅘ secs., Max Willenberg, of the Salford H., being second; Morgan won this event at Birmingham in 1890. The Quarter was won by J. C. Meredith, of Dublin University, in 52 secs., the holder, W. FitzHerbert, C.U.A.C., being second and unable to act in the wind. The Half, after a splendid race, was won by Lt. W. A. de C. King, Royal Engineers, in 2 mins. 1⅘ secs., E. C. Bredin, the holder, not starting. B. Lawford (S.L.H.) won the One Mile in 4 mins. 31⅘ secs., F. E. Bacon, the holder, being under suspension. H. Harrison, of the Manchester H., won the Four Miles in 20 min. 27⅘ secs. and the Two Miles' Steeplechase fell to S. J. Robinson, a local, in 11 mins. 25 secs. The 120 Yards Hurdles, run down hill with a strong breeze behind the men, fell once more to Godfrey Shaw, L.A.C., in 15⅘ secs., but the record cannot be accepted. The Long Jump, a good performance on the level with the wind, was won by C. E. H. Leggatt, 23 ft. ¼ in.; and the High Jump, in the absence of the holder, went to another Irishman, M. O'Brien (Gaelic A.A.) with 5 ft. 11 in. The Pole Jump was taken by R. E. Sorshaw, of Ulverston, 10 ft., the holder, Dickenson, having turned professional. J. Flanagan (Gaelic A.A.) won the Hammer with 131 ft. 11 in., and Denis Horgan (Irish A.A.A.) took the Weight with 43 ft. 5½ in. The Four Miles Walking Challenge Cup produced a record, W. J. Sturgess covering the distance in 28 mins. 57⅘ secs. There were no further noticeable performances recorded during the year except that W. J. Sturgess broke the one mile walking record in a match with D. Fenton at the L.A.C. meeting on Sept. 25, doing 6 mins. 33⅘ secs., and also the 9, 10, 11, 12, 13, and 14 miles walking records on October 3rd, at Stamford Bridge, his times being: 1 h. 9 mins. 31⅘ secs., 1 h. 17 mins. 38⅘ secs., 1 h. 25 mins. 53⅘ secs., 1 h. 34 mins. 41 secs., 1 h. 43 mins. 42⅘ secs, and 1 h. 52 mins. 59⅘ secs. A. G. Butler (L.A.C.) beat the Half Mile Champion, W. A. de C. King, in the L.A.C and United Hospitals match, late in July, doing just inside 2 mins. On August 29th C. Bennett, of Wimborne, with 18 yds. start in a mile at Westwood Park, Southampton, did 4 mins. 21⅘ secs.—undoubtedly the best amateur mile performance of the year, seeing how easily he won. As there is every prospect of a picked team of American athletes visiting this country in 1897 and several of the expected visitors have already beaten our men in New York on Sept. 21st, 1895, the winners of the most recent American so-called amateur Championships cannot fail to be interesting. The American A.A.U. Championships were held on Sept. 12th, at Manhattan Field, New York City, in dull weather and with a miserably poor attendance of spectators. The fact that all the best of the competitors are the paid servants of the clubs they represent invalidates their amateur status and takes away most of the public interest in the games. B. J. Wefers (N.Y.A.C.) won the 100 Yards in 10⅘ secs., the 220 Yards in 23 secs., but in the Quarter was just beaten by T. Burke, of Boston, in 48⅘ secs.—the American record by Myers being 48¼ secs. in 1881; the Half Mile was won by C. H. Kilpatrick (N.Y.A.C.) in 1 min. 57⅘ secs.; the One Mile fell to G. W. Orton (N.Y.A.C.) in 4 mins. 27 secs.; the Three Miles was won by E. W. Hyertberg, (N.J.A.C.) in 16 mins. 31⅘ secs.; W. B. Rogers (N.J.A.C.) won the 120 Yards (loose hurdles on cinders) in 16⅘ secs., S. Chase not starting; and S. Buck (K.A.C.) won the 220 Yards Hurdles in 25⅘ secs; S. Leibgold (P.A.C.) won the One Mile Walk in 6 mins. 53 secs.; and the Three Miles in 24 mins. 24⅘ secs.; the High Jump fell to C. U. Powell (K.A.C.) with 5 ft. 9½ in.; and T. B. Bloss (N.Y.A.C.) won the Broad Jump with 22 ft.; F. W. Allis, of Yale, won the Pole Jump with 10 ft. 5 in., after a dead heat; G. R. Gray (N.Y.A.C.) won the 16lb. Shot, from a 7 ft. circle, with 44 ft. 3⅘ in.; and J. S. Mitchell (P.A.C.) the Hammer with 134 ft. 8¾ in., also from the 7ft. circle. Outside these meetings Burke and Wefers added two records to the list which will be found elsewhere, and on Nov. 7th B. J. Wefers, at Washington, is said to have run 300 yards in 30⅘ secs., and also 100 yards in 9⅘ secs.; both records are quite within the capabilities of this marvellous runner. Athletics began at the Universities in November. The Cambridge Freshmen's Sports were held on Nov. 6th and 9th, with the following results:—Putting the Weight, D. P. Frazer (Inverness College and Pembroke), 29 ft. 7 in.; High Jump, C. L. Estridge (Harrow and Trinity), 5 ft. 3 in.; One Mile, H. E. Graham (Rossall and Jesus) 4 mins. 46⅘ secs.; 100 Yards, W. N. Pilkington (Clifton and Trinity), 10⅘ secs.; Long Jump, 18 ft. 11 in. and 120 Hurdles, 17⅘ secs.; Hammer, A. Campbell (Harrow and Pembroke), 66 ft. 3 in.; Quarter Mile, C. G. Davison (Sutton Valence and Sidney), 52⅘ secs.; Three Miles, J. G. Jackson (Fettes and Clare), time, 16 mins. 43⅘ secs. When the A.A.A. had forced five such splendid runners as Bacon, Crossland, Watkins, Bradley, and Downer, from the amateur ranks, it was expected that a fresh and much-needed impetus would be given to that decaying and neglected branch of athletics—professionalism. All the five men, except Bradley, were promptly in evidence with challenges to run anyone at their own particular distances. Downer soon made a small match with "Cross," of Edinburgh, better known as W. Lock, of the Spartans, when an amateur. This Downer won, and then matched himself to run Mills, of Rochdale, a noted "pro," 150 yards for £50 a-side, at Oldham, Downer receiving 3 yards inside. The match came off on Oct. 17th, Downer winning easily, and doing "two yards inside" from his mark. In the meantime Bacon's challenge was taken up by T. P. Conneff, the

New York A.C. "amateur," who had returned to Ireland and had no scruples in turning a British "pro." The match was to consist of three races—one, two, and three miles, for £100 a-side each match. The first, distance three miles, came off in Dublin, Oct. 3rd. Bacon, trained to perfection by W. Cummings, won easily, Conneff stopping after he was led at a mile in 5 min. 13 secs.; Bacon finished in 15 mins. 29⅘ secs. Conneff was far from well, and had not been back in his native country long enough to get again acclimatised, most necessary for any runner who has been a long time in the hot climate of the United States. The second race, on October 17th, at Bolton, distance one mile, Bacon again won by thirty yards in 4 mins. 35⅘ secs. The third race, distance two miles, took place at Celtic Park, Glasgow. It was more an exhibition than a match, but Conneff ran much better than before, and Bacon had to do 9 min. 41⅘ secs. to win. Previous to this Bacon, on Sept 20th, had defeated H. Anstead, of Greenwich, the so-called professional champion at four miles, at Rochdale, for £100 a-side, Bacon winning easily in 20 mins. 34⅘ secs. The Hon Sec. of the Amateur Athletic Association is C. Herbert, 10 John Street, Adelphi, London, W.C.

BILLIARDS.

The billiard season of 1895-96 did not result in any new or startling developments, and in fact was tame to a degree. The spot stroke was played less and less, indeed not one single match or exhibition of any importance included this much abused stroke in the conditions, although the fact that Mr. J. Peall was still *facile princeps* at English billiards was amply proved by his twice beating C. Dawson at the Agricultural Hall in May, scoring his 500 to love after Dawson had given the regulation miss. John Roberts played probably quite as well if not a little better than he had done any time during the last ten years, and that means that we never have had and indeed are not likely to have such a brilliant exponent of the game for many years to come. He gave away more points than he had ever done before to Peall, Mitchell, North, Richards and Taylor, these five players all showing slight signs of deterioration in their play, and with the exception of E. Diggle and C. Dawson, there is no English professional to whom the champion of champions cannot give away 9,000 in 24,000 and beat him. The season's play seemed to prove that there was not very much to choose between Diggle and Dawson, but looking at their relative play with the champion, Diggle certainly proved himself the better of the two, and in all these exhibitions or so called matches on even terms Diggle always won, and fairly easily too. W. Spiller fairly established himself in the front rank of the professionals, a break of 529 spot-barred, his best, in March, proving conclusively what a good man he is at the all round game. With the exception of Spiller no other new professional came to the fore during the season. The four chief billiard resorts were the Egyptian Hall, Piccadilly, where all John Roberts's London matches were played; Messrs. G. Wright & Co.'s, Argyll Hall, Regent St.; Messrs. Burroughes & Watt's saloon, Dean St., Soho; and Messrs. Thurston's room in Catherine St., Strand. Once more we must deplore the fact that not a single genuine money match was played during the season. John Roberts adopted a new method at his Hall, offering his opponent, for the fortnight's play, £25 if he lost, and £150 if he (Roberts) won. All the other exhibitions were gate-money shows, pure and simple, and there are not wanting signs that the public are getting rather tired of this sort of thing and long for the real money matches of former times, where each man had something more at stake than a share of the gate.

In the first fortnight in January John Roberts gave C. Dawson 8,000 in 24,000. There were no large breaks, Roberts 458 and Dawson 387 being about the best, Dawson winning by 927. Roberts being below his form. Roberts then gave W. Mitchell 9,000 in 24,000 and won by 277. Roberts made some fine breaks, 633, 569, 537, &c., Mitchell also doing well with 483 (his record), 369, 334, &c. Roberts then met W. J. Peall at 9,000 in 24,000, Roberts with 621, 600, &c., winning by 124, Peall's best being 241. Roberts followed this up by defeating D. Richards at 9,000 in 24,000 by 319, no large breaks being recorded. Roberts followed this up by again meeting C. Dawson at 8,000 in 24,000 and the champion being in wonderful form with 719, 711, 548, 528, 524, 522, won by no less than 1,101, although Dawson had compiled amongst other good breaks 415, 373, 423, 300, &c. Then followed perhaps the most interesting game of the season. Roberts conceding E. Diggle 7,200 in 24,000; Roberts was evidently on his mettle, and after a magnificent series of breaks, viz., 817, 682, 653, 550, 526, 475, &c., won by 410, Diggle's contributions including 610, 402, &c. For some time previous to this last match a strong controversy had been going on as to the legitimacy of the "push shot;" a good many judges ruled it a foul stroke, and also doubted the champion's ability to hold his own without the aid of his favourite push. To settle this point W. Mitchell arranged a match with Roberts for "£100 a-side," Roberts to concede 7,000 in 21,000 "push, spot and jams" barred. Roberts, however, won by 196, 480 being his best break, 228 being Mitchell's chief contribution. Roberts then met C. Dawson on the same conditions, Roberts winning by 184 with a best break of 368, to Dawson's 252. Finally Roberts finished up his London season at the Egyptian Hall by giving Diggle push and spot barred, 8,000 in 24,000, but Roberts lost by 713. Diggle proved himself perfectly able to play without the push, his breaks including 499, 438, 405; Roberts contributing 582 (push barred record), 574, 411 and 384. Roberts played a few matches about the country before sailing for South Africa, but they were of little importance.

E. Diggle and C. Dawson twice met, 18,000 up on level terms. The first time in January, at Messrs. Ormes' rooms at Manchester for a stake of £50 a-side, Diggle won by 792, the best break being 517 by Diggle. Then in the following month at Messrs. G. Wright & Co.'s, for a prize of £100, when after Dawson had held his own up to almost the last, Diggle went right away and won by 2,006, Diggle's best break was 625, Dawson's 371. At Glasgow in May they met once more, and again Diggle won easily. Diggle has given Peall 1,000 in 9,000 at Manchester and beaten him by 1,624; and Dawson has beaten Spiller on the same terms by 898, the best break being the loser's 419. W. Spiller has beaten W. Stevenson (the latter receiving 1,000 in 8,000) by 1,797, when Spiller made his record break of 529. A somewhat remarkable series of matches took place at the end of January at the Argyll Hall. (

Memmott, the Australian champion, opposing H. W. Stevenson, the South African champion, 700 up. spot barred on even terms, playing with benzoline balls instead of the usual ivories. Special prizes were offered for record breaks, and Memmott made a record for him of 430 and Stevenson did the same, viz., 458, the last named break including a sequence of 195 nursery canons, an English record, on January 29th. Amongst other professional events may be mentioned a club markers' tournament at the Dean St. saloon, won by C. Camps of the Ajax club from scratch, with a best break of 125 in heats of 300 up. Messrs. Ormes' usual markers tournament won by W. Osborne of Leicester with a best break of 108 in heats of 500 up. The London Licensed Victuallers' Championship (now a very big affair with an enormous entry), won by M. J. Dyke of Walthamstow, a 67 by Mr. P. M. Calder being the best break of series.

The Oxford and Cambridge annual billiard matches were both won by Cambridge at Cambridge, G. M. Hill of Jesus College winning the singles by 168 in a game of 500 up with a best break of 113. The winners of the Double match were Hill and S. B. Bennett, who defeated E. Elgee and R. James the Oxonians by 64; Hill's best break being 45.

The Billiard Association brought off the tournament, viz., in March at the National Sporting Club, for the Amateur Spot-barred Championship, Mr. S. H. Fry defeating the holder, Mr. Maughan, by 70 points in the fina. heat of 1,500 push stroke barred. Mr. Fry made breaks of 121, 73, 63, &c., Mr. Maughan's 72, 65, 61, &c. The final was a magnificent struggle all through.

The 1896-97 season was commenced by John Roberts at Manchester, on September 14th, when he conceded W. Hardy, a local, 12,000 in 24,000. Hardy won by 432, with a best break of 233, played well, and Roberts breaks of 635, 608, 554 and 518 proved the champion to be as good as ever. A match between Roberts and Diggle at Bristol, followed, Diggle with 4,000 in 12,000, Roberts with best breaks of 574 and 533 winning. The champion opened his London season on Oct. 5, at the Egyptian Hall, giving Peall 9,000 in 24,000 and beating him; and then allowing North the same start, and defeating him. In this match on one evening Roberts compiled the following remarkable sequence of breaks, viz., 327, 625, 102, 119, 309, a feat even the champion has rarely performed on one evening. He also made a break of 550 during the match. Eugène Carter, an American champion exponent of the Yankee game, gave a series of wonderful exhibitions in London and the provinces during the spring of 1896. The offices of the Billiard Association are 139 & 140 Fleet St., E.C.

CRICKET.

The national summer game has probably never been more popular, and has never been so closely followed by the general public as in 1896. Not only was the new increased first-class county scheme thoroughly tested by a second season's trial, but the visit of another Australian Eleven (the ninth) added to the excitement and interest, the five months proving all too short for the numerous first-class matches that could have been played had time permitted and counties and players been available. The exceptionally dry weather of May, June, and July made 1896 essentially a batsman's year, and before the wet came in August some mammoth totals were recorded, the bowlers having very little chance of distinguishing themselves. The first-class county scheme worked exceedingly well; and at length Surrey, after a gallant fight, had to yield the championship to Yorkshire, whose batting was more dependable than that of any other county eleven. As the year closes, the various county clubs are giving their opinion on the "follow-on" rule, and probably the present year will see some alteration in the regulations governing this debatable question. We will first of all deal with our visitors, the Australians, and it can be safely stated that no more successful tour has ever been undertaken by any previous band of Australian cricketers to this country. Previous elevens from Australia may have included more remarkable and brilliant bowlers and batsmen. There may not have been a Murdoch, Massie, or Mcdonnel to demoralise our native bowling. The team did not possess a wicket-keeper up to the standard of Blackham, nor bowlers quite so difficult to play as Spofforth, Palmer, or Turner, but we have never had in this country a Colonial side more difficult to beat on a hard wicket; and, quite contrary to general expectation, their eminently successful bowling was the most noticeable feature of the tour. Their record of 34 matches played, 19 won, 6 lost, and 9 drawn, is all the more meritorious, as probably no previous team ever left Australia enjoying less of the confidence of the Colonial cricket authorities. The team arrived at Plymouth, April 24th, on board the Orient s.s. *Cuzco*, the names being G. H. S. Trott (capt.), H. Graham, H. Trumble, A. E. Johns (Victoria), G. Giffen, J. Darling, E. Jones, C. Hill (South Australia), S. E. Gregory, H. Donnan, T. R. McKibbin, J. J. Kelly, and F. A. Iredale (New South Wales). C. J. Eady (Tasmania) had disembarked at Naples, and H. Musgrove, the manager, was already in England. All but Trott, Giffin, Gregory, Trumble, and Graham were new to England. The tour opened with a match at Sheffield Park, May 11, 12 and 13, against a powerful team collected by the Earl of Sheffield, who probably spent some thousands over this initial entertainment to the visitors. His Royal Highness the Prince of Wales was present. Although the English team included W. G. Grace and Ranjitsinhji, it was not particularly strong, and the Australians totalled 241 in their first innings; the match finally ended in a draw, the Englishmen only wanting 77 runs to win with six wickets to fall. Their next match, against Essex at Leyton, the Australians won by seven wickets. Their next two matches, at the Crystal Palace and Eastbourne, were not of great importance. Others followed, a week later, against Yorkshire and Lancashire. The future champion county was beaten by one innings and 8 runs, and Lancashire lost by 154 runs. This fairly established the Australians as a first-class team; and when Oxford University and Gloucestershire were also easily beaten, their reputation was still further enhanced. A scratch eleven at Wembley Park were almost a walk over for the Colonials: and then came a much more severe test, the M. C. C. pitting almost an All England eleven against them at Lord's, June 11th and 12th. In this match Pougher and Hearne dismissed the whole of the Colonial side for 18 runs, a score 1 run below the memorable 19 for which the first Australian team, in 1878, dismissed the Marylebone Club, a performance which made Australian

cricket what it is. Finally, the M.C.C. won by an innings and 18 runs. Another defeat by the Midland Counties at Birmingham followed, and then came the first *v.* England match at Lords, Australia made 53 and 347, but England won by six wickets. Following this, Notts were beaten by six wickets, and the visitors were seen at their very best in their next nine matches. Yorkshire were again beaten by 140 runs. The North of England were beaten by 42 runs at Manchester. Hampshire were defeated by an innings and 125 runs. The Players of England lost by an innings and 137 runs; and, after a grand innings of 584, they could only draw with Leicestershire, 87 and 180 for nine wickets. Then came the second England *v.* Australia at Manchester. After Australia had put together 412, and England were all disposed of for 231, a severe defeat for the Old Country seemed almost certain. A grand innings of 154 not out by Ranjitsinhji still left Australia 125 to get to win. Richardson's bowling in the Australians' second innings was superb, and seven men were got out for 100, Australia finally winning by three wickets. In the same week, after piling up the enormous score of 625 against Derbyshire, there was only time left for a draw. Another draw followed in the return match against M.C.C., the Colonials scoring 202 and 331 against M.C.C. 367 and 99 (for three wickets). Surrey then made a desperate bid for county honours against the Visitors, scoring 283 and 147, but the Australians, with 367 and 65 (for 3 wickets) won by 7 wickets. Earl de la Warr's Eleven at Bexhill then beat them by 4 wickets, but they amply avenged this against Warwickshire at Birmingham by winning by an innings and 60 runs. Kent, at Canterbury, were easily defeated by 176 runs, and then came the England *v.* Australia rubber game at the Oval with all the troubles as to the amounts to be paid to the professionals. No play was possible until nearly five o'clock on the first day, and England's first innings was finished off before lunch on the second day for 145. As Darling and Iredale put in 75 runs for Australia's first wicket, England's prospects looked black indeed, but the full total of the side left England still 26 runs in hand. The finish of England's second innings set Australia 111 to win, and so well did Hearne and Peel bowl that England won the match and the rubber by 66 runs. Trumble for the visitors bowled magnificently all through the match. This was their last defeat but one. Sussex were easily beaten by six wickets. The return match with Surrey resulted in a draw. Gloucestershire were again defeated by an innings and 54 runs. The Somersetshire match was another draw. Against Lancashire the Colonials won by 217 runs. Mr. C. I. Thornton's eleven beat them at Scarborough by an innings and 38 runs, the most severe reverse of the whole tour. Their final game at Hastings, September 3rd, 4th, 5th, *v.* South of England was a draw rather against the Colonials. Figures we know will prove anything, but the fact that the Australians hit eighteen individual innings of over 100, whilst against them only three hundreds were hit, proves most conclusively that they were a magnificent batting team, and that their bowling and fielding could not have been far behind. The century scores were F. A. Iredale, 171, 114, 108, 106; G. H. S. Trott, 143, 141, 103; S. E. Gregory, 154, 103, 102; J. Darling, 194, 115, 105; G. Giffen, 130, 115; C. Hill, 130, 118+; H. Donnan, 167. On our side, K. S. Ranjitsinhji, 154+; Abel, 116; C. J. Burnup, 101+ (not out). In the 34 matches played, the Australians scored 12,245 runs for the loss of 509 wickets, giving an average of 24·30 runs per wicket. Against them 10,054 runs were obtained, 583 wickets, average per wicket 17·153. The highest innings played by the Australians was 625 against Derbyshire, their lowest total being 18. The M. C. C. in their second match put together the highest total against them, viz. 367, and Gloucestershire with 17 were the lowest score, this being the lowest total ever obtained against any Australian visiting team. The best of the Australians averages were: batting, S. E. Gregory, 48 innings, total runs 1,464, average 31·38; J. Darling, 53 innings, total runs 1,555, average 29·47; C. Hill, 46 innings, total runs 1196, average 27·35; F. A. Iredale, 51 innings, total runs 1,328, average 27·32; G. H. S. Trott, 54 innings, total runs 1,279, average 26·23; G. Giffen, 49 innings, total runs 1,208, average 25·8. Bowling, T. R. M'Kibbin, overs 647·1, runs 1,441, wickets 101, average 14·27; H. Trumble, overs 1,149 runs 2,340, wickets 148, average 15·120; E. Jones, overs 8,873, runs 1940, wickets 121, average 16·4; G. Giffen, overs 854·2, runs 2,257, wickets 117, average 19·34. The best English batting averages against them were Abel 12 innings, total runs 523, average 47·6; K. S. Ranjitsinhji, 12 innings, total runs 492, average 44·8; Gunn, innings 11, total runs 350, average 43·6; L. S. Jackson, innings 12, total runs 427, average 38·9. W. G. Grace also scored, 14 innings, total runs 392, average 27·12. In the bowling line J. T. Hearne with 446·2, total runs 732, took 55 wickets at an average of 13·17, very easily heading the list. The Australians left England on September 9th for New York to play a series of matches in America before sailing for home, viâ San Francisco. Notwithstanding the all-absorbing interest in the doings of the Australian Eleven, county cricket well maintained its attraction, and when it was seen how close would be the struggle for the blue ribbon between Surrey and Yorkshire, even the colonial matches failed to draw public attention away from the doings of our own champion elevens. Up to a very late period in the summer, it was quite an open question whether Surrey would once more remain the champion county or whether Yorkshire would come out victorious from the ordeal. Fortunately no quibble can be raised as to the number of matches played, these two counties being the only teams with a full record of 26 matches. If Yorkshire only won 16 to 17 gained by Surrey, Yorkshire only lost three, whilst Surrey had seven matches given against her, so that the merits of Yorkshire's success cannot be questioned for a moment. Had their bowling been stronger on hard wickets, there would have been little fault to find with the team as a whole, but they were clearly the best county team, their batting being always consistently good right through from first to last. Middlesex share with Yorkshire the distinction of only losing three games. Essex made a notable advance on all their previous records, and they alone beat both Yorkshire and Surrey. Derbyshire did well, chiefly owing to their batting excellence. Sussex, at the bottom of the list, were somewhat unlucky, considering the brilliant form of Ranjitsinhji, Newham, and C. B. Fry, and they were certainly a stronger side than either Warwickshire or Leicestershire. In the various county matches the closure rule was put into force upon fifteen occasions, but only in four instances was it completely successful.

The instances were Yorkshire against Leicestershire, and Yorkshire *v.* Kent. Middlesex also tried it and won against Lancashire, and Surrey declared when they beat Hampshire at Southampton. Altogether 126 games were played in the competition, 91 being lost and won, and 35 drawn. In all 94,128 runs were scored, and 3,939 wickets taken, giving an average per wicket of 23 runs. The table below gives the full details of the competition in 14 counties:—

	Played.	Won.	Lost.	Drawn.	Points.	Finished Games.
Yorkshire	26	16	3	7	13	19
Surrey	26	17	7	2	10	24
Lancashire	22	11	4	7	7	15
Middlesex	16	8	3	5	5	11
Essex	12	5	4	3	1	9
Notts	16	5	5	6	0	10
Derbyshire	16	4	6	6	—2	10
Hampshire	16	5	8	3	—3	13
Kent	18	5	9	4	—4	14
Somerset	16	3	7	6	—4	10
Gloucestershire	18	5	10	3	—5	15
Warwickshire	18	3	8	7	—5	11
Leicestershire	14	2	8	4	—6	10
Sussex	18	2	9	7	—7	11

Following our usual practice, we will briefly give the averages of the County Championship Clubs. In Yorkshire, J. T. Brown heads the batting averages with 41 innings, total runs, 1,556, average 45·26; J. S. Jackson comes next with 25 innings, total runs 1,030, average 42·22; and Peel is third with 35 innings, total runs 1,135, average 35·15. In the bowling department, Haig heads the list with 485·3 overs, runs 1,085, wickets 71, average 15·20; but Peel is almost better with 1080·4 overs, 1,850 runs, wickets 97, average 19·7. As regards Surrey, Abel heads the batting list with 38 innings, runs 1,516, average 42·4; Hayward is next with 37 innings, runs 1,182, average 36·30; Brockwell's 38 innings, 1,161 runs, average 30·9, is also most creditable. The three crack Surrey bowlers were Hayward, 528 overs, wickets 81, average 14·68; Lohmann 591·2 overs, wickets 73, average 15·27; and Richardson 1230·3 overs, 191 wickets, average 15·88. In Lancashire, as regards batting, A. C. M'Laren with 15 innings scored 713 runs, average 54·11; F. H. Sugg, with 35 innings, scored 1,278 runs, average 39·30; and Baker with 32 innings totalled 928 runs, average 35·18. In Middlesex, Sir T. C. O'Brien heads the batting list with 24 innings, 952 runs, average 41·9; A. E. Stoddart comes next with 28 innings, 1,100 runs, average 40·20; whilst H. B. Hayman, only 12 innings, scored 424 runs, average 38·6. As regards bowling, J. T. Hearne bore the brunt of the fray, with 1,058·4 overs, 2,119 runs, 405 maidens, 118 wickets, average 17·13. In Essex, in the batting department, H. G. Owen heads the list with 22 innings, 575 runs, average 35.15; P. Perrin comes next with 23 innings, 655 runs, average 29·17; C. M'Gahey being third with 23 innings, 642 runs, average 29·4; F. G. Bull, 4,143 overs, 70 wickets, average 15·44; and Mead 460·2 overs, 55 wickets, average 20·31, did the bulk of the bowling. For Notts, as regards batting, the records are:—W. Gunn, 19 innings, 785 runs, average 46·3; Shrewsbury, 21 innings, 730 runs, average 36·10; and A. O. Jones, 28 innings, 764 runs, average 29·10. The two best bowling averages were—Attewell, 854·4 overs, wickets 86, average 14·55; Brown, 451·3 overs, 43 wickets, average 21·13. For Derbyshire, as regards batting, Storrer, 22 innings, 1091 runs, average 57 8; Davidson, 24 innings, 953 runs, average 43·7, and Chatterton, 26 innings, 890 runs, average 40.10. In the bowling, Hulme, 911 overs, 77 wickets, average 21·73, and Davidson 944·1 overs, wickets 68, average 22·6, did nearly all the work. For Hampshire, Captain E. G. Wynyard has a splendid batting average, viz., 14 innings, 705 runs, average 50·5. F. E. Lacey comes next with 8 innings, 282 runs, average 47. Captain Quinton is third with 17 innings, 577 runs, average 38·7. In the bowling. Kitchener heads the list with 144.3 overs, wickets 18, average 18·5; but the brunt of the work fell to Baldwin, with 980·1 overs, 70 wickets, average 25·65. For Kent, Rev. W. Rashleigh heads the list with 15 innings, 523 runs, average 40·3; W. H. Patterson comes next with 11 innings, 433 runs, average 39·4, and J. R. Mason is third with 32 innings, 1117 runs, average 37·7. A. Hearne heads the bowling averages with 500·1 overs, 63 wickets, average 16·50; Wright comes next with 530 overs, 51 wickets, average 19·44; Martin's 773.2 overs gained 70 wickets at an average of 21·8. For Somersetshire, L. C. H. Palairet heads the batting list with 25 innings, 1204 runs. average 50·4; W. N. Roe comes second with 10 innings, 383 runs, average 48·4, and S. M. J. Woods third with 28 innings, 953 runs, average 36·17. G. Fowler heads the bowling list with 38·1 overs, taking 7 wickets, average 15·3; S. M. J. Woods being second with 354·1 overs, 34 wickets, average 26·16. For Gloucestershire, as usual, W. G. Grace, the champion, heads the list, 32 innings, 1,565 runs, average 53·28; S. A. P. Kitcat coming second with 5 innings, 111 runs, average 37. W. S. A. Brown heads the bowling averages with 66·3 overs, 8 wickets, average 20·7. G. L. Jessop is second with 348·4 overs, 38 wickets, average 21·13. For Warwickshire, W. G. Quaife heads the batting averages with 31 innings, 860 runs, average 34·10; Diver being second with 29 innings, 898 runs, average 32·2. In the bowling Lilley comes first with 69·3 overs, 11 wickets, average 18·5, and Cresswell is second with 207 overs, 17 wickets, average 22·11. Pallett and Santall, however, did most of the bowling. For Leicester, Pougher with 27 innings, 847 runs, average 32·15, heads the batting list, Knight being second with 28 innings, 620 runs, average 25·1. In the bowling G. W. Hillyard tops the poll with 173·1 overs, wickets 17, average 21·6, Woodcock and Pougher doing most of the work. For Sussex the three top batsmen were K. S. Ranjitsinhji, 33 innings, runs 1698, average 58·16. W. Newham, 33 innings, 1070 runs, average 36·26. and C. B. Fry, 11 innings, 361 runs, average 32·9. In the bowling, Tate with 928·3 overs, took 73 wickets, average 26·40. During the 126 County matches no less than 116 individual innings of 100 and upwards were scored, 13 being over 200, and the highest, W. G. Grace, 301. Ranjitsinhji heads the list with 7 innings, Storer coming next with 5, whilst J. T. Brown, A. E. Stoddart, Abel, Hayward, L. C. H. Palairet, and W. G. Grace each obtained 100 on four occasions. Taking the bowling and batting averages in first-class cricket for the whole season, a few features must first be noticed. In Yorkshire's record of 887 for first-class cricket comes another record of four batsmen, Peel, F. S. Jackson, Lord Hawke, and Wainwright all scoring over 100 runs in one innings. Gloucestershire's total of 17 against the Australians, and the Australians 18 against the M.C.C. were also lowest records in Australian

eleven matches in this country. K. S. Ranjitsinhji was unquestionably the batsman of the year, his aggregate of 2,780 runs being the highest ever obtained in one season, beating W. G. Grace's 2,739 made in 1871. Ranjitsinhji made no fewer than 10 innings of 100 and upwards. Others equalled the record of Grace. Altogether 32 batsmen had aggregates of over 1,000 runs, and W. G. Grace in his 43th year seems to be almost equal to his very best form with his 301 record for the season, and being also the only batsman to twice beat 200 runs. Both Peel and Hirst scored over 1,000 runs, and took 100 wickets. Hayward the Surreyite has, perhaps, the claim to be considered the best all-round cricketer of the year, as he scored 1,595 runs with an average of 34, and took 91 wickets for less than 17 runs each. The eight best batting averages were: K. S. Ranjitsinhji, innings 55, times not out 7, total runs 2,780, average 57·44; Captain E. G. Wynyard, innings 23, times not out 2, runs 1,038, average 49·9; Gunn, innings 38, times not out 7, runs 1,383, average 44·19; W. N. Roe, innings 12, times not out 2, runs 434, average 43·4; W. G. Grace, innings 54, times not out 4, runs 2,135, average 42·35; Abel, innings 55, times not out 3, runs 2,218, average 42·34; F. S. Jackson, innings 42, times not out 3, runs 1,648, average 42·10; Storer, innings 35, times not out 5, runs 1,313, average 42·11. The best bowling averages are:—F. J Spofforth, overs 127·2, wickets 28, average 9·4; J. T. Hearne, overs 2003·1, wickets 257, average 14·72; Haigh, overs 586·4, wickets 84, average 15·29; Attewell, overs 1388·3, wickets 135, average, 15·103; F. G. Bull, overs 503·2, wickets 85, average 16; Lohmann, overs 766·4, wickets 93, average 16·24; Richardson, overs 1655·2, wickets 245, average 16·79; F. H. E. Cunliffe, overs 471·4, wickets 60, average 16·24; Hayward, overs 645, wickets 91, average 16·85; Peel, overs 1275·1, wickets 128, average 17·64. During the season no less than 151 individual scores of 100 and upwards were hit in first-class cricket; K. S. Ranjitsinhji accomplished th feat ten times; Storer and Hayward each five times; J. T. Brown, Stoddart, Abel, L. C. H. Palairet, W. G. Grace, Captain Wynyard, and F. A. Iredale four times; F. S. Jackson, Peel, F. S. Sugg, Brockwell, J. R. Mason, Gunn, G. H. S. Trott, S. E. Gregory, and J. Darling each three times, whilst sixteen other batsmen reached three figures on two occasions. The scores above 200 were:—301 W. G. Grace, 292 L. C. H. Palairet, 274 Davidson, 268 Captain Wynyard, 243 (not out) W. G. Grace, 231 Abel, 229 (not out) Hayward, 226 A. C. M'Laren, 220 F. H. Sugg, 210 (not out) Peel, 207 (not out) Gunn, 203 J. T. Brown, 201 (not out) W. Newnham; 171 (not out) was Ranjitsinjhi's highest score. The Oxford and Cambridge match at Lord's looked all over a win for the Light Blues after scoring 319 and 212, leaving Oxford to go in against 330 on a wet wicket; but the Oxonians, with a grand innings of 132 by G. O. Smith, pulled the match out of the fire by 4 wickets.

CYCLING.

The so-called pastime of cycling entered in 1896 upon an entirely new era. Cycling "caught on" with a vengeance; everybody seemed to possess, or to be anxious to possess, a bicyle, and many vast fortunes were made by lucky speculators in the cycling company boom, which early in the year seemed the most profitable investment of the day. So great was the demand for machines, that the various manufacturers were totally unable to execute their orders, and a bicycle became an indispensable adjunct of everybody's luggage when travelling, from the Royal family downwards.

From a racing point of view the season was certainly the most important yet known in this country; and with two new cement tracks in full swing, the Crystal Palace and Wood Green, and all the best racers of the previous year, professionals in the pay and employ of the big tyre and cycle companies, nearly every path record was altered under the new conditions of perfect pacing, whereby the muticycle machine kept every breath of wind from the record-breaker, and our best men were found to be quite equal to the crack riders of France and America, who hitherto had had all these advantages to themselves.

The National Cyclist Union with their new President, the Rt. Hon. A. J. Balfour, M.P., struggled hard to keep trade influences away from their amateur riders, but gradually every single cyclist good enough to enter the professional ranks left the amateur fold and managed to make a good living under the new conditions of cycling.

As the amateur has now ceased to be able to compete against his professional brother under anything like equality as regards machines and pacing, the following history of the records of the year simply deals with professionals, except in the one or two long-distance races not attempted by professionals, where the amateur has still been able to hold his own. That curious specimen the unlicensed amateur has disappeared from the path except in Scotland, and as the year closes he also is doomed in the future north of the Tweed. With cycling manufacture rapidly developing into one of the chief industries of the country there is practically no limit to the expansion of the trade and the perfection of the machine, so probably in 1897 all the marvellous records of 1896 may be still further reduced.

In the early months of the year at the Westminster Aquarium, Olympia and the Agricultural Hall, women's races proved an immense attraction, Frenchwomen being chiefly in evidence. Afterwards, good money prizes at these resorts attracted a good many so-called amateurs to the professional ranks, and as the N.C.U. gradually withheld licences to a large number of doubtful amateurs, these indoor professional races were well supported and proved a moneymaking speculation to their promoters and exponents. The craze for women cycling races slowly died out, but at Olympia professional contests continued to draw big gates until the track was closed and outdoor racing began. The London racing season proper commenced as usual with the spring meeting of the Surrey B.C. at the Oval, April 18, a professional scratch race being included in the programme, proving the extent to which the professional ranks had been augmented since the previous season. The results were as follows:—One Mile Handicap, C. R. Owen, P.C.C., time 2 min. 23½ secs. Half Mile Sydney Cup, R.A. Marples, Anerley B.C., 1 min. 15½ secs. Ten Miles Surrey Cup, H. Reynolds, Irish C.A., 29 mins. 5⅘ secs. Five Miles Professionals, F. Osborne, 14 mins. 4 secs., a then "pro" record. The Catford Cycling Club Sports at Catford, May 2, attracted a big crowd, and the chief results were as follows: Quarter Mile Amateur Scratch race, A. S. Ingram, P.C.C., 33⅘ secs. One Mile Professional

Digitized by Google

Handicap, T. Gibbons Brooks (15), 2 mins. 10¼ secs. Ten Miles International Scratch race, C. F. Barden, of Putney, 24 mins. 42¼ secs. C. F. Barden beat Carl Smitz of Holland in a Mile Match in 2 mins. 32¼ secs., and H. Hutchins, runner, beat T. Osborne, cyclist, in a Hundred Yards match, the latter starting without a push off, in 10¼ secs. At the Wood Green track, May 9, the North London C.C. held a big meeting. C. F. Barden, from scratch, won the Ten Miles Professional Handicap in 12 mins. 35¼ secs., and T. R. Goodwin and S. J. Prevost, of the North Road and Stanley C.C., beat the Tandem Safety record for Ten Miles with 21 mins. 41¼ secs. At the London County Cycling Club Sports at Herne Hill on the same day, P. W. Brown, P.C.C., won the Invitation One Mile Scratch race in 3 mins. 12 secs. and a Ten Miles Scratch race was won by H. W. Payne, West Road C.C., in 21 mins. 48¼ secs. In the following week A. A. Chase began his record-breaking for the year. At Wood Green he made a world's record of 50 miles in 1 h. 45 mins. 38¼ secs., beating all the then safety records, from the 11th mile, and covering 29 miles 300 yards in the hour. G. E. Lascelles and H. Woodruff of Manchester about the same time made a 50 miles road record of 2 h. 20 mins. 53 secs. On May 17 the Polytechnic meeting at Catford was more or less a failure, the four professional races not proving very interesting, T. Gibbons Brooks, in a "pro" one mile race taking 4 mins. 17 secs., Bacon's running one mile time. The meeting clashed with a big "pro" meeting at Wood Green on the same day. C. F. Barden, scratch, won the Half Mile Handicap in 1 min. 6¼ secs., and the One Mile Handicap from scratch in 2 mins. 12¼ secs.; J. Platt Betts took the Ten Miles Scratch race in 20 mins. 42 secs.; J. Michael tried for the one hour record, but failed, his distance being only 28 miles 1634 yards, the pacing arrangements not being too good. During this week at the Velodrome de la Seine, Paris, T. Linton made a world's record for 1 hour by doing 30 miles 214 yds., being the first time 30 miles had ever been covered within 60 mins. He also lowered all records from 7 kilometres upwards.

On Saturday, May 23, the Bordeaux to Paris race, a distance of 600 kilometres, was commenced, Arthur Linton winning, but on an objection by Riviere, disqualified. During the week ending May 30 several records were made by J. Michael at Olympia, amongst others 3 miles 5 mins. 55¼ secs., 4 miles 7 mins. 54¼ secs., 5 miles 9 mins. 55¼ secs., 6 miles 11 mins. 55¼ secs., and 17 miles in 14 mins. 2¼ secs. On May 30 the first batch of the N.C.U. Championships were decided at Wood Green. All the races were unpaced and the times very slow as compared to the records of the period. The Twenty-five Miles Amateur, with a standard of 1 h. 5 mins., was won by M. Diakoff of the Catford C.C., a Russian, in 1 h. 5 mins. 15 secs., after a big smash had taken place two laps from home. The One Mile Amateur Championship fell to P. W. Brown of the Polytechnic in 3 mins. 23 secs. The fastest heat was 2 mins. 18 secs., and the slowest 4 mins. 7 secs. For the first time the N.C.U., carrying out their policy of ruling professionalism, arranged a five-miles "pro" championship, won by J. Green of Northumberland, with T. Gibbons Brooks second, in 15 mins. 19 secs. The attendance of spectators was very small. Diakoff is a sturdy young Russian, who holds the title of champion of Northern Russia. Early in the following week J. W. Stocks beat all British records from 2 to 10 miles at Catford, J. Platt Betts' 1 mile record of 1 min. 52¼ secs. not being lowered. Stocks' times were: 2 miles, 3 min. 51¼ secs.; 3 miles, 5 mins. 44¼ secs.; 4 miles, 7 mins. 43¼ secs.; 5 miles, 9 mins. 39¼ secs.; 6 miles, 11 mins. 36¼ secs.; 7 miles, 13 min. 31¼ secs.; 8 miles, 15 mins. 33¼ secs.; 9 miles, 17 mins. 33¼ secs.; 10 miles, 19 mins. 30¼ secs.; the full distance being only ¼ sec. outside T. Linton's world's record, made at Paris, May 19. On June 6, at Catford, the series of Simpson's lever chain versus McCabe's chain came off. The test really proved very little, as the Simpson team, owing to having the best pacers, won two out of three events. C. F. Barden (McCabe's) beat J. Michael (Simpson's) in the five miles in 10 mins. 40¼ secs. T. Linton (Simpson's) beat J. W. Stocks (McCake's) in the one hour test in 29 miles 643 yds. In the fifty miles, C. Huret (Simpson's) beat A. A. Chase (McCabe's). Huret made world's record from 32 miles, viz., the full distance 1 h. 42 mins. 42¼ secs., which stood as a record, until the brothers Chase beat it on Nov. 13. Also with Simpson's chain, J. S. Johnston rode a flying mile in 1 min. 50¼ secs., as against his own best of 1 min. 46¼ secs. at Bordeaux, May 31. A. V. Linton also rode Two Miles in 4 mins. 2¼ secs. On June 12th, J. W. Stocks rode a mile in 1 min. 50¼ secs., British record, and a quadruplet team covered a flying quarter in 25¼ secs. On June 13th, at the Hospital Fund Sports, very badly supported by the public, Diakoff, the Russian Champion and N.C.U. 25 Miles Champion, won both the scratch races, the Half Mile in 1 min. 15 secs. and the Five Miles in 12 mins. 3¼ secs. The weekly breaking of records now began with a vengeance, A. A. Chase, at Catford, rode 30 miles 30 yards in the hour, his two miles in 3 mins. 42¼ secs., and three miles in 5 mins. 37¼ secs., being then world's records. A quad team did a flying quarter in 24¼ secs. and a triplet ditto in 25¼ secs. Platt-Betts, on a single safety, did the same time as the triplet. F. W. Chase, then an amateur, beat the amateur ten-mile record with 20 mins. 44¼ secs., at Wood Green. J. Platt-Betts also, at Catford, made the following flying records: half mile, 51¼ secs.; three-quarters, 1 min. 17 secs.; and one mile. 1 min. 45 secs. The second instalment of the N.C.U. Championships came off at Newport (Mon.), on June 20th, in a high wind which spoilt the times. A. Macpherson, of Blackpool, won the Quarter Mile Amateur Championship in 33¼ secs., the standard being 33 secs.; the Five Miles Amateur Championship fell to the Russian, M. Diakoff, in 14 mins. 56¼ secs.; C. F. Barden won the One Mile Professional Championship in 2 mins. 30¼ secs.; and J. Green, of Northumberland, won the Professional Quarter Mile in 33¼ secs., C. F. Barden losing the start. Towards the end of the season the Amateur Fifty Miles Championship was decided in London and won by W. H. Bardsley in 1 h. 57 mins. 28¼ secs. This completed the new list of the N.C.U. Championships, and they will probably be altered during the present year, as they cannot be said to have proved quite a success. A professional cash carnival was held on the same day as the Championships, but there was too much wind for records and the pacing was not too good. A. C. Edwards (Polytechnic) beat A. C. Pope (Catford) in a five miles match in 10 mins. 12¼ secs. and J. W. Stocks failed to beat the ten miles world record. In a twenty miles match A. A. Chase beat A. C. Walters easily in 41 mins. 3 secs. A multicycle scratch

race was rather a failure, a quad beating triplets and tandems. The Annual Oxford and Cambridge Bicycle Matches took place, on June 26th, at Wood Green. Cambridge won the One Mile by 12 points to 9, L. F. Kenny (Corpus) being first man home; A. C. Nesbitt (Christchurch) won the Four Miles, but Cambridge won this event also by 12 points to 9; and the Light Blues also took the Ten Miles, F. A. K. Stuart (Caius) being first, by 13 points to 8. On June 18th J. Platt-Betts rode a flying mile, at Catford, in 1 min. 45 secs., a British record. About this time a series of very interesting matches between J. S. Johnston and J. Michael had to be declared off as Michael was suspended by the National Cyclists' Union, the latter then crossing to France. The Century Cup (amateurs) of the London County Club, at Herne Hill, on June 27th, resulted in several world's records being made, R. Palmer, of the Silverdale C.C., beating all records from 75 miles, and covering the full distance in 3 h. 47 mins. 47⅘ secs.—time which he himself lowered on August 8th. At Wood Green, on July 4th, the Essex Cycling Union Meeting was spoilt by the high wind, but A. J. Watson and J. Platt-Betts made a tandem record for five miles of 10 mins. 16⅕ secs. All the other attempts on records failed. In the following week some most noticeable records were established. T. Linton, at Catford, July 7th, rode 31 miles 5 yards in the hour, a world's record. On the following day, A. E. Walters beat world's records from 51 miles (1 h. 50 min. 39⅘ secs.) to 73 miles by 2 h. 46 mins. 29⅘ secs. On the following day, however, in the Catford Gold Vase contest, J. W. Stocks knocked these out from 51 miles (1 h. 45 mins. 33⅗ secs.) to 57 miles (1 h. 58 min. 53⅕ secs.), and on the succeeding day did records from 70 miles to 102, all subsequently beaten. On July 9th J. Platt-Betts beat the flying mile record with 1 min 44⅕ secs., and on July 10th J. S. Johnson put up four new records: flying quarter, 24⅕ secs.; and flying half, 49⅕ secs.; standing quarter, 29⅕ secs.; and standing half, 54⅕ secs. J. W. Stocks won the Catford Gold Vase with a total mileage for the twelve hours during the three days of 302 miles 176 yards. In the next week C. G. Wridgway made a new Brighton and back record of 5 h. 22 mins. 33 secs., and on July 18 J. S. Johnson put on a fresh flying mile record of 1 min. 42⅘ secs. at Catford, and on the same day, at Wood Green, C. F. Barden and E. E. Parlly made a world's record for a tandem of 9 mins. 25 secs., and a pacing quad did a flying quarter in 24⅕ secs. Several amateur and multicycle records were also beaten, at Catford, during the week, J. S. Johnson establishing a new one kilometre record of 1 min. 1⅕ secs. On July 25th two 24 hours races were held, the Cuca Cup (amateurs), at Herne Hill, won by F. R. Goodwin, of the Middlesex County, with a new record amateur score of 476 miles 1702 yards. The other race at Wood Green was confined to professionals, and won by C. Huret of France, who, after making a record of 288 miles 240 yards in 12 hours, took matters very easily and won with the indifferent total of 460 miles. The clashing of these two races was greatly to be regretted and should not occur again. About this time the death of A. V. Linton was announced, he never having quite recovered his severe exertions in the Bordeaux to Paris race. On August 1st, at Catford, the Rudham quartette rode a flying quarter in 23 secs.; J. Platt-Betts doing 23⅕ for the same distance and a half-mile in 1 49⅗ secs. On the August Bank Holiday, at Catford, J. W. Stocks rode 50 kilometres in 1 h. 0 min. 20⅕ secs., a world's record, and on the same day J. Platt-Betts made a world's record standing mile, that still holds, of 1 min. 48 secs.; also a three-quarter mile record of 1 min. 21⅕ secs. On August 8th, at Catford, another world's record, that still stands, was placed to the credit of R. Palmer of the Silverdale C.C., who, in the Bath Road 100 Miles Challenge Cup, beat all records for the distance by doing the distance in 3 h. 37 mins. 57 ⅘ secs., the day being none too favourable. On August 15th, at the World's Championship at Copenhagen, the One Mile Championship (amateur) was won by Reynolds (Ireland) after ten heats. On the same day, at Putney, the Club's 12-hour race ended in a victory for R. J. Atkinson, of the Surrey B.C., with 255 miles 827 yards (a cement track), and at Wood Green several tricycle records were made: A. F. Ilsley riding a mile in 2 mins. 16 secs. (record) and R. P. Clark beating records from 2 miles (4 mins. 51⅕ secs.) to 10 miles (24 mins. 14⅘ secs.). The remainder of the Copenhagen World's Championships were not very successful, Bourillon, of France, won the One Mile Professional Championship, beating Barden (England). The 100 Kilometres World's Professional Championship was won by A. A. Chase (England) in 2 h. 14 mins. 1⅕ secs. A mile match between the amateur and professional champions was won by Bourillon, the pro. In the other races the foreigners all scored. In a six hours race, at Wood Green, on August 22nd, A. F. Ilsley made an amateur best of 151 miles 70 yards. A report from America of E. E. Anderson riding one mile behind a train at St. Louis, in 1 min. 3 secs. is very doubtful. During the week ending August 29th T. A Edge, between the Land's End and Tain, in Scotland, finishing at Forfar, completed 1,000 miles ride in 4 days. 9 h. 19 mins., beating previous record by 14 hours. On Sept. 12th, at the Surrey B.C. Oval Autumn Meeting, H. S. Large, of the Anglo-Irish C.C., won the Half-Mile Sydney Challenge Cup in 1 min. 18⅕ secs and the Ten Miles Scratch., Surrey Cup in 31 mins. 20⅕ secs. On the same day, at Kensal Rise, in a 12 hours path race. G. Padbury (Pegasus C.C.) made a new amateur record of 264 miles 1,535 yards. The Anchor Shield (amateur 12 hours) contest, at Herne Hill on Sept. 19th, was not very successful, M. Balisa (Surrey B.C.) winning with a score of 262 miles 962 yards. During the same week H. Green and W. Nelson (tandem) beat Wridgeway's Brighton and back record by doing the distance, starting and finishing at Crawley, in 5 h. 20 mins. 35 secs. The meetings were now practically all over for the season, and only a series of successful and wonderful attacks on various records remain to be recorded, advantage being taken of every still and calm afternoon. On Sept. 30th, at the Crystal Palace track, S. MacGregor and G. A. Nelson, on a tandem safety, not only beat the one hour tandem record, but set up world's figures for all types of machines by covering in the time 31 miles 610 yards and beating all records from 24 miles (45 mins. 44⅕ secs.). On Oct. 21st, T. Linton, also at the Crystal Palace, made a single safety world record for the hour with 31 miles 583 yards, and beating a previous best of J. W. Stocks of 31 miles 548 yards on the same track on Oct. 10th. On Nov. 12th, A. A. and F. W. Chase, at Catford, made the following records on a tandem:—one mile, 1 min. 48⅕ secs. (made previously); two miles, 3 mins. 39⅕ secs.; three miles, 5 mins. 28⅕ secs.; four miles, 7 mins

Digitized by

21⅘ secs.; five miles, 9 mins. 13⅗ secs., the three last named being world's records for any type of machine; and on the following day the same brothers made world's records for any type of machine from 32 to 50 miles, their full time being 1 h. 38 mins. 14⅘ secs. A powerful team of English cyclists left our shores on Nov. 21st for New York and Melbourne, intending to give numerous exhibitions of record-breaking across the American continent and in Australia. The offices of the National Cyclists' Union are 57 Basinghall Street, London, E.C.

FOOTBALL.

Once again we have to record a still further increase in the public interest and enthusiasm concerning our national winter game—football, under both codes, the Rugby and the Association. Gates have increased, clubs have multiplied, and more and more space is devoted in the daily papers to the pastime, until it is an open question whether football or cricket is the more popular in public estimation. Whether this extraordinary development of the pursuit is altogether advantageous is open to question. Football as an outdoor amusement and a healthy exercise for the youth of the Empire deserves every support and encouragement it can possibly obtain, but its present condition scarcely places the game in the above category. Football now is a big commercial speculation, it is not a recreation. Football clubs are run on money-making lines, and certainly on the Association side very few of the exponents, even amongst the amateurs, regard football as anything more than a means to obtain holidays at no expense to themselves, and indeed, indirectly, perhaps, in some instances as a saving of money in cost of living and travelling. Of course the big professional Association clubs and limited liability companies make no secret of their ends, aims, and objects. They run a troupe of paid players collected together from all parts of the kingdom who, under the name of some town with which they (the players) have not the slightest connection, give exhibitions of the game against other similar organisations with the one object of collecting as much gate-money as possible to pay the teams and provide a dividend for the capitalists who have invested their money in this new species of speculation. This may be business but it is not sport; and how any local interest can be aroused in a so-called local team of hireling strangers is one of those mysteries not easily solved. Football is a game which must be undertaken in a thoroughly sportsmanlike manner or a thousand rules and regulations will not prevent any number of disagreeable incidents and innumerable cases of foul play, and with weekly wages and the absolute necessity of winning to ensure their wages brought into the question, how is it possible to play the game as it should be played, even with the smartest of referees in command and the most stringent rules in force. The tremendous interests at stake have naturally brought betting on the results into unpleasant prominence, and no one who knows the inner workings of present day Association football can honestly say that its present condition is healthful or encouraging. Notwithstanding the improved play which has undoubtedly followed the introduction of professionalism, we can unhesitatingly declare that this new departure will eventually ruin the game as a healthy pastime and amusement, and the genuine amateur will have to seek out some other means of exercise and recreation in the winter; indeed, he is already doing so, hence the increasing support given to lacrosse and hockey which, so far, have escaped the taint and contamination of the paid exponent. Although the Rugby Union fight hard to prevent the introduction of professionalism into their section of the game, the Northern Rugby Union, in Yorkshire and Lancashire, have begun payment for "broken time," which is merely another name for the pernicious system of paying their players salaries and wages. Gradually the best of the Yorkshire and Lancashire players are being tempted into the ranks of the pros., and constant efforts are being made in Wales to induce the best of their Rugby exponents to sell themselves bodily into the slavery of the Northern Union. It cannot be very long before Wales declares itself for the new creed, and then the position of the English Rugby Union will be anything but happy, unless Ireland and Scotland remain firm and true to the sportsmanlike spirit of the game, which is wholly opposed to anything like payment for an amateur amusement and recreation. Few people have any idea of the amount of money sunk in a first-class League club of the present day. There are about 1,000 first-class men registered in the League First Division. The average wages are about £4 per man per week, or £4,000 in wages every week to be found. This means that all sixteen clubs must take £500 each week in gate-money. Besides these wages there are managers' salaries, travelling, outfit, trainer, advertising, &c. Both Aston Villa and Burnley has 62 registered players, and so, if both play two teams each week, each club has 40 men doing nothing. Sheffield Wednesday has 60 signed players, and Sunderland, with the smallest list, own 31 men. In the Second Division there are 620 registered players, of which number Notts County claim 70, the highest of any club in the country; Darwen has 22, the actual minimum with which a club can run two teams. On these figures no wonder the majority of the professional clubs have the utmost difficulty to keep their heads above water. The Association game of 1895-96 shall first be noticed. In the international contests England always placed a fairly representative team in the field. At Belfast, Ireland were again beaten by 2 to 0, and at Cardiff, Wales lost by 9 goals to 1. This looked as if England was again going to prove invincible, as she did in the season of 1894-95, but before the great match of the season *v.* Scotland, the latter executive determined upon a thorough change of policy. Previously the Scottish Association, who had for years most persistently opposed legalisation of professionalism, had systematically declined to employ the services of any of the numerous Scotch players hired out by English clubs. Last season, however, Scotland called all her sons and renegades to her aid, no less than five players employed by English clubs finding places in the Scottish eleven, which, by the way, only included one amateur. On the English side Bloomer, of Derby County, one of the then most dangerous forwards in the country, and Needham, one of the very best halfbacks, were unable to play. Anyhow, the team did not combine so well as was expected, but in the match itself there was not very much to choose between the two sides. In the first half of the game the Scotchmen showed an almost invulnerable front, but towards the end they were very hard pressed indeed. It may also be mentioned that great dissatisfaction was expressed all round

at the referee's decision disallowing a goal which would have brought England on level terms. The match was played at Celtic Park, Glasgow, and the attendance of 56,000 spectators beats anything ever seen in this country for any athletic sport of any description. Scotland won by 2 goals to 1 and the teams were:—England—G. B. Raikes (O.U.F.C.) L. V. Lodge (C.U.F.C.), W. J. Oakley (O.U.F.C.), A. G. Henfrey (Corinthians), T. Crawshaw (Sheffield Wednesday), J. Crabtree (Aston Villa), W. J. Bassett (West Bromwich Albion), J. Goodall (Derby County), G. O. Smith (Old Carthusians), H. Woods (Wolverhampton Wanderers), C. J. Burnup (C.U.F.C). The Scotch team were:—J. E. Doig (Sunderland), J. Drummond (Rangers), T. Brandon (Blackburn Rovers), J. Cowan (Aston Villa), N. Gibson (Rangers), E. Hogg (Heart of Midlothian), W. Lambie (Queen's Park), A. King (Heart of Midlothian), T. Hyslop (Stoke), J. Bell (Everton). J. Blessington (Celtic). In the other International matches, Scotland beat Wales 4 to 0, and Scotland drew with Ireland 3 goals each. Wales gained one victory, beating Ireland by 6 goals to 1. In the International League, England v. Scotland, the English eleven won very easily by 5 goals to 1, but the match was not half such a fine exhibition of skill, nor did it evoke half the interest as the generally recognised fixture of the older and premier body. Next in importance to the International matches, the Football Association Challenge must undoubtedly be given pride of place. The old Cup had been lost by Aston Villa during that club's tenure of the historic emblem of Club supremacy, and the match for the possession of the new one took place at the Crystal Palace new ground between Sheffield Wednesday and Wolverhampton Wanderers. The attendance was enormous; curiously enough neither of these teams were in the first seven of the League Clubs, and it was not a case of the survival of the fittest. The play, however, in the final tie was quite up to the high standard of "the Cup," and Sheffield Wednesday won by 2 goals to 1. The amateur Cup fell to Bishop Auckland, beating in the final the R.A., Portsmouth, by 1 goal to 0. The other chief Cup ties of the season resulted as follows:—Scottish Cup, Heart of Midlothian beat Hibernians in the final; the 1st Royal Scots beat 2nd Royal West Kent Regiment for the Army Cup; the Old Carthusians carried off the London Charity Cup, and they also won the London Senior Cup, beating the Casuals in the final match; Lewisham St. Mary's won the London Junior Cup; St. Bartholomew's Hospital won the Inter-Hospital Cup; Trinity New won the Cambridge Inter-Collegiate Cup, and Magdalene College won the Oxford Inter-Collegiate Cup. The county, city, district, school, &c., challenge cups are now so numerous that it would be impossible to give them all. The annual match between the Military Schools of Woolwich and Sandhurst ended in a draw—one goal each. Oxford beat Cambridge on Feb. 22 at the Queen's Club, by 1 goal to nil, and the Professionals *v.* Amateurs, at Leyton, March 25, ended in a draw—two goals each. The Corinthians hardly had such a successful season as usual, their Christmas and New Year's tour resulting in only three wins out of the ten matches played. The Football League, the great rival of and the eventual successor to the Football Association, flourished exceedingly during the season. For a long time it seemed as if Derby County would finish top of the First Division Clubs, but towards the end of the season they were very unlucky in the matter of injuries to their players, and Aston Villa regained the Championship, Sunderland going down to fifth place. The points of the leading clubs were:—Aston Villa, 45; Derby County, 41; Everton, 39; Bolton Wanderers, 37; Sunderland, 37; Stoke, 30; Blackburn Rovers, 29; Sheffield Wednesday, 29; Preston North End, 28; Burnley, 27; Bury, 27; Sheffield United, 26; Notts Forest, 25; Wolverhampton Wanderers, 21; Small Heath, 20; West Bromwich Albion, 19. Each club played 30 matches. In the Second Division, Liverpool finished head of the sixteen clubs with 46 points, Manchester City well second with the same points, but the goal average (106 goals) gave Liverpool an easy first; Grimsby Town were third, and Burton Wanderers fourth. Kettering were head of the Midland League and Nelson of the Lancashire League. Preston North End Reserves headed the Lancashire Combination and Everton were at the top of "the Combination." The Celtic headed the Scottish League First Division, with the Rangers Second. In the Southern League Millwall Athletic were top of the First Division, and Wolverton L. & N. W. Railway furnished the head of the Second Division. The Football Association Offices are 61, Chancery Lane, W. C., with F. J. Wall as Secretary. The Football League Secretary is H. Lockett, 8 Parker's Terrace, Etruria, Stoke-on-Trent. During the close season both the League and the Association legislators set to work to try and improve their laws and regulations. The Association decided that a referee must settle the question as to whether a goal keeper has lowered the cross bar by swinging on it sufficiently to prevent the ball from going under the bar. The Association also decided that a player may throw in a ball with any part of both his feet on the ground. The League in June at Birmingham very wisely settled that notwithstanding the expense, neutral linesmen shall officiate in all games, and the list of qualified referees now numbers 76. In the League Division No. 1, the Liverpool club takes the place of Small Heath, and as a result of engaging the late secretary of the Sunderland club at £300 per year and the purchase of a large number of Scotchmen, Liverpool has very nearly headed the League clubs as the year closes. In the Second Division of the League Blackpool and Gainsboro have taken the places of Rotherham and Crewe Alexandra (the heroes of the two foot rule), but the three new comers have not done very well so far. The Southern League, the United Counties (or Midland) League, the Lancashire League, the Football Combination, and any number of junior bodies are all shuffling along and buying up players from other clubs where they can. The entries for the English Association Cup number 174. The competition proper begins January 30, and the final will be played April 10. The Amateur Cup does not seem to be in a particularly happy condition. The English Association International matches will be played *v.* Ireland, Feb. 20, *v.* Wales, March 23, *v.* Scotland, April 3. The League International *v.* Scotland takes place April 10.

Under the Rugby code the International matches of course first claim attention. For once, frost and the weather were propitious, and with scarcely a break from October to April, the carrying game went on without any of those most unpleasant interruptions of hard, frost-bound

ground to upset all the fixtures, and quite spoil the continuity of matches. The first International against Wales, January 4th, seemed to demonstrate that the English fifteen would be almost invincible. England won by 2 goals and 5 tries (25 points) to nil, and the Calcutta Cup looked a certainty for the wearers of the Rose. The English forwards carried all before them, and when a little later, January 25, Wales beat Scotland by 2 tries (6 points) to nil, the apparent certainty became, if possible, more so. Then came that *dies iræ*, February 1, at Leeds, when the Irish team met England. The Irishmen were faster, stronger, and simply ran over the English forwards. They smothered the English half-backs, and scoring all along the line won the match by 2 goals (10 points) to 1 goal (4 points). It is difficult to account for this defeat, the English side was practically the same that defeated Wales, and yet they were beaten at all points of the game. The Irish team were almost the identical lot that in the previous year had occupied the last place, but their dash and pace at Leeds undoubtedly won them the match, and that the better side won there can be no manner of doubt. On February 15, in Dublin, Ireland drew with Scotland a pointless match; and then, on March 14, also in Dublin, Ireland beat Wales by 1 goal and a try to 1 goal (8 points to 4). So far Scotland had not proved themselves a very dangerous combination, and when the England *v.* Scotland game came off at Hampden Park, Glasgow, on March 14, England's chance of victory did not seem so very remote. Naturally the game attracted extraordinary interest, but again the English team were outplayed everywhere. Their forwards could make no sort of stand against the Scotchmen, and the English halves and three-quarters were run out before they had a chance of getting away. Finally England were beaten by a goal and two tries to nothing, and the symbol of the International Championship for the second time within three years went to the representatives of Erin. The teams in the England v. Scotland match were as follow:—England, R. Poole (Hartlepool), back; E. F. Fookes (Sowerby Bridge), E. M. Baker (Oxford U.), J. Valentine (Swinton), S. Murfitt (Hull), three-quarter backs; C. M. Wells (Harlequins) and R. H. Cattell (Blackheath), half-backs; F. Mitchell (Cambridge U.), E. Knowles (Millom), T. Broadley (West Riding), J. W. Ward, J. Rhodes, H. Speed (Castleford), H. E. Barrow (Bingley), and G. E. Hughes Barrow, forwards. Scotland, G. McGregor (London Scottish), back; G. T. Campbell, W. T. S. Gedge (London Scottish), C. J. N. Fleming (Edinburgh Wanderers), and J. J. Guvans (London Scottish), three-quarter backs; W. P. Donaldson (West of Scotland) and M. Elliott (Hawick), half-backs; G. M. Neilson, G. O. Turnbull (West of Scotland), W. McEwen (Edinburgh Academicals), J. H. Dodds (London Scottish), T. M. Scott (Hawick), M. Morrison (Royal High School), H. O. Smith and A. Balfour (Watsonians), forwards. The Irish team that drew with Scotland were: G. McAllen (back); W. Gardiner, S. Lee, H. Stevenson and L. Bulger (three-quarters); L. M. Magee and G. G. Allen (half-backs); J. H. O'Connor, C. V. Rooke, A. D. Clinch, T. Crean, H. Lindsay, J. R. Lyttle, W. G. Byron, and J. Sealey (forwards). The preponderance of Northerners in the English team was owing to the rather easy victory of the North when they met the South at Hartlepool, on December 14th, the North winning by a goal and two tries to a try. This proved that notwithstanding the baleful influence of the Northern Union, which had attracted some of the best Yorkshiremen to the professional ranks, the Yorkshire Rugby Union of Amateurs could still hold their own. The County Championship Competition was carried out in three groups instead of four as previously, but once again in the final Yorkshire managed to defeat Surrey with twelve points to spare. Devon County made great strides during the year, and came out top of the South Western County Group, but went down before Surrey in the semi-final round. For once in a way neither frost nor fog stopped the Oxford and Cambridge match, which came off at the Queen's Club on December 11th, and Cambridge won by one goal to nothing. As regards club supremacy for England and Wales, Newport once more fairly carried off the palm. They played the very best possible clubs in England and Wales, and yet were only defeated twice, Cardiff and Swansea being their victors, and then only by a point and a try respectively. They twice defeated Blackheath, to whom the honours of the Southern English Club Championship must be awarded. Blackheath won 21 out of their 26 matches and one was a draw. Richmond were well to the front once more under W. E. Bromet's captaincy. The London Scottish, rather weak in forwards, hardly did so well as usual; and next to them must be placed the Harlequins, Rosslyn Park, Croydon, and Wickham Park. In Wales Cardiff must rank next to Newport, with Swansea a very close third. Rugby football in Wales still maintains the high standard of proficiency which has distinguished it for so many seasons. The most noticeable matches of the year outside those mentioned above were Oxford and Cambridge *v.* London and the South, won by the Universities by four tries to nil; Richmond *v.* Oxford University, won by the former by a goal and a try to nothing. Both Richmond and Blackheath beat the London Scottish. The Royal Military Academy, Woolwich, beat the R. M. C., Sandhurst, by a try to nothing. Both Cardiff and Newport beat Oxford University. A Cambridge team easily beat the Stade Français in Paris by eight goals and two tries to nothing. The two great Scottish schools, Fettes and Loretto, played a draw. St. Thomas' Hospital beat St. George's Hospital by three tries to one goal in the final tie for the Inter-Hospital Cup. The one black spot on the future of the game is the secession of a number of clubs in Yorkshire, Lancashire and Cheshire, and the formation of the Northern Union. This new union is supposed to allow 6*s.* a day for broken time, but only when a player has to leave his work to play for his club. Now as it was an open secret that most of the players in the big northern clubs usually received a sovereign or more every Saturday from somebody connected with the club, the occasional six shillings would hardly be sufficient inducement to attract some of the very best Yorkshire and Lancashire players to the new union, and yet every day Internationals and others are going over to the enemy. The following are the leading clubs in the new organization:—Manningham, Halifax, Runcorn, Oldham, Hull, Leeds, Bradford, Huddersfield, Wigan, indeed, nearly all the large clubs in Lancashire and Yorkshire. About sixty clubs have already embraced this new species of professionalism, and when once they are in the majority in the North, as they soon will be, the Rugby Union will be placed in a most awkward predicament. Two curious

features were to be noticed last season, the advent of the Association game in Yorkshire, and a Rugby fifteen at Eton College. Mr. G. Rowland Hill, Conduit Vale, Greenwich, is Hon. Sec. of the Rugby Union.

SWIMMING.

It must be a highly satisfactory statement to all Englishmen, that the art of swimming is making most encouraging progress under the fostering care of the Amateur Swimming Association. Not only have races and swimming fetes and galas increased considerably in the last few years, but the National Life Saving Society have managed to establish classes and instruction centres all over the Kingdom and abroad, so that, in the near future, deaths by drowning should be very few and far between. The progress of the Life Saving Society has been most rapid and general, and it is seldom that any movement for the public good has made such gigantic strides in popular favour in so short a time. Swimmers are said to be an over-legislated-for body, and apparently no season can go by without some considerable row taking place amongst the various divisions and centres which go to make up the governing power of the sport. This year it was Yorkshire who clamoured for self-control and broke away from the central association. The A.S.A., however, seem to have met the opposition in a moderate and impartial manner, and possibly during 1897 the breach may be healed, and the threatened suspensions and excommunications become unnecessary. The Swimming Association has come safely through many even worse troubles than the Yorkshire dispute, and peace may yet be established once again. J. H. Tyers has been a head and shoulders above all his rivals, until a suspension for strong language stopped his victorious career towards the end of the season. Just previously to the England *v.* Scotland Water Polo match, J. H. Derbyshire, also a Manchester Osborne swimmer, was nearly always second to Tyers in the various championships; indeed, Derbyshire with Tyers out of the way would occupy exactly the same unique position that Tyers now holds. A new swimming centre for Devon and Cornwall was formed during the season, and Wales for the first time appeared with a water polo team which defeated Ireland.

The A.S.A. Championships opened well at Burslem on June 11, with the Hundred Yards, J. H. Tyers winning in a record time of 1 min. 1¾ secs., J. H. Derbyshire being second. The Half-Mile on June 27 came next in the West India Export Dock, Tyers again being first and Derbyshire second. July 4 saw the 220 yds. at Tunbridge Wells, Tyers winning in 2 mins. 50¾ secs., with A. A. Green of the Otter S. C. second. The One Mile at Walsall, on July 11, produced a new record from Tyers, the winner of 26 mins. 49¾ secs.; W. Gallaher was second. Once more came the old order of things, in the Southport Salt Water ¼ mile Championship, J. H. Tyers being first, and J. H. Derbyshire second, in 6 mins. 18¾ secs. on July 18. On August 15 the Long Distance Championship was held at Southport, over a course of between five and six miles. The sea was rough and Tyers refused to start. In his absence W. Green of Liverpool won in 2 h. 33 mins. 16 secs. Tyers and Derbyshire were again first and second in the Five Hundred Yards Championship at Walsall on Sept. 2, the winner's time being 6 mins. 55¾ secs. Directly after this event Tyers was suspended until the end of the year for too strong language at a Nottingham Gala by the Northern Counties A.S.A. Tyers was consequently unable to compete in the England *v.* Scotland Water Polo match at the Westminster Baths on Sept. 21. England, however, won by 4 goals to 2, and on the same evening Wales beat Ireland by 3 goals to nil. For the Club Water Polo Championship at Birmingham, Sept. 23, the holders, the Manchester Osborne, beat Leicester 3 to 0. The Championship list concluded on October 7 with the Plunging at the Lewisham Baths. W. Allason of the Otter S.C. won with a record plunge of 73 ft. 4 ins. in the 60 secs., and before he rose to the surface at the expiration of 98 secs. had credited himself with a world's record of 80 ft. 8½ in. The Schoolboy Team Swimming Championship of England Challenge Cup at Liverpool was won by the Liverpool Seamen's Orphanage beating the Lyndhurst Grove, Camberwell, team by a fifth of a second. The National Life Saving Championship at St. George's Baths on October 31 was won by the London and India Dock team beating Coventry by the narrow margin of half a point, viz. 96 points to 95½. The Otter S.C. won the Southern Counties A.S.A. Water Polo Championship. Lancashire beat Middlesex for the Water Polo County Championship at Liverpool by 4 goals to 1; and in the London Water Polo League Championships, Amateur and the Ranelagh Harrier tied for the Senior Cup, and Amateur II. team beat the People's Palace for the Junior Cup by 3 goals to 2. In the Annual Oxford and Cambridge Swimming races, distances 60, 120, and 420 yds., Oxford won two and tied for the third, Oxford also beating Cambridge at Water Polo by 3 goals to 1. The races took place at St. George's Baths, A. J. McCullock, G. W. Broadribb and J. E. Langdon, all Oxonians, being the winners at the three respective distances. The other chief events of the season are all more or less mixed up with Tyers. Early in May he made a Quarter Mile record (not A.S.A.) at the Broughton Baths, Manchester, of 5 mins. 43½ secs. He won the One Mile Championship of the Mersey, with J. H. Derbyshire second, and the 300 Yards Championship of the Manchester Osborne Club, finishing up his active season for the year in September by covering one hundred yards in the Mayfield Bath (25 yards long) in 59¾ secs. with Derbyshire second in 61½ secs. This is the first time the minute has ever been beaten. The principal winners at the annual Devon and Cornwall matches in August were S. W. Greasley, of Leicester, and W. H. Edwards of H.M.S. Ganges, who should turn out a wonder in the future, being at present quite a youngster. J. H. Derbyshire won the 400 Northern (Yorkshire A.S.A.) Freshwater Championship and also the Northern 150 yards Championship in 1 min. 45 secs. S. T. Pugh of the Surbiton S.C., with Tyers barred, won the Ulph Challenge Cup at Great Yarmouth on Sept. 14th, and A. A. Green of the Otter having won the 150 yards London Championship Challenge Cup outright at the Excelsior Baths in 1 min. 57 secs. presented the Cup to the promoting Club as a perpetual Challenge Trophy. W. L. Russell of Glasgow won the Scottish 100, 220, 440, and half mile championships. The address of the Southern Counties A.S.A. Hon. Sec. is Tamworth, East Finchley, N.

The following are the A.S.A. records up to Oct 31, 1896. They have all been made in A.S.A.

Digitized by Google

costume and in still water. For all distances up to and inclusive of 500 yards in baths of not less than 25 yards long; above 500 yards in open water over courses not less than 220 yards in length:—100 yards, 1 min. 1⅘ sec., June 11, 1896, at Burslem; 150 yards, 1 min. 42⅘ secs., August 24, 1894, at Westminster; 220 yards, 2 mins. 41 secs, June 26, 1895, at Farnworth; 300 yards, 3 mins. 56⅘ secs., Sept. 30, 1893, at Bethnal Green; 440 yards, 5 mins. 53⅘ secs., Sept. 15, 1894, at Swindon; 500 yards, 6 mins. 45 secs, August 20, 1894, at Sunderland. Half mile, 13 mins. 20 secs., July 13, 1895, at Bradford; 1000 yards, 15 mins. 2 secs., August 18, 1894, at Southport; 1 mile, 26 mins. 46⅘ secs., July 11, 1896, at Walsall. All these stand to the credit of J. H. Tyers, of the Manchester Osborne Club, two of them being made this year. Plunging (1 min. limit) 73 ft. 4 ins., W. Allason, Otter S. C., October 7, 1896, at Ladywell Baths. Allason, before he came to the surface, made a world's record of 80 ft. 8⅘ ins. in 98 secs.

THE TURF.

The Prince of Wales' year will for a long time to come, we anticipate, be the turf designation of 1896; for not only did the Prince's horse, Persimmon, win both the Derby and the St. Leger, but his filly, St. Thais by St. Serf, also carried off the One Thousand Guineas, and starting a hot favourite for the Oaks, finished second to Lord Derby's Canterbury Pilgrim for that classic contest. Racing was carried on all through the season with big fields and the usual excitement. Indeed, the Prince's victories appeared to add extra zest to the sport. The handicapping did not seem to be quite satisfactory, and at the end of the season the Jockey Club took the matter seriously in hand, and before racing begins again in 1897 new regulations are likely to be made, and it is possible that the weights will be adjusted in future by a committee, one of whom will have been present at all the previous meetings of the year. Col. North, a very prominent owner of racehorses, died during the year. Commencing with the classic events of the season, Mr. Leopold de Rothschild's colt St. Frusquin by St. Simon had fairly established himself as the best two-year old of 1895. All through the winter he remained a firm favourite for the Derby and Two Thousand, and when he was brought out at the Newmarket First Spring for a small event, the Column Produce Stakes, £778, over the Rowley Mile, which he won easily with odds of 2½ to 1 on him, his supporters considered the Two Thousand and Derby merely a question of health for the son of St. Simon. He started for the Two Thousand, value £4,250, on April 29, at 100 to 12 on, Labrador being his supposed most dangerous opponent. Well ridden by T. Loates, he never caused his adherents a moment's apprehension, and he won like a thorough racehorse by three lengths. All went well with the favourite up to the Derby Day, June 3, the Prince's colt Persimmon, also by St. Simon, being the only opponent considered to have any chance against him. With T. Loates in the saddle he started at 13 to 8 on, but in a desperate finish Persimmon seemed the better stayer of the two and won by a neck amidst a scene of wild excitement and enthusiasm never before seen on Epsom Downs. The value of the Derby was £5,450. On July 2 at Newmarket, these two colts met again in the rich Princess of Wales's Stakes, value £9,005, St. Frusquin carrying 9st. 2lb. and Persimmon 9st. 5lb. The distance was a mile, and Regret, 3 years, 8st. 7lb., Sir Visto, 4 years, 10st. 3lb., Raconteur, 4 years, 9st. 8lb., Kirkconnel, 4 years, 10st., were also in the field. Regret started favourite at 7 to 4; St Frusquin was a slightly better favourite than the Derby winner, and after another grand race St. Frusquin beat his former conqueror by half a length. Persimmon was now very wisely put by for the St. Leger, but St. Frusquin came out again at Sandown Park on July 17 for the Eclipse Stakes, value £9,310. Regret, 8st. 8lb., Troon, 9st. 13lb., and Labrador, 9st. 11lb., were his only opponents, and carrying 9st. 4lb. with odds of 2 to 1 on, he won rather easily by a length. This was his last appearance for the year as it happened. His two victories had firmly established him as a better favourite for the St. Leger than Persimmon, when suddenly, on August 14, Messrs. Weatherby were instructed to scratch the Saint owing to his having injured the sinews of one of his fore legs. This, for the moment, quite paralysed speculation on the St. Leger, as with St. Frusquin a non-starter the race was a gift for Persimmon; and so it proved.

Labrador was the only horse with the slightest pretensions to trouble the Derby winner; and finally at Doncaster, September 9, Persimmon with 5⅘ to 1 on, won as he liked by a length and a half, the value of the stakes being £5,075. The champion of the year appeared once more before the end of the season, being brought out for the Jockey Club Stakes at Newmarket on October 1. The distance was 1 mile, 2 furlongs, and Sir Visto, 10st. 2lb., Laverio, 9st. 13lb., Regret, 9st. 11lb., Kirkconnel, 9st. 13lb., were the best of his opponents, odds of 11 to 8 were laid on Persimmon, who carried 9st. 7lb., and the crack easily defeated Sir Visto at the finish by two lengths. This set at rest all doubt as to he relative abilities of the Two Thousand nd Derby winner, and if the pair ever meet again, odds on Persimmon are almost sure to be laid. Taking a line through Sir Visto and Kirkconnel, the three year olds of 1896 must be better than those of 1895, as both these two horses, the chief winners of the latter year, were always beaten when they met the cracks of 1896. H.R.H. the Prince of Wales' Thais won the One Thousand Guineas by a head from a large field, the value of the stakes, £5,100, exceeding that of the Thousand won by St. Frusquin. After this victory, Thais looked an almost certain winner of the Oaks (value £4,150), odds of 13 to 8 were accepted about her chance, but Canterbury Pilgrim, who had not been seen out previously in the year, won rather easily by two lengths. Galeazzo by Galopin won the Newmarket Stakes, value £2,945. Love Wisely, a colt by Wisdom and a thorough stayer through his sire, won the Gold Cup at Ascot, value £2,680. Victor Wild and Sir Visto were both in the field, but they had nothing to do with the finish, Love Wisely had finished second to St. Frusquin for the Two Thousand. The Gold Cup winner did not appear again during the season. The value of the Ascot Cup will be largely increased in 1897. Pride, a grandly bred four-year old by Merry Hampton—Superba, after winning a couple of mile races at Newmarket and Gatwick came out again at Ascot and won the Gold Vase and the Alexandra Plate, two of the best tests of staying power during the year. Pride, however, did not run again, and the hard ground and want of rain up to August, told severely on all the horses whose legs were not of the soundest condition. It was probably owing

to this that owners declined to risk the chance of a breakdown on long and severe Cup contests. The Goodwood Cup was a walk over for Count Schomberg; Laodamia won the Doncaster Cup, The Rush, the Chester Cup winner, being her most dangerous opponent. The Oaks winner, Canterbury Pilgrim, won the Jockey Club Cup easily from a solitary opponent, Gulistan, but the Cup contests proper have been seriously interfered with by the far richer stakes now decided over much shorter and easier courses. The big handicaps of the year all filled well and produced plenty of betting and good racing. The Lincolnshire Handicap, value £1,815, was won by a five-year old, Clorane, carrying top weight, 9st. 4lb., but the horse appeared once again in the Kempton Jubilee. A 40 to 1 chance, The Soarer, won the Grand National; Paris III. won the Northamptonshire Stakes, value £925. At Epsom, Worcester, a six-year-old, with the top weight, 8st. 12lb., won the City and Suburban, value £1,665, starting first favourite. Fatherless, another six-year-old, won the Great Metropolitan, value £925. The Chester Cup, we have already alluded to, was won by The Rush. The most important and valuable of the Spring handicaps, the Kempton Great Jubilee, value £2,650, distance one mile, was won by Victor Wild, again an old horse (six years) and carrying top weight (9st. 7lb.), a grand performance, but in his only two other attempts he failed completely, and practically broke down in the Ascot Cup. The Manchester (May) Cup, value £1,912, was won by The Docker (5yrs., 7st. 6lb.) at the good odds of 20 to 1. A big handicap at Epsom is badly needed between the Derby and the Oaks now the Epsom Gold Cup has dropped out of the fixture list. Ascot had no Royal procession this year, and rain spoilt the Wednesday's racing; as a society function, however, the meeting was a big success. Arlequin (3 yrs., 6st. 5lb.) won the Ascot Stakes, value £995, a severe test for any three-year-old, so severe, indeed, that he did not run again. Shaddock won the Prince of Wales' Stakes, value £1,750, from a very poor field. The Hunt Cup (£2,400) fell to the favourite Quarrell, a five-year-old with the top weight (7st. 11lb.) but one. Helm (8st. 10lb.) won the Coronation Stakes (£3,050), beating Thais (9st. 3lb.) second, the latter beating the Oaks winner, Canterbury Pilgrim, at even weight, the last-named starting favourite. His Reverence won the St. James's Palace Stakes, value £2,050, but Labrador beat him for the July Third Triennial Stakes of £633. Shaddock also won the Hardwicke Stakes of £2,217 and Kilcock (4 yrs., 8st. 4lb.) won the Wokingham Stakes, value £940, from a very strong field of good horses. Dare Devil (8st. 7lb.) won the once celebrated Northumberland Plate, now a very second-rate handicap and only worth £925. Canterbury Pilgrim won the Liverpool July Cup, value £975, with Paris III. second, and then came Goodwood with several important handicaps. Chasseur, 4 years, 8st. 5lb., won the Stewards' Cup, value £757, from a very large field of good and speedy horses, including Winkfield's Pride. Chasseur started at 20 to 1, and the finish between the first three was the best of the season. The Goodwood Stakes, value £465, was won by Carlton Grange, 4 years, 7st. 7lb., but the opposition was very weak. Phœbus Apollo, 3 years, 6st. 12lb., won the Chesterfield Cup, value £517. The Goodwood Meeting is not what it was, and the added money must be largely increased if these races are to keep pace with the numerous club fixtures and big prizes of the present day. At Brighton the stakes went to Utica, 4 years, 9st. 9lb., another top-weight victory; and the Lewes Handicap, value £990, fell to Paris III. (a), also top-weight with 9st. At York, Helm, giving away a lot of weight, won the Yorkshire Oaks, and Dingle Bay, 4 years, 7st. 9lb., after a dead heat, won the Great Ebor Handicap. At Doncaster the Great Yorkshire Handicap was won by Drip, 3 years, 7st., and the Portland Plate, value £790, fell to Grig, 4 years, 8st. 12lb., the field being numerous and speedy. The Manchester September Meeting, without the rich Lancashire Plate, has lost some of its importance, its biggest prize, the Prince Edward Handicap (£1,820) falling to Bellevin, 3 years, 6st. 9lb., who here made his *début* as a three-year-old. At the Newmarket First October, Roughside, 3 years, 6st. 13lb., won the October Handicap, value £435, and Melange, 3 years, 7st. 10lb., carried off the Great Eastern Railway Handicap, from a good field. The Duke of York Stakes, the chief handicap of the Kempton Park October Meeting (value £1,740), was won by Chin Chin, 5 years, 6st. 7lb. At the Newmarket Second October Meeting, the Cesarewitch, value £935, as usual attracted any amount of interest; indeed, although of small value comparatively, it is still, and always has been, one of the heaviest betting races of the year. Laodamia, the top-weight, 8st. 8lb., was favourite, but St. Bris, 3 years, 6st. 6lb., starting at 10 to 1, won easily in the hands of K. Cannon. Dingle Bay carried off that old-fashioned trophy, The Whip, after a good run with Bevil. At the Newmarket Houghton, the Cambridgeshire Handicap absorbed all attention. Undoubtedly it was the best handicap field of the year, including Yorker, Laodamia, Chit Chat, Thais, La Sagesse, Quarrel, Victor Wild, Sir Visto, Marco, Canterbury Pilgrim, Shaddock, Funny Boat, Coylton, etc. At the last moment immense sums of money went on Winkfield's Pride, a three-year old, with 6st. 10lb. He had started three times during the season unsuccessfully, but here, first favourite at 5 to 1, he won all the way by three lengths, his party netting a big sum by his victory. Winkfield's Pride also won the Old Cambridgeshire Handicap. The last big handicap of the year, the Liverpool Autumn Cup, was won by Count Schomberg, the favourite, at 3 to 1, T. Loates, then at the head of the list of jockeys, falling and breaking his thigh. As regards the winning jockeys of the year, it was a near thing all through the season between T. Loates and M. Cannon for the premier position, but Loates was always in front by a little until he was injured at Manchester races on Sept. 26th, by Troon falling. Loates was out of the saddle until Oct. 24, M. Cannon passing his opponent with 151 wins to Loates' 146 during that period. By Nov. 14th, Loates was one more in front, until in riding Birchrod in the Liverpool Autumn Cup, he again fell and broke his thigh. At the commencement of the last week of the racing season the order of the first dozen jockeys was as follows: M. Cannon, 159 wins; T. Loates, 156; J. Allsop, 103; J. Finlay, 96; O. Maddon, 87; J. Watts, 76; F. Rickaby, 72; S. Loates, 68; J. Fagan, 63; A. White, 57; T. J. Calder, 56; R. Colling, 54.

With St. Frusquin and Persimmon between them carrying off all the best prizes of the year except the Two Thousand and the Oaks, St. Simon easily remains the Champion sire of the year. It is a long time since one sire has had two such splendid three-year-old colts running in

Digitized by Google

one season. Owing to their successes, H.R.H. the Prince of Wales and Mr. Leopold De Rothschild are both well up in the front of the winning owners of the year. Galopin and Donovan, the latter through Velasquez, both did well as sires during the season. It may be noted that Sir Visto, the 1895 Derby Winner, started altogether five times in 1896 without gaining a winning bracket. The two-year-old racing of the year, up to the period of the Middle Park Plate, pointed to Velasquez by Donovan—Vista as being far and away the best of his year. He made his *début* in the New Stakes at Ascot (value £1858), a race in which many a future Derby favourite has been seen for the first time. With only 11 to 10 against him he made short work of Alfar and Monterez, two previous winners, and was at once backed for the Derby. The July Stakes (£1420) were next easily carried off by the young Donovan. Then came the Goodwood Prince of Wales' Stakes (£2400), where Velasquez met two undefeated animals, Goletta with four previous victories and Helebore. Indeed, Goletta was only once again defeated during the season. Velasquez, however, with 13 to 8 laid on his chance, won easily. He next won the Champagne Stakes (£1170) easily, and was then put by for the Middle Park Plate (£2296). He started at 5 to 1 on, but Galtee More defeated him easily. Galtee More is a colt by Kendal. He first appeared in the Hurstbourne Stakes (£897), which he won easily. He was then defeated in the Great Lancashire Breeders' Produce Stakes (£1611) by Brigg. He just managed to win the Molecomb Stakes (£745) at Goodwood, and also the Rous Plate (£445) at Doncaster. Neither Velasquez nor Galtee More appeared again, and as the year closes they are both at a very short price for the Derby of 1897. The soft ground in the Middle Park Plate was not supposed to suit Velasquez's small feet, but this is the only possible excuse that can be urged in his favour. Vesuvian, by Hampton Royal, a dark colt, won the Dewhurst Plate (£1317), beating a good field, including Berzak, Goletta and Minstrel. Chelandry, a well-bred filly by Goldfinch—Illuminata, won four valuable stakes during the year, including the Sandown Park National Breeders' Produce Stakes (£4357), the Kempton Park Imperial Produce Stakes (£2569), and the Epsom Great Surrey Breeders' Foal Plate (£1082). She was only defeated twice during the season, and the half-sister to Ladas should do well as a three year old.

YACHTING.

A NEW linear measurement rule came into force with the opening of the yacht-racing season, 1896, the loadwater length and sail area formula being superseded by one in which length on load water-line, beam, under water girth, and sail area are the recognised elements for computing "rating." Exceptionally fine weather and light winds prevailed, but the racing was thoroughly interesting in all the classes, especially so with the first class contingent, which was made up of the German Emperor's new cutter *Meteor*, the Prince of Wales' *Britannia*, Mr. C. D. Rose's *Satanita*, and Mr. A. B. Walker's *Ailsa*, the small cutter *Caress* also gaining admission to the class, through giving her a sufficiently extended sail plan to bring her within the specified rating limit. Early in the season the *Britannia* did best, or rather until the *Meteor* joined in, when the new cutter carried almost everything before her. The *Meteor* was absent for a time in German waters, returning before the finish of the Clyde season. She proved very successful in the Scotch and Irish regattas, but she was unlucky at Swansea, and singularly so during the Cowes week. At Ryde the *Meteor* made almost a clean sweep of the prizes, and after commencing the Southsea week with a win, she ran down the 52-rater *Isolde*, and unhappily the owner of the latter, Baron von Zedtwitz, was killed. This lamentable occurrence, it may be said, quite spoilt the latter part of the yacht-racing season. The *Britannia* had done fairly well up to the close of the Scotch season, after which she scarcely added to her winnings. Although the *Meteor* had the best average, the *Ailsa* headed the roll, the latter opening a winning account at Queenstown, after which she did remarkably well, and was almost always the *Meteor's* most formidable opponent. The light winds were against the *Satanita* making a mark, but she gave a few very remarkable displays of speed, and won a few prizes. The *Caress*, thanks to a long allowance, was equal to saving her time when she was either favoured by paltry weather or partial breezes, and to a certain extent she was the means of lowering the records of the *Ailsa*, *Satanita*, and *Britannia*. In heading the winning list of the first class division, the *Ailsa*, 100·1 rating, started 49 times, and won 24 prizes, 13 of which were first prizes and 11 second prizes, value £1045. The *Meteor*, 101·9 rating, started 22 times, and won 17 prizes, 13 of which were firsts and 4 seconds, the value of the prizes won being £1480. The *Britannia*, 96·8 rating, in 45 starts won 17 prizes, namely, 11 firsts and 4 seconds; value £1022. *Caress*, 67·1 rating, started in 28 first class matches, and won 11 prizes, 5 being firsts and 6 seconds; value £465. *Satanita*, 99·6 rating, which was sailed in most persevering style, started no fewer than 47 times, and won 8 prizes, 5 being firsts and 3 seconds; value £405. There was no new vessel in the second class contingent, and the *Isolde*, Mr. P. Donaldson, 66 rating, again headed the winning list in the class. She made a very fine record with 35 prizes: 25 firsts and 10 seconds in 46 starts, and her winnings amounted to £1025. The *Corsair*, Mr. F. W. L. Popham, 64 rating, came next with 12 first prizes and 2 seconds in 34 starts, her winnings amounting to £480, while the *Carina*, which competed with *Isolde* and *Corsair* in Scotch and Irish waters, only started 29 times, and won 9 first and 10 second prizes, value £304. The *Hester*, Mr. J. Gretton, it may be said, started 9 times with the first class yachts, and won 1 second prize. She was, however, more successful in handicap matches, winning 5 firsts and 4 seconds; but the *Maid Marion*, Mr. M. B. Kennedy, had the better record, as she gained 10 first prizes and 3 seconds; other prominent winners in the cruising class being the *Creole*, Col. V. Bagot, *Columbine*, Capt. F. Wallace, *Samæna*, M. J. Nairn, *Anemone*, Mr. Haggas, *Marjorie*, Mr. J. Coats, jun., *Namara*, Mr. W. B. Paget, *Thalia*, Hon. Judge Boyd, *Mohawk*, Mr. J. Orr Ewing, *Thelma*, Mr. Michels, *Zinita*, Mr. Connell, *Molly*, Mr. Macindoe. In the 52 feet class, the new boats *Saint*, Mr. F. B. Jameson, and *Penitent*, Mr. C. D. Rose, were at the head of the class, and then in order came *Niagara* (American), Mr. Howard Gould, *Audrey*, Lord Dunraven, and *Samphire*, Col. A. Paget and Mr. O. Goelet. The 36 feet class, 5 raters, mustered very strongly, and the *Westra*, Mr. J. Connell and *Heartsease*.

CLOSE SEASON FOR GAME, WILD BIRDS, &c.

The following Table gives the "close" time for different kinds of Game for England, Scotland, and Ireland, during which it is illegal to pursue the game mentioned, all dates inclusive:—

Game.	England.	Scotland.	Ireland.
Black Game or Heath Fowl.	11th Dec. & 19th Aug., 11th Dec. & 31st Aug., in Somerset, Devon, and New Forest.	11th Dec. & 19th Aug.	11th Dec. and 19th Aug.
Bustard.....	2nd Mar. & 31st Aug.	None.	11thJan.& 31st Aug.
Deer, Male .	None.	None.	1st Jan & 9th June.
„ Fallow	None.	None.	Michaels. & Dec.31.
Grouse or Red Game	11th Dec. & 11th Aug.	11th Dec. & 11th Aug.	11thDec.& 11thAug.
Hare*.....	None.	None.	21stApr.& 11thAug.
Heath or Moor Game	None.	As "Muirfowl."	11thDec.& 11thAug.
Landrail ...	As "Wild Birds."	As "Wild Birds."	11thJan.& 19th Sep.
Muirfowl, or Ptarmigan	None.	11th Dec. & 11th Aug.	11thDec.& 19thAug.
Partridge ...	2nd Feb. & 31st Aug.	2nd Feb. & 31st Aug.	11thJan.& 19th Sep.
Pheasant ...	2nd Feb. & 30th Sept.	2nd Feb. & 30th Sept.	2nd Feb.& 30th Sep.
Quail	As "Wild Birds."	As "Wild Birds."	11thJan.& 19th Sep.

It is unlawful to kill pheasants, partridges, grouse, moor game, or hares on a Sunday or Christmas Day.

In England hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In Scotland the same remarks apply to deer and hares, to the first four birds, and to wild duck; in Ireland to all these five birds, with the further addition of widgeon, teal, and plover. The close-time for these birds (except quail and landrail in Ireland, for whose close-time see above) is, under the Wild Birds Protection Acts, 1880 and 1881, from 2nd March to 31st July, both inclusive, throughout the United Kingdom, except the Island of St. Kilda. The penalty for killing any wild bird in such close-time, or for selling or having in possession between the 16th March and the 31st of July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5s. and costs for each bird for every subsequent offence. In the case, however, of the undermentioned birds, the penalty is £1 for each bird for each offence:—

American quail.	Colin.	Dotterel.
Auk.	Cornish chough.	Dunbird.
Avocet.	Coulterneb.	Dunlin.
Bee-eater.	Cuckoo.	Eider-duck.
Bittern.	Curlew.	Fern-owl.
Bonxie.	Diver.	Fulmar.
Gannet.	Owl.	Sheldrake.
Goatsucker.	Ox-bird.	Shoveller.
Godwit.	Oyster-catcher.	Skua.
Goldfinch.	Peewit.	Snew.
Grebe.	Petrel.	Snipe.
Greenshank.	Phalarope.	Solan Goose.
Guillemot.	Plover.	Spoonbill.
Gull (except Black-backed).	Ploverspage.	Stint.
	Pochard.	Stone Curlew.
Hoopoe.	Puffin.	Stonehatch.
Kingfisher.	Purre.	Summer snipe.
Kittiwake.	Razorbill.	Tarrock.
Lapwing.	Redshank.	Teal.
Lark.	Reeve or Ruff.	Tern.
Loon.	Roller.	Thicknee.
Mallard.	Sanderling.	Tystey.
Marrot.	Sandpiper.	Whaup.
Merganser.	Scout.	Widgeon.
Murre.	Sealark.	Wild duck.
Night-hawk.	Seamew.	Willock.
Night-jar.	Sea parrot.	Wimbrel.
Nightingale.	Sea swallow.	Woodcock.
Oriole.	Shearwater.	Woodpecker.

Offenders refusing their names and addresses are liable to a further penalty of 10s., but the Act does not apply to any person shooting on his own land, or authorizing anyone so to shoot, any wild bird not included in the above list.

On the application of the local authorities, the Secretary of State in England and Wales, the Secretary for Scotland in Scotland, or the Lord Lieutenant in Ireland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette*. They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales, or the Secretary for Scotland, may also on the application of the local authorities make an order, providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here.

* See also below "Seasons for hunting and ground game shooting."

SEASONS FOR HUNTING AND GROUND GAME SHOOTING.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor is there, except in Ireland, for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. November 1st is the recognized date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about Aug. 12 to Oct. 12 for stags, and from Nov. 10 to the end of March for hinds. By an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound. This does not apply to foreign hares.

CLOSE-TIME FOR SALMON.

I. England and Wales.

Under the Salmon Fishery Acts, salmon—(the word "Salmon" includes all migratory *salmonidæ*)—are protected, and a close-time is fixed for England and Wales, including the Esk in Dumfries, during which fishing for salmon is prohibited. The close-time for nets begins on 1st September, and ends on 1st February; and for rods it begins on 2nd November, and ends on 1st

February. The commencement and termination of the close season may be varied by a bye-law by the local boards of conservators (see p. 397), but it must never begin for nets later than 1st Nov., nor be less than 154 days. For rod and line a minimum close-time is 92 days, which must commence not later than 1st December. For putts and putchers the annual close season is from 1st September to 1st May, which cannot be altered by bye-law. The following are the cases in which these dates have been varied by bye-law:—

Close-time for	Nets.	Rods.
Avon & Stour	31 July to 1 Feb.	2 Oct. to 1 Feb.
Taff and Ely	31 Aug. to 30 Apr.	15 Nov. to 30 Apr.

Avon & Erme	‖30 Sep. to 1 May	30 Nov. to 1 May
Camel	21 Sep. to 4 Apr.	1 Dec. to 30 Apr.
Fowey	¶1 Nov. ,,	,, ,,

No fresh salmon may be sold between 3rd September and 1st Feb., except such as can be proved to come from parts beyond the seas, or to have been taken, if in the United Kingdom, in legal netting season and in legal manner. During that period all packages containing salmon consigned by any common or other carrier must be clearly marked with the word "Salmon." Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1st February and 3rd November may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1st Feb. and 3rd Nov., lies with the person selling or exposing for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 3rd September and 30th April, unless it can be proved that the salmon exported or entered for exportation was caught at a time at which its sale in the place where it was caught would be legal, if in the United Kingdom: the *onus probandi* lies on the person exporting. The capture and sale of "unclean" salmon, *i.e.*, salmon recently spawned or full of spawn, are prohibited under heavy penalties. Roe may not be used as a bait in salmon angling.

A weekly close season, during which net-fishing for salmon is prohibited, is fixed in England from noon on Saturday to 6 a.m. on Monday. This close-time may be varied by the Local Conservancy Boards, provided it is not less than 42 hours, nor more than 48 hours, and that it is fixed between Friday at midnight and noon on Monday.

* Between Carmarthen Bar and St. Govan's Head, 1st September to 30th April for nets.
† In Borough of Shrewsbury only.
‡ Below Old Sandsfield. ¶ Below Lostwithiel only.
‖ Except R. Erme, 30 Sept. (rods 30 Nov.) to 4 April.

II. Scotland.

In Scotland the annual close-time must not be less than 168 days. It is, for nets, from 27th August to 10th February, and, for rods, from 1st November to 10th February, except as follows:—

Close-time for	Nets.	Rods.
Add, Aray, Eckaig, N. & S. Esk, Fyne, Ruel, Shira.	1 Sept. to 15 Feb.	1 Nov. to 15 Feb.
Beauly, Dunbeath, Lossie, Ness, Spey, Kyle of Suth'rl'nd.	—	16 Oct. to 10 Feb.
Halladale, Strathy, Naver, Borgie, Helmsdale	—	1 Oct. to 10 Jan.
Forth	—	1 Nov. to 10 Feb.
Girvan	10 Sept. to 24 Feb.	1 Nov. to 24 Feb.
Bervie, Carradale, Fleet, Garnock, Inner, Iorsa, Irvine, Laggan, Luce, Sorn, Ugie, Ythan, and rivers of Orkney, Harris, & Uist.	10 Sept. to 24 Feb.	1 Nov. to 24 Feb.
Nith	ditto	15 Nov. to 24 Feb.
Annan, Stinchar	ditto	16 Nov. to 24 Feb.
Rivers of Shetland	ditto	16 Nov. to 31 Jan.
Urr	ditto	1 Dec. to 24 Feb.
Rivers of Bute	1 Sept. to 15 Feb.	16 Oct. to 15 Feb.
Thurso	—	15 Sept. to 10 Jan.
Hope, Polla	—	11 Sept. to 10 Jan.
Tay	—	16 Oct. to 14 Jan.
Findhorn	—	11 Oct. to 10 Feb.
Tweed	15 Sept. to 14 Feb.	1 Dec. to 31 Jan.

The weekly close-time for nets is between 6 p.m. Saturday and 6 a.m. Monday; and, for rods, on Sundays. The Esk, in Dumfries, is included under the English Salmon Acts.

In Scotland the law as to the sale of salmon differs somewhat from that in force in England.

III. Ireland.

In Ireland the close-time for salmon applies also to trout. The netting close-time must never be less than 168 days. Many variations of the close season have been made, of which it is impossible to specify all the details here; the following list, however, shows the general close-time in force in the different districts, in parts of some of

which, however, it is different (all dates inclusive). The second column gives the point of delimitation on the coast between the various districts, which include all rivers, &c., within their respective coast-limits.

District.	Coast Limits.	Cl.-T.Net.	Cl.-T.Rod.
Dublin.....	Skerries ..... to	16 Aug. to 1 Feb.	1 Nov. to 31 Jan.
Wexford...	Wicklow ..... to	16 Sept. to 19 Apr.	1 Oct. to 14 Mar.

Londonderry	Malin Head ... to	1 Sept. to 14 Apr.	10 Oct. to 1 Apr.
Coleraine .	Downhill ..... to	20 Aug. to 3 Feb.	1 Oct. to 28 Feb.
Ballycastle	Portrush ..... to	20 Sept. to 16 Mar.	1 Nov. to 31 Jan.
Dundalk...	Donaghadee ... to	15 Sept. to 1 Apr.	1 Oct. to 2 Feb.
Drogheda .	Clogher Head..	4 Aug. to 12 Feb.	15 Sep. to 12 Feb.

In Ireland the weekly close-time is fixed at 48 hours, from 6 a.m. Saturday till 6 a.m. Monday.

Salmon and trout must not be sold in Ireland in the close season.

CLOSE-TIME FOR TROUT AND CHAR.

The capture of trout and char in England and Wales is prohibited between 2nd October and 1st February, except in Norfolk and Suffolk, where, under a local Act (the Norfolk and Suffolk Fisheries Act, 1877), the conservators have fixed the close-time for trout, for nets only, at from 10th September to 25th January; and except in the Thames, where the close season is from 11th Sept. to 31st March.

By an Act passed in 1876, the trout and char close-time may be varied by bye-law by local boards of conservators, so, however, that it does not commence earlier than the 2nd September nor later than the 2nd November, and is not less than 123 days. The following dates have been fixed under this Act. In the districts marked * the close-time, as altered, applies only to trout. The *sale* of trout and char, however, is absolutely prohibited throughout England and Wales from 2nd October to 1st February:—

*Eden ...	2 Sept. (rods 16 Oct.) to 28 Feb.	
Tyne.....	10 Sept. to 21 Mar. (for rods and nets).	
*Severn ...	2 Oct. to 1 Mar.	(ditto)
*Taf, Ely	20 Sept. to 1 Feb.	(ditto)
*Cleddy ...	29 Sept. to 1 Mar.	(ditto)
*Ogmore..	30 Sept. to 28 Feb.	(ditto)
*Teign ...	1 Oct. to 2 March	(ditto)
*Ayron ...	1 Oct. to 15 Mar.	(ditto)
Derwent (Cumb.)	15 Sept. to 10 Mar. Except Char in Crummock and Buttermere, 1 Nov. to 30 June.	(ditto)
*W. Cumberland..	1 Oct. to 31 March (for nets). 1 Oct. to 10 March (for rods).	
*Teify, *Avon & Erme ...	1 Oct. to 28 Feb. (rods and nets).	
*Avon & Stour ...	1 Oct.† to 31 Mar.	(ditto)
Usk	2 Oct. to 14 Feb.	(ditto)
*Teify ...	1 Oct. to 28 Feb.	(ditto)
Clwyd and Elwy	2 Oct. to 28 Feb.	(ditto)
Camel, Fowey ‖...	1 Oct. to 15 March.	(ditto)
Seiont,&c.	Trout, 2 Oct. to 1 Mar.‡ Char, 22 Oct. to 1 Mar.	(ditto) (ditto)
*Wye, Towy, *Lune, Kent§...	2 Oct. to 1 Mar.	(ditto)
*Dart	2 Oct. to 28 Feb.	(ditto)
*Ouse and Nene	2 Oct. to 31 Mar.	(ditto)
Yorks	2 Oct. to 15 Mar.	(ditto)
Wear	2 Oct. to 1 Mar.	(ditto)
*Dee	14 Oct. to 14 Feb. (for rod & line only).	
*Coquet ..	1 Nov. to 3 Mar. (for rod & line only).	

In Scotland there is no close-time for trout and char. In Ireland the close-time for trout is the same as for salmon. This may be altered, but not shortened, by the Inspectors. For pollen, however, the close-time is fixed by the Pollen Fishery (Ireland) Act, 1881, from 1st Nov. to 31st Jan.

Between Sept. 3 and Feb. 1 all packages in England and Wales consigned by any common or other carrier and containing trout or char must be distinctly marked with the word "trout" or "char" as the case may be.

CLOSE-TIME FOR FRESHWATER FISH.

By the Freshwater Fisheries Act, 1878, a close-time for "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than pollen, trout, and char, which live in fresh water, except those kinds which migrate to or from the open sea) is fixed from 15th March to 15th June, both inclusive, for all parts of England and Wales except parts of Norfolk and Suffolk. The penalty for taking or selling freshwater fish in that period is £2 for a first and £5 for a subsequent conviction. The close-season, however, does not

† 15 Oct. above Amesbury.
‡ Rivers Braint and Cefni, 15th Oct. to 1st March.
§ 2 Oct. to March 31 for Windermere and Coniston and R. Duddon; and 1 Sep. to 15 Feb. for R. Bela.
‖ April 30 between Lostwithiel and St. Winnow.

apply to eels taken otherwise than by angling or to fish taken in private waters by leave of the owner, in public waters by leave of a Board of Conservators, or taken (with the leave of the owner if in private waters) for bait or for scientific purposes. Fishery districts may be wholly or partially exempted from this close-time with the sanction of the Board of Trade, and the Avon and Stour, Avon and Erme, Wye, Eden, and Towy fishery districts have been so exempted; also the Kent and Leven, Severn and Yorkshire districts, as regards pike, the Usk as regards eels, and certain parts of the Severn as regards other fish than grayling. In the navigable rivers of Norfolk and Suffolk and the broads connected therewith, close-times have been fixed for various fish under the Norfolk and Suffolk Fisheries Act, 1877, from March 1 to June 30. For eels a separate close-time exists (so far as fixed engines in salmon rivers are concerned) in England from January 1 to June 24; in Ireland, with one or two exceptions, from January 11 to June 30. In the Severn, elvers, or the fry of eels, are protected between 1 Jan. and the last day of Feb., and between 26 April and 24 June.

PROTECTION OF CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under 4¼ inches, measured across the largest diameter of the back, or lobsters under 8 inches, measured from tip of beak to end of tail when spread out flat.

CLOSE-TIME FOR OYSTERS.

By the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a close-time for the capture and sale of "Deep-Sea Oysters" is fixed from the 15th June to 4th August; and for all other kinds of oysters—except oysters taken in the waters of a foreign state—from 14th May to 4th August. By a recent decision foreign oysters temporarily deposited on English oyster layings for purposes of storage only do not come within this close season. This Act applies to England and Scotland, but not to Ireland. By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from the 16th June to 31st August inclusive, in that part of the English Channel comprised between a line drawn from the North Foreland Light to Dunkirk, and a line drawn from the Land's End to Ushant—the territorial seas of England and France alone being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified; and until that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1st May to 31st August, is to remain in force so far as French fishermen are concerned. It is customary, however, for both Powers to agree to suspend the operation of this close season till June 16 in each year. In Ireland, the Act 5 & 6 Vict. cap. 106, prescribes that no oysters may be taken between 1st May and 1st September, though this close season has been varied by the Inspectors of Fisheries in the following cases:—

Tralee Bay	11th Mar. to 31st Oct.
Galway Bay	1st Jan. to 30th Nov.
Strangford Lough	1st Mar. to 31st Aug.
Achil Sound, Clew Bay	2nd April to 30th Sept.
Sligo, Ballisodare and Drumcliffe Bays	30th April to 1st June.

Taking oysters from licensed beds is made larceny.

Licences for Shooting and Fishing.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes; rabbit-warren proprietors, or others, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justice of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence, and soldiers, sailors, volunteers, or constables on duty, or at practice, or occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence, need not take out a gun licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are given at p. 432.

SALMON LICENCES.—It is not so generally known that in salmon fishery districts in England and Wales, and in Ireland, it is necessary to take out a licence to fish for salmon, and, in most rivers, for trout or char. In Scotland no such licence is needed. A licence is available only in the district, and for the season, in which it is issued, except that in Ireland one rod licence is available in all parts of that country. The rates on nets and other like instruments range from £20 downwards in England and Wales, and from £30 downwards in Ireland. In the latter country the rate on draft nets, the kind most commonly used, is £3; in England and Wales it varies from about £5 to £2. The licence duty on a rod and line is £1 in Ireland. In England and Wales different rates are charged in different districts as follows (an asterisk signifies that lower rates of duty are chargeable for short periods, or for certain parts of the district):—

*Derwent, *Lune, *Ribble, *Dee, Clwyd & Elwy, *Conway, *Teify, Usk, *Wye, Avon and Erme, *Dart, *Teign, Exe, Frome, Avon and Stour, Stour (Kent), Yorkshire, Tees, *Tyne	20/-
Cleddy, Taff and Ely, Rumney, Ogmore	10/6
*Eden, *Seiont, Dwyfach, Towy, Taw and Torridge	21/-
*West Cumberland	15/-
Camel	12/-
*Kent and Leven, *Dovey, *Ayron, Severn, Fowey, Axe, Trent, *Esk (Yorkshire)	10/-
Avon, Brue, & Parret, Tamar and Plym	7/6
Ouse (Sussex), Wear, Coquet, Cuckmere	5/-

Digitized by Goog

On the 20th of June, 1897, Her Majesty Queen Victoria will have completed the sixtieth year of her reign, a reign which is now the longest in the history of the English people. It will therefore be fitting to give a short summary of the leading events which have taken place during this long period, and to set before the reader in the briefest possible fashion, a general outline of the changes, political and social, which have marked out the Victorian era, and have given it the pre-eminent importance which it must necessarily claim in all future histories of the English nation.

To describe in detail the enlargement and expansion of our Indian and Colonial Empire during this period would take up more space than we can spare, but even the bare outline of the territories which have been added to British rule far surpass the conquests of any previous reign. It would not be accurate to say that the whole of India has been added to the Empire, though as a matter of fact, before the year 1858 the then British territories in India were governed, not by the Queen, but by the East India Company. Between 1837 and that date, however, the territories of Scind, of the Sikhs, Tanjore, the seaboard provinces of Burma, Sattara, Jhansi, Nagpur, and lastly Oude, had been brought under English dominion. Since 1858 annexation has been less busy, but in 1884-88 Upper Burma and the Shan States were added, and the frontier of Afghanistan defined; in 1891 the small State of Manipur was absorbed, and last year it was decided to annex the province of Chitral, which has for some time been the scene of disturbances which were finally put down by the gallant efforts of Sir Robert Low and Colonel Kelly.

In the Southern Hemisphere it may almost be said that the growth of our vast Australian dominion has been contemporary with the Queen's reign, for the various colonies before that date had scarcely been commenced, and were hardly more than penal settlements. Of the seven separate colonies into which the Australian continent is now divided, New South Wales, Victoria, South Australia, Queensland, West Australia, New Zealand and Tasmania, only New South Wales and Tasmania had a separate colonial existence when the Queen ascended the throne. Since then New Zealand in 1841, Victoria in 1851, South Australia in 1856, Queensland in 1859, and West Australia in 1890 respectively, have been constituted separate colonies, and New South Wales received in 1855 the constitution under which it is at present governed. In 1837 the population of the whole of Australia can hardly have exceeded a few thousands; according to the latest returns now available, it reaches the total of 3,400,000 in round numbers, the vast majority of whom are of British descent. Besides this wonderful development of our Australian possessions, in 1881 the island of Fiji was annexed, and in 1884 British New Guinea, while the English flag also waves over several islands in the Western Pacific under the charge of the Governor of Fiji.

In North America, the territorial extent of our Empire remains much the same as at the beginning of the Queen's reign, though in population, wealth and general development, the progress made during the past sixty years is almost as great as that in other parts of the British possessions. In 1841 the population is stated at about one-and-a-half millions, in 1891 it was nearly five millions, an increase of more than threefold. During the past twenty years, for example, the population of Winnipeg, in Manitoba, has increased from 241 in 1871 to 25,642 in 1891, while the city of Vancouver, in British Columbia, which in 1885 had no existence, six years later had a population of 13,685.

In South and Eastern Africa, the expansion of British influence has been equally marked, particularly during the last decade, and there is every prospect that progress in the immediate future will be even greater. Since 1837, when Cape Town was our only possession in South Africa, we have added to our colonies Natal in 1843, Basutoland in 1884, Bechuanaland in 1885, and Zululand in 1887. In 1889 the British South Africa Company received a Royal Charter entrusting it with the development of the immense territory lying to the South of the Zambesi, which in 1888 had been assigned to British rule. In May, 1891, the sphere of the Company was extended to the north of the Zambesi, and now includes the whole of British South Africa from Mafeking to Tanganyika, an area of 750,000 square miles.

In East Africa "the British East African Protectorate" extends British influence over some 468,000 square miles from the eastern coast to the Congo State on the west, and from the German sphere on the south indefinitely towards Khartoum and Egypt on the north. Zanzibar also is now under British control and has been a British Protectorate since 1890.

On the West Coast the influence of Britain is maintained by the Niger Coast Protectorate, which in 1891 was placed under an Imperial Commissioner, and includes the whole maritime region lying between Lagos and the Rio del Rey. The Royal Niger Company, which received its charter in 1886, under the control of the Secretary of State, maintains 44 stations on the Niger, and promises large and extensive developments. In other parts of the West Coast, the settlements of the Gold Coast, Lagos and Gambia were separated from the government of Sierra Leone in 1874, 1886, and 1888 respectively.

Returning to the United Kingdom, the proportionate increase is naturally not so great, but even here the growth of the past sixty years is remarkable. The population of the British Isles has increased from 26,709,456 in 1841 to 37,980,964 in 1891, the public revenue from £48,453,000 in 1837 to £100,000,000 in 1895, and the imports and exports from £159,406,726 in 1840 to £702,522,065 in 1895, figures which only faintly express the enormous increase and growth of our national wealth and national resources. It would take up too much space to follow up in any detail the expansion of our great towns, but it is sufficient to mention the enormous growth during the period under review not only of London, but also of the great manufacturing cities and towns, such as Manchester, Liverpool, Glasgow, Birmingham, Leeds, Newcastle, Middlesborough, Leicester, and many others. Of late years this increase must perhaps be somewhat discounted by the general migration from the rural districts to the towns, but even so, it is sufficiently marked to deserve special attention.

We may now briefly glance at the principal changes during the reign, in our political, social, and commercial conditions, and point out the contrast between our position in these respects to-day and sixty years since. Though the great Reform Bill which admitted the middle classes to the Parliamentary franchise was passed in

Digitized by Google

1832, the main results of its influence belong to the period under review, and it was not till 1867 that a second measure of reform was achieved, by which the working classes were at last enabled to take their share in the government of the country. In 1884 a further extension of the franchise admitted the agricultural labourers to the constituencies, while a new redistribution of seats remedied the most glaring anomalies of Parliamentary representation.

In 1835, two years before the Queen's Accession, the Municipal Reform Act placed the government of our towns and boroughs in the hands of the inhabitants, and the new order of things has had much to do with the vigorous growth of municipal life which has marked the period before us. It was not, however, until 1888, that the inhabitants of the counties throughout England and Wales were, by the Local Government Act, enabled in a similar fashion to manage their own local affairs. Six years later the same principle was extended to the parish, and the Act commonly called the Parish Councils Act, provided at least the machinery, by which those parishes which desired it, might in the same manner manage for themselves their own internal affairs. These last two measures are as yet too recent to have produced any great result. There can however be but little doubt that they have strengthened the spirit of independence and political self-government among the people, and will produce good fruit during the next half century. Under politics we ought perhaps to include the work of Poor Law Reform, which was made possible by the great Poor Law Bill of 1834. It is in its main features the law at the present day, it has ended the shameful scandals so frequent before it became law, and it has prepared the way for any further reform which may still be desirable.

Of the many factors which have influenced our social development, the foremost place ought certainly to be given to the remarkable expansion of our railway and steamship communication, which in 1837 was only in its infancy, and has since effected so great a revolution in all matters of travel or of transit. It has not only covered the United Kingdom with a network of rails and brought each town into easy communication with each other, but it has practically bridged the ocean, and has brought America nearer to England to-day than Edinburgh was to London at the beginning of the present century. One remarkable result has been the establishment, in 1840, of the Penny Post, the influence of which it is quite impossible either to estimate or to realise. In the matter of national education equal progress may be noted. It had indeed been begun in a very small way by a small annual grant for the erection of schools, but in 1839 the Committee of Privy Council for educational purposes was established and since then the annual grants have steadily increased. For several years the National Society and the British School Society maintained a useful rivalry in the extension of elementary schools, until in 1870, Mr. Forster's Education Act, by the School Board system, at length established on a firm footing a national system of education. Its growth and development since that time is best indicated by stating the amount of Education Estimates for the past year, which now reach the sum of £10,489,249. During the past twenty years alone, from 1875 to 1895, the number of primary schools inspected has risen from 16,957 to 22,773, and the average attendance from 2,175,522 to 5,513,024. In this connection we may perhaps take the progress of the Church of England as indicating roughly the condition of religious work and activity in the nation. As the Bishop of Lichfield pointed out when reviewing the period in his presidential address at the last Church Congress, the Queen's reign has witnessed the revival of Church life which is known as the Oxford movement. Seven new dioceses have been formed and seventeen suffragan bishops have been appointed in England alone, while in Ireland the disestablishment of the Church has afforded the opportunity for a freer and more vigorous church life, and no less than 101 bishoprics have been founded to meet the religious needs of our Colonial expansion.

In Literature and Science the Victorian Era may well hold its own with any previous period in our history. In works of imaginative genius it is enough to mention the great names of Dickens, Thackeray or "George Eliot." In poetry, Wordsworth (though he partly belongs to an earlier reign) and Tennyson are fit successors to the great poets at the beginning of the century. Among historians, Macaulay, Froude, Freeman, J. R. Green, and Carlyle, if he may here be included, as regards our own country; Thirlwall, Grote, Finlay and Merivale, as regards Greece and Rome, have given us work of permanent value. In philosophical speculation, Mill, Hamilton and T. H. Green, will well compare with the greatest names of any previous period. But while it has been illuminated by the genius of these and other individual writers, the pre-eminent characteristic of the last sixty years is to be found in the extraordinary extension and development of popular and periodical literature. In these branches, and particularly in the latter, dimensions have been attained which would have been thought impossible at the beginning of the present reign. This development is due no doubt to many causes, but principally to the removal of all the taxes on knowledge which so hampered previous generations, to the wonderfully improved means of production now available, and more than all to the enormous expansion of elementary education among the great masses of the people during the last fifty or sixty years. In science, progress has been equally marked. Foremost we must note the practical acceptance of the great theory of evolution first clearly formulated by Darwin, which has revolutionised the whole of biological study. On the physical side, discoveries have been made hardly less important. Astronomy boasts the great names of Herschel and Adams. The extension of electrical knowledge by the discoveries of Wheatstone, Faraday and Lord Kelvin has opened a new world of possibilities. Chemistry has been placed on a sure foundation by the Atomic theory of John Dalton, while the work of Huxley, Tyndall, and other notable scientists, in pressing upon the popular mind the supreme importance of scientific results and methods, has largely advanced the remarkable spread of scientific knowledge and education of which we are only now seeing the early developments.

In commerce, manufacture, and trade, our growth and development has been unparalleled. The fortunate concurrence of three essential conditions, the invention of steam power, the establishment of free trade, and the possession of immense stores of coal, have given us throughout the whole period an advantage over most of our competitors which we are only very slowly beginning to lose. If to these three we add a

Digitized by Google

fourth and a fifth, the convenient position of the British Isles to the United States, and our indisputed maritime supremacy, we can quite readily account for the good fortune which has followed us thus far. During the longer part of the reign we might justly have called England the workshop of the world, and if at the present time there is any truth in the repeated complaints that foreign trade is diminishing, it is almost wholly due to the fact that we have now taught other countries how to manufacture for themselves. Into details it is of course impossible to enter, and the only qualification that need be entertained, is in respect of the Agricultural interest, which for many years lately has found itself depressed by the severe competition of America and other new countries, where produce can at present be raised with less expense than it can with us.

It is now time to trace in chronological order the principal events which have marked the sixty years since the day, June 20th, 1837, on which Victoria Alexandrina, the only child of Edward, Duke of Kent, fourth son of George III., succeeded at the age of 18 to the throne of England on the death of her uncle, King William IV. At that time there was much to be desired in the immediate surroundings of the Courts of George IV. and William IV., and her mother the Duchess of Kent wisely kept the young Princess in such retirement, that her character and disposition were hardly known. The account of the announcement of her accession is too well known to be repeated here, and it is enough to mention her first appearance on the throne in the House of Lords when she prorogued Parliament in person, and the magnificent ceremony of her coronation, which took place with all due pomp and circumstance on June 28th in the following year. A year and a half later, on January 16, 1840, when opening Parliament, she announced her intention of marrying her cousin, Prince Albert of Saxe-Coburg-Gotha, and in less than a month, on February 10th, the marriage was celebrated. During these opening years of the new reign, the first electric telegraph was constructed by Professor Wheatstone on the London and Blackwall Railway (1837), and the first steam packet, the *Great Western*, reached New York from Bristol in 15 days (1838). In the same year Mr. Villiers made his first annual motion for the repeal of the Corn Laws; in 1839 our first ill-fated war with Afghanistan commenced, and hostilities broke out for the first time between England and China. The year 1840, besides the Queen's marriage, saw the inauguration of the Penny Post. In the succeeding year the settlement of the Canadian difficulty on the one hand, and the murder of Sir William Macnaghten at Cabul on the other, marked our foreign relations; while at home the defeat of the Melbourne Ministry by Sir Robert Peel, and the opening of the Great Western Railway from London to Bristol, and the birth of the Prince of Wales, are specially noticeable. In 1842 Generals Sale and Pollock avenged our Afghan disasters and occupied Cabul, while our war with China was ended by the opening of the Chinese ports to British merchants, and the cession of Hong Kong to England. At home the Chartist demonstration, which occasioned serious alarm at the moment, was the most notable event, though the visit of the Queen and the Prince Consort to Scotland must not be overlooked. The next year in England was uneventful, but in Scotland was marked by the famous disruption in the Scottish Church, when a large number of ministers, headed by Dr. Chalmers and Dr. Guthrie, seceded from the established Scottish Church, and formed the Presbyterian Free Church of Scotland. Ireland also was disturbed, and agitation for repeal under O'Connell for a time assumed serious importance. The year 1844 was conspicuous mainly for the establishment of the Roman Catholic hierarchy in England, by which the "Italian Mission," as Archbishop Benson has so well called it, hoped to make a permanent Roman Catholic organisation, an attempt which aroused an immense deal of excitement and caused "No-Popery" meetings all over the country. In this year also the Queen opened the new Royal Exchange in the city.

The following year is noticeable in many ways. The famous Railway Mania was now at its height, and no less than thirteen hundred schemes were brought before the Committee of the House of Parliament, while the consequent gambling in shares was formally censured by Lord Brougham in the House. In this year too, the potato disease first made its appearance; the Sikhs were defeated at Ferozeshah, and finally next year at the battle of Sobraon. Sir Robert Peel proposed to repeal the Corn Laws and resigned in consequence, though as Lord Russell failed to form a ministry, he retained office till next year, when the Corn Laws were finally abolished, and Lord Russell and the Liberal party came into power. In 1845 also the secession of John Henry Newman to the Roman communion "struck the Church of England a blow from which she is still reeling," while in other fields we must note the discovery of the planet Neptune by Professor Adams at Cambridge, and the setting forth of Sir John Franklin on that voyage of Arctic exploration from which he was destined never more to return. The next two years were years of trouble and depression at home, of storm and revolution on the continent. The distress in Ireland caused by the potato famine was intense, while England was vexed by bad harvests and commercial depression, which were hardly alleviated by a considerable extension of free trade, and the repeal of the navigation laws, which thus enabled the English merchant to make use of foreign ships and seamen. In 1847 a general election resulted in a majority for the Government, and the new Parliament was opened by the Queen in person. The next year was made most memorable on the continent by the revolution in Paris, by which a Republic was officially proclaimed, with Louis Napoleon as President a few months later, and officially recognised by Great Britain. Similar outbreaks stirred Italy, Austria and Germany, while in England the political ferment of the time found an outlet in the immense Chartist demonstration on Kennington Common, to meet which a force of 250,000 special constables (one of whom was Louis Napoleon) was at once in readiness; and in Ireland in the futile attempt at rebellion of the "Young Ireland" party headed by Smith O'Brien and Meagher. In this year the Queen purchased Balmoral in Aberdeenshire, having a year or two previously acquired the estate of Osborne in the Isle of Wight, "a place of our own, free from all Woods, Forests and other charming departments." This year Lord Melbourne, who had been the Queen's first Prime Minister, died; two years earlier had occurred the death of Lord Grey, the minister who had passed the Great Reform Bill in 1832. The most important event of the next year, 1849, was the annexation of the Punjaub by Lord Dalhousie consequent on the conclusion of the

Digitized by Google

Sikh war. At home the Queen and the Prince Consort visited Ireland, where they were received with enthusiasm. During the year an outbreak of cholera in London caused considerable anxiety, but trade on the whole was reviving and popular discontent beginning to disappear. The first submarine telegraph between England and France dates from this year, and the first tube of the Britannia bridge over the Menai Straits was safely placed in position. The next year, 1850, Sir Robert Peel died from the effects of a fall from his horse, and thus prematurely closed his public career. The popular agitation against Papal aggression now reached its height, and the Government, to allay the excitement, introduced the Ecclesiastical Titles Bill, which proved a complete failure, and led to Lord Russell's resignation, though, as Lord Stanley declined to take office, the threatened change of Ministry was for the time averted. It took place, however, in the early part of the following year, 1851, which will always be one of the memorable years of the reign, from the opening of the first Great International Exhibition in Hyde Park. The idea had been suggested a year or two before to the Prince Consort by Mr. Henry Cole, and throughout its entire organisation the Prince took the warmest interest in promoting its success, which was even greater than had been anticipated. About this time, or perhaps a year or two later, we must place the great discovery of gold in our Australian Colonies, in New South Wales and Victoria, a discovery which, added to a similar discovery in California a year or two previously, has produced effects which are seriously felt at the present day. A minor event, but one which caused much discussion at the time, was the dismissal of Lord Palmerston from the Foreign Office, on the ground that he had acted too much on his own initiative in his dealings with foreign powers. The repeal of the Window Tax during this year should not be overlooked, or the visit of Louis Kossuth (whose death has only lately taken place), which aroused universal enthusiasm for the cause of Hungary and her national independence. The atmosphere throughout 1852 was full of tension, and a military spirit showed itself in all directions. The Volunteer movement was taken up with singular unanimity, largely owing to the general belief that a French invasion was imminent. This being so, it seems strange that the Russell Government should have been defeated on a Militia Bill, but such is the fortune of politics, and Lord Derby became Premier, with Mr. Disraeli as Chancellor of the Exchequer. Parliament was dissolved, and the elections gave a majority to the Opposition. There was no surprise therefore when, at the end of the year, the Budget proposals were defeated, Lord Derby's Ministry resigned, and the Aberdeen Coalition Ministry took office in its place. On September 14, the Duke of Wellington died full of years and honours, and in a short time the Crimean War broke up the peace which had lasted since Waterloo. Among lesser events should be noted the unsuccessful strike of the Amalgamated Engineers at Manchester, the conclusion of an International Copyright Treaty between England and France, and the Report of the Oxford University Commission proposing radical changes in the organisation of the University.

During the next year, 1853, the mind of the nation was almost wholly taken up by the question of foreign affairs, particularly the dispute between Russia and Turkey, nominally on the treatment of Christians in the Holy Places at Jerusalem, really because Russia was determined to pick a quarrel with Turkey, and to gain for herself the command of the Black Sea. This was resisted by England and France, and war against Russia was proclaimed on February 22, 1854. The invasion of the Crimea, Sept. 14, and the battle of the Alma, Sept. 20, were followed by the siege of Sebastopol, which was not captured till Sept. 5, 1855. Meanwhile, on October 25, was fought the battle of Balaclava, and on November 5, the victory of Inkerman was gained, of which the results were less important than they might have been. The winter of 1854-5 tried our troops severely. The commissariat utterly broke down, and the letters of Dr. Russell to the "Times" excited such indignation that Lord Aberdeen resigned after a vote of censure, and on the failure of Lord J. Russell and Lord Derby to form a Ministry, Lord Palmerston took office as Premier. Early in 1855 our allies, the Emperor of the French, Louis Napoleon, accompanied by his consort the Empress Eugénie, whom he had married a year or two previously, and the King of Sardinia, visited the Queen in London, and the Queen paid a return visit to Paris later in the autumn. On March 2, the Emperor Nicholas died, and the great obstacle to peace was removed. The war, however, went on till the fall of Sebastopol, in January, 1856, hostilities were suspended, and on March 30 the treaty of peace signed at Paris. We must now, however, go back for a year or two and note one or two domestic matters of importance. In 1853 the Advertisement duty was repealed; Mr. Gladstone's Budget abolished the duties on an immense number of articles; and further restrictions were placed on the employment of children in factories. The next year the recommendations of the Oxford University Commission became law, the system of Limited Liability, which has so powerfully influenced trade either for good or ill since that time, was introduced, and a new bill for extending the Parliamentary suffrage was brought forward by Lord Russell.

With the cessation of the war, trade in England rapidly revived, and home affairs for the time do not need our attention. In India, however, the annexation of Oude was proclaimed on Feb. 13, 1856, apparently in complete tranquillity. Murmurs however were audible, which were perhaps the first beginnings of the dreadful mutiny of the native soldiers in India, which broke out in the following year, when an outbreak at Meerut in May was followed by the seizure of Delhi, and the accession of the native King as Emperor of Hindostan. Immediately, the mutiny and massacre of the Europeans at Cawnpore, the rising of Oude and the siege of the residency at Lucknow, seemed to shake the English rule to its foundations, and it was not till the autumn of 1858 that Generals Outram, Havelock, and Colin Campbell (afterwards Lord Clyde), succeeded in re-establishing English authority. The crisis, however, had made it quite clear that the whole regime in India was unsuited to the times, and an Act was passed transferring the government of India from the East India Company to the Crown, from September 1, and the formal proclamation in India was issued in the November immediately following. As before we have allowed ourselves to depart from exact chronological order, and must now return to note that for the second time a war broke out between England and China in October, 1855. The policy of the

Government in this matter was hotly disputed, and in Feb. 1857, Mr. Cobden carried a hostile motion in Parliament, on which Lord Palmerston at once appealed to the country and obtained a decisive verdict in his favour. During this year Parliament was chiefly occupied with the question of divorce and the ecclesiastical courts, and it was only after warm and exciting debates that the existing Divorce Court was established. This year was also notable for a terrible financial panic, which caused many failures, and led to another suspension of the Bank Charter Act.

At the beginning of 1858 there was a strong feeling manifested in France against England for harbouring political refugees, largely due to the attempt of Orsini to assassinate Napoleon III. Lord Palmerston therefore brought in the Conspiracy to Murder Bill intended to deal with such cases. It was, however, thought that he had done this at the dictation or instigation of Napoleon, and the national *amour-propre* was so excited that the Bill was defeated. Lord Palmerston resigned, and Lord Derby succeeded to the Premiership, though his ministry only remained in office a little more than a year. He succeeded however in passing the Jewish Disabilities Bill, which allowed Jews to sit in Parliament, and at length ended a long and vexatious controversy. This year also Mr. Gladstone was appointed High Commissioner of the Ionian Isles, and recommended their union with Greece as the settlement of the present difficulty, an arrangement which took effect some five or six years later. When Parliament reassembled in February, 1859, the defeat of Mr. Disraeli's Reform Bill was followed by an appeal to the country, and the consequent resignation of the Conservative Ministry. The Liberal party under Lord Palmerston once more resumed office, and set forth a long and ambitious programme of activity for the coming session. In January of the following year, Mr. Cobden successfully negotiated a Treaty of Commerce with France. In Parliament the new Liberal plans for reform were introduced, the Paper Duty finally abolished, after a skirmish with the Lords as to their right to interfere with any decision of the Commons in the matter of aids and supplies to the Crown, and the whole customs system remodelled. In the summer the Prince of Wales visited the United States and was very warmly received. This year also witnessed the conclusion of the Chinese War by the capture of Pekin; the epoch-making election of Abraham Lincoln to the presidency of the United States; and the proclamation of Victor Emmanuel as King of Italy. Though the war feeling had largely abated, it had not wholly disappeared, and the growth of the Volunteer movement was signified by a grand review of Volunteers before the Queen in Hyde Park.

The chief event to be noticed in the year 1861 as regards home affairs, was the unexpected death of the Prince Consort on December 14, which filled the whole nation with profound sorrow and sympathy for the widowed Queen, who had, earlier in the year, lost her mother by the death of the Duchess of Kent in the middle of March. The second great International Exhibition, opened on May 1, was naturally less of a novelty than its predecessor, but it was remarkable for a specially full display of colonial products. Politics remained quiet, and a Bankruptcy Bill is the only item that needs mentioning; while among minor events of the year the purchase of the house of Shakespeare at Stratford-on-Avon by the New Shakespeare Society for the nation should not be forgotten. Abroad, interest was centred on the struggle in the United States, which broke out this year by the secession of the Southern States, in which England maintained a strict neutrality, though, at first, public sympathy was decidedly in favour of the South. In the following year the reduced supply of cotton brought the working population of Lancashire into serious straits, to alleviate which the Cotton Famine Relief Fund, under the chairmanship of Lord Derby, reached national proportions. In 1863 we note the marriages of the Prince of Wales to the Princess Alexandra of Denmark, and that of Princess Alice to Prince Louis of Hesse Darmstadt. In this year Sir John Lawrence succeeded to the Governorship of India, and General Gordon made his first reputation by putting down the Taeping Rebellion in China, when in command of the Imperial troops. In New Zealand, a Maori rising caused some uneasiness, while on the continent, an insurrection in Poland against the cruelties of Russian rule aroused widespread sympathy. The following year we have few events to notice. The political world was quiet, trade and commerce were so prosperous that the exports and imports reached a higher total than in any previous year. A visit of Garibaldi to England aroused wild enthusiasm, so much so that his well-known red shirt was at once appropriated by fashion, and became the fashionable costume of the day. In 1865 the American Civil War came to an end by the defeat of the Southern States, while the joy of the victors was tempered by regret at the assassination of President Lincoln, who had been re-elected the previous year. In the Colonies there was reason for considerable anxiety. The Maori war in New Zealand was still troublesome; a constitutional crisis occurred in Victoria, while an outbreak in Jamaica was put down with such severity by Governor Eyre that he was recalled, and the representative constitution of the island abolished. At home, a dissolution of Parliament in July resulted in the return of Lord Palmerston by a large majority, and with his death at the age of 81 in the following October, a new chapter in English politics opens, under the Premiership of Earl Russell. Besides Lord Palmerston, Mr. Cobden and Cardinal Wiseman also passed away, the former in the prime of his political activity, the latter to be succeeded by an abler and more vigorous ruler in Archbishop, afterwards Cardinal, Manning.

On February 1, 1866, the Queen opened the new Parliament in person for the first time since the death of the Prince Consort; and Mr. Gladstone, on behalf of the Government, at once introduced the new Reform Bill. It suffered, however, two defeats in the House of Commons, Lord Russell resigned, and Lord Derby became Premier. But eventful as had been the political arena, the financial crisis of May caused even greater excitement. The suspension of the great firm of Overend and Gurney brought widespread disaster, and "Black Friday," May 11, will long remain a black-letter day in the annals of English commerce. The suspension of the Bank Act was, of course, inevitable, while the general situation was aggravated by the spread of the cattle disease, in spite of all efforts to prevent it, and a slight attack of cholera in London. Abroad, save for a Fenian attempt on Canada which was easily suppressed, the horizon seemed calm until, on June 12, war was suddenly declared between Prussia and Austria. The struggle was sharp

and short, and in seven weeks was ended by the defeat of Austria at the battle of Sadowa, where the Prussians first evidenced their wonderful military improvement. Venetia was ceded to France by Austria, and then transferred to Italy as a reward for her adherence to the fortunes of Prussia. The commercial depression still continued to mark the following year (1867), and many serious disputes between masters and workmen were the natural consequence. We may perhaps set down to the general feeling of unrest, which was not lessened by the Reform agitation, during which an immense crowd "demonstrated" in Hyde Park in spite of the prohibition of the Government, the Fenian attack on Chester, and the explosion at Clerkenwell prison, in the vain hope of rescuing certain Fenian prisoners. However, Lord Derby's Government, in spite of defections, pressed on the Reform measure. On August 15 the bill became law, and the working classes took their place by the side of the middle and upper classes, as the supreme arbiters of the national policy. Abroad, the expedition against King Theodore of Abyssinia was commenced; and the consolidation of British North America finally completed by the formal inauguration of the Dominion of Canada. The next year, soon after Mr. Disraeli had succeeded Lord Derby, who. by reason of failing health withdrew from official life, in the Premiership, Mr. Gladstone carried his famous Irish Church resolutions against the Government. Parliament was therefore dissolved, and on an appeal to the people, he obtained a decisive majority in support of his proposals, and naturally took office as Prime Minister. The next year, 1869, the measure for disestablishing the Irish Church was at once introduced, and on July 26, it received the royal assent. In 1870 legislation was very busy; the Irish Land Bill establishing a sort of tenant right all over Ireland was introduced, and pushed through both houses with equal energy. A new system of national elementary education was established by Mr. Forster's bill, which provided for the establishment of School Boards in every district, and their maintenance by local rates.

On the Continent the opening of the Suez Canal was celebrated by a brilliant ceremonial, and after three centuries a general council assembled at the Vatican for the formal promulgation of Papal Infallibility. But such events were completely dwarfed by the sudden outbreak of war between France and Germany. The French were worsted from the very first, and their speedy defeat led to the deposition of Napoleon III., the establishment of the present French Republic, and in the following year to the consolidation of Germany, under the King of Prussia with the style of Emperor of Germany. Undisturbed, however, by events outside, Mr. Gladstone still pursued in 1871 his work of reform. Thwarted by the House of Lords in an attempt to effect his purpose by legislation. he abolished purchase in the army by means of a royal warrant dated July 20. The University Tests Bill, admitting all lay students to Oxford and Cambridge on equal terms, the Trades Union Bill, the Bank Holiday Bill, and the establishment of the Local Government Board were some of the principal measures placed on the statute-book. The practice of Autumn Manœuvres for the army was commenced, and the Geneva Convention settled our long-standing dispute with the United States respecting our responsibilities for the alleged piracies of the Alabama. Towards the end of the year, the critical illness of the Prince of Wales awakened widespread interest, which was acknowledged by the public thanksgiving for his recovery early in the new year 1872. In political affairs the year was, compared with its immediate predecessors, unfruitful; the Ballot Act and a modified Licensing Act being the chief results of the Parliamentary Session. Outside the House, however, the organisation of the Agricultural Labourers' Union, and the result of the famous Tichborne trial, divided public attention. Meanwhile the nation generally rejoiced in increasing prosperity, which was perhaps evidenced particularly by the extraordinary rise in the price of coal, sometimes to as much as 80 per cent. In India, the assassination of the Governor General, Lord Mayo, deprived the nation of an admirable administrator, while the meeting of Stanley and Livingstone in Africa, recalled public attention to a noble and unique career.

By this time the wave of popular enthusiasm which had carried Mr. Gladstone and his party into office seemed to have spent its force. and sinister omens for the future were not wanting. In 1873 the rise of the Irish Home Rule party under the leadership of Mr. Isaac Butt caused new difficulties, and in the division on the Irish University Bill, the Government were left in a minority. They resigned at once; but as Mr. Disraeli refused to take office without a working majority, Mr. Gladstone consented to carry on the Government, but in February, 1874, suddenly dissolved Parliament. The return of a large majority against him sufficiently showed the temper of the country. Mr. Disraeli naturally once more became Prime Minister, while Mr. Gladstone amused himself in his retirement, by issuing a pamphlet on the Papal claims which stirred up an exciting controversy. In other respects the year was uneventful and we need only mention the successful conclusion of the Ashantee expedition, the marriage of the Duke of Edinburgh to the daughter of the Czar, the outbreak of a strike among the agricultural labourers in the Eastern Counties, and the death of Dr. Livingstone in Central Africa. In the succeeding year, 1875, the Conservative Government attempted very little domestic legislation; all the more as Mr. Gladstone announced his final retirement from the Liberal leadership, in which position he was succeeded by the Marquis of Hartington, while matters abroad remained fairly uneventful. An unsuccessful attempt at South African federation, a dispute with Burmah, and the visit of the Prince of Wales to India may be noted. The mission of Mr. Cave to arrange the finances of Egypt, and the Commission on Foreign Loans, were matters of less importance, perhaps, than the purchase in November of the Khedive of Egypt's shares in the Suez Canal, which gave England an effective, if not a predominant, voice in the control of that international waterway. In 1876, the ever-recurring difficulties of the Eastern question, due largely to the encroachments of Russia on Turkey, were brought to a crisis by the occurrence of the Bulgarian massacres, which the Sublime Porte seemed unable either to prevent or to redress; and the agitation was inflamed by a memorable speech of Mr. Gladstone's at Blackheath, when he advocated the expulsion of the Turk "bag and baggage" from Europe. The policy of the Government, on the contrary, was rather directed to restraining the

advance of Russia on Constantinople, so that when war broke out between Turkey and Russia, and the latter, in the following year, 1878, seemed likely to prevail, the British fleet was sent to the Dardanelles, and an Indian Contingent brought to Malta in preparation for eventualities. In the result, however, a collision between England and Russia was averted, and when a treaty between the belligerents was concluded at San Stefano, Mr. Disraeli, now created Earl of Beaconsfield, insisted that it should be submitted to a congress of the great powers. This met at Berlin, and Lord Beaconsfield and Lord Salisbury were present as the representatives of England. Matters, however, had been practically arranged beforehand, and the Eastern Question was settled for the time by the Treaty of Berlin. By this, Cyprus became a British possession, and the great powers joined in guaranteeing the safety of the Christian subjects of the Sultan, results which Lord Beaconsfield, on his return to England, epitomised in the famous epigram that he had brought home, "Peace with Honour."

In addition to these anxieties, difficulties arose on the Afghan frontier of India, where the Ameer refused to receive a British Mission, and shortly afterwards murdered the British envoy, Sir Louis Cavagnari. These troubles emphasised the necessity for what Lord Beaconsfield termed a "scientific frontier," and Sir Frederick Roberts received orders to occupy Cabul. At home during this year, trade was dull and depressed, and in a strike of cotton operatives at Blackburn, serious damage and disturbance took place, while the death of the Princess Alice, and in September, a fearful collision in the Thames, by which between 600 and 700 persons lost their lives, cast a heavy gloom over the events of the year. Nor was the new year, 1879, more prosperous. Trade, and especially agriculture, grew worse instead of better; nor could the appointment of a Royal Commission to investigate the causes be expected to afford much alleviation. In Parliament, Mr. Parnell had now assumed the lead of the Irish Home Rule party, and his obstructive tactics in Parliament seriously hindered all legislation. He roundly denounced "landlordism," and organised an "anti-rent" agitation, demanding a "fair" reduction, and advising the tenants to keep a "firm grip" of the land. In South Africa the successful conduct of the war against Cetywayo, the chief of the Zulus, was qualified by the disaster at Isandlana, where Lord Chelmsford was defeated by the Zulus with considerable loss, a disaster which was hardly atoned for by the brilliant defence of Rorke's Drift by Lieut. Chard. Among domestic events may be noted the establishment of the Victoria University, now including colleges at Manchester, Liverpool, and Leeds; the marriage of the Duke of Connaught, the elevation of John Henry Newman to the Cardinalate, and the destruction of the Tay Bridge in a fearful storm together with a train then passing over it without a single survivor to tell the tale.

Early in the next year, 1880, Lord Beaconsfield dissolved Parliament, and, as the result was a large majority against him, he at once resigned, and Mr. Gladstone once more became Prime Minister. In spite of Irish obstruction and the "Bradlaugh difficulty," the Government managed to carry the Burials Bill, the Ground Game Bill, and the Employers' Liability Bill, as well as to effect other reforms, the substitution of a beer duty for the malt tax, and considerable improvements in the Post Office. Ireland, however, monopolised attention, and the Relief of Distress Bill soon passed into law, but the Compensation for Disturbance Bill was thrown out by the Lords, with the result that agrarian agitation increased, and the attack on Captain Boycott commenced the peculiar form of warfare called after his name. Matters in Afghanistan again caused trouble, but Sir Frederick Roberts effected a forced march to Candahar and soon crushed the revolt of Ayoob Khan. In South Africa the Boers rebelled against the annexation of the Transvaal, and after the English had sustained three several defeats, an armistice was arranged, and the annexation rescinded early in 1881, reserving only the suzerainty of England in foreign affairs. With the new year the Irish difficulty grew still more serious, and a reign of terror prevailed in Ireland to such an extent that Mr. Forster introduced his Coercion Act. This was answered by the advocacy by Mr. Parnell of "prairie value," which Mr. Gladstone rightly described as a "gospel of public plunder," while attempts to blow up Liverpool Town Hall, Salford Barracks, and the Mansion House in London by dynamite, further increased public anxiety. Later in the year, Mr. Parnell was arrested and the Land League proclaimed, while the Land Act was accepted generally in Ulster. In England, a bad harvest strengthened an agitation for "fair trade," while the Farmers' Alliance demanded a Land Bill, such as the Irish Bill, for England. The census this year recorded a population of over 35,000,000 for the United Kingdom, while the issue of the Revised New Testament marks a notable epoch in the history of our English Bible. In India, the policy of non-intervention was steadily followed, and in Canada, the Governor-General, the Marquis of Lorne, with his wife, the Princess Louise, made a successful progress through the Dominion. The death of Lord Beaconsfield at home, and the assassinations of the Czar in Russia, and of President Garfield in America, made the year's obituary more than usually noteworthy. In 1882, though the state of Ireland continued to cause anxiety, the release of Mr. Parnell in accordance, as was alleged, with an understanding nicknamed the "Kilmainham Treaty," augured some improvement. Suddenly, however, in May the country was startled by the murder of Lord Frederick Cavendish, the new Irish Secretary, and Mr. Burke, in Phœnix Park, Dublin, by the "Invincibles," the extreme wing of the Irish agitators, an event which naturally threw affairs into new confusion.

Later in the year interest was shifted to Egypt, by the uprising of a national party under Arabi Pasha. The Khedive had accepted the English and French terms, but was overruled, and an English fleet bombarded the Alexandrian forts. At the battle of Tel-el-Kebir, Arabi was defeated, and sent an exile to Ceylon, while Sir Evelyn Wood remained in command of the Egyptian army. In Parliament, Lord Randolph Churchill and his four followers, the "Fourth Party" as they were termed, added greatly to the difficulties of the Government. The harvest fortunately proved moderately good, while the marriage of Prince Leopold, and the formal opening of the Law Courts, and of Epping Forest by the Queen in person, may be noted as the chief functions of the year. The following year, 1883, was marked by no events of quite equal importance. The appearance of Mr. Henry George's book on "Progress and Poverty" however largely stimulated the demand for Land Nationalisation, which

Digitized by Google

was further strengthened by an inferior harvest and consequent depression in agriculture. The capture of the Phœnix Park murderers was at length effected, and the more guilty suffered the extreme penalty of the law. James Carey, who turned Queen's evidence, was scarcely more fortunate, for in spite of all precautions to ensure his safety, he was shot dead on shipboard as he was seeking a new home in a foreign land. Explosions at Birmingham and elsewhere, showed that the dynamite miscreants were still active, and a stringent Explosives Bill was passed, the Irish members being the only serious dissentients. In India, so much excitement was aroused by the proposal of Mr. Ilbert to give native magistrates power to try Europeans, that it was considerably modified before it was passed into law.

In the Soudan the state of affairs became very critical; an Egyptian Army under Hicks Pasha was annihilated, and the leader killed by the supporters of the Mahdi, the subjugation of the Soudan thus becoming a matter of pressing importance. The following year, 1884, was marked rather by preparation than actual accomplishment. The principle of Household Suffrage was at length accepted by both parties, and a compromise after much negotiation arrived at, which added some two millions (mainly agricultural labourers) to the voters of the nation, while the general lines of a comprehensive scheme of redistribution were also mutually agreed upon. The crisis in the Soudan was tentatively met by the despatch of General Gordon to Khartoum, where he for many months held the forces of the Mahdi at bay. At first no attempt was made to reinforce him, but after long delay, in the autumn Lord Wolseley was sent with a relieving force, and arrived at Cairo in September; the rest of the year being spent in preparations. Unfortunately all help came just too late, for when Sir Charles Wilson reached Khartoum on January 28th, 1885, he learnt that Gordon had fallen two days earlier, and the place was in the hands of the Mahdi. The state of Ireland, as before, demanded much attention, but no events occurred particularly worth noting. The dynamiters, however, still advertised their activities by abortive explosions at Victoria Station, Scotland Yard, and London Bridge; while on the west coast of Scotland, the Scotch Crofters hastened to imitate the policy and the methods of Irish agitation. In South Africa Sir Charles Warren was able to establish a British Protectorate in Bechuanaland, while in Australasia the hand of the Colonial Office was forced, and England was compelled, rather against her will, to annex a large part of the Island of New Guinea.

In purely home events, the marriage of the Princess Beatrice to Prince Henry of Battenberg, and the early death of Prince Leopold at Cannes, mingled joy and sorrow in the Royal Family; while the death of Mr. Fawcett deprived the nation of one whose great abilities successfully overcame the usually unsurmountable difficulties caused by loss of sight. The acceptance of a peerage by the Poet Laureate and the fortunate success of the Health Exhibition at South Kensington ought not to go unrecorded. The early days of 1885 were, as already noticed, shadowed by the catastrophe at Khartoum, while the new Franchise Bills were passing through their final stages. In view of an early appeal to the nation Mr. Chamberlain and the Radical leaders endeavoured to force on the Liberal party an "unauthorised programme." Mr. Parnell on his part boldly declared that the minimum of the Irish demands was the restoration of Grattan's Parliament, and after that, any further concessions that could be obtained. The Prince and Princess of Wales visited Ireland and were received with enthusiasm, though no political results followed, or, indeed, were expected. In the summer Mr. Gladstone's Ministry was defeated on the Budget proposals, and Lord Salisbury took office, though in the general election which took place late in the autumn the Conservatives were left in a minority, the numbers being 333 Liberals, 251 Conservatives, and 86 Parnellites, thus giving the balance of power to Mr. Parnell, in spite of Mr. Gladstone's appeal for a distinct majority. In the election campaign Mr. Chamberlain was especially prominent, and in his sneers at the Conservative "Cabinet of Caretakers," and at the "Rip Van Winkles" of the more moderate Liberals, spared neither friends nor foes. He seemed to care neither for the disapprobation of Mr. Gladstone, nor for Lord Rosebery's appeal to all Liberals to unite under the great "Gladstone umbrella."

Abroad, matters during the year caused anxiety. In Egypt the financial position proved troublesome. In India, the advance of Russia caused apprehension as to the frontier of Afghanistan. In Southern Asia the King of Burmah, Theebaw, was deposed, and his territory formally annexed to the British dominions. Though there were signs that the Salisbury Government were ready to make some advances to the Irish party, it was clear that Mr. Parnell would find it of much greater advantage to secure the alliance of Mr. Gladstone, whose attitude to the Home Rule question was as yet undefined. Early in the next year, 1886, it became evident that union between the Liberals and the Parnellites was possible. The Conservative Government was thrown out on a side issue, and Mr. Gladstone resumed office with the express purpose of introducing and carrying Home Rule for Ireland. To this, however, the moderate side of the Liberal party refused to agree, and the Bill was rejected by a majority of 30. It therefore became evident that the two wings of the Liberals must part company, and the general election which followed an appeal to the country decided indisputably against Mr. Gladstone's view. The numbers were 316 Conservatives, 76 Liberal Unionists, against 192 Gladstonians and 86 Parnellites, giving the opponents of Home Rule a majority of over 100.

Lord Salisbury resumed office, with Lord Randolph Churchill as leader in the Commons, and with the active co-operation of Lord Hartington and the Liberal-Unionist party. The defeat of the Home Rule agitation naturally resulted in something very like civil war in Ireland. The Land League renewed its agitation, a "Rent War" was started, and the "Plan of Campaign"—the refusal of rent unless the demanded reduction was conceded—was in general operation in spite of its declared illegality. Throughout both countries the controversy was vehemently carried on, and a large number of bye-elections showed a slight gain to the Gladstonians. The Government, however, held on their way undisturbed, and even Lord Randolph Churchill's unexpected resignation, though vexatious and annoying, merely made room for Mr. Goschen as Chancellor of the Exchequer, with Mr. W. H. Smith as leader of the Commons. All this interest and excitement in public affairs naturally enough gave new vigour to socialistic and revolutionary ideas, which now began to attain a new

Digitized by Google

prominence; and a violent collision with the police in a proclaimed demonstration at Trafalgar Square caused much public excitement. Fortunately, however, affairs abroad caused much less disquiet. India remained practically undisturbed, and the activity of the Imperial Federation League helped to draw closer the ties between England and her Colonies, even if it produced no more practical result.

In 1887 the central incident was the celebration of the Queen's Jubilee at Westminster Abbey on a magnificent scale and under the happiest conditions. The spontaneous loyalty of the nation and of the whole empire to the throne was most effectively manifested. Public affairs became more hopeful. Under Mr. Balfour's vigorous rule the attempts of the Irish at disorder were visibly checked, while the temporary absence of Mr. Parnell from public affairs operated in the same direction. Abroad affairs remained quiet, and the annexation of British Beluchistan to India, and of East Zululand to Natal, are the only items that need be recorded. Though on the Continent the succeeding year 1888 was marked by the deaths of two German Emperors, in England affairs were, comparatively speaking, uneventful. The contest between the coercion and the anti-coercion policies was carried on with unabated vigour on both sides, with little result save the assembling of the Special Commission appointed to investigate the charges made by the *Times* against the Irish leaders in the pamphlet known as "Parnellism and Crime." At the same time the revolutionary doctrines of Ireland were adopted by advanced politicians in Wales, and by the supporters of the Crofter agitation in the West of Scotland. This year also the Metropolitan Board of Works was put an end to by the Local Government Act, which made London a separate county and gave it a council in common with the other counties of England and Wales. Now for the first time the millions inhabiting the metropolitan area were afforded the opportunity of attaining some share of that corporate life, which characterises municipalities in all other parts of the kingdom.

The centenary International Exhibition at Paris that marked the year 1889 is the only event of particular moment, though in England the spread of advanced ideas on social questions, either the cause or the effect of the great Dock Strike, and the unsuccessful attempt to coerce the management of the South Metropolitan Gas Company, will make the year memorable in labour annals, particularly as noting the first organisation of unskilled labour. Under these conditions and remembering that political partizanship was expressly discountenanced, it is hardly wonderful that the first election to the new County Council should have resulted in the return of a large "Progressive" majority. The choice of Lord Rosebery, however, as chairman, moderated their enthusiasm, and at the same time gave him a useful lesson in the working of a democratic organisation. The position in Ireland showed some improvement, though the Plan of Campaign was still frequently enforced, and in one instance, Gweedore, the conflict reached something like a crisis. The result of all this was that the Unionist forces drew closer together, partly, perhaps, because the result of the bye-elections proved unexpectedly favourable to their opponents. Abroad the outlook continued to be more hopeful, the good results of English management in Egypt were becoming more manifest, while Mr. Stanley's wonderful "rescue" of Emin Pasha and subsequent march to the coast excited widespread enthusiasm. India remained quiescent and orderly, and the visit of the Duke of Clarence proved a conspicuous success. This year the death of Mr. John Bright removed one of the greatest of our Parliamentary orators, though of late years he had rather fallen out of popular notice.

The year following was marked by the disastrous events which shattered the solidarity of the Irish party and postponed the attainment of Home Rule indefinitely. Early in the year the "Parnell" Commission, which had spent the preceding year in hearing evidence, reported that Mr. Parnell and certain other prominent Home Rulers had been guilty of "a criminal conspiracy" to defeat the law, and of intimidation to gain their own ends. Worse than this, however, was to follow; Mr. Parnell was an undefended co-respondent in the divorce suit of O'Shea *v.* O'Shea and Parnell, under circumstances of more than ordinary depravity. It was clear that, from the English point of view, his continuance in the Irish leadership was impossible, and Mr. Gladstone declared that it would "reduce his own leadership to a nullity." On this the Irish party, who had quietly re-elected Mr. Parnell to the chairmanship, reconsidered their position. After vehement and passionate discussion in Committee Room No. 15, the large majority were against him. Mr. McCarthy was elected in his place, a policy which was generally supported throughout Ireland by the Irish bishops. Mr. Parnell, however, with a small band of zealous supporters still made a strong fight, and Ireland was distracted by the contending factions. All this naturally lessened opposition in Parliament, so that Free Education, an Irish Land Purchase Bill, and a Tithe Bill with some other measures were passed without trouble before the session ended.

Turning to other matters, we must record a crisis in the City, due to the practical collapse of the great house of Baring Brothers, and complicated by a crisis in New York. Labour troubles moreover came to a head in strikes among dock-workers at Liverpool and Cardiff, a railway strike in Scotland, and abortive attempts at insubordination among the police and the Post Office employés. This year the Archbishop of Canterbury, in his famous "Lincoln Judgment," practically ended the long controversy as to ritual in the Church of England, while in the world of philanthropy, General Booth's appeal for help in "Darkest England," though severely criticised in many quarters, was generously responded to by the public. Abroad, matters continued to be prosperous and tranquil, and the Anglo-German Agreement, defining the respective spheres of German and British influence in Africa, provided a settlement satisfactory to both parties, though the Cape Colonists complained that they were not consulted. Compared with its predecessor the year 1891 was uneventful, though it saw the deaths on the same day of Mr. W. H. Smith, the leader of the Commons, and of Mr. Parnell, who contracted a chill while vainly endeavouring to regain his position in Ireland.

In the parliamentary world the shadow of the approaching general election made itself felt, while in Irish politics the disasters of the Irish party ensured comparative tranquillity and an immense improvement in the maintenance of law and order. In the Liberal party the adoption of the "multifarious" Newcastle programme evi-

Digitized by Google

denced the belief of the party managers that Home Rule no longer held the field, and that it was necessary to appeal to as wide a constituency as possible. Abroad, the general tranquillity was hardly qualified by the outbreak at Manipur, or the commercial crisis which prevailed in Australia, while Egyptian affairs remained satisfactory, and in South Africa, Mr. Rhodes and the British South Africa Company successfully effected the colonisation of Mashonaland. The early days of 1892 were saddened by the death of the Duke of Clarence, who succumbed to a severe attack of the influenza which was then widely prevalent. The event caused general sorrow, not lessened by the fact that his engagement with his cousin, the Princess Victoria Mary of Teck, had only recently been announced. Parliament, in the leadership of which Mr. Balfour had succeeded the late Mr. W. H. Smith, oppressed by the impending dissolution, did little, and the appeal to the nation resulted in a Liberal majority of 40—the numbers being, Conservatives 268, Liberal Unionists 47, Gladstonians 270, Labour and Parnellites 85. On its reassembling a vote of No Confidence was carried by a majority of 40, and Lord Salisbury consequently resigned.

Mr. Gladstone thus became Prime Minister for the fourth time, with Mr. Asquith at the Home Office and Lord Rosebery Foreign Secretary, but active measures were necessarily postponed till the coming year. Of other events at home we may note a second Progressive majority at the election for the County Council, which emboldened the advanced party to conceive and carry out the formation of a works department, and the payment of all wages at Trade Union rates. In the commercial world, or rather on its outskirts, the failure of the Liberator Building Society and its allied undertakings caused widespread distress. In Church matters the confirmation of the Lincoln judgment by the Privy Council, and the deaths of Cardinal Manning (two years after the death of Cardinal Newman) and Mr. Spurgeon, excited general interest, while the passing away of Lord Tennyson removed, full of years and honours, the greatest poet of the Victorian era.

Abroad, matters continued to be satisfactory. In India the climbing of the Himalayas by Mr. Conway and his companions was perhaps the most notable event. In Egypt prosperity continued, though the death of the Khedive Tewfik, and the accession of his son Abbas, a youth of 16, caused some anxiety. In South Africa generally, rapid progress was made in developing the gold mines in the Transvaal, and the diamond mines at Kimberley, while the colonisation of Mashonaland advanced satisfactorily. On the reassembling of Parliament in 1893 Mr. Gladstone, as was expected, introduced his second Home Rule Bill, which after passing its second reading by 40, and third reading by 34, votes, was eventually thrown out in the Lords by 419 to 41. In the fulfilment of Government pledges, a Suspensory Bill preliminary to the disestablishment of the Welsh Church was introduced, and also a measure popularly termed the Parish Councils Bill, for extending local self-government to the parishes, in the same way as it had already been granted to the county councils. The first of these was not persisted with, but the Parish Councils Bill was practically carried through in an autumn session, though not formally passed till the next year. In July the wedding of the Duke of York and the Princess Victoria Mary of Teck was celebrated amid great public rejoicings, and the Queen returned thanks in a letter to the nation. In the labour world the strike of the coal-miners for a "living wage" aroused much public sympathy, and was at length ended rather in favour of the miners by a conference of the contending parties under the presidency of Lord Rosebery. Abroad, there was some slight anxiety in Egypt caused by an affectation of independence by the young Khedive, while in Africa Nyassaland was constituted the British Central Africa Protectorate immediately under British control.

The event of the next year, 1894, was the unexpected resignation of Mr. Gladstone and the accession of Lord Rosebery to the Premiership. In Parliament, the Parish Councils Bill was formally passed, and Sir William Harcourt's Budget proposals, involving a graduation of the death duties and other innovations, carried in spite of a persistent opposition, while an Evicted Tenants Bill for Ireland was eventually thrown out by the House of Lords. Outside Parliament the most notable events were the formal opening of the Manchester Ship Canal by the Queen in person, the birth of a son to the Duke and Duchess of York, and a close election of the School Board resulting in the equalisation of the two opposing parties on the board. The opening of the Parliamentary session of 1895 carried with it persistent rumours of an early dissolution, or at least of disagreements in the Ministry. It was not, however, till midsummer that their defeat, on a small matter in Supply, led to their resignation, the succession of the Conservatives under Lord Salisbury, the dissolution of Parliament, and the collapse for the time being of the Liberal party, the Conservatives returning to power with the huge majority of 150.

Before the crisis, however, the Welsh Disestablishment Bill was re-introduced and good progress made with it, and an Irish Land Bill was read a second time. The most notable feature of the session, however, was the resignation of Mr. Speaker Peel and the election of Mr. Gully in his place, at first by the small majority of 11, but after Parliament had reassembled by a unanimous vote. Outside Parliament there were few matters of interest, but we may note that the London County Council election resulted in an exact tie, 59 Progressives and 59 Moderates, while Lord George Hamilton was chosen Chairman of the School Board in the place of Mr. Diggle. Jabez Balfour at length stood his trial at the Old Bailey for his share in the Liberator frauds, was found guilty and sentenced to 14 years' penal servitude. At the end of October the Duke of Cambridge resigned the office of Commander-in-Chief, and was succeeded by Lord Wolseley. The appointment of Lord Acton to the Regius Professorship of Modern History at Cambridge, the first Roman Catholic Professor at the Universities since James II., and the conferment of a knighthood on Henry Irving, the actor, ought not to be overlooked, nor the death of Lord Randolph Churchill earlier in the year, which ended a very notable but chequered and disappointed career. Abroad India still remained tranquil, and the delimitation of the Pamir boundary between Russian territory was amicably completed. In Africa the territories of the Imperial British East Africa Company formally became the British East African Protectorate under the control of the Foreign Office, and Bechuanaland a part of Cape Colony. There were, however, some few troubles to qualify the general tranquility. In Armenia reported outrages and massacres by the Turkish troops roused much

public indignation, and great public meetings were held to demand guarantees against their recurrence. In Ashanti, the King Prempeh showed himself refractory, so that an expedition had to be sent to enforce the British ultimatum. At the end of the year an ill-advised pronouncement by President Cleveland on a small dispute between England and Venezuela caused some alarm, and for the moment hostilities between England and America seemed to be within measurable distance.

With the new year, 1895, however, the centre of interest was suddenly shifted to South Africa by a series of events which are too fresh in the public mind to need more than the briefest mention. An unexplained and unsuccessful raid on the territories of the South African Republic by Dr. Jameson and a force of the British South Africa Company, all but involved this country in war, a danger not lessened by a bellicose telegram to President Krüger, in which the youthful German Emperor seemed to take up a definitely hostile position towards Great Britain. The crisis, however, passed away, though the trial and conviction of Dr. Jameson and his followers, the resignation of Mr. Rhodes, and serious fighting in Rhodesia kept up the public interest. Later in the year, however, renewed outrages in Armenia excited renewed agitation against the Turk, and the visit of the Czar to the Queen at Balmoral, though nominally private, was, it may be hoped, made the opportunity for deciding on united action. Amid these alarms and excursions, home politics have been comparatively quiet, though, in spite of the disorganisation of the Opposition, the Government Education Bill was withdrawn, largely owing to divided counsels among its friends, and the session rendered comparatively fruitless. Since Parliament dispersed the resignation of the Liberal leadership by Lord Rosebery has further complicated matters, and developments will be awaited with more than usual interest.

What the future may have in store none can wholly foretell, but this much may be said, that the exceptional length of Queen Victoria's reign finds the throne and the empire, morally, materially and socially stronger in resource and more firmly established than at any previous time more than ever "broad-based upon the people's will." Of the Queen herself there is no need to speak here. But we may conclude with a short account of the many personal changes through which she has lived, which will impress upon the reader more deeply than any mere words the unique significance of her lengthened and honorable reign. Her Majesty has outlived all those Members of the House of Lords who sat there at her accession, and all the members of her first House of Commons, except Mr. Gladstone, Mr. C. P. Villiers, Mr. J. Temple Leader, and possibly one or two more. She has seen six Archbishops at Canterbury, the same number at York, five Bishops of London, and every episcopal see vacated at least twice, and many of them four or five times. Eleven Lord Chancellors have received the Great Seal at her hands. Ten Prime Ministers and six Speakers of the House of Commons have taken office during her reign, and she has survived every member of her first Privy Council. To find in the closing years of her long rule her people stronger, her empire wider, and her own person more beloved than ever, is a happier fate than has befallen any of her predecessors. Every reader of the Almanack will join in the universal wish, that her Majesty may still have several years of further happiness and prosperity, and that the day may yet be distant, when, in the fulness of years and honours, she shall pass on to her successor, her sovereignty over the British people and the British Empire.

SUMMARY OF EVENTS, 1837–96.

The Queen's Accession, 20 June	1837	The Abyssinian War; Cost £10,000,000	1867
"Great Western" steamed to New York	1838	Transportation of convicts abolished	1868
The Electric Telegraph first constructed	1838	The Capitulation at Sedan	1870
Aden captured and settled	1839	Rome again became the Capital of Italy	1870
Marriage of Queen Victoria, 10 Feb.	1840	The Irish Church was disestablished	1871
Penny Postage commenced, 10 Jan.	1840	The first London Board School opened	1873
New Zealand made a separate colony	1841	Queen proclaimed Empress of India	1876
Hong Kong taken from the Chinese	1841	Cyprus occupied	1878
Birth of the Prince of Wales, 9 Nov.	1841	The Tay Bridge disaster	1879
The re-imposition of the Income Tax	1842	The Death of Lord Beaconsfield, 19 April	1881
The Franklin Expedition	1845	End of Afghan War: Cost £23,500,000	1882
Repeal of the Corn Laws, 26 June	1846	British Occupation of Egypt commenced	1882
The Irish Potato Famine	1846	Burmese Empire entirely annexed	1886
The Sikhs defeated at Chilianwallah	1849	The Queen's Jubilee, 20 June	1887
Queensland formed into a province	1850	British South Africa Co. chartered	1889
The Death of Sir Robert Peel	1850	Western Australia a self-governing colony	1890
Victoria formed into a province	1850	The Forth Bridge opened, 4 March	1890
The First International Exhibition	1851	The Death of the Duke of Clarence, 14 Jan.	1892
The Duke of Wellintgon died, 14 Sept.	1852	H.M.S. *Victoria* sunk, 22 June	1893
The Battle of Balaclava, 25 Oct.	1854	First Matabele War	1894
The Battle of Inkerman, 5 Nov.	1854	The Tower Bridge opened, 30 June	1894
Second Burmese War; Pegu annexed	1850–53	The Manchester Ship Canal opened	1894
Oude annexed; Lord Canning Viceroy	1856	British Guiana-Venezuela dispute	1895
Mutiny commenced at Meerut, 10th May	1857	Chino-Japanese War ended	1895
India transferred to the Crown, 1st Sept.	1858	A Conservative Majority of 152	1895
Jewish disabilities entirely removed	1860	The Chitral Expedition	1895
The Queen last visited Ireland	1861	The "Liberator" Directors' trial	1895
The Death of the Prince Consort, 14 Dec.	1861	The Ashanti Campaign	1895
Slavery abolished in the U.S., 18 Dec.	1862	Dr. Jameson's Raid	1896
The Death of Lord Palmerston, 18 Oct.	1865	Second Matabele War	1896
The Confederation of Canada	1867	The Dongola Expedition	1896
The Second Reform Act passed	1867	The Czar visited Balmoral	1896

(a) Not known.

WHITAKER'S ALMANACK, 1897.

On the morrow of St. Martin (12th November) certain high officials, usually the Lord President of the Council, the Chancellor of the Exchequer, the Lord Chancellor, several Judges, the Clerk of the Council, and others, assemble in the Court of the Queen's Bench Division of the High Court of Justice, and after certain ceremonies have been gone through, three gentlemen are nominated for the office of Sheriff for every one of the counties of England and Wales; Cornwall is nominated by the Prince of Wales as Duke of that county; and Lancaster, by its Duke the Queen. The three names, engrossed upon a parchment roll, are afterwards brought before Her Majesty, who then, with a golden bodkin, pricks through the parchment against one name for every county. The name thus pricked is usually the first on the list, and they come into office after Hilary Term. The following is a list of the gentlemen thus nominated whose names stand first upon the roll:—

BEDFORDSHIRE.—George James Gribble, Henlow Grange, Biggl wade.
BERKSHIRE.—Frank Walters Bond, Wargrave Hill, Wargrave.
BUCKINGHAMSHIRE.—Major Alexander Finlay, Littlebrickhill.
CAMBRIDGE AND HUNTINGDON (SHIRES).—Edmund John Mortlock, Great Abington.
CHESHIRE.—William Henry Verdin, Darnhall Hall, Winsford.
CORNWALL.—
CUMBERLAND.—Col. Thomas Angelow Irwin, Lynehow, Carlisle.
DERBYSHIRE.—Michael M'Creagh Thornhill, Stanton Hall, Bakewell.
DEVONSHIRE.—Sir Charles Daniel Cave, Manor House, Sidbury.
DORSET.—William Montagu Calcraft, Rempston Hall, Wareham.
DURHAM.—Col. Lancelot Allgood Gregson, Burdon, Sunderland.
ESSEX.—Edward Murray Ind, Coombe Lodge, Gt. Warley.
GLOUCESTERSHIRE.—James Dugdale, Seasoncote House, Moreton-in-the-Marsh.
HEREFORDSHIRE.—Capt. John Greers Cotterell, Garnous, Hereford.
HERTFORDSHIRE.—John Henry Buxton, Hunsdonbury, Ware.
KENT.—R. C. Miller, Oakfield, Dartford.
LANCASTER.—
LEICESTERSHIRE.—Edward Handley Warner, Quorn Hall, Loughborough.
LINCOLNSHIRE.—Thomas Cheney Garfit, Kenwick Hall, Leybourne.
LONDON, COUNTY OF.—Henry James Lubbock, 15 Lombard Street, E.C.
MIDDLESEX.—A. F. Govett, Laleham.
MONMOUTHSHIRE.—Charles Montague Compton-Roberts, Drybridge, Monmouth.
NORFOLK.—Major George Nathaniel Mickelthwait, Taverham Hall.
NORTHAMPTONSHIRE.—Pickering Phipps, Rushton Hall, Kettering.
NORTHUMBERLAND.—Sir John Walter Buchanan Riddell, Bart., Hipple, Rothbury.
NOTTINGHAMSHIRE.—Phylo Laos Mills, Ruddington.
OXFORDSHIRE.—A. Harcourt, Nuneham.
RUTLAND.—H. C. Jervoise, Langham.
SHROPSHIRE.—John Baddeley Wood, Henley Hall, Ludlow.
SOMERSET.—Henry Martin Gibbs, Barrow Court, Barrow Gurney.
SOUTHAMPTON, COUNTY OF.—Godfrey Baring, Nubia House, West Cowes.
STAFFORDSHIRE.—William Bealey Harrison, Aldershaw, Lichfield.
SUFFOLK.—Edward Walter Greene, Nether Hall, Pakenham.
SURREY.—William Keswich, Eastwick Park, Great Bookham.
SUSSEX.—William Dodge James, West Dean Park, Chichester.
WARWICKSHIRE.—Edward Herbert Wood, Newbold Revel, Rugby.
WESTMORLAND.—William Smith Paget-Tomlinson, The Biggins, Kirkby Lonsdale.
WILTSHIRE.—John Evelyn Gladstone, Bowden Park, Chippenham.
WORCESTERSHIRE.—Capt. Richard Frederick Britten, R.N., Kenswick, Worcester.
YORKSHIRE.—James Anson Farrer, Ingleborough.

Wales (North and South).

ANGLESEY.—Wm. Thomas, Tregarnedd, Llangefni.
BRECONSHIRE.—Stewart Williams Morgan, Bolgoed, Brecon.
CARDIGANSHIRE.—Col. William Price Lewes, Llysnewyd, Llandyssil.
CARMARTHENSHIRE.—William Joseph Buckley, Penyfai, Llanelly.
CARNARVONSHIRE.—Lloyd Warren George Hughes, Coedholen.
DENBIGHSHIRE.—Thos. Williams, Llewesog.
FLINTSHIRE.—Samuel Liebig Muspratt, Bron Haul and Rhyl.
GLAMORGANSHIRE.—Godfrey Lewis Clark, Talygarn, Pontyclun.
MERIONETHSHIRE.—Edward Owen Vaughan Lloyd, Rhaggat, near Corwen.
MONTGOMERYSHIRE.—John Lomax, Bodfach.
PEMBROKESHIRE.—Clement John Williams, Penally.
RADNORSHIRE.—Walter de Winton, Maesllwch Castle, Glasbury.

Foreign Moneys.

TABLE FOR CALCULATING THE VALUE OF ANY GIVEN WEIGHT OF STANDARD SILVER IN TROY OUNCES.

Market Price of Standard Silver in Pence per Troy Ounce.

Oz	28	28½	29	29½	30	30½	31	31½	32	33	34	35
1	28	28·5	29	29·5	30	30·5	31	31·5	32	33	34	35
2	56	57·0	58	59·0	60	61·0	62	63·0	64	66	68	70
3	84	85·5	87	88·5	90	91·5	93	94·5	96	99	102	105
4	112	114·0	116	118·0	120	122·0	124	126·0	128	132	136	140
5	140	142·5	145	147·5	150	152·5	155	157·5	160	165	170	175
6	168	171·0	174	177·0	180	183·0	186	189·0	192	198	204	210
7	196	199·5	203	206·5	210	213·5	217	220·5	224	231	238	245
8	224	228·0	232	236·0	240	244·0	248	252·0	256	264	272	280
9	252	256·5	261	265·5	270	274·5	279	283·5	288	297	306	315

By means of the above table, taken in conjunction with the column of the opposite page headed "Equivalent Weight of Standard Silver in Troy Ounces," the intrinsic value of any coin can be easily calculated with silver at several prices other than those given. It will only be necessary to take the numbers representing tenths, hundredths, and thousandths of ounces in the first column, find the numbers opposite to them in the column of the above table giving the price of silver and add these together, taking care to move the decimal point successively one, two, and three places, to the left; the result will be the coin's intrinsic value in pence.

EXPLANATORY NOTES.—France, Belgium, Italy, Greece, and Switzerland constitute what is known as the "Latin" Union, and their coins are alike in weight and fineness, occasionally differing, however, in name. The same system has been in part adopted by Spain, Servia, Bulgaria, Russia, and Roumania, but they have not joined the Union. Francs and centimes of France, Belgium, and Switzerland are respectively designated lire and centesimi in Italy; drachmai and lepta in Greece; dinars and paras in Servia; pesetas and centimos in Spain; leys and banis in Roumania; levas and stotinkis in Bulgaria. Similarly the Scandinavian countries, Norway, Sweden, and Denmark, employ coins of the same weight and fineness, their names being also alike. Most of the South American States possess a standard coin, equal in weight and fineness to the silver 5-fr. piece, generally termed a "peso." In Hayti the corresponding coin is a "gourde."

In all British colonies, English money of every denomination is current. A British dollar, identical in weight and fineness with the Japanese "yen," was authorized by order in Council in 1894, and has been made legal tender in the Straits Settlements, Hong Kong, and Labuan. The exchange value of the moneys of those countries indicated by a * is determined by the rate of exchange for the day, and may be taken as approximately that given in the last column. The rate given in the daily papers generally represents the number of the standard coins (*see* page 419) that are equivalent to one sovereign. The Spanish rate is given in terms of pence per dollar (= 2 escudos), the Russian in pence per rouble, Portuguese in pence per milreis, and the United States rate in pence per dollar. The value of other silver coins must be sought in one of the columns headed "Intrinsic Value with Silver at per Troy Ounce." The exchange value of the rupee depends on the rate for "India Council Bills." In "bimetallic" countries pure gold is generally taken as being worth 15½ times its weight of pure silver. This proportion corresponds to giving standard silver a constant value of 60¾d., as in the last column of the table.

Population of the United Kingdom.

Previous to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1813 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was in the years—

1570	4,160,221	1670	5,773,646
1600	4,811,718	1700	6,045,008
1630	5,600,517	1750	6,517,035

During the eighteenth century, manufactures attracted the rural population to towns, in consequence of which many villages were comparatively deserted. The American War and the French Revolutionary War carried off large numbers of men; and this, coupled with the removal of the rustic population, gave rise to the impression that the inhabitants of the country had decreased, and were rapidly decreasing. The first general Census in 1801 dispelled this idea, and showed that, notwithstanding all drawbacks, there were many more people than any one supposed. Since that time named there had been a fresh numbering every ten years, with the following results:—

(a) These rates have been corrected for the varying length of the intercensal periods.

‡ Exclusive of the Army, Navy, and Merchant Seamen Abroad, who numbered in 1801, 442,013; in 1811, 502,536; in 1821, 280,005; in 1831, 260,191; in 1841, 202,954; in 1851, 212,194; in 1861, 250,356; in 1871, 216,080; in 1881, 215,374; and in 1891, 224,211. ** Incorrectly taken. † Decrease.

Briefly the Census of 1891 showed an increase of 3,088,086 persons and 629,078 inhabited houses in England and Wales: in Scotland, increases of 290,074 and 78,503; in the Channel Islands and Man, an increase of 6,582 persons and of 1,627 houses; but in Ireland a decrease of 470,086 persons (or 82,961 families) and 43,530 inhabited houses; making, after these deductions, an increase of 2,854,655 persons and 685,638 inhabited houses.

In 1854 a Commission, under the presidency of the late Prince Consort, was appointed to raise and distribute a fund bearing this name, for the relief of the widows and orphans of those who might fall in the Crimean War. Successive Commissions have at different times further extended the objects of the Fund, as to enable the Commissioners to utilize the funds for the benefit of widows and children of officers and men of Her Majesty's naval and military forces. Several special funds have since been added to the administration of the Patriotic Commissioners, notably the "*Captain*," the "*Eurydice*," the "*Royal Naval Relief*," "*Rodrigues*," and the "*Victoria*" funds. On the original Crimean War Patriotic Fund 1,314 widows are still left, but statistics show their mortality to be 60 or 70 every year. Of the "Rodriguez" Fund (which was bequeathed in 1857 by Señor Rodrigues of Manila for the benefit of the families of such English subjects wounded or dying in the wars who were really indigent and necessitous) it would appear that only one case—that of a widow, whose husband was killed at the capture of the Taku Forts in 1860—has been relieved. From the "Captain" Fund there is a surplus of £13,208, which is *immediately available* for purposes of general relief of "distressed dependents of seamen who have lost their lives in the service of the Crown." The "Eurydice" Fund also shows a surplus of £2,329, which will be eventually available for the same purposes as the "Royal Naval Relief" Fund, which has already granted relief to many deserving cases. The available *income* from this latter fund is now £186. The "Zulu War" Fund appears to have been extensively employed in purposes of relief to widows and orphans and dependents of soldiers and sailors killed in the various engagements of 1879, and as further claims may be made upon this fund, there is practically no surplus which could be utilized for purposes of outside relief. The "Soldiers' Effects" Fund is applicable for military purposes only, and arises from the sale of the effects of deceased soldiers. The funds are applied preferentially to widows and orphans of soldiers who have been killed in action, or who died from wounds received in action, or from wounds or exposure when in the performance of military duties. The income of this fund in 1895 was £4,835, of which £1,061 was expended in relief. The "Victoria" Relief Fund was opened at the Mansion House in June, 1893, and the appeal met with a prompt and liberal response from the public, the final amount handed over to the Commissioners by the Lord Mayor in August of the same year being £67,586, and in addition to this amount, the sum of £5,535 was independently collected by the Mayor of Portsmouth. Relief from this fund was at first very tardily doled out, a long time elapsing before any case was considered. The apology urged by the Commissioners for this apparently inexcusable delay was that the most urgent cases had been met by the prompt action of the Admiralty in the continuation of allotments, by the Greenwich Hospital in awarding pensions, and by the efforts in the direction of immediate relief made for the sufferers by Miss Weston, of Portsmouth. This excuse scarcely seems to have met the necessities of the case, and in the evidence collected by the Commission held on the Patriotic Fund in 1896, it would appear that the public wish in regard to the distribution of relief would have been better carried out by the granting of immediate aid to the sufferers from the disaster, quite independently of the work carried on by the Admiralty, Greenwich Hospital, or by Miss Weston's Homes, all of which should have been considered as being absolutely distinct from a public subscription collected for a specific object. The total amount which has actually been granted in relief from the "Victoria" Fund is £7,813, and it is now generally supposed that the result of the 1895 Commission will be to ensure a more liberal and extensive application of the Fund, more in accordance with the public wish, and more sympathetically in touch with the sufferers. The following table shows all the Funds which are now administered by the Patriotic Commissioners:—

Date.	Description of Fund.	Actual Value of Assets, July, 1896.
		£
1854–5	Patriotic (Crimean)	481,420
1864	"Rodriguez" Fund	18,700
1870	"Captain" Relief Fund	39,080
1878	"Eurydice" Relief Fund	16,746
1878	Royal Naval Relief Fund	8,962
1879	Zulu War Fund	27,884
1880	"Atalanta" Relief Fund	7,811
1873	Ashanti War Fund	2,073
1883	Zervudachi Fund	1,954
1884	Soldiers' Effects Fund	161,277
1891	Balaclava (Light Brigade)	2,977
1892	County of Forfar Fund	856
1893	"Victoria" Relief Fund	94,284
	Royal Victoria Patriotic Asylum Endowment Fund	179,380
	Thurlow Fund	745
	Roman Catholic Orphan Fund	41,184
	Total	1,085,955

Of the various endowments and funds which have been formed with the same objects, but not under the control of the Patriotic Commissioners, the most important is "Lloyd's Patriotic Fund," originated in 1803, now amounting to £162,000, which is invested chiefly in Greenwich Hospital and other schools where Lloyd's nominations have the preference. This fund was intended to provide rewards in the shape of plate, swords, and honorary distinctions, for bravery and personal merit, the sum originally voted being £20,000. The other funds are the "Imperial War Fund," formed at the time of the Egyptian war in 1882, now having a capital of £5,000; the "Soldiers' and Sailors' Families Association" (£37,000) started in 1885, and devoting its attention to the care of the wives and families of men of all branches of both services; the "Royal Naval Fund," created in 1893 from the surplus of £47,658 from the Royal Naval Exhibition of 1891, now possessing a capital of £49,000: the "H.M.S. 'Thunderer' Fund" (1876) about £6,000; the "Indian Mutiny Relief Fund" (£46,000) with 223 surviving beneficiaries; "Woodman's Trust," bequeathed by Mr. Woodman for the benefit of old soldiers, £10,000; and the Military Tournament (Royal Cambridge) Fund for old and disabled soldiers, established by the late General Burnaby in 1880, amounting to £36,000.

Perpetual Calendar.

By H. F. L. MEYER.

Explanations.

The old style ended in Italy on Oct. 4, 1582, and the new style began on Oct. 15, 1582; but in England the old style ended on Sept. 2, 1752, and the new style commenced on the following day, that day being called Sept. 14, 1752. Thus in that year the dates from Sept. 3 to Sept. 13 did not exist. In most other countries the change took place between 1582 and 1752, but Greece, Russia, and the Balkan States still adhere to the old style.

Examples:—To find the day of the week for 17 Nov., 1247. Under the year 47 in the line of the century 1200 stands Tu; take Tu above Nov., and in this line, over the 17th day, stands Su = Sunday.

On what day of the week was April 7, 1800? The letter for the century is W, which for Apr. stands in the second column of the central table, and in this line stands M for the 7th.

When will June 6 be on a Monday? The 6th day shows the M in a line, which for June gives Sa, and Sa for 1800 shows the year 98, and for 1900 the years 4, 10, 21, &c.

LEAP YEARS.

The years in heavier type are leap years for which the two months January and February must be used. Examples below.

Examples for Leap Years.

When will Jan. 25 be on a Friday? The 25th day shows the F. in the sixth line above it, and in this horizontal line stands Tu for Jan. and W. for Jan. Now Tu for 1800 gave the year 95, and gives for 1900 the years 1, 7, 18, &c., and W is for the leap years in 1900, which are 24, 52, and 80.

In what years will Jan. 1 fall on a Sunday? The 1st day gives the Su for Jan. and Jan. in the 7th line of the week days, and these Su and M for 1800 show the year 99, and for 1900 the years 5, 11, 22, 28, 33, &c.

For further examples see next two pages.

Historical Notes.

The names of the months date from the time of Romulus and Numa, the two first rulers of Rome. Romulus established a year consisting of ten months, named Martius, Aprilis, Maius, Junius, Quintilis, Sextilis, September, October, November, and December; but in the reign of Numa two months were added, called Januarius and Februarius. The year then began in March.

The Julian calendar originated with Julius Cæsar, who was assisted by Sosigenes, a Grecian astronomer of Alexandria. This calendar was made in the year 708, dating from the foundation of Rome, and being the year 45 B.C. The Julian year began on the 1st of January, 708 A.U.C. (Anno Urbis Conditæ), and ended on the 31st December, 709 A.U.C. It had been found that the length of the solar year was more than 365 days, and it was therefore decided to give an additional day to every fourth year, but in the first 48 years of the reform some confusion prevailed about the bissextile or leap years, because during the first 36 years every third year had been reckoned a leap year. Instead of 9 they had made 12 intercalations. Then Cæsar Augustus decreed that the next 12 years, that is 9 B.C. to 3 A.D. inclusive, should elapse without an intercalary day. The names of two months, Quintilis and Sextilis, were also changed into Julius and Augustus in honour of the two emperors. The years A.D. 4, 8, 12, 16, 20, etc., which were the Roman years 757, 761, 765, 769, 773, etc., were reckoned leap years, and after that the counting went on regularly.

It has been asked why Cæsar did not commence the new year with the shortest day, that is with the winter solstice, which occurred at Rome on the 24th Dec. 46 B.C. (common era), and it is supposed that he waited seven days because he wished to gratify the superstition of the Romans by allowing the first year of the reformed calendar to begin on the day of the new moon, which occurred at Rome at 6*h*. 16*m*. P.M. mean time, on the 1st of January, 45 B.C. (common era).

Five centuries later the Christian era was introduced by Dionysius Exiguus, a Roman abbot. This era, which began

Digitized by Google

on the 25th of March, 533 A.D. (being A.U.C. 1286), was subsequently reckoned from Christmas day, December 25, and in the 13th century they began in some countries to reckon it from the 1st of January according to the Julian era. It has now been ascertained that Dionysius stopped four years short of the true date, for Christ was born on the 25th of December, 750 A.U.C. Therefore 1 Anno Domini is 754 A.U.C., and 1 Anno Christi is 750 A.U.C. Christ died on Friday, the 7th of April, 33 A.C.=30 A.D. This has been calculated from the Jewish calendar, the Gospels, and statements of Clement of Alexandria.

J. J. Scaliger, A.D. 1583, introduced the Julian system of years, which fixes a point in time to which all chronological eras can be referred. This epoch is the 1st of January, 4713 B.C. (for astronomers the noon, but for historians the previous midnight), which is a cycle of $28 \times 19 \times 15 = 7980$ years.

Then it had been found that the mean solar year is about 11 minutes less than the Julian year, which was 365 days and 6 hours. According to the latest observations the length of the year is 365*d*. 5*h*. 48*m*. 46*s*. In order to rectify the error of the Julian year, which in the 16th century amounted to 10 days, it was proposed by Aloysius Lilius, from Calabria, a physician and mathematician of Veronica, to eliminate the 10 days, and consequently it was decreed by Pope Gregory XIII., that the day after the 4th of October, 1582, be called the 15th of October. Thus the day of the equinox, the 21st of March, came right again. The calendar of the future was arranged thus:—As 129 years must elapse before the redundance would cause the equinox to be one day behind its time, it was decided that the leap day in three leap years should be omitted in each four centuries, namely that the secular years 1700, 1800, and 1900 be common years, but 2000 be a leap year.

In this reformation of the calendar the Pontiff was assisted by learned men, the chief of whom were Christoph Clavius, a German Jesuit and great mathematician, born at Bamberg in 1537, who died at Rome in 1602; Peter Ciacconius, whose real name was Chacon, a Spaniard from Toledo, born 1525, died 1581; and Ignazio Danti, a Dominican from Perugia, who became bishop of Alatri, and died in 1586 at the age of 48 years.

1700 was still kept as a leap year in England, for the Papal decree of 1582 was accepted in different years in various countries. In Spain and Portugal it was adopted in October, 1582; in France in December, 1582; in Poland in 1586; in the Catholic States of Germany in 1583; in the Protestant German States, through Leibnitz's instigations and Erhard Weigel's calendar, in 1700; the day after Sunday, 18 February, 1700, was called Monday, 1 March, 1700. Denmark and Switzerland soon followed Germany, but in England the adoption occurred in September, 1752, whereas Russia, Greece and the Balkan States still adhere to the Julian calendar. Thus the legal equinoxes of the Greek Church are now 12 days in advance of the real equinoxes. When the Russians write to us "Dec. $\frac{18}{30}$, 1890," they mean the Monday on which was the 10th to them and the 22nd to us. They can use our table by simply adding to the old style the years 1800, 1900, etc.

The Jewish and Mohammedan calendars are lunar. The Turks reckon from the Hegira, July 16, A.D. 622.

In England the change was made after the 2nd of September, 1752; the day which should have been the 3rd of September by the old style, was called the 14th of September, 1752, by the new style. The 2nd Sept., 1752, was on a Wednesday, and the 14th Sept., 1752, on the next day, a Thursday. Besides this there was another important change in the year 1752, for it ended on the 31st of December, and not, as was then usual, on the 24th of March. The day after December 31, 1752, was called January 1, 1753. Thus, 11 and 83 days were removed from that year, so that 1752 had only 271 days. The people in England then used to write the new style under the old, thus:—

Monday, $\frac{\text{28th June}}{\text{9th July}}$, 1753.

Wednesday, $\frac{\text{23rd February, 1753}}{\text{6th March, 1754}}$.

Historians often write "January 30, 1648-9," which means that the death of Charles I. took place on Tuesday, January 30, 1648, as written at that time, and that it is now written January 30, 1649. Edward II. was crowned on Sunday, Feb. 25, 1308 (1307 in the old style).

The Scotch changed the beginning of their year long before the English, for the day after Dec. 31, 1599, was called January 1, 1600.

The French Republican calendar was used from Nov. 26, 1793, till Dec. 31, 1805, when the Gregorian calendar was again used.

The 4th of October, 1582, was on a Thursday in all parts of Europe, but the 15th of October, 1582, was on a Friday in Italy, etc., and on a Monday in England, etc. The 2nd of September, 1752, was on a Wednesday in England, Greece and Russia, but on a Saturday in the other parts of Europe. The 14th of September, 1752, was on a Monday in the East of Europe, but on a Thursday in the other parts of Europe. The 21st of March, 1891, was on a Saturday in England, but in Russia it was 12 days later, that is on a Thursday; on which Thursday we had the 2nd of April. This is expressed thus:—

Thursday, $\frac{\text{the 21st March}}{\text{the 2nd April}}$, 1891, $\frac{\text{for Russia}}{\text{for England}}$.

Some important dates in history are these:—

Cæsar invaded Britain in the year of Rome 699=55 before 1 A.D. And it has been ascertained from the tables of Full Moons, and other statements, that it was on the 26th of August, Saturday. This day and date has been calculated from the Julian calendar.

The Battle of Hastings occurred on Saturday, 14 October, 1066.

The Magna Charta was signed on Sunday, 24 May, 1215.

The 13 April, 1240, was a Good Friday.

The battle of Towton in Yorkshire was fought on Palm Sunday, 29 March, 1461.

Columbus sailed from Palos on Friday, 3 August, 1492, and discovered America on Friday, 12 October, 1492.

Miguel de Cervantes Saavedra, the author of "Don Quixote," died at Madrid on Saturday, 23 April, 1616.

William Shakespeare was born on St. George's day, Sunday, 23 April, 1564, and died on Tuesday, 23 April, 1616. (The latter day in the new style is Tuesday, 3 May, 1616.)

The 18 June, 1868, was on a Thursday, and we see by the first column in the table of years that the 18 June was again on a Thursday in all the years

in that column, that is, in 1874, 1885, 1891, 1895, and will be so in 1903, 1908, 1914, etc.—Anyone born on Saturday, February 29, 1896, will have his birthday again on a Saturday in 1908, 1936 and 1964. The 29th of February, 1876, was on a Tuesday, and will again be on a Tuesday in 1916, 1944, and 1972, that is, only 4 times within 100 years. This shows that a date is repeated on a certain day of the week at intervals of 5, 6 or 11 years, but that for the leap day there are intervals of 12, 28 or 40 years.

When will there be 5 Sundays in February? This is only possible when the first and last days of the month are Sundays; therefore we ascertain from the table in which years the 29th falls on a Sunday. The 29th shows the Su in the last line, in which line we see F for February. We take F in the line of 1800, and see in the column of F the leap years 1824, 1852, and 1880. Now we take the F in the line of 1900, and discover the leap years 1920, 1948, and 1976. Under 2000 we see 4 leap years of this peculiarity; 2000 itself will have the 29 February on a Tuesday.

The table shows the first of January of the year 1 to be a Saturday.

If it be required to find the months which in 1898 will have five Sundays, then find the letter for 1898, which is Fa, and see which Sa shows Su in the same column with five dates in the table of the days of the months. Sa in the first column belongs to January and October, and shows Su with the dates 2, 9, 16, 23 and 30; Sa in the second column shows April and July, but as April has 30 days, and Su of this column shows 31, it (April) must be excluded; Sa in the third column shows Su with only four dates, likewise in the next three columns; and Sa in the last column shows May; thus there are four months, namely, January, May, July, and October.—The year 1905 shows September with five dates, but as it has 30 days, it will have only four Sundays. There are 53 Sundays in the common and leap years which have the letter Su, and in the leap years which have the M; these are 1843, 1848, 1854, 1860, 1865, 1871, 1876, 1882, 1888, 1893, 1899, 1905, 1911, 1916, 1922, 1928, 1933, 1939, 1944, etc.

There is a rule for determining the day of the week, thus:—The dth day of the mth month of the year y shows the wth day of the week, when the sum

$$d + 2m + \frac{3m+3}{5} + y + \frac{y}{4} - x,$$

omitting the fractions, is divided by 7, and the remainder reckoned as the day of the week, Sunday being the first day; and January and February must respectively be reckoned as the 13th and 14th months of the preceding year; whilst x has the value 0 in the Julian or old style, but in the Gregorian or new style

$$x = \frac{y}{100} - \frac{y}{400} - 2.$$

Thus, M. Faraday's birthday, September 22, 1791, gives the day of the week as follows:—

$$22 + 2\times 9 + \frac{3\times 9+3}{5} + 1791 + \frac{1791}{4} - \frac{1791}{100} + \frac{1791}{400} + 2 = 22 + 18 + 6 + 1791 + 447 - 17 + 4 + 2 = 2273;$$

divided by 7, the remainder is 5, and the 5th day of the week is Thursday.

T. A. Edison's birthday, Feb. 11, 1847, is obtained thus:—

$$11 + 2\times 14 + \frac{3\times 14+3}{5} + 1846 + \frac{1846}{4} - \frac{1846}{100} + \frac{1846}{400} + 2 = 11 + 28 + 9 + 1846 + 461 - 18 + 4 + 2 = 2343;$$

divided by 7 gives 334 and 5 over; therefore the 5th day is Thursday.

March 8, 1806, gives the sum 2261, which divided by 7 gives 323 and no remainder; therefore we take 322 and 7 over, which gives Saturday.

Our calendar might be simplified. The year, beginning on the day after the shortest day, might have 13 months, each of 4 weeks, except the 13th month, which would have 29 days, and in a leap year 30 days.

Coinage, 1878—1895.

GOLD, SILVER, AND BRONZE MONEYS ISSUED 1878—1895, FROM THE LONDON AND AUSTRALIAN MINTS.

Year.	Gold.			Silver.	Bronze.	Total.

Note.—Since 1871, inclusive, the designs adopted for gold coins have been identically the same in the three Mints of London, Sydney, and Melbourne. Coins struck at Sydney and Melbourne are distinguishable, however, from those struck in London by the fact that they bear minute "Mint Marks;" the letter S being borne by Sydney coins and M by those issued from Melbourne.

OFFICES OF THE ASSOCIATION, 12, PALL MALL EAST. *Secretary:* COL. W. MACKINNON.

THE QUEEN'S PRIZE. FIRST STAGE TO 1881.—FIRST AND SECOND STAGES FROM 1882. THE N.R.A. SILVER MEDAL.

Hall Marks on Plate.

One of the revivals of the past half century has been that of the taste for ancient gold and silver ware, but especially of silver. Previous to that time there were but comparatively few persons who cared about old silver plate; most preferred that which was new, and the old was transferred to the melting-pot: but now the tide has turned, and old plate is one of the things most coveted by all persons professing to have taste. With the revival of this taste there has also grown up with it the very laudable desire to know something of the history of the manufacture and manufacturers of the plate itself. The literature of the subject is not large, but it is almost exhaustive, and for the materials of this Article readers of the Almanack are indebted to Mr. Wilfred Cripps, whose volume on "Old English Plate" contains nearly all that can be said upon the subject. Readers are also further indebted to that gentleman for the loan of the following illustrations, without which this paper would scarcely be intelligible.

It must be premised that *pure* gold and *pure* silver in a manufactured state do not exist; both are *alloyed* with a coarser metal, gold sometimes with silver, but mostly with copper; and silver invariably with the latter metal: silver thus alloyed becomes less brittle and is more easily shaped by the workman's hammer. But mixed, the metal is of less value than when pure, and as the uninformed public could have no means of testing its intrinsic value, the Government at a very early period took steps to insure uniformity in the quantity of base metal used as alloy. So far back as the year 1180 there appears to have been a test or check upon the manufacture, and in 1260 discreet men of the craft were appointed to watch over the ware produced for sale; but not till the year 1300 was there any actual legislation, the first ordinance being that the Leopard's Head  should be *marked* upon all *sterling* articles of gold and silver. The Company of Goldsmiths of London was incorporated by Edward III. in the year 1327, and the leopard's head has ever since been borne on the company's shield. In addition to London and the six others mentioned there have been Assay Offices at Bristol, Exeter, Newcastle-on-Tyne, Norwich and York, all of which are now closed. In Scotland, Edinburgh and Glasgow have this privilege: in Ireland, Dublin alone. One of the duties imposed upon the Goldsmiths Company is to test all articles of gold and silver, except certain small articles, and having tested them, to impress the Hall Mark thereon. Sterling silver is one invariable standard, viz., 11 oz. 2 dwts. of fine silver to 18 dwts. of alloy, which, when thus mixed, becomes *standard*, and a pound troy coined into sixty-six shillings gives the nominal value of 5*s.* 6*d.* to the troy ounce.* In *sterling* gold there are twenty-two carats fine to two of alloy, the value of which is £3 17*s.* 10½*d.* In order to encourage the home jewellery trade, other degrees of fineness are permitted, but these degrees are marked on articles sent to the "Hall" for the purpose. The value of the various *standards* per ounce troy are—

	£	*s.*	*d.*
Pure gold, 24 carats.....	4	4	11½
Standard, 22 carats.....	3	17	10½
2nd ditto, 18 carats.....	3	3	8½
3rd ditto, 15 carats.....	2	13	1
4th ditto, 12 carats.....	2	2	5½
5th ditto, 9 carats.....	1	11	10½

An ordinary piece of English plate has the following marks:

1. That of the maker, which must be the first letters of his Christian and Surname.

2. That of the Company, the Leopard's Head (this in London only). 

3. That which is supposed to be the Sovereign's mark, the lion passant. 

4. A letter denoting the year in which the plate is made, *e.g.* ..... A

[And, in the case of those articles which were chargeable with duty, the Sovereign's Head; this is now no longer impressed.]

The maker's mark is placed upon the article by the manufacturer himself. The Sovereign's Head does not appear upon plate manufactured prior to the year 1784.

There is now no duty upon gold and silver plate, but the Hall marking is compulsory; no one can complain of this, as the charge for assaying and marking at Goldsmiths' Hall is little more than nominal, that for a dozen tea-spoons being but 3*d.*, and for a dozen table spoons or forks and other wares weighing 5 oz. each and upwards one halfpenny per oz.

By the following table of date-marks the age of any piece of plate manufactured in London and assayed at Goldsmiths' Hall may be ascertained:

	Lombardic, simple.....	1438-9 to 1457-8
	Lombardic, external cusps	1458-9 ,, 1477-8
	Lombardic, double cusps	1478-9 ,, 1497-8
	Black letter, small.....	1498-9 ,, 1517-8
	Lombardic	1518-9 ,, 1537-8
	Roman and other capitals	1538-9 ,, 1557-8
	Black letter, small.....	1558-9 ,, 1577-8

* Unlike gold, which has one fixed value, the price of silver varies considerably. In 1870 the price paid for it at the Royal Mint was five shillings and a halfpenny per ounce, while in 1894 it was purchased at 2½ pence. At this price there was a profit, *Seigniorage*, of no less than 125·64 per cent. upon all the silver coined. (See also p. 419).

Each Assay Office has its distinguishing mark in lieu of the Leopard's Head of Goldsmiths' Hall, and its own cycle and chronological alphabet. The type and the shape of shield on which the letters are impressed change with each cycle.

The learned virtuoso who a hundred years hence may wish to examine his plate, will be sorely puzzled to know whether that marked A was manufactured in the year 1796, or in 1876, the chief difference being the form of the shield. For 1876 he must carefully look for the Sovereign's Head, and although the Lions appear remarkably alike (there is also a difference in the Leopard's Head, one being crowned and the other not), he will be fortunate indeed if the

[Hall marks used   from 1756 to 1815.]

stamps be sufficiently distinct for identification.

The London Goldsmiths' letter for the year ending 29th May, 1897, is a, on a shield shaped like that of the last specimen in the adjacent column; that for 1898 is the letter b.

ASSAY OFFICES OUT OF LONDON.

DAYS OF GRACE.

Bills of Exchange or Promissory Notes, payable at any time after date, have three days of Grace allowed: thus, a bill dated 1 Jan. at two months' date is not due till March 4; but no days of Grace are allowed on Bills drawn at sight or on demand; such must, therefore, be paid on presentation. Bills falling due upon "Bank Holidays"—Easter Monday, Whitsun Monday, the first Monday in August, and the 26th December—if the 27th be Sunday, then not till the 28th, are payable the day after; but those falling due on Sundays, on Good Friday, or Christmas Day, must be paid the day before.

LIGHT AND SOUND.—Light travels at the rate of 186,660 miles per second, and takes 8 minutes 18 seconds to travel from the Sun to the Earth. Any phenomenon, therefore, occurring on the surface of the Sun is not observed by an inhabitant of the globe till that time afterwards.

Sound travels in still air, at the freezing-point, at the rate of 1,090 feet per second, and the report of a gun one mile distant would not be heard till nearly 5 seconds after the flash was seen. The moisture in the air and direction of the wind, as well as the temperature, would, to some extent, modify the time elapsing between the flash and the report.

The Royal National Life-Boat Institution.

Founded in 1824. Supported solely by Voluntary Contributions.

Patron ..... HER MAJESTY THE QUEEN.

President ..... THE DUKE OF NORTHUMBERLAND.

Offices: 14 John St., Adelphi. *Secretary:* Charles Dibdin.

DURING the year 1895, the receipts by the Institution in subscriptions and donations amounted to £10,279; in contributions from branches, £16,093; Life-boat Saturday Fund (gross total), £16,837; and in dividends and interest on capital invested, £17,881; with Sunday collections, &c., a gross total of £66,281. The expenditure of the year reached a total of £75,417 (plus £6,046 for the special purpose of working the "Life-Boat Saturday Fund"), and included £26,376 in payments for improving and repairing life-boats, carriages, houses, and slip-ways; £15,958 for life-boat stores and subsidies to stations which are not self-supporting; £26,719 for payments to inspectors, coxswains, bowmen, signalmen and crews, &c., and in special awards and grants. The expenditure in 1895 thus exceeded the receipts by £15,182. The total number of lives saved by the life-boats of the Institution and by special efforts for which it has awarded grants since its foundation in 1824 amounts to 39,354, the number of lives saved in 1895 being 709, and representing a cost to the Institution of about £106 per life. In 1895 thirty-six vessels were also saved. The rewards granted by the Institution since 1824 include 97 gold medals, 1 2nd service clasp, 1,149 silver medals and clasps, besides aneroids, binocular glasses, addresses, and £158,929 in money. Three hundred life-boats are maintained under the auspices of the Institution on the coasts of the U.K. at an annual cost of £30,000. The average cost of a life-boat, including station and appliances, is £1,050, and the yearly expense of maintaining same is £100.

The Royal Humane Society.

Instituted 1774. Supported by Voluntary Contributions.

Patron ..... HER MAJESTY THE QUEEN.

President ..... THE DUKE OF ARGYLL.

THE income of the Society in 1895 was £1,850 (including £1,333 in various dividends—the proceeds of invested capital—£314 in subscriptions and donations, and a legacy of £50). The expenditure in the same period amounted to £1,823—£1,018 for office expenses, salaries and wages; £283 in awards for saving life; and for life-saving apparatus £69, leaving an available balance for 1896 of only £27.

During the year 1895, eight hundred persons were rewarded by the R.H.S. for saving 812 lives, and attempting to save the lives of 73 others. This number was far in excess of any other year since the formation of the Society. The "Cordon Bleu" of the awards is the Stanhope Gold Medal, instituted in 1873 (the first recipient being the late Captain Webb), and was awarded in 1895 to E. A. Hatton, seaman, of the "Drummond Castle," who made a gallant attempt to rescue a comrade from drowning when off the coast of S. Africa, at night time and in a heavy sea infested with sharks. The other rewards include 15 silver medals, 154 bronze medals, 8 bronze clasps (which are usually given for a second act of bravery, to those already in possession of the medal), 594 testimonials, and 29 pecuniary rewards amounting to £283. Twenty awards went to the Royal Navy, six to the Coast Guard and Royal Naval Reserve, forty-eight to the Army, thirty-two to the Police Force, and ten awards were made on the recommendation of the Indian and Colonial Offices.

In addition to boats and ice-boats for the protection of bathers, life-buoys and drags, &c. are maintained at the cost of the Society in nearly 300 places in and around the Metropolis. The offices of the R.H.S. are at 4 Trafalgar Square, Charing Cross; and the Secretary is Captain J. W. Horne.

Unclaimed Moneys and Dividends, 1896.*

Funds in (1) *Supreme Court of Judicature* (England), £61,385,160.

Funds in (2) *Supreme Court of Judicature* (Ireland), £5,440,348.

The proportion of these funds which may be passed as "unclaimed" is not stated, but very large sums in Chancery, amounting to £3,572,972, the owners of which are unknown, have been appropriated to various objects, and the Consolidated Fund is liable in respect of this debt to suitors.

Unclaimed Government Stock and Dividends, total (about) £5,000,000. Dividends due and not claimed for the quarter ending January 3, 1896, £283,545.

Unclaimed Dividends (Bankruptcy).—The total amount unclaimed is not stated, but the Consolidated Fund is liable in respect of a sum of £1,142,819, appropriated by the Government.

Intestates' Estates reverting to the Crown.—Balance in course of administration, and not yet handed over to Crown, England, £125,273; Scotland, £43,236. There are also large estates left by intestates in the past few years, now in possession of the Crown, which can be reclaimed on rightful heirs appearing.

Naval Prize Money.—£260,004.

Army Prize Money.—£76,858.

Soldiers' Unclaimed Balances (since 1863), £134,333.

Unclaimed Seamen's Wages and Effects, £22,914.

In addition, there are large unclaimed sums in the hands of solicitors who continually advertise for missing heirs and kindred; also funds in the shape of unclaimed Bank Deposits and Unclaimed Dividends of Companies, particulars of which are rarely published.

The foregoing summary shows the necessity for greater publicity as to unclaimed funds in the hands of the Government. It is high time that a Parliamentary Return, giving a list of the owners of all unclaimed funds, should be issued.

* From "Unclaimed Money," by Mr. Sydney H. Preston (London: E. W. Allen).

THE final report of the Commission, appointed in 1889 to enquire into the subject of vaccination, has now been issued. It is most exhaustive, extending to 221 folio pages, and embodies in addition to the main report that of the minority. During the progress of the enquiry 187 witnesses were examined. The report may be summarised as follows:—

We (the Commissioners) find that the period which immediately followed the introduction of the practice of vaccination was characterised in all countries in which the practice prevailed by a marked though irregular diminution of small-pox mortality, and that this diminution, when compared with the century preceding vaccination, has continued in those countries down to the present time.

There is further strong evidence that where attacks of small-pox occur the fatality is far less in the case of the vaccinated than of the unvaccinated, and that this difference is much more marked in the first ten years of life than at a later period. We notice further that the same classes of vaccinated and unvaccinated persons which display when attacked by small-pox so marked a contrast in the fatality of the disease, manifest a contrast no less marked in the type of the disease from which they suffer, viewed in relation to its severity or mildness.

Where vaccination has been most thorough the protection appears to have been greatest. The fact that the re-vaccination of adults places them in so favourable a condition, as compared with the unvaccinated, affords further confirmation of the conclusions suggested by the evidence. We have not disregarded the arguments adduced for the purpose of showing that a belief in vaccination is unsupported by a just view of the facts. We have endeavoured to give full weight to them. Having done so, it has appeared to us impossible to resist the conclusion that vaccination has a protective effect in relation to small-pox.

We think:—

1. That it diminishes the liability to be attacked by the disease.
2. That it modifies the character of the disease, and renders it (*a*) less fatal, and (*b*) of a milder or less severe type.
3. That the protection it affords against attacks of the disease is greatest during the years immediately succeeding the operation of vaccination. It is impossible to fix with precision the length of this period of highest protection. Though not in all cases the same, if a period is to be fixed, it might, we think, fairly be said to cover in general a period of nine or ten years.
4. That after the lapse of the period of highest protective potency, the efficacy of vaccination to protect against attack rapidly diminishes, but that it is still considerable in the next quinquennium, and possibly never altogether ceases.
5. That its power to modify the character of the disease is also greatest in the period in which its power to protect from attack is greatest, but that its power thus to modify the disease does not diminish as rapidly as its protective influence against attacks, and its efficacy during the later periods of life to modify the disease is still very considerable.
6. That re-vaccination restores the protection which lapse of time has diminished, but the evidence shows that this protection again diminishes, and that, to ensure the highest degree of protection which vaccination can give, the operation should be at intervals repeated.
7. That the beneficial effects of vaccination are most experienced by those in whose case it has been most thorough. We think it may fairly be concluded that where the vaccine matter is inserted in three or four places, it is more effectual than when introduced into one or two places only, and that if the vaccination marks are of an area of half a square inch, they indicate a better state of protection than if their area be at all considerably below this.

We proceed to the objections made to vaccination on the ground of injurious effects alleged to result therefrom. This is obviously a matter of great importance. Those who have assailed vaccination on the ground of evil consequences said to flow from it have asserted that evidence of its mischievous influence is to be traced in an increase in the number of deaths from certain specified diseases, corresponding with the spread of vaccination, which they allege to be the cause. The diseases were, tabes mesenterica, diarrhœa, bronchitis, pyæmia, skin disease, syphilis, convulsions, cholera, diphtheria, pneumonia, atrophy and debility, whooping cough, erysipelas, scrofula.

If vaccination is the parent of other diseases, we should expect to see some effect produced on infant mortality as a whole, yet it is clear that the mortality of infants during the first year of life, as measured by their proportion of deaths to births, has not increased at all during the times when infant vaccination has been increasing. It is the fact that deaths from syphilis have increased in the last 20 years among infants under one year of age, but it is most largely fatal in the first three months of life, indicating that in England and Wales the increase has been greatest in that portion of the first year of life which would be practically unaffected by vaccination.

The same argument holds good for Scotland, while statistics show with regard to Ireland that deaths from this cause have largely diminished, affording strong proof that in Ireland vaccination has not been influential in increasing the disease in question. Even if it can be shown that in some instances syphilis has been inoculated by vaccination, the fact would still remain that this cannot have been so to any substantial extent. We do not find any facts to warrant the assertion that the increased mortality from tabes mesenterica and scrofula, or any part of it, was due to vaccination. Upon the whole, we think that the evidence is overwhelming to show that in the case of some of the diseases referred to, vaccination cannot have produced any effect upon the mortality from them, and that it has not in the case of any one of them increased the mortality to a substantial, we might even say an appreciable, extent.

With regard to the question, what means other than vaccination can be used for diminishing the prevalence of small-pox? We think that a complete system of notification accompanied by an immediate hospital isolation of the persons attacked, together with a careful supervision, or, if possible, isolation for sixteen days of those who have been in immediate contact with them, could not but be of very high value in diminishing the prevalence of small-pox. We can however see nothing to warrant the conclusion that in this

Digitized by Google

country vaccination might safely be abandoned, and replaced by a system of isolation. If such a change were made in our method of dealing with small-pox, it is impossible to contemplate the consequences without dismay. At the same time, while fully admitting the protective effect of vaccination, it does not, in our opinion, diminish the importance of measures of isolation, or dispense with their necessity.

After careful consideration, we have arrived at the conclusion that it would conduce to increased vaccination if a scheme could be devised which would preclude the attempt to compel those who are honestly opposed to submitting their children to vaccination, and, at the same time, have the law to operate, as at present, to prevent children remaining unvaccinated, owing to the neglect or indifference of the parent. We do not think such a scheme impossible.

The Minority Report expresses doubt as to the protective value of vaccination, and lays great stress on the supreme importance of notification and isolation of cases of small-pox.

Among the statistics published in the Report we take the following table, showing the influence on the mortality of children, of neglect of vaccination, for the years 1883-92 :—

Place.	Percentage of Small-pox deaths below the age of 10 years.	Percentage of unvaccinated.
Warrington	22·5	4·8
London	36·8	9·9
Dewsbury	51·8	32·3
Gloucester	64·5	68·6
Leicester	71·4	67·6

In the fatality from small-pox amongst vaccinated and unvaccinated in the six epidemics dealt with, the modifying influence of protection is again emphasised.

Commencing with the earliest, that relating to SHEFFIELD: Of vaccinated persons who took the disease, 4·8 per cent. died; of unvaccinated persons who took the disease, 49·6 died. Of 353 vaccinated children under ten years of age, six, or 1·7 per cent., died. Of 228 unvaccinated children under ten, 100, or 43·9 per cent. succumbed, so that, relatively, for each individual vaccinated child that died of small-pox, 25·8 unvaccinated children died. Of 3,774 vaccinated persons over ten years of age, 194, or 5·1 per cent., died of the disease, and of 322 unvaccinated persons of similar age, 174, or 54·2 per cent. died, so that, relatively to their numbers, for each vaccinated person ten years and upwards who died of small-pox, 10·6 unvaccinated persons of a similar age were fatally attacked by the disease.

In the outbreak in LONDON 1892-93: Of the vaccinated under ten, 110 were attacked, none of whom died. Of the unvaccinated under ten, 228 were attacked, of whom 61, or 26·7 died. Of the vaccinated over ten years of age, 1,643 were attacked, of whom 39, or 2·3, died, whilst of 181 unvaccinated of a similar age, 38, or 20·9, died.

In DEWSBURY, 44 vaccinated children were attacked, of whom one, or 2·2 per cent. died; of 174 unvaccinated children, 56, or 32·1 per cent. died. Of 577 vaccinated persons over ten years of age, 15, or 2·6, per cent. died; of 192 unvaccinated persons of similar age, 36, or 18·7, died.

In WARRINGTON, of 33 vaccinated children under ten, 2, or 6 per cent. died; of 32 unvaccinated children of similar age, 12, or 37·5 died. Of 560 vaccinated persons over ten, 36, or 6·4, died; of 36 unvaccinated persons over ten, 12, or 33·3 per cent. died.

In LEICESTER two vaccinated children under ten were attacked, neither of whom died; of unvaccinated children under ten, 107 were attacked, of whom 15, or 14 per cent. died. Of vaccinated persons over ten, 197 were attacked, of whom 2, or 1 per cent. died; of unvaccinated persons of similar age 51 were attacked, of whom 4, or 7·8 per cent. died.

In GLOUCESTER 26 vaccinated children under ten were attacked, of whom 1, or 3·8 per cent. died; of unvaccinated children of similar age, 680 were attacked, of whom 279, or 41 per cent. died. Of vaccinated persons over ten, 1,185 were attacked, of whom 119, or 10 per cent. died; of unvaccinated persons of similar age, 88 were attacked, of whom 35, or 39·7 per cent. died.

It is worth special notice that, in all these cases, the contrast between the attack rate of the classes of vaccinated and unvaccinated respectively is much more striking in the case of children under ten years of age than in those over that age, as will be seen by a glance at the following table :—

Place.	Attack rate under ten.		Attack rate over ten.	
	Vaccinated	Unvaccinated	Vaccinated	Unvaccinated
Sheffield	7·9	67·6	28·3	53·6
Warrington ...	4·4	54·5	29·9	57·6
Dewsbury	10·2	50·8	27·7	53·4
Leicester	3·5	35·3	22·2	47·6
Gloucester ...	8·8	46·3	32·2	50·0

Some striking facts were elicited by the Select Committee in 1871, in the evidence of the surgeon to the Highgate Small-pox Hospital, who then stated that during the preceding 35 years no nurse or servant at the hospital had been attacked by small-pox. Since then, up to the present time, only one case has occurred. Of the 137 nurses and attendants who have been taken on since May, 1883, thirty had had small-pox previously; all the others were re-vaccinated on entering the service, with the exception of the one case, a gardener, who took the disease.

POST OFFICE SAVINGS BANKS.

These are established at all Money Order Offices, and are opened for the receipt of deposits during the hours appointed for the sale of stamps, commencing at 8 a.m. Every such office is also open for the payment of withdrawals on week days during certain hours, which are specified in a notice exhibited at the office.

Deposits can be made from 1s. to £50 in one year, the total never to exceed £200 including interest, which is at 2½ per cent.

ANNUITIES AND LIFE ASSURANCE.—Immediate or deferred annuities from £1 to £100 may be purchased through the Post Office on the life of any one over 5 years old. These are payable by equal half-yearly instalments.

Life insurances, from £5 to £100, are granted to persons between 14 and 65 years of age. Children between 8 and 14 can be insured for £5.

If the amount of the annuity or insurance purchased is less than £100, further amounts may be bought, until the total sum amounts to £100.

The Post Office Savings Bank is at 144A, Queen Victoria Street, E.C.

THE following is a list of the Principal Tramway Companies in the United Kingdom so far as returns are obtainable on application to the secretaries. The statistics given refer to the year 1896, except in the case of those to which an asterisk (*) is prefixed where old figures relative to traffic returns have been allowed to stand, but the latest information with regard to the dividends is given. It is not claimed that this is a *complete* list, but particulars are given concerning each company whose secretary has been courteous enough to supply the information.

The supply of water to London is in the hands of eight companies incorporated under private acts of Parliament. Five of them draw their water from the River Thames, two from the Lea, supplemented by springs and wells, and one from deep chalk wells in Kent. Considerable interest has been taken during late years in proposals to place the water supply in the hands of a public body, but one of the chief difficulties has always been to find the authority to which the control should be entrusted. Since its constitution the London County Council has been considered by many to be the proper authority to which the powers and duties of the companies should be transferred; but others have objected on the ground that, while the area of the Council's jurisdiction is only 121 square miles, the area supplied by the water companies is over 500 square miles. A bill was introduced by the Government, in the House of Lords, in the session of 1896, to empower the creation of a Metropolitan Counties Water Board, representing the councils of the counties and county boroughs situate within the metropolitan water area, together with the Common Council of the City of London and the Thames and Lea Conservancies, but, owing to opposition, the bill was dropped. The London County Council promoted bills in 1895 for the purchase of the companies' undertakings, a main feature of them being a special form of arbitration clause on the lines that the purchase price should be based on the fair and reasonable value of the undertakings, due regard being had to the rights, special circumstances and obligations of the companies. The companies contended for compensation under the provisions of the Lands Clauses Consolidation Act. The bills were suspended at the committee stage, owing to the dissolution, and finally, in the following session (1896), on the Council's refusal to accept the ordinary arbitration clause, they were opposed by the Government and rejected.

It is generally expected that the Government will make another attempt to deal with the questions of control and purchase in the ensuing session. The London County Council has also resolved to again introduce bills to empower the Council to acquire the companies' undertakings by agreement, or, in default of agreement, within one year after the passing of the Act, compulsorily on arbitration terms. The arbitration clause is to be similar to that which was practically agreed to by the House of Commons Committee in 1895, authorising the arbitrators to receive all evidence and consider all contentions that may be urged on behalf of the Council and of the companies respectively, as affecting the value of the undertakings. The clause will also provide that no allowance shall be made for compulsory sale, except so far as the arbitrators may award to meet the cost of re-investment.

Before 1889, the interests of the ratepayers were guarded by the Metropolitan Board of Works and the Corporation of the City of London; and whenever application was made to Parliament by any of the Companies for further powers, their proposals were carefully watched, and, by the joint action of these two bodies and the Local Government Board, many restrictions in the ratepayers' interests were placed upon the companies. No addition to share capital has been allowed since 1878 and the interest on debenture stock has, since 1894, been limited to such a rate as will, in the opinion of the Governor of the Bank of England, secure the issue of the stock at par. The additional debenture capital is, however, assumed to earn a considerably higher rate of interest, and, to prevent this going to swell the dividends already paid on the share capital, a clause, known as the "sinking fund clause," has been devised to intercept this difference between the interest paid and the interest earned and the amounts, calculated as provided by the clause, which has been incorporated in all the recent acts, are paid over by the Companies to the Chamberlain of the City of London, to be held by him as trustee and invested to form a sinking fund to extinguish the capital of the Companies or otherwise, as Parliament may direct.

The quality of the supply and its sufficiency are matters which in recent years have engaged and still are engaging the serious attention of Parliament and of the London local bodies. The County Council is perfecting a scheme to bring water from Wales.

The following table summarises the financial position of the companies at the present time:—

Name of Company.	Incorporat'd	Capital Called-up.	Debenture and Preference.		Ordinary.				Yield.
			Amount.	Rate of Interest per cent.	Amount.	Dividend. Max	Dividend. Paid '95-6	Price per £100.

* Including payment on account of back dividends. † Claim to back dividends satisfied. ‡ "New Shares."

THE following are the values, according to the British standard, of the commoner measures of length, surface, capacity (dry and liquid), and weight in use in foreign countries. Those measures which appear in italics may be regarded as obsolete. It should be borne in mind that in the majority of semi-civilized lands the measures frequently vary with the locality, or with the species of thing to be measured. The chief authorities which have been consulted are Siegfried's "Münz-, Maass-, und Gewichts-Tabelle" (Leipzig, 1887), and Dr. W. A. Browne's "Merchants' Handbook" (Stanford, 1879). To the latter, inquirers may be referred for fuller information.

The Metrical System is fully given on p. 426.

Annam (Cochin China).

1 Tak	=	1·92 inches.
1 Thuok	=	19·2 inches.
1 Truon (2 Ngu)	=	16·0 feet.

1 Uckieh (12 Dirhem)	=	571·938 Tr. grs.
1 Rottolo (12 Uckieh)	=	·9804 lb. av.
1 Cantar (100 Rottoli)	=	98·046 lbs. av.
1 Oka (400 Dirhem)	=	2·723 lbs. av.
1 Trade Oka (420 Dirhem)	=	2·859 lbs. av.
1 Kirat (jewels)	=	2·9788 Tr. grs.
1 Metikal	=	71·492 Tr. grs.

France.

Metrical System, and old "Système Usuel."

1 *Pied* (10 *Pouce*)	=	11·8112 inches.
1 *Aune* (4 *Pied*)	=	3·937 feet.
1 *Toise* (6 *Pied*)	=	70·864 inches.
1 *Perche* (10 *Pied*)	=	118·1123 inches.
1 *Pot*	=	·8809 pint.
1 *Braude*	=	22·048 pints.
1 *Muid*	=	88·097 pints.
1 *Livre*	=	1·1023 lbs. av.
1 *Quintal*	=	110·231 lbs. av.
1 Barrique (Bordeaux)	=	401·28 pints.
1 Barrique (Marseilles)	=	394·24 pints.
1 Millerole	=	112·64 pints.
1 Pièce (Bordeaux)	=	668·8 pints.
1 Pipe	=	1091·2 pints.
1 Tonneau	=	2204·6 lbs. av.

Germany.

The Metrical System was legalized throughout the Empire, Jan. 1, 1872, but French nomenclature is as far as possible avoided. The millimètre is also called Strich; the centimètre, Neu Zoll; the mètre, Stab; the décamètre, Kette; the litre, Kanne; the half-litre, Schoppen; the hectolitre, Fass; the décagramme, Neu Loth; the half-kilogramme, Pfund. The Centner is 50, and the Tonne is 1,000 kilogrammes. The chief obsolete measures are:

Prussian	*Fuss* (12 *Zoll*)	=	1·0297 feet.
,,	*Elle*	=	2·1881 feet.
,,	*Ruthe*	=	4·1188 yards.
,,	*Meile*	=	4·6805 miles.
,,	*Morgen*	=	2·5207 roods.
,,	*Hufe* (30 *Morgen*)	=	18·929 acres.
,,	*Metze*	=	3·024 quarts.
,,	*Scheffel* (4 *Viertel*)	=	1·512 bushels.
,,	*Tonne*	=	·756 qr.
,,	*Last* (60 *Scheffel*)	=	11·340 qrs.
,,	*Ossel*	=	1·007 pints.
,,	*Anker* (60 *Ossel*)	=	7·559 gallons.
,,	*Ohm* (3 *Eimer*)	=	30·237 gallons.
,,	*Fuder*	=	181·422 gallons.
,,	*Zollpfund* (30 *Loth*)	=	1·1023 lbs. av.

1 Batman Rei	=	27 lbs. av.

Peru.

Metrical, old Spanish, and British; but Vara (3 pie) = 2·780 feet; Fanega (wheat) = 135 or 140 libra; Carga = 150 libra.

Philippine Islands.

1 Pulgada (12 Linea)	=	·927 inch.
1 Pie	=	11·125 inches.
1 Vara	=	33·375 inches.
1 Gantah	=	·8796 gallon.
1 Caban	=	21·991 gallons.
1 Libra (16 Onzo)	=	1·0144 lbs. av.
1 Arroba	=	25·360 lbs. av.
1 Catty (16 Tael)	=	1·394 lbs. av.
1 Pecul (100 Catty)	=	139·482 lbs. av.

Poland.

As in Russia, and,

1 *Cwierc* (6 *Cal*)	= 5·606in.	1 *Smurow*	= 47·245 yds.
1 *Stopa*	= 11·212in.	1 *Mila*	= 5·304mls.
1 *Losiec*	= 22·425in.	1 *Morgow*	= 1·382 acs.

Portugal, Roumania, and San Domingo.

The Metrical System.

Russia.

1 Stopa (8 Vershok)	=	14 inches.
1 Arschine (16 Vershok)	=	28 inches.
1 Saschen (3 Arschine)	=	7 feet.
1 Verst (500 Saschen)	=	1166·66 yards.
1 Desatine	=	13066⅔ sq. yards.
1 Vedro (100 Tscharkey)	=	2·704 gallons.
1 Anker	=	8·114 gallons.
1 Chetvert	=	46·2 gallons.
1 Sarokowaja	=	108·196 gallons.
1 Tschetwerik	=	2·885 pecks.
1 Pajak	=	1·442 bushels.
1 Last	=	11·540 quarters.
1 Zolotnick (96 Doli)	=	65·830 Tr. grs.
1 Funt (12 Lani)	=	·9028 lb. av.
1 Pood (40 Funt)	=	36·1127 lbs. av.
1 Berkowitz	=	361·273 lbs. av.
1 Packen	=	1083·382 lbs. av.

Servia.

The Metrical and Turkish Systems.

Siam.

1 Niw	=	·83 inch.
1 Kü'p (12 Niws)	=	10 inches.
1 Sawk (2 Kü'ps)	=	19½ inches.
1 Wah (4 Sok)	=	80 inches.
1 Sen (20 Wahs)	=	44·4 yards.
1 Yot (400 Sens)	=	9⅞ miles.
1 Röeneng	=	2·525 miles.
1 Thang	=	3·75 gallons.
1 Coyan	=	375 gallons.
1 Tael (4 Bat)	=	936·25 Tr. grains.
1 Chang, or Catty	=	2·675 lbs. av.
1 Hap, or Pecul	=	133·75 lbs. av.
1 Kecan (20 Piculs)	=	1675 lbs. av.

Spain.

The Metrical System was made compulsory on July 1, 1868. In many countries that were colonized by Spain some of the old Spanish measures are still used, *e.g.*,

1 Pulgada (12 Linea)	=	·927 inch.
1 Sesma (6 Pulgada)	=	5·564 inches.
1 Vara (6 Sesma)	=	2·782 feet.
1 Estado (2 Vara)	=	5·564 feet.
1 Legua (of Castile)	=	4636·66 yards.
1 Fanegada	=	1·6374 acres.
1 Cuartillo (4 Capo)	=	·1109 gal.
1 Cuartilla (2 Azumbre)	=	·8879 gal.
1 Arroba Mayor (or Cantara)	=	3·5517 gals.
1 Mayor (16 Cantara)	=	56·276 gals.
1 Medio (2 Quartillo)	=	·0621 bushl.
1 Almude (2 Medio)	=	·1256 bushl.
1 Fanega	=	1·5076 bushls.
1 Cahiz	=	18·0919 bushls.
1 Tomin (12 Grano)	=	·02113 oz. av.
1 Onza	=	·0634 lb. av.
1 Libra (of Castile)	=	1·014 lbs. av.
1 Quintal	=	101·442 lbs. av.
1 Tonelada	=	1014·42 lbs. av.

Sweden.

The Metrical System since 1875.

1 *Fot* (10 *Tum*)	=	11·689 inches.
1 *Mil* (360 *Ref*)	=	6·6416 miles.
1 *Kanna*	=	4·608 pints.
1 *Skoalpund* (100 *Ort*)	=	·937 lb. av.

Switzerland.

The Metrical System since Jan. 1st, 1873.

1 *Fuss* (10 *Zoll*)	=	11·8112 inches.
1 *Stunde* (1600 *Ruthe*)	=	2·9826 miles.
1 *Malter* (10 *Viertel*)	=	4·126 bushels.
1 *Maass* (4 *Schoppen*)	=	2·641 pints.
1 *Pfund* (16 *Unze*)	=	1·1023 lbs. av.

Tripoli.

1 Pike	=	26·416 inches.
1 Draâ	=	19·13 inches.
1 Orbah	=	1·476 gallons.
1 Hueba (4 Temen)	=	2·952 bushels.
1 Secchie (4 Bozze)	=	2·361 gallons.
1 Oka (40 Uckieh)	=	2·69 lbs. av.
1 Centner (100 Rottoli)	=	107·66 lbs. av.

Turkey.

1 Pike or Arshen	=	27¼ inches.
1 Pike or Arshen (land)	=	29⅓ inches.
1 Halebi or Archim	=	27·9 inches.
1 Endazzeh (Silk)	=	25¼ inches.
1 Agatsch (3 Berri)	=	3·1159 miles.
1 Jubbeh (11 Rottol)	=	·4851 bushel.
1 Fortin (4 Killow)	=	3·8809 bushels.
1 Rottol (12 Okiejeh)	=	2·513 pints.
1 Almud (8 Oka)	=	1·1519 gallons.
1 Cantar (100 Rottol)	=	31·417 gallons.
1 Cantar (dry)	=	124·08 av.
1 Okiejeh (100 Dirhem)	=	·70854 lb av.
1 Kèlé or Oke (4 Okiejeh)	=	2·1975 lbs. av.
1 Batman (dry)	=	16·92 av.

United States.

The Metrical System, authorized 1866; also weight, length, and surface measures as in England, and old Winchester measure.

1 Pint (dry)	=	·9694 pint.
1 Gallon (dry)	=	·9694 gallon.
1 Bushel	=	·9694 bushel.
1 Quarter	=	·9694 quarter.
1 Pint (wine or spirit)	=	·8331 pint.
1 Gallon (wine or spirit)	=	·8331 gallon.
1 Pint (beer)	=	1·017 pints.
1 Quintal or Centner	=	100 lbs. av.
1 Barrel (of flour)	=	196 lbs. av.
1 Barrel (of beef)	=	200 lbs. av.

Uruguay.

Metrical System, introduced 1864; also as in Argentine Republic. Venezuela, the Metrical System, since 1857; and old Spanish.

Digitized by Google

The Postal and Telegraphic Work of the World.

THE accompanying table shows, with respect to each of the principal countries of the world, the estimated population; the number of letters, post-cards, books, newspapers and postal parcels posted in each country; the proportion which these bear to the population; the number of post-offices open in each country; the number of telegraphic (excluding telephonic) messages dispatched in or from each country, so far as statistics are available; and the proportion which these bear to the population.

The figures given apply, with very few exceptions, to the years 1894 or 1895, or, as in the case of Great Britain, to the financial year 1894-95; and they are obtained, for the most part, either from the reports of the Union Postale Universelle, or from the last edition of Herr O. Hübner's "Geographisch-Statistische Tabellen," edited by Prof. von Juraschek.

It will be seen that the citizen of the United States makes more use of the post-office than the citizen of any other country. After the American come in order the Swiss, the Australian, the Briton, the Dane, the Belgian, the Netherlander, the Frenchman, the German, the Uruguayan, the Norwegian, the Canadian, and the Swede.

Unfortunately, the telegraphic statistics for the United States, and for one or two other countries are not complete. Probably the American both sends more telegrams and posts more letters than anyone else. Conceding him this superiority, the countries which appear to take the fullest advantage of the electric telegraph are, in order, the United States, Australia, Belgium, Switzerland, France, the Netherlands and Canada, Great Britain, Norway, Denmark, Germany and Bulgaria. It is significant that of the twelve countries mentioned as heading the telegraphic list, eleven are also among the first twelve in the postal list.

—	Estimated Population.	No. of Postal Dispatches of all kinds.	Postal Dispatches per head.	Post Offices.	Telegraphic Dispatches.	Telegraphic Dispatches per head.
Argentine Republic	4,200,000	123,600,000	29·4	1,465	?	?

THE FRENCH ACADEMY is composed of 40 members, elected for life, and is the highest of the five Academies constituting the *Institut de France*. The special object of this institution is the composition of the historical Dictionary of the French Language. It was founded in 1635, by Cardinal Richelieu, and re-organized in 1816. The other Academies are as follows:—

ACADÉMIE DES INSCRIPTIONS ET BELLES-LETTRES, founded 1663, 40 members.

ACADÉMIE DES SCIENCES, founded 1666, divided into 11 sections, each of which comprises 6 members.

ACADÉMIE DES BEAUX-ARTS, 5 sections, comprising 40 members, as follows—painting, 14 members; sculpture, 8; architecture, 8; engraving, 4; musical composition, 6.

ACADÉMIE DES SCIENCES MORALES ET POLITIQUES (for the study of questions of social and political economy), founded in 1832, 40 members, 5 sections.

All the Academies, with the exception of the Académie Française, elect a certain number of honorary members and of foreign correspondents.

Drunkenness is not and never was an offence by the common law of England. More than one statute, however, has been directed against it. The preamble of an Act passed in the reign of James I. runs, "Whereas the loathsom and odious Sin of Drunkenness is of late grown into common Use within this Realm, being the Root and Foundation of many other enormous Sins, as Bloodshed, Stabbing, Murder, Swearing, . . . and such like, to the Great Dishonour of God and of our Nation, the overthrow of many good Arts and manual Trades, the disabling of divers Workmen, and the general Impoverishing of many good subjects, abusively wasting the good Creatures of God," and provides that drunkenness shall be punished by a fine of 5*s*., with confinement in the stocks in default of distress. There are, of course, modern statutes which provide for the punishment of drunkenness when occurring on licensed premises or in public places, but the only attempt by the Legislature to treat drunkenness *per se*—drunkenness pure and simple, if we may use the phrase—from the moral standpoint indicated by the Act of James I., is contained in the Habitual Drunkards Act, 1879 (42 & 43 Vict. c. 19), whose duration was at first limited to ten years, but which was made perpetual and slightly amended by the Inebriates Act, 1888 (51 & 52 Vict. c. 19), the two statutes being generally quoted together as The Inebriates Acts, 1879 and 1888.

The principal Act, that of 1879, endeavours, as in recent times other well-known provisions of the Legislature have endeavoured, to protect the vicious against themselves. Its salutary nature and its effect for good on those who, as Macaulay says of Johnson, can "practise abstinence but not temperance," have probably never been thoroughly appreciated by the public, whose comprehension of its operation it is the object of this brief article to elucidate. To begin with, it defines an habitual drunkard as a "person who, not being amenable to any jurisdiction in lunacy, is, notwithstanding, by reason of habitual intemperate drinking of intoxicating liquor, at times dangerous to himself or herself, or to others, or incapable of managing himself or herself, and his or her affairs." It allows (section 6) "retreats" for the reception of such unfortunates to be licensed by the local authority, and these retreats by subsequent sections are subjected to inspection by an "Inspector" or "Assistant-Inspector" to be appointed by one of Her Majesty's Principal Secretaries of State. It is also enacted that every retreat shall employ a duly qualified medical man, that no licence shall be granted to the keeper of a lunatic asylum, that the retreats shall be visited at least twice a year by the Inspector or Assistant-Inspector, and that the former (section 16) "shall in the month of January in each year present to the Secretary of State a general report setting forth the situation of each retreat, the names of the licensees, and the number of habitual drunkards who have been admitted and discharged, or who have died during the past year, with such observations as he shall think fit as to the results of treatment and the condition of the retreats." This report has to be laid before Parliament by the Secretary of State, who also has power to make rules for the management of the retreats of which any contravention is an offence against the Act.

It will thus be seen that the security and proper treatment of the inmates of these retreats are well safeguarded, and it may be that imperfect acquaintance with this fact is one of the reasons why the salutary statute of 1879 has not been so extensively used as it might have been. Passing now to the method of getting in and out of a retreat, it is provided (section 10) that "any habitual drunkard desirous of being admitted into a retreat may make application in writing to the licensee of a retreat for admission into such retreat . . . . and shall state the time during which such applicant undertakes to remain in such retreat. Such application shall be accompanied by the statutory declaration of two persons to the effect that the applicant is an habitual drunkard within the meaning of this Act." The section goes on to provide that, besides the written application of the habitual drunkard, and the statutory declaration of his two friends, there shall be a magisterial investigation before the applicant is permitted to enter a retreat. The signature to the application, it is enacted, "shall be attested by two justices of the peace, and such justices shall not attest the signature unless they have satisfied themselves that the applicant is an habitual drunkard within the meaning of this Act, and have explained to him the effect of his application for admission into a retreat and his reception therein, and such justices shall state in writing, and as a part of such attestation, that the applicant understood the effect of his application for admission and his reception into the retreat."

When once the preliminary formalities are completed, and the applicant is in the retreat, he must stop there for the term (not exceeding twelve calendar months) mentioned in his application, unless he is discharged by the order of a justice on "reasonable and proper" grounds, or is licensed to reside outside the retreat for the benefit of his health. Such a licence must also be granted by a justice, and it is only in force for two months, and will be forfeited by any habitual drunkard who escapes from the person to whose care he has been entrusted whilst absent from the retreat, or who "refuses to be restrained from drinking intoxicating liquors." Authorised absences from a retreat are included in the time originally fixed for the detention of the party. With regard to getting out of a retreat, it has been already pointed out that the term of detention naturally expires at the end of a year, but before such period, or any other which may have been fixed, the habitual drunkard may by order of the local authority or the Inspector of Retreats, be discharged from an unfit or unsuitable retreat, and the important section 18 enacts that "a Judge of the High Court of Justice, on an application *ex parte* at chambers, or a County Court Judge, within whose district the retreat is situated, may at any time, by order under his hand, authorise or direct any person or persons to visit and examine a person detained in a retreat. . . . and to inquire into and report on any matters which such Judge may think fit in relation to the person so detained. The Judge, on receiving such report, may, if he shall think fit, order the discharge of any person so detained from any such retreat."

The Act further provides that if a drunkard escapes from a retreat he may be apprehended and brought back by order of a justice of the peace, and for the punishment of

offences by drunkards during their detention and by the licensees, &c., of retreats, who must not neglect the inmates, or aid their escape, or supply them with intoxicants "except in case of urgent necessity."

In the schedules of this Act information is given as to "local authorities" and their clerks in England, Scotland, and Ireland, together with a form of request for reception into a retreat and other forms to be used under the Act.

Bills of Sale.

Putting aside exceptionally strong cases of personal friendship, it is a difficult, if not an impossible, thing to borrow money on what in the old "ca. sa." days used to be called "personal security." One must give "better bail" than that, and as an additional name is very often useless, a bill of sale is commonly resorted to by those who have furniture and household effects, without being possessed of higher class property in the shape of land, stocks and shares, etc. A bill of sale, in the ordinary and popular acceptation of the term, may be generally described as the poor man's method of raising money, though it must not be forgotten that bills of sale given by way of security for a less sum than £30 are void under section 12 of the Bills of Sale Act, 1882, which also provides (section 8) that the consideration for which a bill is given must be truly stated in it, or it will be invalid.

The law with regard to bills of sale is contained in a series of statutes ranging from 1878 to 1891, of which the provisions cannot, of course, be referred to in detail here. The Acts in question are intricate and puzzling, and have, perhaps, succeeded in evoking as many expressions of wonder from her Majesty's Judges as even the Copyright and Betting Acts.

At the commencement of this brief *résumé* of their effect, it may be stated that a bill of sale is essentially a mortgage of chattels, an assignment of personal goods as security for a debt or loan. There is, as a rule, no transfer of possession. Instruments included in the statutory definition of a bill of sale are enumerated in section 4 of the Act of 1878. The fact of there being no transfer of the possession of the goods forming the subject of a bill of sale from the grantor or borrower to the grantee or lender, is the reason why the registration of such instruments is required by the Legislature. Without this publicity—so much disliked and so often attempted to be evaded—innumerable and serious frauds might obviously be perpetrated by the unscrupulous upon the body of their creditors, landlords excepted. A bill of sale then must be registered within seven clear days after its execution, or it will be void. The fees payable are *ad valorem*. The registration of bills of sale and other business connected with them is performed in the Bills of Sale Department of the Central Office of the Supreme Court (Royal Courts of Justice, Strand). Anyone may search the register and inspect or make certain extracts from any bill on payment of a fee of 1*s*. When the grantor of the bill resides beyond the London district, an abstract of the bill is sent to the local county court and filed there. With regard to the form of the bill, it must be strictly in accordance with the precedent given in the schedule to the Bills of Sale Act, 1882, and the grantor's execution of the instrument must be attested by a credible independent witness, whose address and description must appear on the face of the bill, which cannot, in this respect, be supplemented by reference to the affidavit to be filed on registration. Annexed to a bill of sale must be an inventory or schedule of all goods comprised in it, and it will be void as regards any goods omitted therefrom, and also void, except as against the grantor, as regards any goods of which he was not the true owner at the time of giving the bill of sale.

Respecting the right of the grantee to seize the goods, section 7 of the Act of 1882 provides that he may only do so in the five following cases:—(1) If the grantor makes default in payment of the sum or sums of money secured by the bill of sale at the time therein provided for payment, or in the performance of any covenant necessary for maintaining the security; (2) If he becomes bankrupt or suffers a distress for rent, rates, or taxes, upon any of the goods assigned; (3) If he fraudulently removes any of the goods; (4) If he unreasonably fails to produce to the grantee, upon written demand, his last receipts for rent, rates, and taxes; and (5) If any execution under any judgment is levied upon his goods. There is, however, an important proviso to this section which enacts that the grantor may "within five days from the seizure or taking possession of any chattels on account of any of the above-mentioned causes, apply to the High Court or to a Judge thereof in chambers, and such Court or Judge, if satisfied that by payment of money or otherwise, the said cause of seizure no longer exists, may restrain the grantee from removing or selling the said chattels, or may make such other order as may seem just."

It has been already intimated that the publicity attendant on the registration of bills of sale is by no means relished by would-be grantors. "If I register a bill of sale, it will ruin my credit," says the trader. Accordingly many contrivances for evading the provisions of the Bills of Sale Acts are constantly being resorted to, such as a sale and a resale, etc. But such transactions almost invariably fail to stand investigation in a court of law, where their substance will be considered, and a document which is in effect a bill of sale will be held liable to be governed by the Acts. It should also be remembered that, though the Legislature has made an unregistered bill of sale void generally as an assignment of personal chattels, this by no means abolishes the rules of the common and statute law relating to fraudulent conveyances. "Fraud vitiates everything" is a maxim well known to lawyers.

A *bonâ fide* hiring or hire-purchase agreement does not require registration as a bill of sale, but a post-nuptial settlement, whether voluntary or for value, does.

Naval and Military Salutes.

All members of the English or Foreign Royal Families, Foreign Crowned Heads, or Sovereign Princes or the consorts of any Foreign Crowned Heads or Princes, or the President of a Republic, are entitled to a "Royal" Salute of 21 Guns.*

Naval, Military, and Civil Authorities who are entitled to salutes when in their official capacities.	No. of Guns.
The Lord Warden of the Cinque Ports (by the Forts or Batteries within his jurisdiction)	19
Ambassador Extraordinary and Plenipotentiary	19
The Lord High Admiral (or the Lords Commissioners for executing the office of Lord High Admiral)	19
The Commander-in-Chief, or the Officer Commanding-in-Chief the whole Army of the U.K.	19
Governor or High Commissioner of any of Her Majesty's Colonies, Foreign Possessions, Castles, or Fortresses	17
Admiral of the Fleet	17
Field-Marshal	17
Envoy-Extraordinary and Minister Plenipotentiary, and others accredited to sovereigns (with the exception of such as are accredited in the specific character of Minister Resident)	15
The First Lord Commissioner of the Admiralty	15
Admiral	15
General	15
Lieutenant-Governors, if administering the Government and holding a direct Commission from the Queen, or acting temporarily for the Officer so commissioned, Administrators, and Administrators acting in subordination to a Governor-in-Chief	13
Lieutenant-Governors not administering Government if holding a Commission direct from the Queen	13
Minister Resident, Diplomatic authorities below the rank of Envoy Extraordinary and Minister Plenipotentiary and above that of Chargé-d'Affaires	13
Vice-Admiral and Lieutenant-General	13
Consul-General	13
Commodore (no Senior Captain being present)	9
Brigadier-General	9
Consul	7

* In India the "Royal" Salute consists of 31 guns (Her Majesty the Queen and Empress when present in person receiving a Salute of 101 guns). The Viceroy and Governor-General is entitled to 31 guns when within Indian territory. Other Salutes to Indian Officers vary from 19 guns to 11 guns. The Governor-General of the Portuguese Settlements in India is saluted by 17 guns; the other Portuguese Governors by 9 guns.

PAWNBROKERS' REGULATIONS.

For the Ticket on goods pledged for 10*s.* or less ..... ½*d.*
On goods pledged for more than 10*s.* ..... 1*d.*
For Interest on pledges not exceeding 40*s.*, for every 2*s.* or part of 2*s.*, per month ..... ½*d.*
And after the first month any time not exceeding 14 days to be charged as half a month.
On pledges exceeding 40*s.*, for every half-crown or part of half a crown, per month ½*d.*

Forfeiture.—Pledges for 10*s.* and under must be redeemed within twelve calendar months and seven days from the date of pledging. After that they become the property of the pawnbroker.

Pledges above 10*s.*, if not redeemed within twelve calendar months and seven days from the day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawner may inspect the account of the sale in the pawnbroker's books on payment of one penny, and receive any surplus produced by the sale. Should there be a deficit, the pawner, or the person producing the ticket, is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawnbroker against surplus on another.

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit—*i.e.*, the loan and profit and 25 per cent. on the amount of the loan.

If any ticket is lost, mislaid, or stolen, the pawner should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same.

When the loan is 5*s.* or under, the charge on form of declaration is one halfpenny; when the loan is above 5*s.*, one penny.

Special Contracts.—A pawnbroker may make a special contract with a pawner in respect of a pledge on which the pawnbroker makes a loan of above 40*s.*, provided always that—

(1.) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn-ticket, signed by the pawnbroker.

(2.) The duplicate of the special contract pawn-ticket shall be signed by the pawner.

The pawnbroker may also charge:—For ticket, profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract.

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special contract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as are set forth above in the case of ordinary pledges for more than 10*s.*

SHOWING THE DATES OF EXISTING DIGNITIES, AND THE ORDER IN WHICH THEY WERE CONFERRED

* Irish Peerages. † Scottish Peerages. x Merged in other titles.

THE Peerage of the United Kingdom consists of—1. Those Peers of England whose titles date from before the Legislative Union with Scotland (1st May, 1707), and who therefore take precedence of all others; all these are Peers of Parliament. 2. Peers of Scotland created previous to the Union: of these, sixteen are elected to sit in the House of Lords. 3. Peers of Great Britain created previous to the Legislative Union with Ireland (1st January, 1801): these all sit in the House of Lords. 4. Peers of Ireland created previous to the Union: of these, twenty-eight are elected to sit in the House of Lords. 5. Peers of the United Kingdom created since the Legislative Union between Great Britain and Ireland. 6. Peers of Ireland of recent creation. By the Articles of Union the Sovereign was empowered to create one Irish Peer whenever three of the old Peerages become extinct. The last creation was that of the late Duke of *Abercorn* (1868), who sat in the House of Lords by virtue of his British Marquessate. 7. Life Peers. Of these there are five, Lords Watson, Macnaghten, Morris, Russell of Killowen, and Davey: they sit in Parliament, but the titles are not hereditary.

The Representative Scottish Peers are elected for every fresh Parliament, but those for Ireland are elected for life. Many of the others for both countries having had English or later titles granted to them, sit in the House of Lords by virtue of such titles: thus the senior Scottish Marquess, *Huntly* (1599), sits as Baron *Meldrum* (1815), and the senior Irish Duke, *Leinster* (1766), sits as Viscount Leinster (1747).

All Irish Peers not Peers of Parliament are eligible for seats in the House of Commons, and may represent any Borough, County, or University in England or Scotland, but not in Ireland: *e.g.*, Viscount Valentia M.P. for the city of Oxford. Peers of Scotland cannot be elected as Members of Parliament in any o the three countries.

Henry II., 1154–1189.

1155 xArundel, *Earl*
1181 *Kingsale, *Baron*; x*Courcy, *Baron*; x*Ringrone, *Baron*

John, 1199–1216.

1200 x*Kerry, *Baron*; x*Lixnaw, *Baron*

Our Ocean Mail.

WITH A GLANCE AT THE SHIPS OF THE PAST.

. In most cases where lists of fleets are quoted in this article, the larger vessels only are mentioned, space being too limited to include the entire fleets.

Of all the marvellous results of man's inventive genius, none is perhaps more worthy of our wonder and admiration than that of the application of steam to navigation, more especially when we consider how humbly it originated, and with what rapid strides it has reached its present immensity. Although many engineers of the end of the last and the beginning of the present century had more or less claim to be inventors of the steamboat, there is a supposed instance of a ship being propelled by steam as early as 1543, when Blasco de Garay, a Spanish captain, exhibited in Barcelona harbour a vessel of 200 tons burthen which he had invented. The steam power, which worked a moveable wheel on either side of the ship, was supplied from a cauldron of boiling water placed under each.* To trace the history of steam navigation in all its details would occupy more space than it is possible to devote to the subject, and it would moreover exceed the limits of the present article, which is intended to deal specially with the development and progress of the mail and passenger services which are carried out by English companies. It will be sufficient for our purpose, therefore, if the year 1807 is taken as a starting-point—the year in which Fulton and Livingstone built the *Clermont* at New York. This vessel was the first to make a completely successful voyage by steam from that city to Albany, and justly claims to be the first passenger steamer ever built. In 1812 the first European passenger steamer, the *Comet*, was built by Henry Bell and launched upon the Clyde. She was engined by John Robertson, who lived long enough to set up those very engines in the South Kensington Museum when they were deposited in that institution. Six years later Mr. Scarlborough, of Savannah, determined to attempt the navigation of the Atlantic by steam. He accordingly purchased a vessel at New York while yet on the stocks, fitted her with engines, and named her the *Savannah*. On 19th May, 1819, she left Savannah for Liverpool, which port was safely reached on the 20th June. It cannot be said, however, that this was the first vessel to *steam* across the Atlantic, for, owing to rapid consumption of the fuel (pitch pine), she only used steam 18 days, sailing the rest. To Canada belongs the honour of having first made that journey entirely by steam. The *Royal William* was launched at Wolfe's Cove, Quebec, in 1831, and on the 17th August, 1833, sailed from Picton, N.S., arriving in England on the 11th September. She was sold on her arrival and chartered by the Portuguese Government for a transport, and subsequently purchased by the Spanish Government, fitted out as a man-of-war called the *Isabella Segunda*, and went into action against the Carlists at San Sebastian. She is stated to have been the first steam warship in the world. The *Sirius* was the next ship to make the passage by steam alone. She was built in London, and, on the 5th April, 1838, left Cork for New York, arriving there with seven passengers on the 23rd of the same month. Scarcely had she dropped anchor, however, when another vessel was sighted. This was the *Great Western*, which had left Bristol on the 8th April, and entered New York only a few hours after the *Sirius*, having completed the journey in the marvellous time of 14½ days. It may be of interest to mention that the *Great Western* made in all, between 1838 and 1843, 64 voyages across the Atlantic. Her fastest westward passage was made in 12 days 18 hours, and her fastest eastward passage in 12 days 7½ hours. In 1847 she was sold to the Royal Mail Steam Packet Company, and remained in their service for many years. She was finally broken up at Vauxhall in 1857, after a long and successful career.

Now that it had been proved beyond doubt that steam navigation could be carried on with success, companies were formed for the purpose of extending the use of steamboats and establishing regular services between country and country. In sketching the histories of the great lines of steamships, we will first turn our attention to those whose vessels ply between England and the United States, seeing that they are not only the largest but also the most numerous. The pioneer companies on this route were all established in 1838; they were, (1) The British and American Steam Navigation Company, (2) The Great Western Steam Navigation Company, (3) The Transatlantic Steamship Company. To the first of these belonged the *Sirius*, whose performance is already noted, and in 1839 the company launched on the Thames a vessel of much larger proportions. This ship, the *British Queen*, carried a crew of 100 men, 600 tons of coal, and £1,500,000 worth of cargo. She left Portsmouth for New York on July 12th, 1839, and made the passage in 14 days 8 hours. Before the year was out she had crossed five times more, and in the following year made five round voyages, *i.e.* out and home; from a financial point of view, however, she was a failure, and in 1841 was purchased by the Belgian Government. Her sister ship, the *President*, made only three passages, and after leaving New York for Liverpool on March 10th, 1841, she was never heard of again. This loss proved too heavy for the company to bear, and consequently the Transatlantic traffic was left in the charge of the two remaining lines. The Great Western Company owned the *Great Western* already mentioned, and built for their service the *Great Britain*, an iron steamer, which unlike those hitherto in use, worked by paddles, was propelled by means of an Archimedean screw. She made two passages only. She left Liverpool 26th August, 1845, and arrived off Sandy Hook 10th September, having made the passage in 14 days 21 hours. Her homeward passage was accomplished in 15 days 12 hours. She stranded in Dundrum Bay, September 22nd, 1846, just as she had started on her third voyage. This disaster closed the career of the second company. The history of this famous steamer is indeed a remarkable one. After remaining stranded from September, 1846, until the following August, she was floated, and on examination it was found that her hull had not sustained any material damage. She was purchased by a Liverpool firm, fitted with new machinery, and was employed in the Australian trade for many years. Afterwards she was converted into

* This was stated to be a figment by the late John Macgregor (Rob Roy). It was worked by paddles turned by hand.

Digitized by Google

a sailing ship, and was broken up at the Falkland Islands in 1890. The Transatlantic Company had in their service the *Royal William*, which they chartered from the City of Dublin Steam Packet Company. Liverpool was selected for the departure and arrival of the steamers of the Transatlantic line, the other companies having started their boats from Bristol and Portsmouth, and it is worthy of note that the *Royal William* was not only the first steamship to cross the Atlantic from Liverpool, but also the first that was built on the watertight-section principle. She left Liverpool on July 5th, 1838, and completed the voyage in 19 days. The next steamer of this company was the *Liverpool*, a much larger vessel, which started on her first voyage October 20th, 1838. On the 26th, however, she put back to Cork, and did not proceed on her journey until the 6th November, reaching New York on the 23rd. She made 6 round voyages, averaging 17 days westward and 15 on the eastward journeys, and was then purchased by the Peninsular and Oriental Company, who changed her name to the *Great Liverpool* in distinction from one they already possessed of that name. In 1846 she became a total wreck off Cape Finisterre.

The failure of these companies by no means decided that Atlantic steam navigation was itself a failure, for in 1840 was established the British and North American Steam Packet Company. As proof of its success it is only necessary to mention that its principal promoter was the late Samuel Cunard, who, with George Burns of Glasgow and Charles MacIver of Liverpool, obtained from the British Government an annual subsidy of £60,000 for a monthly—and afterwards fortnightly—service of mail ships between Liverpool, Halifax and Boston.

The *Great Eastern*, the largest ship ever built, was 680 feet long, 83 feet beam, 28 feet draught (loaded), 23,000 tonnage, paddle engines 1,000 horse-power nominal, screw engines 1,700 horse power nominal. Designed by I. K. Brunel, she was commenced building at Millwall in the spring of 1854, and was launched, after many difficulties, on January 30, 1858.

The history of the *Great Eastern* was from the first financially an unfortunate one. She made several voyages to America at a great loss to her owners, but in 1865-66 somewhat redeemed her character by successfully laying the Atlantic Cable.

Subsequently, owing to her vast size, she was instrumental in laying most of the important telegraph cables across the Atlantic, in the Mediterranean, Red Sea, &c. In 1888 she was sold at auction in Liverpool to be broken up, fetching £58,000.

Before closing the historical portion of "Our Ocean Mail," it may be added that in 1825 the steamship *Enterprise* reached Calcutta from London in 113 days: she was 122 feet length of keel, and 27 feet beam.

TABULAR STATEMENT OF MEASUREMENTS OF SOME OF THE EARLIEST STEAMSHIPS.

	Name of Ship.	Length.	Breadth.	Depth.	Tonnage.	Horse-power.
	Clermont	136 ft.	18 ft.	7 ft.	160	18

	Liverpool	235 ft.	21 ft.	.....	1,150	464
	William Fawcett	74 ft.	16 ft.	.....	206	60

THE AFRICAN STEAMSHIP COMPANY may be said to be the earliest African line, having originated in 1832 in a private expedition, started by Mr. Macgregor Laird from Liverpool, for the purpose of exploring the Niger River. The successful issue of this expedition encouraged others for the purpose of opening up that part of Africa, and of putting down the slave trade. In 1852 the company received its charter, and agreed to perform a monthly mail and passenger service to West Africa, in consideration of which they received an annual subsidy of £30,000. The pioneer boats, which were built on the Mersey, by Mr. John Laird, and which rendered valuable service in the Crimean war, were the *Forerunner*, *Faith*, *Hope*, and *Charity*. An unbroken service has been maintained by this company ever since its incorporation, and year by year numerous fine vessels have been added to the fleet. The Company has recently (1891) associated itself with the British and African Steam Navigation Company (see next page) under the conjoined management of Messrs. Elder, Dempster & Company, of Liverpool. The following are the largest ships:—

Ship.	Gross Tons.	Horse-power	Ship.	Gross Tons.	Horse-power
Assaye	4296	390	Coomassie.	2625	233
Merrimac ...	4177	390	Ethiopia...	2523	234
Albertville..	3500	308	Mayumba	2516	232
Leopoldville	3500	308	Palmas ...	2428	245
Ilaro	3500	244	Monrovia..	2402	221
Lycia	3282	283	Benin	2223	250

Angola	2870	257	Gambia ...	1915	214
Cabenda ...	2777	238	Gaboon ...	1860	252

and seven smaller vessels.

In conjunction with the British and African Steam Navigation Company, they perform, in addition to three distinct services between Liverpool and West Africa, the following:—Liverpool to South-West Africa; Hamburg and Rotterdam to West Africa; Hamburg to South-West Africa; and Antwerp to South-West

Africa; the last named being under contract with the Congo Free State.

PASSENGER RATES.—To West Coast, 1st cl., £18 10s. to £30; 2nd cl., £12 10s. to £22 10s.

THE ALLAN LINE was established in 1852. The vessels of this line are owned by Messrs. Allan Brothers, of Liverpool, although the fleet is really of Canadian origin, having been started so long ago as 1820. As a steam fleet, however, the Allan dates from 1852, when Sir Hugh Allan, of Montreal, tendered for service a line of steamers, which the Canadian Government determined should be established to meet the growing commercial requirements of the colony, and which they agreed to subsidize. In 1856 his engagement developed into a contract to carry the mails, and a weekly service between Quebec and Liverpool, a fortnightly one between Halifax and St. John's and Liverpool, and subsidiary services between Glasgow and Liverpool on this side and New York, Boston, Portland, Quebec, Philadelphia and other ports have since been regularly carried on. The *Parisian*, the "commodore" ship of the fleet, with a gross tonnage of 5,500 tons, and 6,200 horse-power, has performed the voyage from Moville, north of Ireland, to Rimouski, the mail station, 160 miles below Quebec, a distance of 2,300 knots, in 6 days, 20 hours, and homeward in 6 days, 15 hours, 2 minutes. Other fast passages made by steamers of this line are the following:—*Sardinian*, outward in 6 days, 23 hours, 30 minutes, and homeward in 7 days, 3 hours, and 20 minutes; *Sarmatian*, outward in 7 days, 3 hours, 40 minutes, and homeward in 7 days, 4 hours, 30 minutes; *Peruvian*, outwards in 7 days, 6 hours, and homeward in 7 days. The following are the principal steamers in the Allan fleet:—

Ship.	Gross Tons.	Ship.	Gross Tons.
Assyrian	3970	Norwegian	3523
Austrian	2682	Numidian	4907
Brazilian	3203	Nestorian	2726

Mongolian	4909	State of California	4244
Monte Videan	3076	Waldensian	2306

PASSENGER RATES.—To New York, 1st cl. from £10 10s., 2nd cl. £8 5s., steerage £5 5s.

THE ANCHOR LINE began their Transatlantic business in 1856 with a small ship called the *Tempest*, which had done service in their South American and Indian fleet of sailing ships. This was converted into a screw steamer, and was the first of their North American vessels. As soon as it was seen that their venture was succeeding, Messrs. Handyside & Henderson, the projectors of the line, turned their attention from their other branches of trade to that between New York and Glasgow. Larger ships were rapidly built and continually added to the size of the Anchor fleet, and at the present time they own upwards of thirty steamers. Besides the American service, this company maintains a service from Glasgow and Liverpool to India, and another to the Mediterranean. Their principal vessels are:—

Ship.	Gross Tons.	Horse-power.
Algeria	4,510	3,000
Anchoria	4,156	3,000
Arabia	3,593	1,920
Armenia	3,395	1,744
Asia	3,560	1,920
Bohemia	3,189	2,000
Bolivia	3,999	2,920
Britannia	3,069	1,451
California	3,410	1,653
Circassia	4,272	2,717
City of Rome	8,453	11,153
Dalmatia	3,318	1,700
Devonia	4,270	3,047
Ethiopia	4,004	2,846

Persia	3,596	1,920
Scindia	4,534	2,500

PASSENGER RATES.—New York, 1st cl. 9 to 13 guineas; 2nd cl. £6 10s.; steerage £5.

THE BIBBY LINE trades from Liverpool to Colombo and Rangoon, viâ Marseilles.

This line (which was first established in 18[illegible]) is now the recognised route for first-class passengers to Burmah, and controls a large share of the trade with Ceylon. They also, in conjunction with the daily steam service between Colombo and Tuticorin, offer the best facilities for those desirous of reaching Bangalore, Cochin, Calicut, Ootacamund, Trichinopoly, Madura, and Southern India generally.

These fast steamers, which are all of Harland & Wolff's most modern type, consist of:—

Steamer.		Tons.	Horse-power.
Staffordshire	Twin-screw	6005	4500
Shropshire	Twin-screw	5720	4000
Cheshire	Twin-screw	5708	4000
Derbyshire	(Building)	6500	5000
Lancashire		4256	3500
Yorkshire		4261	3500

Besides affording special facilities for travellers to and from Egypt, Palestine, &c. (whether round the Bay or through France), they offer a pleasant opportunity for those going to or from the Riviera, or desiring a week at sea in a first-class passenger steamer.

This line is recognised by the Indian Government for officers returning at expiry of furlough.

PASSENGER RATES.—To Rangoon, 1st cl. £50; to Ceylon, £42 10s.

THE BRITISH AND AFRICAN STEAM NAVIGATION COMPANY, established in 1868, conveys passengers and mails from Liverpool to the West Coast of Africa. It has a fleet of 22 steamers, and, in conjunction with the African Steamship Company, performs seven distinct services to the West Coast of Africa. The company is under the management of Elder, Dempster & Co. Many of its captains, at the orders of the company, have explored and brought into prominence African rivers hitherto unknown to civilisation, and the names given to the various waterways, such, for instance, as the "Elder," "Dempster," "Jones," "Davey," "Sinclair," "Bond," &c., show at once the source of their discovery. The steamers, which are all modern passenger and cargo vessels, are named after the various African

Digitized by Google

rivers and ports. The following is a list of the larger vessels of the fleet :—

Ship.	Gross Tons.	Horse-power	Ship.	Gross Tons.	Horse-power
Axim	3000	266	Bonny	3000	247
Bakana	3000	265	Boma.....	3000	253

Accra	3000	268	Roquelle ...	2500	250
Volta	3000	253	Calabar.....	2000	214
Loanda	3000	253	Lagos.....	2000	214

British India Steam Navigation Company.—The first operations of this Company date from 1855, in which year the Honourable East India Company desired to establish a mail service between Calcutta and Burmah ; and soon after a small company was formed under the title of the Calcutta and Burmah Steam Navigation Company. At the outbreak of the Mutiny in 1857, the Company rendered important service to Government by bringing up from Ceylon to Calcutta half of the 35th Regiment ; since then the ships have been frequently utilized by the Government.

In 1862 the Company obtained the sanction of the Board of Trade to change its name from the Calcutta and Burmah Steam Navigation Company to the more appropriate and comprehensive title of the British India Steam Navigation Company. Since then its business has greatly increased, and it now boasts of having more steamers than any company trading to the East, its magnificent fleet consisting of 104 vessels with a total tonnage of 268,720. The largest ships of this line are—

Ship.	Gross Tons.	Ship.	Gross Tons.	Ship.	Gross Tons.

Passenger Rates.—Zanzibar, 1st cl. £52 10s., 2nd cl. £34 ; Colombo, 1st cl. £45 to £50, 2nd cl. £32 ; Madras and Calcutta, 1st cl. £47 10s. to £52 10s., 2nd cl. £32 ; Batavia and Queensland, 1st cl. £52 10s., 2nd cl. £37, 3rd cl. £16 16s.

The Castle Line was established in 1872, by Sir Donald Currie, since which time it has made itself a name not only for safety, but for speed and comfort.

The first vessel despatched to the Cape by Messrs. Donald Currie & Co. was the *Iceland*, which sailed from London and Dartmouth in January, 1872, and which was followed by the *Gothland* in February of the same year. Since 1876 the Castle Line steamships have carried the Royal Mails between England and South Africa.

It is interesting to note in the tonnage of the vessels of the Castle Line the increase in size as well as the increase in speed which has marked the company's progress. The *Gothland* and *Iceland* were vessels of about 1,400 tons gross register ; the steamers now employed by the company in the Cape Mail service are of 3,600 to 5,958 tons gross register, and the voyage, which formerly occupied about 32 to 34 days, has been accomplished by the Castle Company in 15 to 16 days.

A fleet of powerful steamers is at present engaged in keeping up regular communication between this country and South Africa, and additional steamers are employed on the South African Intercolonial service and Mauritius. The steamers are amply provided with watertight bulkheads, and other appliances for minimizing risk in case of accident, and are lighted throughout by electricity. The following are the largest ships of this line :—

Ship.	Gross Tons.	Horse-power	Ship.	Gross Tons.	Horse-power
Dunvegan Castle	5958	8000	Dunolly Castle ..	4200	3000
Tantallon Castle	5636	8000	Doune Castle ..	4045	3000
Tintagel Castle	5600	4000	Lismore Castle..	4045	3000
Avondale Castle	5600	4000	Raglan Castle ..	4000	3000
Dunottar Castle	5465	7000	Pembroke Castle	3878	2500
Arundel Castle..	4588	3400	Garth Castle ...	3660	2500
Norham Castle..	4398	5500	Grantully Castle	3454	2450
Hawarden Castle	4380	5500	Harlech Castle..	3264	2400
Roslin Castle....	4266	5000	Warwick Castle	3056	2400

It is evidently the aim of Messrs. Donald Currie & Co. to possess a fleet of uniformly fine and fast steamers for their South African Mail service, and such a policy is without doubt calculated to meet the wishes of the public interested in South Africa, who look for regularity combined with speed more than merely an occasional fast passage.

The fastest of these vessels is the *Tantallon Castle*, which has made the run from Southampton to the Cape in 15½ days, and from the Cape to Plymouth in 15 days.

The Castle Company have added to their fleet no less than five new steamers during the past year, with large capacity for cargo, and ample accommodation for passengers.

Passenger Rates.—Cape Town to Natal, 1st cl. £36 to £44 ; 2nd cl. £23 to £29 ; 3rd cl. £10 to £19. Delagoa Bay, 1st cl. £46 ; 2nd cl. £31 ; 3rd cl. £19. Beira, 1st cl. £50 ; 2nd cl. £33 ; 3rd cl. £20.

Canadian-Australian Line.—The natural outcome of the Canadian Pacific Railway has been the establishment of fast mail steamers between Vancouver, Australia, New Zealand, Hawaii, and the Fiji Islands. The fleet consists of—

Ship.	Gross Tons.	Horse-power.
Aorangi.....	4196	5000
Miowera	3315	4500
Warrimoo	3326	4500

There is a four-weekly mail service. This route, as the Imperial highway to and from Australasia, is of considerable importance to the British Empire, commercially and strategically.

The City Line trades between Liverpool and Glasgow, and Calcutta, Bombay, and Kurrachee. The company owns the following fine fleet of steamers, all of which are fitted with the electric light :—

Ship.	Gross Tons.	Horse-power	Ship.	Gross Tons.	Horse-power
City of Agra	3274	375	City of Khios.....	3496	350
City of Bombay....	4541	650	City of London	3229	450
City of Calcutta ..	3906	600	City of Oxford	4019	600
City of Cambridge	3844	600	City of Perth	3427	375
City of Canterbury	3416	350	City of Sparta (building)	5500	750
City of Dublin	3328	350			
City of Dundee	3427	350	City of Venice ...	3456	440
City of Edinburgh.	3230	500	City of Vienna	4672	700

Passenger Rates. — Calcutta, Bombay or Kurrachee, 1st cl. £45.

THE CLAN LINE was established in 1878. Its vessels run from Glasgow and Liverpool to Bombay; and from the same ports to Colombo, Madras, and Calcutta; also to Cape Colony and Natal, Delagoa Bay, Beira, and Mauritius. The steamers belonging to this line include the following:—

Ship.	Gross Tons.	Horse-power	Ship.	Gross Tons.	Horse-power
Clan Alpine	3080	1,200	Clan Menzies	2600	1,700
Clan Fraser.....	2083	1,500	Clan Ross.....	2602	1,700
Clan Gordon	2091	1,200	Clan Campbell ..	2600	1,700

PASSENGER RATES.—1st cl., Colombo, £42 10s. Madras and Calcutta, £45; 2nd cl. £30 to each.

THE CUNARD LINE.—The mail service was commenced on July 4th, 1840, when the *Britannia*, one of the Cunard fleet of four ships (the others being the *Acadia*, *Caledonia* and *Columbia*) left Liverpool for Boston, which port it fetched in 14½ days. The dimensions of these ships were as follows:—Length, 207 ft.; breadth, 34 ft. 2 in.; depth, 22 ft. 4 in.; tonnage, 2,050; h.p., 740. Additional interest is attached to the *Britannia* from the fact of its having conveyed Dickens when he visited America in 1842. To detail the various steps by which the Cunard Line has arrived at its present popularity would occupy more space than that at our disposal. It will be as well, however, to give in as concise a manner as possible the chief outlines of its history. An important period in its annals was the time when the American shipowners declared their intention of "running the Cunarders off the Atlantic," and many were the rivals which appeared to contest their supremacy. Of these the most important, perhaps, was the Collins Line, whose four ships, the *Atlantic*, *Pacific*, *Arctic* and *Baltic*, averaged on their passages from America 9 days, 17 hours, and to America 11 days, 10 hours, 26 minutes, whilst the Cunard ships could only show an average of 12 days, 19 hours, 26 minutes. Through bad management, however, this company soon became bankrupt, and their ships were sold. The Cunard Line has for many years been conspicuous for the speed, safety, and size—not only of its vessels but of its undertakings; and it is a significant fact that between October 1894 and October 1895 about 110,000 passengers were conveyed by them across the Atlantic. Two steamers, the *Campania* and *Lucania*, are subsidised by H. M. Government to be employed when necessity arises as armed cruisers. They are the largest passenger steamers in existence, and have made passages across the Atlantic averaging a speed of 22 knots per hour, whilst the *Etruria*, with her sister vessel the *Umbria*, are of an ocean speed of 20 and 19½ knots per hour respectively. The Cunard Company, which in 1890 celebrated its jubilee, has been in existence on the Atlantic for over 54 years, and during that time it has carried millions of passengers without loss of life.

The following is a list of "Cunarders" over 4,000 tons:—

Ships.	Gross Tonnage.	Horse-power.
Campania	12,950	30,000
Lucania	12,952	30,000
Umbria	8,127	14,500
Etruria	8,119	14,500
Servia	7,391	10,000
Aurania	7,268	9,500
Pavonia	5,587	4,000
Cephalonia.....	5,517	4,000
Catalonia	4,841	3,200
Gallia	4,809	5,300
Scythia	4,557	3,115
Bothnia	4,535	3,160

The fastest passages on record ever made across the Atlantic were accomplished by the two new steamers of this line, the *Lucania*, westward, in 5 days, 7 hours, 23 minutes, eastward, 5 days 8 hours, 38 minutes; *Campania*, westward, 5 days, 9 hours, 6 minutes, eastward, 5 days 9 hours, 18 minutes. We need hardly say that such achievements are quite phenomenal.

The fastest recorded passages made by other vessels of this line were as follows:—To America, *Etruria*, 5 days 22 hours 28 minutes; *Umbria*, 5 days 22 hours 7 minutes. From America, *Etruria*, 6 days 0 hour 40 minutes; *Umbria*, 6 days 1 hour 15 minutes. The *Etruria* has made an average speed across the Atlantic of over 20 knots, and the *Umbria* of 19½ knots per hour.

THE DOMINION LINE, whose steamers ply between Liverpool and Canada and the United States, was established in 1872. The fleet numbers among its vessels the following:—

Ship.	Gross Tons.	Horse-power	Ship.	Gross Tons.	Horse-power
Canada.....	5000	8000	Labrador...	5000	5000
Scotsman...	6041	3600	Angloman	5000	3200
Vancouver	5500	5000	Ottoman ...	5000	3200

The *Labrador*, on the 9th Aug. 1895, embarked the mails at Moville (Ireland) at 2.15 P.M.; Belle Isle was reached at 7.5 A.M. on Aug. 14th, thus making the run from land to land in 4 days, 16 hours—the fastest passage on record.

PASSENGER RATES.—1st cl. £10 10s. to £21; 2nd cl. £7 5s.; steerage, £5 5s.

EMPRESS LINE.—The magnificent twin-screw mail steamers of this line are owned by the CANADIAN PACIFIC RAILWAY, and run in connexion therewith between Vancouver and Japan and China, calling at Yokohama, Shanghai and Hong Kong. The fleet consists of:—

Ship.	Gross Tons.	Horse-power.
Empress of India	6,000	10,000
Empress of China	6,000	10,000
Empress of Japan.....	6,000	10,000

These vessels carry the British mails—*viâ* the Canadian route—to and from China and Japan, and are all held at the disposal of the Admiralty for use as armed cruisers in case of need, receiving an annual subvention from Government.

Messrs. Lamport & Holt also have a fine fleet, consisting of over 60 steamers, running from Glasgow, Liverpool, Manchester, London, Antwerp, and New York, to Brazil, River Plate, and West Coast of South America. A large percentage of their steamers are capable of carrying cargoes of between 5,000 and 6,000 tons, and steaming between 10½ and 12 knots at sea. Their cargo steamers have accommodation for passengers to all South American ports. This line has also regular departures of fast passenger steamers between New York and Brazil. Their largest steamers are as follows:—

Ship.	Gross Tons.	Horse-power (nom.)	Ship.	Gross Tons.	Horse-power (nom.)
Bellagio	3919	450	Horace ...	4000	407
Canova	5000	564	Melbourne .	3819	350
Cavour	5500	623	Queensland	3892	350
Canning ...	5500	623	Virgil	4000	407
Cervantes ...	5000	564	Wordsworth	3260	450

Passenger Rates.—Brazil, 1st cl., £20 to £25; River Plate, £20; Chile and West Coast, £35 to £40.

The Natal Line—This line of steamers, sailing every fortnight from London to Natal, Delagoa Bay, Beira and East African ports, was established by Messrs. Bullard, King & Co. in 1879. They have a fleet of 12 steamers, of suitable tonnage, and corresponding draft in order that they may cross the bar at Natal, and thereby discharge their cargoes inside the harbour, without transhipment, and without lighterage charges to shippers. They have also a three-weekly colonial service, which is under contract with the Government of Natal, from Cape Colony and Natal, touching at East African ports, extending to Madras and Calcutta, and calling occasionally at Ceylon.

There is a through service, at regular intervals, between China, Japan and South African ports.

The vessels of the fleet are as follows:—

Ship.	Gross tons.	Horse-power	Ship.	Gross tons.	Horse-power
Congella ...	1585	800	Umkuzi ...	2050	1100
Pongola ...	1449	700	Umlazi	1759	1100
Umbilo	1923	1100	Umona	2311	1100
Umfuli	2370	1400	Umtali	2640	2000
Umgeni	2800	2000	Umvoti	2624	2000
Umhloti	2173	1300	Umzinto ...	1802	1100

The New Zealand Shipping Company was established to run steamers direct to New Zealand, Tasmania, and Australia, calling at Teneriffe, Cape Town, and Hobart, outwards; and Montevideo, Rio Janeiro, and Teneriffe, homewards. The following is a list of steamers belonging to this company:—

Steamer.	Gross Tons.	Horse power	Steamer.	Gross Tons.	Horse-power
Ruahine ...	6127	5000	Otarama ...	3808	2000
Kaikoura ...	4507	4000	Waikato ...	4766	2000
Rimutaka ..	4515	4000	Rakaia	6688	3500
Tongariro ..	4163	4000	Mataura ...	6688	3500
Ruapehu ...	4202	4000	Waimate ...	6688	3500
Tekoa	4050	2000			

* Passenger Rates.—To Tasmania and New Zealand, 1st cl. £58 to £68 (return £100); 2nd cl. £36 15s. to £40 (return £65); 3rd cl. £15 15s. to £19 19s. (return £28 to £36).

The Orient Line was formed by the two well-known shipping firms, Anderson, Anderson & Co. and F. Green & Co. in 1877. The first steamer to leave London under the new flag of the Orient Steam Navigation Company was the *Garonne*, one of four steamers which already belonged to the company by purchase, the others being the *Chimborazo*, *Lusitania*, and *Cuzco*. The fleet now includes the following:—

Mail Line.

Ship.	Gross Tons.	Horse-power	Ship.	Gross Tons.	Horse-power
Cuzco.....	3918	4000	Ophir	6910	10000
Orient	5365	6000	Orizaba ...	6077	7000
Ormuz	6031	8500	Oroya	6057	7000
Orotava ...	5552	7000	Austral ...	5524	7000
Oruba	5552	7000			

Pleasure Cruising.

	Gross Tonnage.	Horse-power.		Gross Tonnage.	Horse-power.
Garonne ...	3876	4000	Lusitania...	3877	4000

The last-named steamers are despatched by the Orient Company on exclusively pleasure cruising voyages, varying in duration from two to eight weeks. The places visited include Spanish and Mediterranean ports, Greece, the Crimea, Norway, Madeira, the Azores, and the West Indies, according to season.

The latest addition to the Orient fleet is the *Ophir*, a magnificent vessel, and the first twin-screw steamer ever built for the Australian trade. Her dimensions are: length, 482 ft.; breadth, 53 ft. 6 in.; depth, 37 ft.; h.-p. 10,000; 6,910 gross tonnage. The Orient company is under contract with the Imperial Government for the conveyance of mails between the United Kingdom and Australia for a subsidy of £85,000 per annum. The sailings are from London fortnightly, and the steamers call at Plymouth, Gibraltar, Naples, Port Said, Suez, Colombo, Albany, Adelaide, Melbourne and Sydney.

Passenger Rates.—Albany, Adelaide, Melbourne and Sydney, 1st cl. £60 to £70; 2nd cl., £35 to £40; 3rd cl., 15 to 18 guineas.

The Pacific Steam Navigation Company, which was incorporated by Royal Charter in 1840, conducts a line of mail steam vessels from Liverpool to the Brazils and River Plate, continuing the voyage to the West Coast of America *vid* the Straits of Magellan. The company are the pioneers of the steam trade along the shores of the Pacific and between Europe and the West Coast, their first steamers, *Chile* and *Peru* having been despatched from Liverpool in the year 1840. The fleet consists of 42 steamers, of the aggregate tonnage of 129,000, and horse-power 121,000; the largest of which are:—

Ship.	Gross Tons.	Horse-power	Ship.	Gross Tons.	Horse-power
Antisana ...	3584	3000	Orissa	5000	5000
Chile	3225	3000	Orotava ...	5552	7000

Digitized by Google

The *Orizaba*, *Oroya*, *Oruba*, and *Orotava*, are running in the ORIENT Line, between London and Australia.

PASSENGER RATES.—Brazil, 1st cl., £24 to £30; 2nd cl., £17 10s.; 3rd cl., £9. River Plate, 1st cl., £28 to £35; 2nd cl., £17 10s.; 3rd cl., £9. Chile and West Coast, 1st cl., £52 to £70; 2nd cl., £30 to £35; 3rd cl., £18.

THE PENINSULAR AND ORIENTAL COMPANY, familiarly known as the "P. & O.," is the second oldest steam-packet company in existence. This line had its origin in a small steamship undertaking, started in 1836 under the name of the "Peninsular Company," to trade between Falmouth and Lisbon. Their first vessel was the *William Fawcett*, a paddle-steamer, which was built in 1829, with a gross tonnage of but 206. The first formation of the Peninsular Company dates back to 1825 and was due to Mr. Brodie McG. Wilcox. The company's business gradually increased, and in 1840 they were incorporated by charter. The first vessel despatched for service in the Indian Sea was the *Hindostan*, of 1,800 tons burthen and 250 horse-power, and the company now carries the mails not only to India, but to China, Australia and neighbouring countries, and is served by a fleet of which the principal vessels are given below:—

Ship.	Gross Tons.	Ship.	Gross Tons.	Ship.	Gross Tons.
Aden	3925	Formosa	4045	Palawan	4550
Arcadia	6670	Ganges	4206	Parr'matta	4874
Australia	6901	Himalaya	6898	Pekin	3908
Ballarat	4872	India	7910	Peninsular	5152
Bengal	4499	Japan	4319	Peshawur	3927
Bombay	3216	Java	4093	Ravenna	3386
Borneo	4573	Kaisar-i-Hind	4029	Rohilla	3511
Brindisi	3553	Khedive	3890	Rome	5545
Britannia	6530	Malacca	4045	Rosetta	3525
Candia	6100	Malta	6064	Shanghai	3216
Caledonia	7558	Manila	4210	Shannon	4189
Canton	3171	Massilia	5016	Simla	5884
Carthage	5280	Mazagon	4997	Socotra	6100
Ceylon	4094	Mirzapore	3913	Sumatra	4550
China	8000	Nubia	5914	Sutlej	4205
Chusan	4496	Oceana	6670	Thames	4113
Clyde	4136	Oriental	6752	Valetta	5018
Coromandel	4499			Victoria	6527

The following are the contract times for the transit of mails:—

Indian	mails—Bombay ...	16½ days.
China	,, —Shanghai	37½ ,,
Australian	,, —Melbourne	35½ ,,

With regard to the punctuality of the mails, it may be stated that out of 312 deliveries in the last two years, in three instances only were they even an hour late, while nearly all the other mails were delivered considerably in advance of contract times. In 1887 the P. and O. Company celebrated its Jubilee. The s.s. *Caledonia* is at present the fastest vessel employed in the Indian trade, and has succeeded in landing the mails in Bombay within 12¼ days of their despatch from London. Over £7,000,000 have been expended on the P. and O. fleet during the past 20 years, and they have now building two large mail steamers, the *Arabia* and *Egypt*, each of 8,000 tons, for the India, China and Australian mail services.

PASSENGER RATES.—India, 1st cl. £55; 2nd cl. £35 to £37 10s. Australia, 1st cl. £60 to £70; 2nd cl. £35 to £40. Straits Settlements, 1st cl. £61; 2nd cl. £36 15s. to £40. Hong Kong, Shanghai and Yokohama, 1st cl. £73 10s.; 2nd cl. £42.

THE ROYAL MAIL STEAM PACKET COMPANY, which dispatches steamers from Southampton to the West Indies, Central America, North and South Pacific, Brazil, and the River Plate, was founded in 1839. In the list of its largest vessels given below, the *Tyne* is a namesake of the historic vessel which was boarded by the U. S. man-of-war *San Jacinto* in 1861, when the seizure of Messrs. Slidell and Mason temporarily led to very strained relations with the United States. The following is a list of the chief steamships of the Company:—

Ship.	Gross Tons.	Horse-power.	Ship.	Gross Tons	Horse-power.
Danube	5946	7500	Medway	3730	4794
Nile	5946	7500	La Plata	3445	3000
Clyde	5645	7010	Ebro	3445	3000
Thames	5645	7010	Minho	3445	3000
Magdalena	5140	6773	Tagus	3312	3486
Atrato	5366	6773	Elbe	3140	3486
Orinoco	4581	5863	Tamar	2951	2864
Don	4028	4824	Trent	2938	2864
Para	4028	4824			

PASSENGER RATES.—West Indies, 1st cl. £32 10s. to £40; 2nd cl. £18 to £20; steerage, £15. Brazil, 1st cl. £30; 2nd cl. £20; steerage, £9. River Plate, 1st cl. £35; 2nd cl. £20; steerage, £9.

THE SHAW, SAVILL & ALBION COMPANY, LIMD.—Established 13 years ago as a public company, this line was for many years previously worked by Messrs. Shaw, Savill & Co. and the Albion Shipping Co.; it has been most successful; a special feature of its operations being the large amount of frozen meat carried. The following fine mail steamers form the company's fleet of passenger vessels, in addition to which they have a large number of cargo steamers and sailing ships. Their new twin screw steamer, the *Gothic*, is the largest steamship employed in the Australasian trade.

Name.	Gross Tons.	Horse-power.	Length in Ft.
Arawa	5026	5000	440
Doric	4786	3000	440
Ionic	4753	3000	440
Tainui	5031	5000	440
Gothic	7730	5000	490

The *Arawa* has made the fastest passages on record, viz., Plymouth to New Zealand, 38 days, 0 hours, 30 minutes, and New Zealand to Plymouth in 35 days, 3 hours, 40 minutes; but on this occasion excelled herself by 4 hours 26 minutes, her net steaming time being 34 days, 23 hours, 18 minutes.

PASSENGER RATES.—New Zealand, 1st cl. £58 to £68; 3rd cl. £15 15s. to £19 19s. Australia, 1st cl. £62 to £72; 3rd cl. £16 16s. to £23. Cape Town, 1st cl. £26 5s. to £28 7s.; 3rd cl. £8 8s. to £12 12s.

THE UNION STEAMSHIP COMPANY was first formed in 1853 under the title of "The Union Steam Collier Company," and commenced with a fleet of five steamers, the *Briton*, *Dane*, *Norman*, *Saxon*, and *Union*, having an aggregate tonnage of 2,327 tons only. In 1857 a contract was obtained for a monthly mail service to the Cape of Good Hope for five years at an annual subsidy of £30,000. The service proved so satisfactory that the contracts were not only renewed but extended, and at the present time the company's ships carry the mails from this country to the Cape and Natal,

Digitized by Google

and also from Hamburg, Rotterdam, Antwerp and Southampton to Cape Town, Port Elizabeth, East London, and Natal, making calls at Madeira and Teneriffe.

In view of the great development of the South African gold fields, the directors in 1890 built the steamer *Scot*, the largest then ever designed for or employed in the South African trade. She was launched from the yard of Messrs. Denny, Dumbarton, on December 30, 1890. She has made the fastest passages on record between England and Cape Town, both outwards and homewards.

The *Scot* has since been lengthened 51 ft. by Messrs. Harland & Wolff, and her capacity for carriage has been largely increased. Her tonnage is now 7815.

In November, 1894, the new steel twin-screw R.M.S. *Norman* sailed on her first voyage from Southampton. She was built by Messrs. Harland & Wolff, of Belfast, and her gross tonnage is 7,537 tons. She has performed the voyage between England and Cape Town in 14 days 21 hours. In order to meet growing requirements, arrangements have been made for Messrs. Harland & Wolff to construct three intermediate steamers on the lines of the "G." class of vessels, but with improvements and enlarged capacity. Their names are *Gascon*, *Gaika*, and *Goorkha*, and their tonnage will be about 6,200. A further order has also been placed with the same firm for a new twin screw mail steamer, to be called the *Briton*, having the following dimensions and tonnage: length 530 ft., breadth 60 ft., depth 40 ft., gross tonnage 10,000, by far the largest and finest vessel yet introduced into the Cape trade.

The fastest passages made by vessels of this line are—

Ship.	Outwards.		Homewards.	
	Plymouth to Cape Town.	Sthmpton. to Cape Town.	Cape Town to Plymouth.	Cape Town to Southampton.
	D. H.	D. H.	D. H.	D. H.

European	8196	—	WilliamCliff	3252	1938
Floridian	3257	1789	Yucatan	2816	1394
Jamaican	4501	1879			

Passage Rates.—U. S. and West Indies, 1st cl., £20; Colombia, £22; Mexico, £25.

The White Star Line started in 1871 with the *Oceanic*, a vessel of 3,807 tons, and rapidly increased the size of its fleet by the addition of the *Baltic*, *Adriatic*, *Celtic*, *Republic*, *Germanic*, *Britannic* and others. The founders of this line were Messrs. Ismay, Imrie & Co., who have indeed carried out their project with conspicuous success, the White Star being to-day one of the most popular of Transatlantic steamship lines. The following is a list of their vessels:—

Ship.	Gross Tonnage.	Ship.	Gross Tonnage.
*Majestic	10,000	Coptic	4448
*Teutonic	10,000	Belgic	4211
Germanic	5066	Gaelic	4205
Britannic	5004	*Georgic (Cargo & Cattle Steamers)	10,077
Adriatic	3887	*Cevic (Cargo & Cattle Steamers)	8301
*Delphic (bldg.)	8355	*Bovic (Cargo & Cattle Steamers)	6583
*Gothic	7720	*Nomadic (Cargo & Cattle Steamers)	5749
Ionic	4748	*Tauric (Cargo & Cattle Steamers)	5727
Doric	4784	Cufic	4639

The twin-screw mail steamers *Majestic* and *Teutonic*, built by Messrs. Harland and Wolff, Belfast, were the first steamers especially constructed, under arrangement with the Admiralty, for employment as mercantile armed cruisers.

The *Teutonic* commenced running between Liverpool and New York, carrying Her Majesty's mails for the United States, in August, 1889.

The *Majestic*, in July, 1891, crossed from Queenstown to New York in 5 days, 18 hours, 8 minutes, the fastest passage on record up to that date, but in the following month the *Teutonic* lowered the record still further by making the passage in 5 days, 16 hours, 31 minutes. In August, 1896, the *Majestic* crossed from Queenstown to New York in 5 days, 17 hours, 56 minutes, thus excelling her previous best performance by 12 minutes.

The *Germanic* has been fitted by Messrs. Harland & Wolff with new engines and boilers, giving her considerably increased speed; her passenger accommodation has been also rearranged and re-decorated after the plan of the *Majestic* and *Teutonic*, so that she has more than retained her popularity with the regular Transatlantic voyager. The pioneer steamer of the line, the *Oceanic*, having completed 25 years successful work, was recently sold and broken up.

Included in the White Star company's fleet there are nine new twin-screw steamships of the largest size and most improved class, in

* Twin-Screw.

* Twin-screw.

Digitized by Google

addition to the *Magnetic*, a new twin-screw mail and passenger tender.

PASSENGER RATES.—New York, 1st cl., £12 to £35; 2nd cl., £9 to £10.

THE NORTH GERMAN LLOYD.—This Company, whose steamers have for so many years called at Southampton, and which has spent many millions upon shipbuilding in this country, was established in 1857 by some Bremen merchants. From the modest beginning of two vessels, it has steadily developed into one of the largest lines in the world, with a total registered tonnage (including vessels building) of nearly 300,000. During the year 1895 the fleet steamed, on its various routes, a total distance of 2,627,263 knots, more than 121 times the circumference of the globe. In November, 1896, the twin-screw mail steamer *Friedrich der Grosse* made her first trip to Australia, being the largest mail steamer hitherto sent on this voyage. The chief services maintained by the company are:—Bremen to New York, via Southampton or Cherbourg; Genoa to New York via Southampton; Bremen to Australia, China, and Japan, via Southampton; Bremen to River Plate, and Brazil, via Antwerp; Bremen direct to Baltimore, Hull, or London. The principal vessels of the fleet are thirty in number, the largest being:—

We have been supplied with the following information by "Lloyd's Register of British and Foreign Shipping":—

Merchant and other Vessels (not Warships) launched in the United Kingdom during recent Years.

Year.	No.	Gross Tonnage.
1889.....	690	1,209,361
1890.....	743	1,194,705
1891.....	822	1,130,816
1892.....	681	1,109,950
1893.....	536	836,383
1894.....	614	1,046,508
*1895.....	579	950,967

* In addition, there were launched in the United Kingdom, during 1895, 59 Warships of 148,111 tons displacement, of which 44 of 139,145 tons were for the British Government.

Of the merchant steamers (526 in all) launched in the United Kingdom during 1895, 1 (Georgic, 10,077) was over 10,000 tons, and 4 (Victorian, Armenian, Cestrian, and American) were between 8,000 and 9,000 tons; 45 were between 4,000 and 7,000 tons each; and 224 were between 1,000 and 4,000 tons. Of sailing vessels (53 in all), the largest was the "Iranian," of 2,958 tons; 2 were between 2,000 and 3,000 tons; and 22 were between 1,000 and 2,000 tons.

Merchant and other Vessels (not Warships) under construction in the United Kingdom at various dates. (Vessels *not* to be classed by Lloyd's Register are also included.)

30th September.	No.	Gross Tonnage.
1882.....	617	876,769

Description of Vessels Building in the United Kingdom in 1875 and 1896 respectively.

Date	Steel.				Iron.				Wood.				Total.			
	Steam.		Sail.		Steam.		Sail.		Steam.		Sail.		Steam.		Sail.	
	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.
30 Sept. 1875	...	...	...	...	126	157,466	114	106,521	6	1,065	203	51,122	132	158,531	317	157,643
30 Sept. 1896	283	628,448	20	23,720	28	4,047	1	226	2	737	21	2,463	313	633,232	42	26,409

These figures show that the average size of vessels built at the present time is very nearly 2¾ times that of vessels built twenty years ago. Then, steel was not used for shipbuilding purposes; now, it has all but supplanted iron. Then, the tonnage in hand was equally divided between steamers and sailing vessels; now, the proportion of steam to sailing tonnage is twenty-four to one, which, however, is much higher than has been usual in recent years.

Merchant and other Vessels (not Warships) launched in each of the principal Shipbuilding Districts of the United Kingdom during 1895.

The history of canals in England dates from the time of the Romans, who constructed the Caer Dyke, 40 miles in length, connecting the rivers Nene and Witham, and the Foss Dyke, 11 miles, which is still navigable. A series of Acts regulating the navigation of the Thames run from the year 1423, of the Lee from 1424, and of the Severn from 1503. In the year 1539 the Corporation of Exeter obtained an Act under which a canal was constructed 3 miles in length, parallel to the river, but subject to the tide; this was lengthened in 1625, and again in 1820, the Act for the present ship-canal being obtained in 1829. It was, however, not till the introduction of locks in the 17th century, that canal development became possible; in 1625 an Act for rendering the rivers Aire and Calder navigable was rejected, but passed in 1699, the tolls being, from May 1 to October 1, 10s. per ton, and from October 1 to May 1, 16s. per ton for the entire distance between Leeds and Wakefield. In 1737 powers were obtained for the construction of the Bridgewater canal, but lapsed; the work being finally carried out by the celebrated Duke of Bridgewater, and his engineer, James Brindley, under an Act of 1759, out of the Duke's private means. It was said to have cost £220,000, and was extraordinarily successful, the revenue it produced in the early part of this century being estimated at £130,000. The canal is now the property of the Manchester Ship Canal Company. The Trent and Mersey, or Grand Trunk canal, running across England, and connecting Liverpool with Nottingham and Hull, was commenced in 1766; in 1847 it was purchased by the North Staffordshire railway company. A period of canal enterprise followed the success of these undertakings, and by the year 1800 more than 100 canal and navigation Acts had been passed. It is noteworthy that prior to 1845, canal companies merely provided the waterway, and did not act as carriers; in that year, to meet growing railway competition, an Act was passed to enable canal companies to become carriers, and two years afterwards they were given power to borrow money for such purposes. Many companies availed themselves of these powers; but few now exercise them.

Prior to 1845 canals were subject to no general legislation, but were regulated by the provisions of their private Acts. In that year, besides the Act referred to above, an Act was passed giving to canal companies the same power of varying their tolls as possessed by railway companies. This was the era of railway and canal amalgamations, there being in 1846 upwards of 200 Bills containing such provisions. The Railway and Canal Traffic Act, 1854, aimed at checking the throttling of canals by the railway interest, and required companies to make arrangements to afford all reasonable facilities for receiving and forwarding traffic, and an Act of 1858, at preventing, without legislative sanction, the virtual amalgamation of canals with railways, which had been going on under the name of leases of independent canals by railway companies, who were also canal companies by virtue of previous purchases of canals. In 1873 the Railway Commission was created; the Act also providing that no agreement between a canal company and a railway company, by which a railway would obtain control over a canal, shall have any validity unless it is approved by the Railway Commissioners; and that where any canal is already the property of a railway company, or managed by a railway company, such company shall be required to keep it in good navigable condition. The Canal-Boat Acts of 1877 and 1884, provide for the registration of boats by the rural sanitary authority, the Local Government Board is also compelled to appoint inspectors of boats, with powers similar to those of poor-law inspectors. The last, and most important piece of legislation affecting canals, is the Railway and Canal Traffic Act of 1888. Its principal provisions are:—the establishment of a new Railway and Canal Commission, consisting of two appointed, and three ex-officio Commissioners (see p. 174), having jurisdiction as to the legality of tolls and rates, power to order such reasonable facilities for traffic as may be required in the interest of the public, and under certain limitations, to fix through rates. Under this provision a uniform classification of merchandise, similar to that adopted for railways, has been fixed, and uniform tolls and rates (with some exceptions for special circumstances), which abrogate the varied charges hitherto made by canal companies under their private Acts. These came into operation on January 1, 1895. The following table shows the general scale of maximum tolls, rates and wharfage charges for traffic in classes A and B of the classification, which include a very large proportion of the traffic carried on canals. The "rate" includes carriage, the "toll" does not.

Under the above schedule each company has the right of charging the full initial rate or toll for traffic passing over its system, but through tolls are arranged between London and Birmingham, 142 miles over four navigations, and on the Erewash Canal, between London and Langley Mill 175 miles over three navigations, and other companies have made similar arrangements from Birmingham to the North. A railway controlling a link in any through route can, by refusing to consent to low through tolls, do much to throttle canal competition.

There are in the United Kingdom 3,827 miles of canal. These figures are based on the return made to the Board of Trade in 1888, since which no official figures have been published; but the inclusion of partially canalised streams and disused canals would bring the mileage to over 4,000. 1333 miles are owned or controlled by railway companies, and 2,494 miles are owned by 62 companies, having an outstanding capital (including Government grants to Scotch and Irish canals) of £30,545,000. The Manchester Ship Canal Co. owns 77 miles, with a capital of

	Classes.	For the first ten miles.	For the next ten miles.	For the next ten miles.	For the remainder of the distance.	Maximum wharfage charge.

£15,412,000; 61 companies therefore own 2,417 miles, or 40 miles each, and have a capital of £15,133,000, not including sums spent out of revenue on capital account, which would bring the capital of the free canals, excluding the Manchester Ship Canal, to considerably over £20,000,000. The capacity of inland canals is governed by that of the locks, which vary from 220 ft. long, 42 ft. wide, and 15 ft. deep, to 60 ft. long, 7 ft. wide, and 3½ ft. deep. Horse haulage is still generally employed, but steam is gradually taking its place, the want of uniformity in locks being the chief drawback to its extension. It seems probable that a lock 75 ft. long, 14 ft. broad, and 5½ ft. deep, capable of passing a 60 ton barge, will be generally adopted, these being the dimensions of locks on the principal canals, and being sufficiently large to allow of the economical employment of steam power. Canals stand much where they were in 1830, and owing to divided ownership and divergent interests, have been unable to adopt modern improvements. The first step must be the amalgamation of the smaller companies, or their purchase by stronger ones, and the freeing of important links owned or controlled by railways. Arrangements have been made by which low through rates can be quoted for coal from the Derbyshire coalfields to the home counties and London; the Old and Grand Union Canals, now part of the Grand Junction Canal, are being put into thorough order, and further improvements are contemplated with a view to reducing the cost of haulage. A large quantity of coal is now being carried by this route. An attempt was made during last session to close the Nutbrook Canal, 4 miles in length, which serves three of the Derbyshire collieries, but was defeated by the opposition of the coalowners and the neighbouring canal companies.

The Manchester Ship Canal is now excavated throughout to a depth of 26 ft.; the large docks at Manchester to 26 ft., and the smaller docks to 20 ft. The bottom width is 120 ft., at the curve of the Weaver outfall 140 ft., and at the bend at Runcorn 150 ft.; for a distance of about 2½ miles between Latchford Locks and Partington Coal Basin, the width at present is 90 ft., and from Barton Aqueduct to Manchester Docks (3 miles) 170 ft. The fixed bridges are 75 ft. above the normal water level; but as the headway is necessarily a few feet less when high tides or floods occur, masts should clear the bridges at 70 ft. above the water level. The Manchester Docks are equipped with transit sheds of new design, hydraulic and team cranes, seven-storey warehouses for cotton storage, four-storey warehouses for grain and general goods. The dock premises include 45 buildings containing 157 extensive depots. The canal and docks are in direct communication with 14 inland canals which serve 750 miles of country. The company receive, warehouse, and distribute all descriptions of traffic, and quote through rates for conveyance by railway to and from all railway stations. The Company's own railways already completed measure 75 miles, and are connected with all the railway systems of the country.

Frost interfered seriously with canal traffic in the early part of 1895, causing in some cases a reduction of dividend. The smaller canals were closed for periods varying from a few days to ten weeks.

TABLE SHOWING THE MILEAGE, WIDTH OF LOCKS, CAPITAL, DIVIDEND, RECEIPTS, TONNAGE AND EXPENDITURE OF THE PRINCIPAL CANALS IN THE UNITED KINGDOM FOR THE YEAR 1895.

II. Metalliferous Mines (Metals, with Slate, Stone, Clay, Chalk, and Salt).

*** Under the Metals the information sought is rather as to the extent of the output than the number of hands employed. Most, however, of the Iron, Stone, Slate, and Chalk mines or quarries are worked under either the Coal Mines or the Quarries Act, under which the former item is never supplied as to individual mines. In these cases we can only follow our authorities.

RAILWAYS AND THEIR HISTORY.

In the first half of the seventeenth century (1633 has been cited as the best approach to a definite date) we meet with the earliest mention of the introduction of *rails* for the lessening of friction upon roads. Beams of wood, some six or seven inches in breadth, were about this time laid down to facilitate the draught of the waggons in the vicinity of some of the coal mines at Newcastle: and as a matter of necessity the addition of "sleepers" had speedily to follow. In 1738, at Whitehaven, it is stated that iron was first substituted as the material of the rails; and in 1767 it appears established that this revolution was adopted at Coalbrookdale, being followed nine years later at the Sheffield Colliery. As yet, however, only thick plates of iron were fastened to the surface of the wooden rails, and it was not till 1801 that "edge rails" were introduced, the credit of their adoption being assigned to Lord Penrhyn's slate-quarries in Carnarthenshire. James Watt had conceived the idea of utilizing steam for locomotion, and there is a record of a steam locomotive having been used in Cornwall in 1784. George Stephenson, however, in the year 1825, was the first to bring the project fairly into practical shape.

The first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801, for a line 6 miles long from Wandsworth to Croydon. In 1804 an Act was passed "for making and maintaining a railway or tramroad from the town of Swansea into the parish of Oystermouth, in the county of Glamorgan, and for the hauling or drawing of waggons or other carriages passing upon the said railway or tramroad with men, horses, or otherwise." On the 24th of February, 1804, Trevethick's patent locomotive steam engine was tried at Penydarran, near Merthyr, and conveyed along a tramroad 10 tons of bar iron and about 70 persons, a distance of 9 miles. The application passed the third reading as a

railway or tramroad. The word "otherwise" was evidently intended to cover the use of Trevethick's engine, and this Act may therefore be considered the first in which steam was contemplated as the motive power. The line is now known as the Swansea and Mumbles Railway. Then followed the Carmarthenshire, the Kilmarnock and Troon, the Severn and Wye, the Berwick and Kelso, the Gloucester and Cheltenham, and other small undertakings, about twenty in number altogether, with an aggregate of 250 miles, and an authorized capital somewhat under a million. It is almost unnecessary to add that animal power only was contemplated in their working. The Stockton and Darlington Act was obtained in 1821, with a capital of £102,000; and it is remarkable that, while animal power was to be relied upon for working the line, the clause in the Act states "with men and horses *or otherwise*." George Stephenson came upon the scene immediately after this Act was obtained, and was appointed engineer of the line; and at his urgent request, Edward Pease, the promoter, applied for a new Act empowering the company to work the railway with locomotive engines. Great opposition was encountered, but the bill finally passed in 1823, and the line, which was 25 miles in length, was opened on the 27th of September, 1825. A duplicate system of working was at first adopted, the passenger traffic being conducted by single one-horse coaches, while that of minerals was worked by a locomotive engine made under Stephenson's own directions and bearing the simple but significant designation of "No. 1." The first train consisted of 33 coal waggons with one passenger carriage in the rear; and during a portion of its journey it attained a speed of fifteen miles an hour. It appears to have been only a few weeks or months before horse-power was wholly displaced by steam locomotives. The above notable engine was long exhibited in front of the Darlington Station of the Stockton and Darlington line; but it is now placed under cover, mounted on stonework, in the large Central Station of the same town. This line, the germ, it may be called of the railway system, proved a great success financially and otherwise. Nevertheless, the employment of locomotives remained almost unknown to the public at large until the opening of the Liverpool and Manchester line, five years later. The Monkland, opened in 1826, was really the first to follow the example of the Stockton and Darlington, and several other small lines—including the Canterbury and Whitstable, a remarkable undertaking, worked partly by fixed and partly by locomotive engines—quickly adopted the new traction power. The inauguration of the Liverpool and Manchester line in 1830, attended as it was with a tragic result, was the first to impress upon the people that a revolution in travelling had really taken place; but even then the aid of the press, powerfully and influentially invoked, failed to arouse anything in the shape of enthusiasm. Royal patronage was not bestowed upon the opening ceremony, although eagerly solicited. To the great minds of the time, however, the event assumed more than ordinary importance, and it is reported that the impression made upon Lord Brougham's contemplative mind forced a tear from his eye. Leicester to Swannington came

next, but that from London to Birmingham was the largest that had yet been projected. A great struggle took place with landowners and other influential personages, opposed not only to this Bill in particular, but to the introduction of railways generally. Undaunted courage and perseverance on the part of the promoters prevailed, and the Bill, which was rejected in 1832, passed in 1833, but not until landowners and others had been conciliated by having the price originally estimated for their land, &c., doubled and even trebled. The expenses of carrying this Bill, which was probably the most momentous parliamentary campaign in the history of railways, were over £70,000. The line was opened throughout in 1838, and the first train accomplished the distance at an average speed of over twenty miles an hour. The tide of public opinion was now fairly turned, and ran as strongly in favour of railways, as it had before been against them. The London and Greenwich, London and Southampton, the Great Western, Birmingham and Derby, Bristol and Exeter, Eastern Counties, Manchester and Leeds, Midland Counties, North Midland, South Eastern, London and Brighton, Birmingham and Manchester, and Edinburgh and Glasgow, together with a large number of small Bills, were all passed in four years from the passing of the London and Birmingham Bill, and before that line was opened. Thus in four or five years was witnessed the laying of the foundations of nearly all the existing great trunk lines of railway in this country.

The expenditure incurred in securing legislative authority to construct railways was enormous. The Parliamentary costs of the Brighton Railway averaged £4,806 per mile; of the Manchester and Birmingham, £5,190 per mile; and of the Blackwall, £14,414 per mile! The solicitors' bill for the South-Eastern Railway contained 10,000 folios, and amounted to £240,000. These few facts, however, afford but a feeble idea of the reckless wastefulness of capital on railway undertakings. It is universally allowed that, under a better policy, not only a much better railway system might have been provided, but a saving might have been effected of at least fifty millions.

Up to 1840, inclusive, notwithstanding the delays and difficulties which surrounded railway projectors, even in the earliest stages of legislation, 299 Acts, authorizing the construction of 3,000 miles of line, had been passed. The inevitable reaction set in, and in 1841-2-3 only a few small Bills were passed by the Legislature. The public mind in the meanwhile was greatly exercised in connection with the lines already opened. The Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying ten per cent. dividends, and some of the smaller lines were yielding even larger returns. Attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. Projectors came forward with abortive schemes, eager to supply a want which seemed insatiable. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorized; in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained Parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These figures illustrate the rise and fall of the great fever known as the "railway mania." At least four times as many schemes came before the credulous and overweening public as ever came to receive legislative deliberation, and between the close of the 1845 session and the opening of that for 1846, no less than 1,300 projects were brought out. It was calculated that even the small parliamentary deposits required to be lodged with each Bill would aggregate to something like sixty millions. The coolest and most practical heads were absolutely carried away in the prevailing excitement. It gradually dawned upon the minds of reflecting people, that of the £600,000,000 required, a vast proportion were mere paper projects or competitive schemes, alike unnecessary and uncalled for. At the instigation of the Government, probably, the screw was applied, the Bank rate was raised from two to four per cent. within a month, the alarm spread, shares fell, and even Consols dropped eight per cent. The collapse soon followed: much money was lost, and a deal of wisdom gained.

General legislation relative to railways was introduced about 1840. The lines that had been constructed previous to this were established under

Special Acts. Their wonderful increase, considering the obstacles placed in their way by the aristocracy and landowners, until they saw the land and the property in the vicinity of the lines rapidly improving in value, originated a new species of legislation. More than anything else in the nature of public or private enterprise, it was beginning to be felt that the railways were instrumental in promoting the interests not only of the rich, but perhaps even in a greater degree the interests of the community at large. The enormous development of the trade of the country was ascribed to the instrumentality of railways. It is not wonderful, therefore, that a new branch of law for their regulation was introduced. The variety and repeated alterations in the railway laws showed the difficulty of dealing with the various and often conflicting interests concerned. The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening; for returns of traffic to be made by the companies, as also of accidents involving personal injury; for government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulation, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session. Then followed legislation on the leasing and sale of railways, on the gauge, on cheap trains, passenger duty, &c. In their civil and commercial importance, and the enormous interests they represented, railways soon came to occupy the attention of leading minds of the day, and an active part in their administration was shared by members of the Government and of both Houses of Legislature. The railway interest has continued powerfully represented. At the present time about 50 members of the Upper House are upon the direction of our railways, and more than twice that number of the members of the House of Commons are officially connected with them. This does not, however, represent the aggregate power of the railway interests in the Legislature, for much larger numbers hold more or less a pecuniary stake in the lines.

RAILWAYS IN 1895.

The number of persons employed in working the railways of the United Kingdom in 1895 was 465,112. The number dependent upon this large body must also be very great; and if we take into account the vast numbers besides who are employed in branches of trade which administer to the requirements of railways, the social dependence upon their existence must be something enormous.

At the close of the year 1895 there were in use upon the railways 18,658 locomotive engines, 42,230 carriages for the conveyance of passengers, 16,507 other vehicles attached to passenger trains, 603,710 waggons for the conveyance of live stock, minerals and general merchandise, and 14,581 miscellaneous vehicles.

WHITAKER'S ALMANACK, 1897.

Digitized by Google

Capital embarked in Railways.—The total amount of capital authorized by Parliament to be raised for the construction of railways in the United Kingdom amounted on the 31st December, 1895, to £1,114,686,989. Of this sum, £1,001,110,221 (which includes £88,495,406 nominal capital caused by the consolidation or conversion of stocks) exists and forms the capital account of the various railway companies, and shows an increase over the year 1894 of £15,722,866, or 1·57 per cent. The £1,001,110,221 is composed of £102,555,643 guaranteed, £267,240,324 debenture, £253,890,373 preferential, and £364,037,405 ordinary stocks and shares, besides a sum of £13,386,476 raised by loans. The net receipts for the year amount to £38,046,065, equal to 3·80 per cent. on the total capital sunk, as compared with £37,102,518 in 1894, with a corresponding capital of £985,387,355, which gave a net receipt of 3·77 per cent. It is satisfactory to note in the interest of railway proprietors that the net earnings for the year 1895 give a percentage of 3·80 on the total capital sunk, and that although the first half of the year was financially darkened by the influence of commercial depression and industrial strikes, a more than compensatory turn happened by the second half giving an uninterrupted increase in revenues, and showing for the year the highest figure yet recorded. The receipts from goods traffic in 1895 were certainly exceeded in 1892, but the revenues from this source have been affected by the revision of rates, which has operated since that date. The net revenue for the year has been largely affected by the increased wages and curtailment of the hours of labour of railway servants, also the improvements, &c., required by the Board of Trade, and the rapid growth of local taxation, which has increased during the last decade in an alarmingly disproportionate ratio to the net profit.

Gross Earnings of the Railways.—The earnings for the year 1895 amounted to £85,922,702, as compared with £84,310,831 for the year 1894, which gives an increase of £1,611,871, equal to 1·91 per cent. The increase in the passenger receipts is £663,438, made up as follows:—

	1895. £	1894. £	Incr. £	Decr. £
1st Class	3,034,449	2,965,730	68,719	
2nd ,,	1,935,029	1,972,451		37,422
3rd ,,	23,796,137	23,276,224	519,913	
Seas. & Periodical Tk. Holders	2,760,352	2,648,124	112,228	
	31,525,967	30,862,529	700,860	37,422
			£663,438 incr.	

It will be seen that first and third class passengers and season-ticket holders have alone produced this increase, whilst the earnings from the second class show a most decided decrease. It will not be without interest to investigate this a little further by making a similar comparison of the numbers carried; they were:—

	1895. No.	1894. No.	Inc. or Decr. No.
1st Class	29,930,006	29,821,010	+ 108,996

	930,967,736	912,597,787	+18,369,949

The cause of the large decrease in second-class numbers and receipts is partly owing to the better accommodation to be now found in third class carriages, than has been hitherto the case. For years the third class carriages lacked the ordinary conveniences of travelling. The public were compelled to stand (unless by chance they had brought a box or camp-stool), the coaches had little or no roofs, and were without lights, and it is not therefore to be wondered at that passengers who really could not afford to pay double the third-class fare (which they were obliged to pay if they wished to travel second) did so in order to obtain a seat and travel in a more respectable manner. But all that is now changed. The companies have improved their

third-class coaches, and from the time this improvement was commenced the exodus from second to third has gradually grown to its present proportions. Again, third-class coaches were not always attached to the fast trains, the result being that passengers requiring to do their journeys quickly were obliged to pay first or second class fares; but now thirds are attached to the most exclusive mail trains, and almost on all lines third class is well cushioned and lighted. Another reason to be given is that although the improvement in third-class accommodation has been going on for a number of years, the authorities have not, until a very recent date, thought fit to alter the old plan of calculating the fares upon a scale of 3*d*., 2*d*., and 1*d*. per mile, according to the class of carriage, and naturally the keen eye of the travelling public quickly discovered that to pay double the third-class fare, for second, was too wide a difference in comparison with the only extra luxuries to be obtained in second, which in most cases were a little more reservedness and room. The scale now being gradually adopted on lines which still run second-class coaches is 2*d*., 1¼*d*., 1*d*. per mile, which will thus minimise the difference between the second and third class fares, and will probably be the means of increasing the number of travellers in second class. Lastly, on another page it will be seen that on a number of lines second class is entirely abolished, on others partially; this, of course, to a large extent accounts for the decrease in that particular class. The increase in numbers travelling by third class is 2·41 per cent. over 1894. The earnings for the conveyance of parcels, mails, and such other traffic as is generally carried by passenger trains, amounted in 1895 to £5,835,195, as compared with £5,632,959 in 1894, being an increase of £202,236 or 3·59 per cent. The total figures of traffic falling under the heading of "goods" are £44,034,885, as compared with £43,379,078 in 1894, an increase of £655,807, or 1·51 per cent. The aggregate is made up of £24,450,682 from merchandise; £18,176,535 from minerals; and £1,407,668 from live stock. The total quantity of goods carried in 1895 was 334,230,991 tons, as compared with 324,457,633 tons in 1894, showing an increase of 9,773,358 tons, or 3·01 per cent.

Expenditure.—The total working expenses of the whole of the railways for the year 1895 amounted to £47,876,637, equal to 56 per cent. of

RAILWAY PASSENGER TRAFFIC.

The Midland Railway Company took the initiative in passenger traffic reforms, having run third-class carriages by all trains from 1st April, 1872; afterwards, from 1st January, 1875, greatly reducing the first-class and abolishing second-class fares. From 1st November, 1891, the Great Northern Railway Company also abolished second-class fares to all stations north of Hatfield; from 1st January, 1893, the Great Eastern abolished it in the provinces; the Cambrian followed on 1st May of the same year, when it also disappeared from all journeys between London and Scotland.

Digitized by Google

the gross earnings as compared with a total of £47,208,313 for the year 1894, equal also to 56 per cent. The increase compared with 1894 amounts to £668,324 or 1·42 per cent. The total number of miles travelled by passenger and goods trains during the year 1895 was 338,851,595 or 5,831,221 more than in 1894. Analysing the expenditure we find the item £12,534,627 for locomotive power; £4,024,130 for repairs and renewals of carriages, &c.; £7,658,136 for maintenance of permanent way, stations, &c.; and £14,960,097 for traffic expenses. The locomotive expenses in 1895 amounted to 8·88*d.* per train mile.

Compensation.—The amount paid for compensation for personal injuries sustained during the year 1895 amounted to £120,697, as compared with £141,637 for the year 1894, resulting in a decrease of £20,940, for which the railway companies are to be congratulated, seeing that they carried nearly 19 millions more passengers than in 1894. In the movement of goods the companies have paid for damages and losses £232,487, as compared with £230,154 in 1894, an increase of £2,333.

We subjoin a statement showing the amounts paid by the principal companies under both heads:—

Net Result of Working the Railways.—The gross receipts compared with those of the preceding year, show an increase from passengers (which includes season ticket, carriage, horse, dog and post office mail traffic) of £865,674; from goods, £655,807, and from rents, tolls, navigation and steamboats, &c., £90,390, or a total increase from all sources of £1,611,871. The net receipts for 1895 on the capital outlay give a sum of 3·80 per cent., compared with 3·77 per cent. for the year 1894, and 3·60 per cent. for the year 1893. As may be seen, however, on page 713, that nearly 16 millions additional capital has been raised during the year 1895, a large proportion of which is "locked up" in works either unfinished or only partly finished, therefore unproductive, and coupled with the fact that working expenses, and rates and taxes are yearly increasing in a disproportionate ratio to the net profit, a percentage of 3·80 on the net receipts for the year must be viewed as a very favourable result.

RAILWAY ACCIDENTS.

To the public generally, one of the most interesting points in connection with the working of the railways is the increased immunity from accident, as evidenced by the great decline for a considerable number of years past in the amount paid by the companies by way of compensation for personal injury to passengers. In 1894 the cost per passenger train-mile for personal injury was only 0·19*d.*, and in 1895 only 0·16*d.* In loss and damage of goods, the cost in 1894 was 0·37*d.*, and in 1895 only 0·38*d.* per goods train-mile. The gradual minimisation of the amount paid by the companies for compensation is owing to the improved modes of working and the mechanical appliances which have been adopted to secure the safety of the travelling public, and it is in facilitating this security that some of the chief causes of increase of cost in railway working—such as the more general adoption of the block system, and the system of interlocking points and signals, and of improved continuous brakes, on which the Board of Trade have insisted—may

RAILWAY SPEED.

THE FASTEST RUNNING, WITHOUT STOPPAGE, IS MADE BY THE COMPANIES AS UNDER:—

Company.	Train.	From	To	Time.	Distance.	Speed.
				H. M.	Miles.	
Caledonian	4.40	Perth	Forfar	0 32	32½	60·94

London and South Western	Bournemouth	Vauxhall	2 12	106¼	48·29
North British	Carlisle	Edinburgh	2 20	98½	42·10
Glasgow and South Western	Carlisle	Kilmarnock	1 49	91½	50·36
South Eastern	Cannon Street	Dover Pier	1 38	75½	46·22
London, Chatham, and Dover	Herne Hill	Dover Pier	1 32	74½	48·59
London, Brighton and S. Coast	London Bridge	Chichester	1 35	69½	43·89
Great Eastern	Liverpool Street	Parkeston Quay	1 25	68¼	48·53

be accounted for. It is also very noticeable that on those lines where these improvements have not been carried out, the want of them has largely contributed to the accidents which have occurred. The general report to the Board of Trade for 1895 shows that although accidents and collisions of a serious nature have occurred during the year to passenger trains, yet the numbers (particularly in the case of the number killed) are very low when compared with the millions of passengers carried by the companies during the year.

The number of personal accidents on railways to passengers, railway servants, and others, reported to the Board of Trade during the year, show a total of 1,090 killed and 9,318 injured (as compared with 1,185 killed and 9,165 injured in 1894), and arose from various causes, which we will now proceed to investigate under three distinct heads:—

Accidents to Passengers.—Five passengers were killed and 399 injured from accidents to trains, rolling stock, permanent way, &c. (as compared with 16 killed and 347 injured in 1894), while 78 passengers were killed, and 710 injured from other causes—such as falling between carriages and platforms, or on to the platforms, on getting into or alighting from trains, passing over the line at stations, falling out of carriages during the travelling of trains, and is inclusive of 92 injuries resulting from the closing of carriage doors. In addition to the above may be recorded 4 killed and 297 injured by accidents in which the movement of railway vehicles was not concerned, viz.: ascending or descending steps at stations, falling off platforms, &c., and is inclusive of 39 injured by being struck by barrows or stumbling over packages.

Accidents to Servants in the employ of the railway companies or contractors.—The casualties under this head resulting from accidents to trains, or in which the movement of trains or vehicles used exclusively upon railways is concerned, show that 442 were killed and 2,654 injured during the year; of this number 12 deaths and 88 injuries were caused by collisions, 16 were killed and 331 injured in coupling or uncoupling vehicles, 1 was killed and 23 were injured by passing over or standing upon buffers during shunting, 6 were killed and 199 injured in getting on or off, or falling off, engines, waggons, &c; 6 were killed and 196 injured whilst spragging or chocking wheels, 17 were killed and 258 injured by moving vehicles by capstans, turntables, props, &c., and 58 were killed and 390 injured during shunting operations; 85 were killed and 95 injured whilst working on the permanent way, sidings, &c., and 93 killed and 148 injured whilst walking, crossing, or standing on the line. In addition to these accidents, other casualties, in which the movement of vehicles used exclusively upon the railways are not concerned, have occurred, viz., 10 killed and 1,395 injured whilst loading, unloading, or sheeting waggons, 2 killed and 182 injured by the falling of waggon-doors, lamps, bales of goods, &c., 11 killed and 447 injured by falling off platforms, ladders, scaffolds, &c., in addition to a large number of accidents from various other causes, either the result of want of caution or misconduct.

Accidents to Persons other than Passengers or Servants.—Under this head is classed casualties whilst passing over railways at level crossings: this caused 65 deaths and 33 injuries in 1895 (as compared with 80 deaths and 31 injuries in 1894). There were 285 deaths and 144 injuries resulting from persons trespassing on the railways, 96 persons committed suicide upon the lines in 1895 (compared with 112 in 1894).

The above figures may appear formidable, but in analysing them it becomes necessary to review the business done by the railways of the United Kingdom during the year 1895. The companies carried nearly 930 millions of passengers holding ordinary tickets, and besides this number there were over one million persons travelling with season or periodical tickets (the number of journeys made with these tickets can only be guessed at); still the companies must have carried over 1,000,000,000 of passengers (a number not very far short of the entire population of the globe), and also moved 334,000,000 tons of goods and minerals, and run 339,000,000 of train miles. It will be interesting here to make a comparison of railway accidents with the number of persons "run over" in the streets of London. During one recent year 140 were killed and 5,330 injured from this cause, and assuming the population of London to have been five and a half millions, it will be seen that the average per million of population killed in the streets was *twenty-five* and injured nine

Class of Servants.	Number Employed at the end of 1895.	Number Killed and Injured in 1895.		Proportion to the Number Employed.

Digitized by Google

hundred and sixty-nine, whereas the number of railway passengers killed by accidents to trains was *one in the million* of population, or one in 200 millions of the total number of passengers; those *injured* from the same cause being respectively 72 *per million* and one in 2½ millions. These results are mainly attributable to the great development of signalling and appliances for stopping trains which are in use at the present time.

BLOCK SYSTEM.

There has been no relaxation during the past year in the progress made for rendering railway working more safe, by the extension of the interlocking and absolute block systems over a larger railway mileage, and continual progress is reported in this matter, so essential to the safe working of the railways. The proportion in which the signal and point levers had been interlocked on railways was 99·7 per cent. in England and Wales, in Scotland 99, and 97·7 per cent. in Ireland, so that 99 per cent. is now given for the United Kingdom. At the end of the year the absolute block system had been adopted on 11,235 miles out of 11,252 miles of double lines open for traffic. When the orders made upon the railway companies under the Regulation of Railways Act, 1889, come into full force the absolute block and interlocking systems will have to be generally adopted.

CONTINUOUS BRAKES.

In several cases the good effects of continuous brakes have been specially mentioned, whilst in other cases the accidents and collisions might, according to the statements in the reports of inquiries, have been either prevented or their effects mitigated had the trains been fitted with quickly-acting continuous brakes, automatic in their action, instead of those with which the trains were fitted. It appears that 99·4 per cent. of the vehicles used in passenger trains had been fitted with continuous brakes, leaving ·6 per cent. to be so fitted.

THE CHEAP TRAINS ACT.

The "Cheap Trains Act, 1883," is a measure which affects not only railway shareholders and the public generally, but especially the working classes whose domiciles have been interfered with by the extension of the railway systems into crowded centres of London and other large urban areas. The Act has been received by the railway companies with indifference, its provisions being regarded as partial so far as free and untaxed locomotion is concerned, and nothing less than total repeal of all taxation is the universal desire of the railway proprietors and authorities.

The Act, which took effect 1st October, 1883, provides that fares not exceeding the rate of one penny per mile shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. Duty shall be payable at a reduced rate of two per cent. on fares exceeding the rate of one penny a mile between stations within one urban district. Such district will contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character.

If at any time the Board of Trade have reason to believe that upon any railway a due and sufficient proportion of accommodation is not provided at fares not exceeding a penny a mile, or that such proper and sufficient trains are not provided for workmen going to and returning from their work, at such fares and at such times between six in the evening and eight in the morning as appear to the Board of Trade to be reasonable, steps may be taken to compel the company to provide such accommodation.

Provision is also made in the Act continuing the companies' powers as to special mileage and exceptional charges, and also enlarging their powers in dealing with the charges over distances which include fractions of a mile over a quarter of a mile. The Queen's forces, including officers or men in the navy or naval volunteers, or in the regular, reserve, or auxiliary forces of the army, or in any police force when conveyed by railway on any occasion for the public service, are, when travelling in bodies under one hundred and fifty in number, to be charged three-fourths the rates for ordinary passengers; when over that number, at half rates. The Act does not extend to Ireland.

RAILWAY SERVANTS' RISKS.

Some idea of the relative amount of risk run by the different classes of railway servants is afforded by the table on p. 728, which shows the number of men employed in various occupations, and the number of fatal accidents and injuries to each class, in the year 1895.

The figures referring to goods guards and shunters are a very startling record of the dangers to which these men are exposed, necessarily in a few cases; but in a great many instances they arise from indifference, or daring, which ordinary reason should be able to restrain. That most dangerous part of their employment, viz., the coupling and uncoupling of waggons, has recently been greatly relieved.

FURTHER LEGISLATION FOR RAILWAYS.

The report by the Board of Trade in accordance with section 24 of the Railway and Canal Traffic Act, 1888, on the classification of merchandize traffic and schedule of maximum rates applicable thereto, determined in respect of the various companies, shows that the proposed rates and the actual charges approach nearer than anticipated. The adoption of the New Schedules would result in a serious but not overwhelming loss, and there is no probability that the loss would be recouped by an increase of traffic, as the decrease in revenue would affect hundreds of thousands of rates, and the reduction for any particular class of goods would be too small to encourage new traffic. As to terminals for station accommodation, and charges for servants' labour, the Board of Trade have adopted a uniform maximum based on as fair an average as it is possible to attain, and have limited the charge to services for loading, unloading, covering, and uncovering. It is also proposed that in all cases there shall be a truck rate for the conveyance of animals. The Companies believe that, if they rightly understand the principle laid down in the report as to the revision of rates, no serious difference will be found to exist, but that it is the failure of these schedules to give due and fair effect to those principles that stands in the way of an agreement between the Board of Trade and the Companies. The new rates operated on and from January 1, 1893.

ALPHABETICAL LIST OF PRINCIPAL RAILWAYS OF UNITED KINGDOM, WITH OFFICERS AND OFFICIAL ADDRESSES.

THE RAILWAY CLEARING HOUSE.

The question must often have arisen with the travelling public, when booking from a particular company's system to another, and probably before arriving at the destination station have passed over several companies' lines, as to how the allocation of the through fare to each of the several companies, whose lines have been traversed by the issue of the through ticket, is attained. This business of allocation is conducted on what is termed "the Clearing System," and the arrangements are under the superintendence of a committee appointed by the Boards of Directors of such several railway companies who are parties to the Railway Clearing System. Lord Claud Hamilton is the Chairman and Mr. H. Smart the Secretary of this large institution, the premises of which are situated in Seymour Street, N.W., adjoining the L. & N. W. Euston Station. The *modus operandi* of dealing with traffic passing over more than two companies' lines, is as follows:—The stations render to the Clearing House, through their respective companies, a monthly return of all through bookings, and the business of the Clearing House is to manipulate these returns, afterwards crediting each company with their proportion of those bookings. The goods, parcels, &c., traffic is dealt with in a similar way. Where two companies only are concerned the division of the receipts is, as a rule, settled privately and not dealt with through the Clearing Committee. The Clearing House is also a meeting place of the delegates from all companies, where arrangements are made relative to the working of through traffic; fares are compiled, tolls, proportions, etc., which each company shall receive in division are arranged, and disputes and queries, which of necessity arise in matters of so complicated a nature, are settled. The Clearing Committee minute the business transacted and circulate copies among the companies. There are also numerous other difficulties in working through traffic which are minimised by the Clearing System. The institution was opened in January, 1842, and obtained legal powers by the passing of the Railway Clearing Act in 1850.

Indian Railways.

The construction of Railways in India, which commenced in 1853, has been conducted on three different systems: first, the employment of companies under a system of guarantee; secondly, by the State through its own officials; and thirdly, by assisted companies either with or without guarantee or subsidy from the State, and working with capital wholly raised by themselves or partly with capital provided by the State. Out of eight lines constructed on the first system, five * have been purchased by the State. Two of these are worked by companies. The more important, the East Indian line, is carried on by the same company that constructed it in the first instance, on special terms as to the sharing of profits. The second, the South India line, is in the hands of a new company, whose capital was subscribed by the shareholders of the old one. The three remaining lines are worked by the State, and all five come into the category of State lines in the accounts of the Government of India.

The general statistics for Indian railways in regard to their capital outlay, traffic, receipts, &c., will be found on page 462. In the following table, the annuities and stock created for the purchase of the lines, the yield on which does not depend on the profits of working, are excluded. The debenture stocks of the companies are also excluded. Some of the principal State lines worked by the State are given for purposes of comparison.

The figures of the Rajputana-Malwa line, which is worked by the Bombay-Baroda, are given separately, but in other cases the statistics of some minor undertakings are included in the totals of the railway by which they are worked.

The railways of India involve a yearly loss to the Indian revenues, amounting in 1895-96 to Rx. 1,783,700, and from the commencement to Rx. 52,927,496. The loss is due to the onerous rate at which the money was in the first instance raised, and to the fall in the value of the rupee while the liabilities continued to be largely calculated on a gold basis. See Table, p. 732.

*East Indian; *Eastern Bengal (part of the system now so called); *Oudh and Rohilkhund; *Scinde, Punjab and Delhi (now part of North-western system); *South Indian; Bombay, Baroda and Central India; Great Indian Peninsula; Madras.

* £9,787,670 at 5%, £300,000 at 4½%, £169,960 at 4%; these last two amounts have been lately converted into capital stock. ** Opened to traffic from July 1, 1895.

For the use of Parish Councils, Overseers, Churchwardens, Vestry Clerks, Magistrates' Clerks, Clerks of the Peace, and Town Clerks, Superintendent and District Registrars, Coroners, and County, Municipal, District, and Parochial Officers and Citizens generally, showing the days when certain Official Duties are to be performed; also the days when Inland Revenue Licences expire.

NOTA BENE.—1. *A rule of law is that Sunday is no day. Any act, therefore, which falls to be done on a Sunday should be performed the day previous unless statutory provision exists to the contrary. Every meeting or adjourned meeting of any vestry or corporation other than Municipal, or of any public company, for the nomination, election, or admission of any officer, or for the transaction of any affair of such vestry, corporation, or company, which according to any Act of Parliament, charter, prescription, or usage whatsoever, is or shall be required to be held on any day which shall happen to be a Lord's Day, shall, by 3 & 4 Will. IV. c. 31, be held on the Saturday preceding or on the Monday ensuing; and every matter transacted at any meeting or adjourned meeting held upon any Lord's Day shall be absolutely void. When no such nomination, election, or admission shall have taken place on the Saturday, every person whose term of office would have expired on any such Lord's Day shall continue in office, and exercise and enjoy all powers and privileges, until the Monday next ensuing.*

2. *By the Municipal Corporations Act, 1882, when a limited time from or after any date or event is appointed for the doing of any act, the time is exclusive of the day of that date or of the happening of that event, and as commencing at the beginning of the next following day; and the act is to be done on the last day of the limited time, unless that should be a Sunday, Christmas Day, Good Friday, Monday or Tuesday in Easter Week, or a day appointed for a public fast or thanksgiving, in which case the act will be done in due time if performed the day following. The same applies to any act directed to be done on a certain day, and that day falls on one of the days above mentioned. Further, if any act or proceeding is directed to be done within any time not exceeding seven days, the days above specified are not to be reckoned.*

3. "*Three clear days*" *means that three days must intervene between the day on which a notice is given and the day on which a meeting is held, and notices sent by post must be* delivered *three clear days before a meeting.*

4. *In regard to Bills of Exchange that fall due on a Sunday, Good Friday, Christmas Day, or a day appointed for a fast or thanksgiving, presentation for payment should be made on the preceding business day. Bills of Exchange falling due on a Bank Holiday are not payable until the following day, and when the last day of grace is a Sunday, and the second day of grace is appointed as a Bank Holiday, such bills are due and payable on the succeeding business day (see 45 & 46 Vict. c. 61).*

5. PARLIAMENTARY ELECTIONS.—*The times that must elapse between the receipt of the writ by the Returning Officer and the dates fixed for the various steps in the election are as follows:—Assuming that the writ is received on the 1st of any month, the notice of election must be issued on the 2nd in Boroughs, and 3rd in Counties. The nomination must take place on the 4th or 5th in Boroughs, and on any day between the 5th and 10th (both inclusive) in Counties. The poll (if any) must be fixed for some date between the 6th and 9th (both inclusive) in all Boroughs, except those mentioned in Rule 57, Schedule I., to the Ballot Act, 1872, in which the date may be between the 7th and 12th (both inclusive).*

6. LOCAL GOVERNMENT AUDIT STAMP DUTY.—*The following is the scale of Stamp Duty payable by County and Urban and Rural District Councils and Parish Councils, and by the Chairmen of Parish Meetings on the Audit of their accounts by District Auditors:—*

Where the total of the expenditure comprised in the Financial Statement is—			£	s.	d.
Under £20	... ...	the sum shall be	0	5	0
£20	and under £50	do.	0	10	0
£50	do. £100	do.	1	0	0

£5,000	do. £10,000	do.	10	0	0
£10,000	do. £20,000	do.	15	0	0
£20,000	do. £50,000	do.	20	0	0
£50,000	do. £100,000	do.	30	0	0
£100,000	and upwards	do.	50	0	0

January.

1 F.—The Land Tax, Income Tax, and the Duties on inhabited houses are due on this date; so are licences for carriages, male servants, and to use armorial bearings. These licences must be taken out before the end of the month and thereafter within twenty-one days after a person becomes liable to duty. Dog licences must be taken out without delay: no grace can be claimed, but on *renewal*, if with other licences, they may be taken out any time during January.

Holiday on the Stock Exchange, and Bank Holiday in Scotland.

The Registers of Parliamentary, Local Government and Parochial Electors come into force for the year.

Watch Committee of Town Council to send to Secretary of State a copy of all rules made for the regulation and guidance of borough constables since the last quarterly return.

Between this date and the 31st March, the Medical Officer of the parish to visit every pauper lunatic not in an asylum; and before the 7th of this month make a report to the Clerk to the Guardians, or to the Overseers, of his visits during the preceding quarter, which report, within three days after its receipt, is to be transmitted to the Commissioners in Lunacy, and a copy sent to the Clerk to the Visitors of the asylum for the county or borough in which the union or parish is situate.

Clerk to Guardians and Overseers of parishes on this date, or as soon after as may be, to make out an annual list of all lunatics chargeable to the parish, and send copies before the 1st February to the Local Government Board, the Commissioners in Lunacy, Clerk to Visitors of Asylums, and to the Clerk of the Peace of the county, or Clerk to the Justices of the borough, to be by him laid before the Justices.

Return of Paupers relieved on 1st instant and of children boarded-out, to be made to Local Government Board.

On this date, or within ten days after (if no other day be prescribed), municipal corporations to appoint members of the council as trustees of corporate property.

Registrars, except of London districts, to post to the Registrar-General a correct return of births and deaths registered during the preceding quarter.

Coroners to send return of inquests for preceding year to Secretary of State during this month.

Within fifteen days after this date Registrars of Dioceses to send to the Registrar-General a list of all chapels wherein marriages may be lawfully solemnized.

Within fifteen days after this date bankers not registered under the Joint Stock Companies Act to deliver returns at the Stamp Office in London.

Quarter Sessions to be held during this week. Under the Quarter Sessions Act, 1894, the Justices in General Quarter Sessions or at any adjourned or special meeting thereof, may at any time, when it may appear desirable for the purpose of not interfering with the Assizes then next ensuing, fix or alter the time for holding the then next General Quarter Sessions so that they shall be held not earlier than fourteen days before and not later than fourteen days after the week in which they would otherwise be held.

Within one week after the termination of Quarter Sessions the gaoler to send to the Secretary of State a calendar of the prisoners tried thereat.

6 S.—After the fourth day of Michaelmas Sittings courts to sit to hear appeals from Revising Barristers.

9 Tu.—Ordinary date of election of mayors of boroughs. The council of every borough being a county in itself, and the city of Oxford, to appoint a sheriff immediately after the election of the mayor, and elect borough aldermen to take the place of those retiring.

The Lord Mayor of London, having been chosen on St. Michael's Day, is, by 24 Geo. II. c. 48, to be presented at the Supreme Court of Judicature and sworn on this date, except the same shall fall on a Sunday, then on the day following.

11 Tu.—Martinmas. Scottish Quarter Day.

12 F.—High Sheriffs of England and Wales nominated in the Queen's Bench Division for appointment in January next.

15 M.—Solicitors' Annual Certificates expire.

16 Tu.—Between this date and December 15th, solicitors, proctors, and notaries public in *England* must renew their certificates.

19 F.—End of Trustee Savings Bank year (26 & 27 Vict. c. 87).

20 S.—Within sixty days the half-yearly receipts for interest from the National Debt Commissioners to savings banks to be made out and issued.

Trustee Savings Banks to make up accounts to this date, and within nine weeks publish annual statement.

30 Tu.—Latest date for depositing plans and books of reference in the Private Bill Office of the House of Commons and with Clerks of the Peace.

Latest date for Special Pleaders, Draftsmen in Equity, and Conveyancers in England to renew certificates. (*See* Oct. 30.)

December.

1 W.—Time expires for lodging declaration with Registrar of Solicitors for certificates.

Clerks of Union Assessment Committees to send in this month the totals of the gross estimated rental and rateable value of the property in the valuation lists of the several parishes to the Clerk or respective Clerks of the Council of the county or counties within which such parishes may be situate.

Chief Constables to transmit returns as to Constabulary force.

14 Tu.—Latest date for delivering notices, &c., to owners and occupiers affected by private bills.

Latest date for renewal of solicitors' certificates.

18 S.—Railway Companies to pay quarterly instalments of Income Tax on or before this date.

20 M.—Clerk of the County Council to make up the "County Register," that is, the Register of County Electors for local government purposes, and also the Parochial Registers, so that it shall be completed before this date. It will come into force on the 1st January next.

21 Tu.—Common Councilmen in the City of London to be elected on this date.

Michaelmas Law Sittings end.

Latest date for leaving petitions, declarations, &c., at Private Bill Office.

25 S.—Christmas Day. Quarter Day.

Medical officers of Unions entitled to be paid any extra fees, to make out their accounts quarterly to this date, and lay the same before the Guardians.

27 M.—Bank and General Holiday.

District Medical Officer to notify to the Board of Guardians at the commencement of this quarter the paupers whose names have been inserted in the permanent medical relief lists for a period of six months.

28 Tu.—Quarter Sessions to be held during the week following this date. (*See* Jan. 1.)

31 F.—Clerk of the Peace to deliver, on or before this date, County lists of voters to the Sheriff of the county, and Town Clerk to deliver Borough lists to the Returning Officer of the borough.

Railway Companies to prepare an annual abstract of receipts and expenditure for the year to this date, or some other convenient day in each year, and, if required, transmit a copy thereof, free of charge, to Overseers of parishes through which the railway runs.

Latest date for Assessment Clerks to send valuation returns to Clerks of the Peace.

Latest date for leaving estimates, lists of occupiers, &c., at Private Bill Office.

End of year for calculation of interest in Post Office Savings Banks.

End of the "official year" for the purposes of the Building Societies Act, 1894.

Annual Police Return to be made to Secretary of State as soon as possible after end of the year.

The following licences expire on this date:—Male servants, carriages, dogs, armorial bearings, and all "Establishment Licences."

Digitized by Google

TO BE ISSUED EARLY IN 1897.

Whitaker's Directory

OF

Titled Persons

FOR THE YEAR 1897.

DESIGNED AS A COMPANION TO

WHITAKER'S ALMANACK.

THE object of the Publishers is to place in the hands of the public a reliable Directory of the Peerage and other Titled Persons, *at less than one fourth the cost* at which such desideratum has hitherto been obtainable.

The work will be issued in distinctive binding, in similar size to the Almanack, and will be published at half-a-crown. It is confidently anticipated that, as the book becomes generally known, it will be found as indispensable—not only to the journalist, but to the many thousands who resort frequently to such means of reference—as its popular forerunner, the Almanack.

The ordinary contents of a Peerage, Baronetage, and Knightage, including Dowager Ladies and Titled Issue, will be presented in WHITAKER'S DIRECTORY under a *single alphabet;* and to this is prefixed an extended list of the Royal Family, together with much descriptive and explanatory information never before given in any similar work. An alphabetical list of Country Seats will also be a noticeable feature, helping appreciably to render the volume a handy and concise Court Guide.

London: J. WHITAKER & SONS, 12, Warwick Lane, E.C.

The New Departure in the Wine Trade.

HATCH, MANSFIELD & CO., Ltd.,

1, COCKSPUR STREET, TRAFALGAR SQUARE,

FULL PRICE LIST ISSUED QUARTERLY. Each Number contains an entirely New and previously Unpublished Story by a Well-known Author.

The New Departure in the Wine Trade.

HATCH, MANSFIELD AND CO., LIMITED, are essentially

Distributing Agents

between the great Wine Producers, Shippers and Distillers on the one hand, and the Public on the other.

They thus bring within the reach of all classes the widest choice of the finest Wines and Spirits,

at Prices the Lowest in the Trade.

Their complete system of guarantees—particularly their

Specification of Vintages,

and the exclusion of all those of doubtful character—

Ensure the very Best Quality.

Insistence on the subject of Vintages is of the utmost importance.

Bad or Doubtful Vintages

are due either to parasitic disease, such as mildew, or to the immaturity of the grapes; the wines are therefore unsound, and consequently

Injurious to Health.

In Good Vintage Years only,

when the grapes are free from disease, and attain perfection,

is the Wine Absolutely Pure and Wholesome.

Wine of a Bad Vintage goes steadily from bad to worse. Wine of a Good Vintage invariably improves by keeping.

The List of Customers,

published by permission, in Hatch, Mansfield & Co.'s Quarterly Book, vouches for the high appreciation of their New Departure.

One bottle is sent as readily as the largest order.

Free Carriage

to any part of London, to any Railway Station in Great Britain, and to any Port in Ireland.

Hatch, Mansfield & Co.'s Quarterly Price List contains in each number an Entirely New and

Previously Unpublished Story by a Well-known Author.

STANDARD ENGLISH DICTIONARIES.

Large fcap. 4to, cloth, 7s. 6d.; half-Persian, 10s. 6d.; half-mor., flexible, 12s. 6d.

THE STUDENT'S ENGLISH DICTIONARY.

Literary, Scientific, Etymological and Pronouncing. By JOHN OGILVIE, LL.D. New Edition, thoroughly Revised and greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D., Editor of the New Edition of "The Imperial Dictionary." Extensive and Useful Appendices. Nearly 800 Engravings on Wood.

"Leaving out of account the unwieldy and expensive recent editions of Webster and Worcester, we have no hesitation in saying that this is by far the most useful one-volume English dictionary at present existing."—*Athenæum.*

In One Vol., fcap. 4to, cloth, 5s.; half-roxburghe, 6s. 6d.; half-morocco, 9s.

A CONCISE DICTIONARY OF THE ENGLISH

LANGUAGE. Etymological and Pronouncing, Literary, Scientific and Technical. By CHARLES ANNANDALE, M.A., LL.D.

"Stands towards other dictionaries of the smaller character in the relation of the 'Imperial' to rival lexicons—in other words, it holds the 'premier' place."—*Spectator.*

In Four Vols., imperial 8vo, cloth, £5; or half-morocco, £6 6s.

THE IMPERIAL DICTIONARY OF THE ENGLISH

LANGUAGE. A Complete Encyclopædic Lexicon, Literary, Etymological, Scientific, Technological and Pronouncing. By JOHN OGILVIE, LL.D. New Edition, carefully Revised and greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D. Illustrated by above 3,000 Engravings on Wood.

"So far as vocabulary and treatment are concerned, we should not wish for anything better than the new 'Imperial.' The etymology is clear and concise, and the illustrations are copious, appropriate and well executed."—*Times.*

Scott. 5 Vols, in case, 32mo, from 15s.	**Wordsworth.** 5 Vols., in case, 32mo, from 16s.

OPINIONS OF THE PRESS.

"The Oxford editions of the Poets are the shapeliest, most trustworthy and best."—*Notes and Queries.*

"May the Oxford Press send out in the same form all the Poets between the dates and ranks of Shakespeare and Longfellow."—*The Sketch.*

A NEW THUMB EDITION.

Printed on the OXFORD INDIA PAPER, in perfectly legible type. Uniform with the **Oxford Thumb Prayer Book**, with or without Hymns Ancient and Modern, "**Of the Imitation of Christ**" and "**The Christian Year.**" Measuring 2⅜ by 1¼ by ⅝ inches.
Issued in various bindings, from 1s. 6d.

THE PILGRIM'S PROGRESS. By JOHN BUNYAN.

"They are complete, but, printed on the Oxford India Paper, they take up very small space, and are among the most attractive 'miniatures' we have seen."—*Westminster Gazette.*

"Singularly well printed, possessing the clearness that fine type and Oxford India Paper only can produce . . . the acme of excellence has been reached in these admirable little books."—*Birmingham Gazette.*

THE OXFORD BIBLE FOR TEACHERS, with the "Oxford Helps to the Study of the Bible." Re-cast and Re-written. Profusely Illustrated. In upwards of 20 sizes and 100 styles, from 3s. to £5.

THE BISHOP OF LONDON (Dr. CREIGHTON).—"Additional matter gives the book greater completeness than the edition which, in my parochial experience, I found most valuable for teaching purposes; and the illustrations supply materials for further instruction."

THE LATE ARCHBISHOP OF CANTERBURY.—"I have for some little time past frequently referred to this Bible, and have been already much impressed with the amount and the importance of the information it gives, and the accuracy, the skill, the good sense with which it is classified and compacted."

CLARENDON PRESS PUBLICATIONS.

Demy 8vo, cloth, 10s. 6d. net.

SCRIPTURE AND CLASSICAL AUTHORS IN DANTE.

STUDIES IN DANTE. First Series. By EDWARD MOORE, D.D., Principal of St. Edmund Hall, Oxford.

"The book is one of the most important contributions that have yet been made to the growing literature devoted to the interpretation of the great poet of the middle ages."—*Scotsman.*

With numerous Illustrations in the Text, Twenty-nine full-page Plates and Sixteen Key Plates, demy 8vo, buckram, 16s. net.

A HANDBOOK OF ANATOMY FOR ART STUDENTS. By Professor ARTHUR THOMSON, M.A., M.B., Professor of Human Anatomy in the University of Oxford, and Lecturer on Anatomy in the National Art Training School, South Kensington.

"In every way Professor Thomson's book appears to be practical and likely to prove useful for its purpose."—*Times.*

With Illustrations, demy 8vo, cloth, 12s. 6d.

THE TRAGIC DRAMA OF THE GREEKS. By A. E. HAIGH, late Fellow of Hertford College, Classical Lecturer at Corpus Christi and Wadham Colleges, Oxford.

"Much helpful and interesting information and light."—*Scotsman.*

GEORGE PHILIP & SONS' LIBRARY AND REFERENCE ATLASES.

Revised to Date.

PHILIPS' IMPERIAL ATLAS OF THE WORLD. A complete Atlas for all purposes, Illustrating every aspect of Geographical Science, and embodying an amount of information unequalled by any other Atlas, English or Foreign. This Atlas, the preparation of which occupied several years, contains no less than Eighty Imperial Plates, drawn with the greatest care and accuracy from the most recent and reliable sources. While every portion of the globe is adequately shown, special attention has been devoted to the British Empire, and all Her Majesty's Dominions throughout the world are fully delineated. Each Map (with the exception of the Physical and Orographical Maps) is accompanied by a Complete Index, comprising in all 200,000 names, and, to facilitate reference, the latitude and longitude of every place is given. Imperial folio, half-bound morocco, gilt edges, price **£8**; or full bound russia or morocco extra, for presentation, **£10 10s.**

A Descriptive Prospectus, giving an Analysis and Full Details of this Important Publication, may be obtained from the Publishers, or through any Bookseller.

PHILIPS' GENERAL ATLAS OF THE WORLD. Comprising Fifty large Plates, printed in Colours. Three Maps, which are produced in the best style of the art, have been revised so as to present the results of all the latest discoveries and political changes, special attention being paid to the maps devoted to the Continent of Africa, in order to embrace all important discoveries and the new boundaries effected by the recent agreements with Germany, France, Italy, &c. Each Map is accompanied by a Complete Index, in which the latitude and longitude of every place on it is given, so that its exact position can be instantly located. Imperial folio, strongly half bound in morocco leather, gilt title and edges, price **£4.**

PHILIPS' NEW HANDY GENERAL ATLAS OF THE WORLD. A Series of Sixty Plates, containing over 120 Maps and Plans, illustrating exhaustively every aspect of Physical, Political, and Commercial Geography, accompanied by a Complete Consulting Index of 100,000 names. Crown folio, half morocco, **£2.**

PHILIPS' REFERENCE ATLAS OF THE WORLD. A Series of Seventy-two Plates, with a Statistical Survey of the Countries of the World and a complete Index. By E. G. RAVENSTEIN, F.R.G.S., Hon. Fellow of the Geographical Societies of Edinburgh, Amsterdam, Lisbon, and Frankfurt-on-Main. Small 4to, cloth gilt, gilt edges, **10s. 6d.**

Just Published.

THE MERCHANT SHIPPERS' AND OCEAN TRAVELLERS' ATLAS. A Series of Fifteen large Coloured Plates of the various Oceans and Seas, showing clearly Submarine Cables, Steamship and Sailing Ship Routes, Distances between Ports, Canals, Lighthouses, Coaling Stations, and much additional information which will be found exceptionally useful to Merchants, Ship Brokers, Insurance Offices, and all those who are interested in Ocean Travels. Large folio, strongly bound in cloth, **£1 10s.**

London: GEORGE PHILIP & SON, 32, Fleet Street, E.C.
Liverpool: PHILIP, SON & NEPHEW, 45 to 51, South Castle Street. [272

*** *A Catalogue of larger works upon Homœopathy sent mail free to any part of the world on application to*

THE HOMŒOPATHIC PUBLISHING COMPANY, 12, Warwick Lane, London, E.C.

Society for Promoting Christian Knowledge.

THE STRUGGLE OF THE NATIONS—EGYPT, SYRIA and ASSYRIA. By Professor MASPERO. Edited by the Rev. Professor SAYCE. Translated by M. L. McCLURE. With Maps, Three Coloured Plates and over 400 Illustrations. Demy 4to (approximately), cloth, bevelled boards, 25s.; half-morocco (bound by RIVIERE), 50s.

This is a Companion Volume to "The Dawn of Civilization," and contains the History of the Ancient Peoples of the East from the XIV. Egyptian Dynasty to the End of the Ramesside Period. This interval covers the sojourn of the Israelites in Egypt and their Exodus therefrom. The recent discovery of an Egyptian Stele mentioning the Israelites gives special interest to this Volume.

THE DAWN OF CIVILIZATION (EGYPT and CHALDÆA). New and Revised Edition. By Professor MASPERO. Edited by the Rev. Professor SAYCE. Translated by M. L. McCLURE. With Map and over 470 Illustrations, including Three Coloured Plates. Demy 4to (approximately) cloth, bevelled boards, 24s.; half-morocco (bound by RIVIERE), 48s.

Professor MASPERO, by using the result of the most recent researches in Egypt and Mesopotamia, has brought this New Edition up to the latest date.

THE BIBLE IN THE LIGHT OF TO-DAY. By the Rev. CHARLES CROSLEGH, D.D. Post 8vo, cloth boards, 6s.

THE

LONDON PROPERTY INVESTMENT TRUST,

LIMITED.

Incorporated under the Companies Acts, 1862 to 1890.

CAPITAL £100,000

In 20,000 Shares of £5 each, of which Eight are Founders' Shares.

Directors.

GEORGE BAXTER, *Chairman and Managing Director.*

EDWARD ANGELL EADY. | WILLIAM LINDSAY COULSON.

Bankers.

PARR'S BANK, Limited, BARTHOLOMEW LANE, E.C.

Offices.

1, FREDERICK'S PLACE, OLD JEWRY, E.C.

This Trust is established for the purpose of acquiring Freehold and Leasehold Properties, primarily in the London District, for **investment** purposes.

The Trust affords large and small capitalists opportunities for investment to good advantage, both as regards security and rate of interest. Transactions of a speculative character are studiously avoided, and only properties of sound commercial value dealt with.

The Investments consist of Shop Properties situate in main thoroughfares and well-established neighbourhoods. More than three-fourths of the present income is derived from lettings on full repairing leases.

The Directors, Solicitor and Secretary serve without remuneration, being holders of the Founders' Shares, which receive no share of profits until a dividend of 6 per cent. is paid to the Ordinary Shareholders, and one-fourth of the balance of profits is carried to a Reserve Fund **invested in Consols.**

The Ordinary Shareholders thus obtain a preferential dividend of 6 per cent. per annum, and their position is further assured by the Reserve Fund.

The Directors invite applications for Capital in fully paid Shares of £5 each, bearing 6 per cent. interest.

Applications can be made direct to the Secretary at the Offices of the Trust, 1, Frederick's Place, Old Jewry, E.C., who will furnish a Schedule of the Investments, and a copy of the last Balance Sheet and Report. [177

CORNFORTH & REACHER,

Stock and Share Brokers,

MANSION HOUSE BUILDINGS,

4, QUEEN VICTORIA STREET, LONDON, E.C.

We invite correspondence with Investors, to whose Interests and needs special attention is devoted.

GOOD INVESTMENTS.

For permanent Investment the following may be named :—English Government, Corporation and Colonial Stocks; English Railway Stocks; Mortgage Debenture Bonds in Foreign and American Railways, *which yield dividends on Ordinary Stock;* Shares in first-class Banks, such as London and Westminster; London and County; Union Bank of London; London Joint Stock; City; Parr's and Alliance; National Provincial; Lloyd's, &c. &c.

A careful selection of the foregoing will provide an investment yielding an average return of about 4½ per cent.

Investors desiring a larger percentage may turn their attention to the better class of Industrial Companies, such as Roberts' Stores (Islington and Stratford); Plummer Roddis (Drapers); Harrod's Stores; Slaters, Limited (Restaurant Keepers and Provision Merchants); Bovril, Limited; Aërated Bread Company, &c. The Preference Shares and Debentures of the above-named appear to us well worthy of attention, even on the part of the most cautious investor. We make sound Home Industrial Shares a special feature, and are able to deal at closest quotations. Upon our advice many investors bought Slaters at 12*s.* 6*d.* (now £2); Coats at £10 (now £63); Harrods at £1 (now £6).

MINES.

Mining Shares are, of course, speculative. Our Notes, carefully prepared each month and based on most recent information, should be seen by those interested in Indian, Australian and African (Gold or Diamond) Mines. Dealing at close prices. Prompt delivery.

Stocks delivered to any London Banker against cash.

Foreign Correspondents will receive every attention.

Monthly Investment List free on application.

References can be given in every large Town in England.

CURRENT ACCOUNTS are kept in conformity with the practice of London Bankers. In cases where a remunerative Balance is not maintained, a charge for Commission is made. Parties keeping Current Accounts have the facility of having approved Bills discounted; of obtaining Loans upon negotiable Securities; of depositing Bills, Coupons, &c., for collection; and of lodging with the Bank Deeds and other valuable property in the Fireproof Strong-Rooms for safe custody

DEPOSIT ACCOUNTS.—Money, in amounts of £10 and upwards, is received from the public generally, subject to 7 days' notice of withdrawal, and Interest is allowed thereon at the current rate of the day; the Bank notifying any change in the rate of Interest by Advertisement in one or more of the leading London Newspapers. If the money be withdrawn within a fortnight no Interest is allowed. Persons having Current Accounts can transfer any portion of their Credit Balance to Deposit Account.

THE AGENCY OF COUNTRY AND FOREIGN BANKS, whether Joint Stock or Private, is undertaken by the Bank. LETTERS OF CREDIT, payable at any of the chief Commercial Towns and Cities of the World, are granted; also Mercantile and Marginal Credits. CIRCULAR NOTES are issued by the Bank, addressed to all, and payable at any, of the places on the Continent where the Bank has an appointed Correspondent. DIVIDENDS, &c., on Government and other Stocks, Annuities, Pensions, &c., are received for customers of the Bank without charge; the purchase and sale of Stocks, Shares and Securities are also undertaken; and every description of Banking business is transacted. The Officers and Clerks of the Bank are pledged not to disclose the transactions of any of its Customers.

Secretary—A. M. HAWTHORN. *Inspector of Branches*—H. L. RUTTER.

The present Subscribed Capital of the Bank is **£16,000,000**, in 160,000 Shares of £100 each, held by upwards of 8[illegible] Shareholders. The sum of **£20** has been paid on each Share, thus making the paid-up Capital **£3,800,000**. The R[illegible] Surplus Fund is **£1,600,000**.

Current Accounts are opened with, and the usual Banking facilities granted to, persons properly introduced. T[illegible] Bank takes the Agency of Private Country Banks, Joint Stock Banks, and other Public Companies in England or Colonies; attends to the purchase and sale of British and Foreign Stocks; collects Dividends on Government, F[illegible] Railway Stock, Foreign and other Securities, payable in England or abroad; acts as Agents for the receipt of Mi[illegible] and other pay and allowances, and generally transacts every description of Banking business.

Sums of £10 and upwards may be deposited, repayable at call. Sums of £500 and upwards may be deposited on seven days' notice of withdrawal. Interest is allowed thereon, according to the class of Deposit, but subject to alteration by public advertisement in the *Times* newspaper. Cheques cannot be drawn against Deposit Accounts, nor will De[illegible]positors be entitled to any of the usual Banking facilities of a Current Account. A Receipt is given for each Deposit, which is not transferable, and must be surrendered on repayment of the amount according to the conditions printed thereon.

Circular Notes of £10, £25 and £50 are issued for the use of Travellers, payable in the principal Towns of Europe, Asia, Africa and North and South America. They are issued free of expense, and are payable by the Agents abroad at the exchange of the day without any deduction whatever for Commission. Letters of Credit are also granted, payable at all the Chief Towns and Cities abroad. They may be obtained at the Bank in Lothbury, or any of its Branches.

The Officers of the Bank are not allowed to receive any Christmas Boxes or Gratuities.

London, Dec., 1896. A. M. HAWTHORN, *Secretary.*

The National Provincial Bank of England, Limited, having numerous branches in England and Wales, as well as Agents and Correspondents at home and abroad, affords great facilities to its customers, who may have money transmitted to the credit of their accounts through any of the branches free of charge.

Current accounts are conducted at the Head Office and Metropolitan Branches, and deposits are received and interest allowed thereon at the rates advertised by the Bank in the London newspapers from time to time.

The Bank undertakes the Agency of Private and Joint Stock Banks, also the Purchase and Sale of all British and Foreign Stocks and Shares and the collection of Dividends, Annuities, &c.

Circular Notes and Letters of Credit, payable at the principal towns abroad, are issued for the use of Travellers.

At the Country Branches Current Accounts are opened, Deposits received, and all other Banking business conducted.

The Officers of the Bank are bound to secrecy as regards the transactions of its customers.

Copies of the Annual Report of the Bank, Lists of Branches, Agents and Correspondents may be had on application at the Head Office, and at any of the Bank's Branches.

By order of the Directors. T. G. ROBINSON, F. CHURCHWARD, W. FIDGEON, *Joint General Managers.* [36

CHEQUE BANK, LIMITED.

(Established 1873.)

Head Office—4, WATERLOO PLACE, PALL MALL, LONDON, S.W.
City Office—93, BISHOPSGATE WITHIN, E.C.

Chairman of Trustees of Guarantee Fund—The Most Hon. the MARQUESS OF TWEEDDALE.
Chairman of Board of Directors—The Right Hon. Sir EDWARD THORNTON, G.C.B., P.C.

The principle of the Cheque Bank being that no Cheque is issued to the Public until the maximum amount for which it can be drawn has been deposited, the Cheques are thereby **Guaranteed**, and can be readily cashed anywhere.

Special arrangements have been made with the principal Banks in the United Kingdom that these Cheques can be **cashed on presentation** at any of their Branches, and similar arrangements have been entered into with Bankers in all **parts of the world.** The Cheques are therefore the most useful form of **Circular Note** and **Remittance** to the country and abroad.

Current Accounts opened and kept **without charge.** No minimum balance.
Cheques, Bills, Warrants, Coupons and Dividends, &c. &c., collected for customers.
The **Purchase** and **Sale** of Government and other Stocks, Shares and Securities effected.
Deposits of £1 and upwards received at Interest. Rates on application.
For **Handbooks** and full particulars apply as above.

Favourably reviewed by over Eighty influential Newspapers.

"HOW TO SELECT A LIFE OFFICE."

A Dialogue, Illustrated by Tables, showing how to obtain a Maximum of Security and Profit.

By G. M. DENT, F.S.S.

Extracts from a few Press Opinions.

"Those who are seeking an Office for the purpose of assurance will do well to peruse this 'dialogue' before deciding upon any particular Company."—*Bullionist.*

"The statistics as to Endowment Assurance policies as investments are highly interesting and convincing."—*Citizen.*

"To those who contemplate taking out life policies, the expenditure of a shilling on this pamphlet may be recommended as about the wisest step they could take. Everyone should read it."—*Fairplay.*

"There is no doubt Mr. Dent has expended a vast amount of research on his pamphlet, and the elaborate tables which he publishes are distinctly valuable."—*Financial Times.*

"A dialogue, which, together with a series of tables, shows the features to which an intending assurer should direct his attention before selecting a Company."—*Glasgow Herald.*

"The publication is of value to the insurance broker and other professional men, but of more value still to the intending insurer."—*Halifax Courier.*

"A cleverly-written dialogue. Both tables are explained with great lucidity."—*Law Journal.*

"All who contemplate insuring their lives, should read, mark, learn and inwardly digest this able and interesting treatise."—*Leeds Times.*

"A well-written pamphlet. Anyone proposing to insure his life will easily find from the author's 'three interviews' how to spend his money to the best advantage."—*Liverpool Mercury.*

"Mr. Dent explains with singular clearness the canons by which the security of an Office may be tested, and its prosperity gauged, and shows the immense difference between the advantages offered by different Companies; all this being set forth in such simple, untechnical language, that the reader most unused to the phraseology of finance may follow him not merely with apprehension, but with real pleasure and interest."—*Manchester Examiner.*

"Conveys in dialogue form some very sound and exhaustive advice. Anyone contemplating effecting an insurance should first of all study this work."—*Money.*

"A valuable pamphlet on life assurance. . . . There are two carefully-prepared tables—No. 1, 'exhibiting in a concentrated form the more essential points to be considered in the selection of a Life Office,' and No. 2, 'showing the different results to policy-holders, produced by the payment of the same money to the various Offices.'"—*Morning Post.*

"A most valuable and exhaustive pamphlet."—*Nonconformist.*

"One special branch of the question, which is most lucidly treated, is the value o life assurance considered simply as an investment."—*Southport Guardian.*

"An instructive pamphlet. Insurers in search of knowledge might advantageously expend a shilling on this book."—*Statist.*

Price 1s. By post, 1s. 1d. (under four ounces).

THE GROWTH OF THE BUSINESS IS SHOWN BY THE FOLLOWING FIGURES.

	Fire Premiums.	Life Premiums.	Total Income.
1883	£95,898	£79,734	£256,554
1895	368,941	135,246	594,091

TOTAL ASSETS (31st December, 1895), £2,121,259.

THE COMPANY HAS PAID IN CLAIMS UPWARDS OF £13,000,000 STERLING.

LIFE DEPARTMENT.—Life Policies are granted under any one of the following six principal plans:
I. **Ordinary with Profit Policies**, at moderate rates, with large compound bonuses.
II. **Policies at "Cost Price,"** where future bonuses are applied in reducing the Premiums from the commencement of the Assurance.
III. **Tontine Investment Policies**, for a fixed sum during a term of years and large accumulations of bonus at the end of that term.
IV. **Non-Profit Policies**, of use principally in financial transactions.
V. **Double Endowment Assurances**, a safe and profitable investment for annual savings.
VI. **Renewable Term Policies**, or temporary Assurances at minimum rates, renewable without fresh medical examination.

The **Bonuses** declared have always been large, and all interest yielded on the investments beyond 2½ per cent. will contribute to future bonuses.

CLERGY MUTUAL ASSURANCE SOCIETY,

Founded in the Year 1829.

Offices—2 & 3, THE SANCTUARY, WESTMINSTER, S.W.

Patron—His Grace the Archbishop of York.
President—The Right Hon. and Right Rev. the Lord Bishop of London.
Vice-President—The Lord Harris.
Chairman—The Very Rev. the Dean of Westminster.
Deputy-Chairman—The Hon. Edward W. Douglas.
Bankers—Messrs. Coutts & Co. *Physician*—J. Kingston Fowler, Esq., M.A., M.D.
Actuary—Frank B. Wyatt, Esq., F.I.A. *Secretary*—G. H. Hodgson, Esq., M.A.

The Society is conducted on the Mutual Principle, solely in the Interests of

THE CLERGY AND THEIR RELATIVES.

Accumulated Fund, £4,049,254. Annual Income, £407,972.

Special Features:—

1. The Annual Premiums charged are below the average, this fact being equivalent to an Immediate Bonus.
2. The expenses of Management are on a remarkably low scale, No Agents being employed or Commission paid for the introduction of business.
3. The rate of Mortality among the Members is very much lower than among the general population.
4. The combination of the above favourable circumstances has resulted in the return of exceptionally large Bonuses to the Assured Members. The Bonus declared for the 5 years ending 31st May, 1896, amounted to £560,000, making the total Bonuses distributed £3,182,812.
5. The Reserves for the Society's Liabilities have been estimated on the most stringent basis employed by any Insurance Institution in the United Kingdom.
6. Assured Members have therefore absolute security with every prospect of the continuance of a high rate of Bonus.

WHOLE-LIFE and ENDOWMENT ASSURANCES
are granted at Low Premiums, with right of participation in profits.

THE FOLLOWING ARE SPECIMENS OF THE RATES:—

Age next Birthday.	WHOLE-LIFE ASSURANCE.		ENDOWMENT ASSURANCE.		Age next Birthday.
	Annual Premium for an Assurance of £100 payable at death.	"Reduced" Annual Premium for an Assurance of £100 payable at death (see Note).	Annual Premium for an Assurance of £100 payable at death or on attainment of age.		
			65	60	
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	
20	1 15 0	1 8 0	2 1 1	2 6 3	20

Assets	£3,488,009
Income	£402,481
New Assurances in the Year (net)	£539,368
Annual Premiums thereon	£18,903
Sum divided among the Assured, 1892, over (yielding an average Cash Bonus of 35 per cent. on Premiums).	£352,000
Reversionary Addition to Policies corresponding thereto, nearly	£500,000

(*The Figures relating to the 1897 Division can be obtained after January 7th.*)

UNDER AVERAGE (OR "INVALID") LIVES.

This Society was the first to grant Policies on "Invalid" Lives, *i.e.*, lives below the average standard, either from personal defect or hereditary taint, and still does so with conspicuous success and advantage to its Assured. Much of this success is due to its **BONUS SYSTEM**, which is devised to ameliorate and, should the life be prolonged beyond the estimate, ultimately to nullify the original surcharge. (*See Prospectus.*)

LOANS.

Loans effected at moderate rates on Life Interests and other terminable charges, on Real Estate in fee and on approved securities generally of sufficient magnitude. Persons desirous of realising Reversionary Interests are also invited to communicate with the Society.

NEXT QUINQUENNIAL BONUS, 1902.

Profit Policies effected prior to June 30th, 1897, will be entitled to one year's additional Share of Profits.

The latest Bonus Report, Prospectus, Forms of Proposal and every information on application.

ANNUAL GENERAL MEETING, 1896.

The Directors reported that, in accordance with the powers conferred upon them under the Company's Deed of Settlement, certain alterations had been made in the method of apportioning the quinquennial surplus, **the object of which was to gradually increase the share of the Policy holders from the 80 per cent., to which they are at present entitled, to 90 per cent.** The new Clauses in the deed effecting this important change were laid before the Meeting and unanimously approved.

[68

LAW UNION AND CROWN

Fire and Life Insurance Company.

FOUNDED 1825.

Funds in Hand £3,877,000
Annual Revenue (1895) . . £541,825

LIFE DEPARTMENT.

The Claim of the "Law Union and Crown" to the favourable consideration of intending Assurers is based, not upon theoretical assumptions of the superiority of a particular system of Life Assurance, but on the Plain Issue of Actual Results.

On these results the Company invites comparison in **Strength of Financial Position, Moderation of Premiums, Exceptional Largeness of Profits, and Simplicity and Liberality of Policy Conditions with any other Life Assurance Office, whether Mutual or Proprietary.**

Financial Position.

The Company's Funds amount to upwards of **£3,850,000.** The security is, therefore, absolute.

Moderate Premiums.

Age.	Law Union and Crown Premium.	Average of the Premiums charged by 50 British Offices
20	£1 17 6	£1 18 9
30	2 8 4	2 9 0
40	3 4 0	3 4 8
50	4 9 10	4 10 8

Exceptionally Large Profits or Bonuses.

At each of the last two Quinquennial Divisions of Profits the Company added to all its Participating or Profit Policies a Reversionary Bonus **at the very high rate of £2 per £100 per annum on the sum assured, and also on the amount of previous bonuses not surrendered for cash.**

Further Advantages.

The Policies of the "Law Union and Crown" have practically one condition only, and that is the payment of the premium. Surrender Values are guaranteed and automatically applied to prevent the policy lapsing. Paid-up Policies are granted; and policies, with rare exceptions, are freed from all restrictions.

FIRE DEPARTMENT.

Fire Capital Subscribed . . £1,125,000

The Rates of Premium in the Fire Department are moderate, and Claims are settled with liberality and promptitude.

Intending Insurers and others are requested to apply for Prospectuses and all other information to the Company's Offices.

THE LONDON LIFE ASSOCIATION

LIMITED,

81, KING WILLIAM STREET, LONDON, E.C.

Established 1806 for Mutual Assurance

FUNDS IN HAND, £4,350,000.

SYSTEM.

THE Association's system of Members' assurance was at the time of it foundation unique. It was felt that most men desire the protection fo their youth and middle age of a fixed assurance at the smallest cos rather than heavier payments and a policy of increasing amount as life more and more prolonged, for there are many ways of saving if only li be spared, but one alone which will provide for an early death.

It was intended therefore that the Association's sums assure should not be increased, but the premiums payable reduced to the lowe possible limit; and it is only the exceptional prosperity of the Office whic has made it necessary to add in certain cases to sums assured, so as t deal equitably with those who are not called upon to pay any premiu at all.

But in deciding what is the smallest cost at which life assuranc can be granted, it is obvious that no absolutely accurate calculation probable mortality and rates of interest can be possible, and a margin f safety is therefore a necessity.

It is in the provision of this margin, without charging the Membe more than the cost price of the assurance, that the ingenuity of the speci system of the Association is apparent; for its practice is to specify in th policy a premium which is abundantly, indeed more than, sufficient f absolute security, and yet, after the first seven years, to call on th Members to pay only that proportion thereof which a valuation of th assets and liabilities made at the beginning of each year shows to b necessary for that year.

The Association does not therefore like most companies deman payment of premiums in full, and after five or seven years return portion thereof as "bonus," but year by year (after the first seven), foregoes the receipt of all premium except the portion which is require to fully safeguard its contracts.

Detailed Prospectuses, Accounts, and full information may be obtained o application by post or otherwise. [202

Bankers—PARR'S BANK, Limited, Bartholomew Lane.

Secretary—E. G. LAUGHTON ANDERSON.

GUARANTEE DEPARTMENT.

The Bonds of the Company are accepted by Her Majesty's Government, the High Court of Justice, the Board of Trade, the Local Government Board, the City of London and other Municipal Corporations; and by various Banks and Railways, and other large Companies throughout the United Kingdom.

Special terms will be quoted for guaranteeing all the members of a staff.

ACCIDENT AND DISEASE INSURANCE.

A Weekly Allowance during total disablement by accident or by typhoid, typhus, scarlet fever, small-pox or measles, with capital sum in the event of death or permanent disablement, doubled if a railway accident, is insured for a moderate premium.

EMPLOYERS' LIABILITY DEPARTMENT.

In addition to covering the risk under the Employers' Liability Act, 1880, the Company relieves Employers of the cost of defeating unjust claims. [67

THE MACHINERY INSURANCE COMPANY,

LIMITED.

CAPITAL . . £200,000.

Chairman—W. H. STONE, D.L., J.P., Deputy-Chairman London & County Banking Company, Ltd.

Consulting Engineer—A. W. KENNEDY, Esq., F.R.S., LL.D., President of the Institution of Mechanical Engineers.

For a fixed Premium this Company insures Machinery of all descriptions against Accident, Damage or Breakdown, and maintains same in thorough working order.

Favourably reviewed by over Eighty influential Newspapers.

"HOW TO SELECT A LIFE OFFICE."

By G. M. DENT, F.S.S.

Extracts from a few Press Opinions.

MORNING POST.—"Mr. G. M. Dent, who is a Fellow of the Royal Statistical Society, has written a valuable pamphlet on Life Assurance, in which all the more important questions connected with the subject are discussed by a firm of merchants and an insurance broker. . . . There are two carefully-prepared tables."

EVENING NEWS.—"Will be useful as a guide to those persons intending to insure their lives who desire to get as large a return for their money as is compatible with perfect security."

STATIST.—"The form of question and answer relieves the work very much from the heavy character of a statistical inquiry."

FINANCIAL TIMES.—"Carefully and skilfully compiled."

POLICY-HOLDER.—"Life Assurance as an investment, and Endowment Assurance, are both explained in a very attractive way."

METROPOLITAN.—"Shows conclusively the great value of Life Assurance as an investment, and clearly states the considerations which should guide intending insurers in the selection of an office."

ABERDEEN FREE PRESS.—"An ingenious and valuable pamphlet . . . will abundantly repay attentive study."

BELFAST NORTHERN WHIG.—"Mr. Dent is evidently master of his subject and should prove a safe guide."

BRADFORD OBSERVER.—"The remarks on Life Assurance as a paying investment, apart from its protection against the misfortune of premature death, deserve to be widely read.

CARDIFF TIMES.—"In terse and lucid fashion, Mr. Dent not merely emphasises the utility of Life Assurance as an investment, but also explains how the assurer may obtain the maximum of security and the largest return for money."

GLASGOW HERALD.—"The pamphlet takes the form of a dialogue, which together with a series of tables, shows the features to which an intending assurer should direct his attention before selecting a Company."

LIVERPOOL COURIER.—"The dialogue is smartly written and touches on many of the most important elements that have to be considered before a policy is taken in any Office. Appended are illustrative tables showing how widely different Offices vary in their mode of doing business."

MANCHESTER EXAMINER.—"We heartily commend the little work to those about to insure, to those who are already insured, and to those who have made up their minds that they cannot or will not insure."

SCOTTISH AMICABLE

LIFE ASSURANCE SOCIETY.

Established 1826.

Funds, £3,600,000. Claims Paid, £5,600,000.

LARGE COMPOUND BONUSES.—The Society being purely Mutual, all profits belong to the assured. The amount distributed has been so large, that the sums assured by the earlier policies are more than doubled in amount.

LOW PREMIUMS under the Society's popular Minimum Premium System.

ABSOLUTE SECURITY.—The valuation of the Society's Liabilities as at 31st December, 1895, was made by the most stringent tests applied to any similar institution, and shows that the Society's Reserves are unsurpassed by those of any other Life Assurance Office.

LIBERAL CONDITIONS.

HEAD OFFICE—St. Vincent Street, GLASGOW.

London Office—1, Threadneedle Street, E.C. [113

THE SCOTTISH EQUITABLE

LIFE ASSURANCE SOCIETY.

ESTABLISHED IN 1831—FOR MUTUAL LIFE ASSURANCE.

HEAD OFFICE: 26, ST. ANDREW SQUARE, EDINBURGH.

President—HIS GRACE THE DUKE OF BUCCLEUCH AND QUEENSBERRY, K.T

Manager—THOMAS BOND SPRAGUE, M.A., LL.D. *Secretary*—J. J. M'LAUCHLAN.

THE LEADING FEATURES ARE—

PERFECT SECURITY. LIBERAL CONDITIONS OF ASSURANCE. MODERATE PREMIUMS. GUARANTEED SURRENDER VALUES. COMPLETE AND LIBERAL NON-FORFEITURE REGULATIONS. LARGE BONUSES. IMMEDIATE PAYMENT OF CLAIMS.

The Scottish Equitable being a purely mutual Society, the whole profits belong to the Members, who are expressly freed from all personal responsibility.

The next division of profits will be made as at 1st March, 1898.

The progress of the Society during the last fifteen years is shown in the following table:—

Year.	Policies in force.	Existing Assurances.	Income.	Total Funds.
1881	13,712	£8,443,660	£324,939	£2,489,431
1886	16,072	9,726,556	371,503	2,850,934
1891	18,772	10,593,986	425,695	3,353,887
1896	22,970	11,963,757	470,504	3,779,914

The Society transacts every description of Life Insurance Business.
Insurances against Issue are effected at moderate rates of premium.
Loans are granted on Life Interests and other approved security, and Reversions are purchased.

Prospectuses, Forms of Proposal, &c., may be obtained on application to the Society's London Office—

STRONG FINANCIAL POSITION.

The Assurance Fund in hand represents twenty-one years' income of the present Annual Premiums under Policies in force, an exceptional condition of stability and security.

EXCEPTIONALLY LARGE BONUSES TO POLICY HOLDERS.

The additions to Policies for seventy years have been at the average rate of rather over £2 per cent. per annum, which is above the average of other offices.

The Quinquennial Bonus declared in 1895 amounted to the unusually high rate of £3 per cent. per annum for the five years, or £150 Reversionary Bonus added to the policy for each £1,000 assured on the whole life participating scale for five years and upwards. The large sum of £145,000 undivided profit was carried forward to the next division.

Large Intermediate Bonuses are paid in case of death between two divisions of surplus.

Life Assurance with Profits for a minimum outlay.

Annual Discounted Bonus Premiums per £100 Assured at Death.

THE BENEVOLENT SOCIETY OF ST. PATRICK.

PATRONS—
Her Majesty the Queen and H.R.H. the Prince of Wales.

PRESIDENT—
The Earl of Crewe.

The Schools of this Society are established for the Free Education, Clothing, Partial Feeding, and benefit of some 500 very poor children of Irish parentage, without distinction as to "their religious tenets or mode of worship

H.R.H. THE DUKE OF YORK, at the Anniversary Festival, held March 17th, 1895, said:—"I congratulate you on having attained the 112th year of your existence. . . . . The connection between the origin of the Illustrious Order of St. Patrick and the Benevolent Society of St. Patrick is a very interesting feature of your history. . . . . In 1820, half a century before the foundation of the London School Board, you built your first large schools in London. . . . A matter of great importance is the supervision exercised by the Society, and the premiums for good conduct which it grants during the five years after the children have left the schools. . . . As your President, I should like to feel that a special effort has been made to increase the numbers of your scholars."

[With the aid of a legacy, bequeathed by the late Dr. Madden, the Society some years since added technical classes to their system of education, and much increased the usefulness of the schools.]

The Committee will gladly receive subscriptions or donations addressed to

MAINTAINED, EDUCATED AND TAUGHT TRADES

IN

"Dr. Barnardo's Homes."

"Christian, Protestant, Evangelical, but Non-Sectarian" is the religious motto of the Institutions. In their operations the members of all Evangelical sects may and do join hands.

Applications for urgent cases are received at any hour of the day or night.

Destitute children of any age or creed, or either sex, and of any nationality, are eligible.

Deaf or dumb, blind or crippled children, or those otherwise diseased and already given over to death, are, if destitute, always eligible.

The most searching enquiry is made into every application, but no really destitute boy or girl is ever rejected. Each case is determined solely upon its merits, without election and without the intervention of wealthy patrons.

Over **31,000** children have been received since 1866. From **50** to **60** Fresh Cases are admitted weekly during the winter months.

2,000 young children are now Boarded Out in rural districts under the auspices of the Homes.

Technical Training in some one of the **14** handicrafts carried on in the Homes is given to every lad capable of receiving it.

All the Girls are brought up in Cottages on the family system, and carefully instructed in the various branches of Domestic Service.

8,725 Trained and Tested Children have already been placed out in the Colonies. Of these **98** per cent. have been successful.

Four Lodging Houses and a Night Refuge, open in the Metropolis, and **Eight "Ever Open Doors"** in Provincial Towns, are accessible throughout all hours of the day and night to homeless "Waifs and Strays" seeking temporary shelter.

In all, 85 distinct Homes, dealing with every age and class of destitute and needy childhood, and **24** Mission Branches, are included within the scope of these Institutions.

FUNDS ARE URGENTLY NEEDED FOR FOOD AND MAINTENANCE.

Donations and Subscriptions gratefully received by the Treasurer, WILLIAM FOWLER, Esq.; by the Chairman of Committee, HOWARD WILLIAMS, Esq.; by the Founder and Director, Dr. THOS. J. BARNARDO; or by the Bankers, LONDON AND SOUTH-WESTERN BANK (Bow Branch), and Messrs. PRESCOTT, DIMSDALE AND CO.

JOHN ODLING, *Secretary.*

Matron.
Miss MILDRED HEATHER-BIGG.

The Hospital has 52 Beds, and was founded for the reception and treatment of respectable poor women and gentlewomen in reduced circumstances suffering from those many distressing diseases to which the female sex is liable, irrespective of social position. A great proportion of women thus afflicted are those upon whom the numberless misfortunes of ill-health most heavily fall—the poor gentlewoman, the governess, the wife of the lowly-paid clerk, the artizan, and the very poor. Their homes are altogether unsuited for the performance of a critical operation, nor can they there have the special nursing and care which their condition demands. It is therefore obvious that the work of this Charity in restoring Mothers, Wives and Daughters to that health upon which the maintenance of families so frequently depends is one of real value and importance.

FREE IN-PATIENTS
are admitted on recommendation of a Subscriber, each letter giving One Month's Free Treatment.

CONTRIBUTING IN-PATIENTS,
occupying separate Wards, are received upon payment Weekly of 10s. 6d., 21s. or 42s., according to means.

OUT-PATIENTS
attend daily at 2 o'clock.

THE CONVALESCENT HOME
at St. Leonards-on-Sea contains 18 Beds.

The Hospital is entirely without Endowment or Reserve Funds of any kind, and is in pressing need of assistance.—**Annual Subscriptions** are especially solicited. Any contributions will be thankfully received, and information gladly given by

HERBERT H. JENNINGS, *Sec.*

[96

CHURCH OF ENGLAND
SCRIPTURE READERS' ASSOCIATION.

Patrons—

The ARCHBISHOP OF CANTERBURY, and the BISHOPS OF LONDON, WINCHESTER, ROCHESTER and ST. ALBANS.

Treasurer—EDMUND S. HANBURY, Esq.

The Association is *the only Organisation* the special purpose of which is to provide Trained Lay Evangelists to the Parochial Clergy of Greater London.

130 Readers are labouring under the direction of the Clergy in parishes with an aggregate population of considerably over a million souls, bringing the Gospel and the ministrations of the Church to the poor, the sick, the ignorant and the vicious; holding services both in open-air and mission-rooms; reporting cases of sickness and distress, and helping in all that promotes the temporal as well as spiritual welfare of the people.

Speaking at a recent Annual Meeting of the Society, the Bishop of London said: "I cannot but wish that the Church of England Scripture Readers were employed on a very much larger scale than they are now, because I am convinced that such work as theirs is of the very highest value in dealing with the great mass of what we may call the uneducated classes."

Additional Help is Greatly Needed to maintain the present staff and to enable the Committee to accede to some at least of the urgent applications for Readers made by the Incumbents of poor and crowded parishes. Annual Subscriptions, Donations and Offertories are earnestly solicited, especially from residents in more favoured parishes in London and the Suburbs.

T. MARTIN TILBY, *Lay Secretary.*

CERTIFIED INDUSTRIAL BRANCH	**Milton, KENT.**
RAMSEY BRANCH	**Ramsey, ISLE OF MAN.**
PRINCESS ALICE ORPHANAGE	**New Oscott, BIRMINGHAM.**
CONVALESCENT & INFANT BRANCH	**Alverstoke, HANTS.**

The Mission of **The Children's Home** is to rescue children who, through the death or vice, or extreme poverty of their parents, are in danger of falling into criminal ways. It is, therefore, at once an **Orphanage** and a **Refuge.**

The Home receives Children of any age, or any sect, without election. It is conducted on the Family system; is a Religious and Industrial Institution; is a **Training School for Christian Workers**; and is dependent on Voluntary Contributions.

Within the last twenty-seven years about **3,364** children have received the benefits of this Institution. **954** are now in residence. About **£16** will maintain a child in the Home for a year.

About **2,910** children have now passed through the Home, and there is the greatest cause for thankfulness to God for the present well-being and for the prospects in life of a large majority of this great number.

In connection with this work the **Gordon Hall Mission** is carried on in the East End of London; an agency for the **Protection of Girls** is at work, a Refuge being available night and day; a **Servants' Free Registry** is open, and **Lodgings** are provided for respectable young women during the interval between situations; also a **Mission to the poorest Children** of East London is very successfully carried on. The entire work is greatly in need of more liberal support. The smallest contributions will be thankfully received.

The need of such a work is painfully obvious. Our cities and towns are crowded with children exposed to every evil influence, shut out from all good, living a life worse than that of savages, and as they grow up they naturally take their places in the ranks of the pauper and the criminal. Yet they may be saved. Hundreds of cases prove that these little ones—some of them mere infants—are susceptible of every elevating influence, and need only the care of a Christian home to develop all that is good in their characters, and fit them for reputable and useful lives.

Collecting Books, Boxes, or Cards will gladly be forwarded to those who are willing to collect in aid of the funds of the Institution.

Cheques and Money Orders should be crossed City Bank, and Orders made payable at General Post Office.

Remittances to be made payable and sent to T. B. STEPHENSON, Bonner Road LONDON, E.

J. PENDLEBURY, *Secretary.*

CITY OF LONDON HOSPITAL

FOR

DISEASES OF THE CHEST,

Victoria Park, E.

(Nearest Station: CAMBRIDGE HEATH, G.E.R.)

Patron: Her MAJESTY the QUEEN.

Treasurer—JOHN NORBURY, Esq.

The Patients (10,188 in 1895) are of both sexes and all ages—from Children of a month old to Adults over 95. Over HALF A MILLION Patients have been relieved since the formation of the Charity. Additional Funds are greatly needed to meet the increasing demands on the Charity. Premises, recently enlarged, providing *inter alia* a separate entrance, waiting room, and female attendant for female patients.

Subscriptions, Donations and Bequests will be thankfully received by the Society's Bankers, LLOYDS Bank (Limited), 72, Lombard Street; and by the Secretary at the Institution.

N.B.—Patients are relieved in and from all Parts of the United Kingdom and the Colonies.

JOHN WHITTINGTON, *Secretary.* [102

FEMALE ORPHAN ASYLUM

AT BEDDINGTON, SURREY.

Established at Lambeth, 1758. Incorporated, 1800. Removed to Beddington, 1866.

Patron—HER MAJESTY THE QUEEN. *President*—H.R.H. THE DUKE OF CAMBRIDGE, K.G.

This Asylum maintains and educates Fatherless and Orphan Girls, and at the age of 16 places them out in respectable private families. New Subscribers to this old Institution are most urgently needed. Children are eligible for admission from all parts of Great Britain, and must be between the ages of 7 and 10. They are admitted by Election, held half-yearly, in June and December. Forms of nomination may be obtained at the Offices.

Life Subscription, 3 Votes £10 10 0		**Annual Subscription, 3 Votes .. £1 1 0**	
Ditto 1 Vote 3 3 0		**Ditto 1 Vote .. 0 10 6**	

A donation of 60 Guineas in one sum entitles the donor to the immediate presentation of One Child to the Charity, with 12 votes at every election for life, provided such child be eligible; Orphan Girls may be placed in the Institution and paid for at the rate of £12 12s. per annum, with an entrance fee of £2 2s. upon admission.

Cheques crossed HOARE & CO. Subscriptions most thankfully received and all information given on application to the Secretary.

London Offices—37, ESSEX STREET, STRAND, W.C. BROUGH MALTBY, *Secretary.* [107

The EARLSWOOD ASYLUM

FOR IDIOTS AND IMBECILES,

RED HILL, SURREY.

Open to Cases from all parts of the Kingdom.

This NATIONAL ASYLUM, established in 1847, now affords protection to upwards of **600** inmates, and everything that kindness and science can suggest is employed to ameliorate their condition.

Eligible cases are admitted by the Votes of the Subscribers for 5 years, and in many instances are allowed the advantage of re-election for a second 5 years.

At each Half-Yearly Election there are generally over **One Hundred and Fifty Applicants** seeking admission, of whom the Board can only elect 25 to 35 owing to want of sufficient Funds for a larger number.

The Board ***earnestly ask for additional aid.*** The expenses are heavy, owing to the general helplessness of the poor inmates.

AN ANNUAL SUBSCRIBER has *one vote* at each Election for each Half a Guinea contributed. A LIFE SUBSCRIBER has *one vote* at each Election for each Five Guineas contributed.

COLLECTING BOXES and CARDS will be gladly supplied, and votes given in proportion to the amount collected : at the rate of Four for each Guinea.

Special Provision is made for the reception of **Paying Patients**, who have the comforts of a **Private Home**, as well as instruction and amusement.

The last Report and other Pamphlets may be had gratuitously on application

Offices: 36, King William Street, E.C. JAMES DOWNING, *Secretary*. [105

EAST LONDON HOSPITAL FOR CHILDREN

AND DISPENSARY FOR WOMEN,

Bankers—BARCLAY & CO., Limited, 54, Lombard Street.

The Committee make an earnest Appeal for a continuance of support.

The Benefits of this Charity Exceed 3,500 Weekly.
Supported by Voluntary Contributions.
£4,000 needed for One Year's Expenses.

His Royal Highness the DUKE OF CONNAUGHT has characterised this work as "A perfect network of charitable operations—an immense boon to the poor."

Funds urgently needed. Bequests also earnestly solicited.

Contributions will be thankfully received by the Treasurer, Bankers, or by

PEREGRINE PLATT, *Secretary*, Vine Street, Clerkenwell Road. [108

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE QUEEN. | *Vice-Patron*—H.R.H. PRINCESS OF WALES. | *President*—H.R.H. PRINCE OF WALES, K.G.
Chairman of Committee—Field-Marshal Sir J. INTORN J. SIMMONS, G.C.B., G.C.M.G.

NEW BUILDINGS NOW OPEN AT WEST END, CHOBHAM, NEAR BROOKWOOD.

OFFICES—20, COCKSPUR STREET, LONDON, S.W.

The Home is constructed to accommodate 240 Boys chosen from the homeless and destitute, between the ages of 14 and 16, and give them a training, up to the age of 18, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy or Mercantile Marine.

CONDITIONS OF ADMISSION.—1. The Candidate must be from about 14 to 16 years. None are admitted below 13½ years of age or above 15½. 2. He must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of £20 during his stay at the Home will give a right of nomination of a boy similarly circumstanced. There are now 240 Boys in the Home. Subscriptions and Donations are urgently needed in order that this number may be maintained.

Subscriptions are received by THE LONDON AND WESTMINSTER BANK, 1, St. James's Square, S.W.; Messrs. W. S. KING & CO., 45, Pall Mall, S.W.; by the Treasurer, General Sir DIGHTON PROBYN, V.C., Marlborough House, Pall Mall, S.W.; and by the Secretary, at the Office, 20, Cockspur Street, S.W., from whom any further information can be obtained.

Lt.-Colonel G. A. BEATY-POWNALL, *Secretary*. [257

GORDON HOSPITAL FOR FISTULA, PILES,

AND OTHER DISEASES OF THE RECTUM.

HOMES OF HOPE.

4, 5 & 6, Regent Square, Gray's Inn Rd., London, W.C.

(Established 1860.)

This Society was established in 1860 for the reception of the less degraded class of penitent fallen young women, for whom little provision had been made.

Young women are admitted on any day, and coming from any quarter whatsoever, if there be room in the Homes.

Special efforts are made on behalf of mothers with their first infants, who are really the most hopeful class of the fallen, and are generally to be pitied.

A Home has been opened for the reception of such young women, before they become mothers, as are unfitted, from their previous good character and position, to mix with others.

Since the Homes have been established, 3,562 have been admitted; of this number, 1,421 belonged to the class of young mothers who were thus saved from falling into deeper and continued sin; 491 were rescued from the surroundings of great temptation unfallen. In almost every case the mothers, and those admitted unfallen, have turned out well, and about 70 per cent. of the others.

While inmates of the Homes, the young women are trained in household and domestic duties, with a view to their becoming good and useful members of society. The great object, however, kept most anxiously before the Committee is, to afford them opportunities of religious instruction, and to impress upon them the extreme importance of turning to God with all their hearts.

The applications for admission are *painfully urgent*, and the charity is wholly dependent upon voluntary contributions.

The Secretary will be happy to forward the last Annual Report.

Bankers—LONDON AND WESTMINSTER BANK (Bloomsbury Branch), 218, High Holborn.

Help is solicited from all who sympathise with homeless, destitute and orphan boys.

500 such little ones enjoy Home Life on the family system in the cottages. Great care is exercised in their moral and religious training. In the schools, drill halls, gymnasiums, swimming bath and workshops they are mentally and physically developed for a useful life.

The Committee earnestly appeal for Donations, Church and Sunday School Collections and Bequests, to enable them to carry on this Christian work. W. ROBSON, *Secretary*, 25, Holborn Viaduct, E.C. [113

The Hospital & Home for Incurable Children,

2, MAIDA VALE, W.

Patrons—H.R.H. The PRINCESS CHRISTIAN; H.R.H. The DUCHESS OF CONNAUGHT; H.R.H. The PRINCESS MARY, Duchess of Teck.

President—H.R.H. The DUKE OF CONNAUGHT AND STRATHEARN, K.G.

Treasurer—F. AYLMER LLOYD, Esq.

Bankers—Messrs. HOARE, 37, Fleet St., E.C.; PARR'S and ALLIANCE BANK, 239, Regent St., W

This Institution, founded in 1875, was the first of its kind in the Metropolis, and, it is believed, in the United Kingdom. It was established with the object of providing for the maintenance, care and medical treatment of Children (up to the age of sixteen) suffering from Chronic or Incurable Complaints of an aggravated character. It combines the advantages of a Home and a Hospital.

Over **One Hundred and Eighty** Children have been received, and there are **Thirty** cots. A small Weekly Payment is required for each Child; but the expenses of such a Charity are necessarily very large, and the Committee ***appeal earnestly for donations and new subscriptions***, which are much needed. Visiting hours, 3 to 5 p.m. daily. Miss A. COLEMAN, *Matron*. [110

HOSPITAL for DISEASES of the SKIN

(Removed from New Bridge Street, Blackfriars),

52, STAMFORD STREET, BLACKFRIARS, S.E.

ESTABLISHED 1841.

Patroness—H.R.H. THE PRINCESS OF WALES.
Chairman—Major-General LORD METHUEN, C.B., C.M.G.
Treasurer—JOSEPH GURNEY BARCLAY, Esq.

This was the first, and for many years the only, Institution in the kingdom established for the special treatment of Cutaneous Diseases. Over 352,000 Patients have been successfully treated.

OUT-PATIENTS are received on Mondays and Thursdays at Two o'clock, and on Tuesdays, Wednesdays and Fridays at One o'clock.

Medical Practitioners and Students are admitted to witness the Practice.

SUBSCRIPTIONS and DONATIONS are most earnestly solicited, and will be thankfully received by the Secretary, or by Messrs. BARCLAY & COMPANY, Limited, Bankers, 54, Lombard Street, E.C.

SAMUEL HAYMAN, *Secretary.* [259

HOSPITAL FOR DISEASES OF THE THROAT,

GOLDEN SQUARE, LONDON, W.

(FOUNDED 1863.)

President—THE EARL OF STRAFFORD.

Entirely Free to the Poor and Necessitous. Open always.

Out-Patients are seen daily at 1.30 p.m. Tuesday and Friday evenings, 6.30, and on Monday mornings at 9, specially for Children.

EXTENSION

OF THE

HOSPITAL for CONSUMPTION,

BROMPTON.

The pressure for admission has rendered an Extension a long-felt necessity. **A NEW BUILDING** has been erected (opposite the existing Hospital), containing

137 ADDITIONAL BEDS,

making a total of 321 Beds, all of which are fully occupied.

The ordinary expenditure of the Parent Hospital is nearly £17,000 a-year, and the Maintenance of the New Building increases the expenses to over £24,000 a-year. The Charity, being ***unendowed,*** **is dependent on Donations, Annual Subscriptions and Legacies.**

Contributions are therefore much needed, and are earnestly solicited in aid of the funds.

W. S. DEACON, Esq., *Treasurer.*

Bankers—Messrs. WILLIAMS, DEACON, & MANCHESTER AND SALFORD BANK, 20, Birchin Lane, London.

WILLIAM H. THEOBALD, *Secretary.* [106

INVALID CHILDREN'S AID ASSOCIATION,

18, Buckingham Street, Strand, W.C.

Patron—H.R.H. THE DUCHESS OF YORK.

The Association has been formed for the purpose of helping, ***in every possible way,*** the seriously invalided and crippled Children of the London Poor.

It works chiefly by Visitors, each of whom takes charge of one or more cases; but it also endeavours to carry out whatever is most calculated to benefit the children placed under its care. Skilled nursing, medical advice and treatment, convalescent aid, industrial training, are amongst the principal benefits secured.

Funds are greatly needed to meet the heavy expenses incurred. Visitors are also wanted who may be able to go into the poorer districts. Full particulars will be given by the Secretary, who can be seen at the Office at any time, except on the afternoon of Tuesday and on Saturday.

N.B.—The Accounts are Audited by Messrs. JACKSON, PIXLEY, BROWNING, HUSEY & Co., of 58, Coleman Street. [115

LONDON FEVER HOSPITAL,

ISLINGTON, N.

Patron: H.R.H. The PRINCE OF WALES.

President: The Rt. Hon. LORD BALFOUR OF BURLEIGH.

During the last 25 years over 22,000 persons suffering from infectious fevers, other than small-pox, have been treated in this hospital, and probably ten times that number of persons have been saved from infection by the isolation of these sufferers.

Patients pay a fee equal to about one-fourth of their cost, the balance falling upon the funds of the Institution.

Additional help in this great public work is urgently needed, and the benevolent are earnestly appealed to. Governors have the right of sending their domestic servants for free treatment.

Subscriptions and Donations will be gratefully received by the Secretary, at the Hospital,

Major W. CHRISTIE. [116

THE LONDON ASSOCIATION OF NURSES.

Chief Office: 123, NEW BOND STREET, W.

(Between Brook Street and Grosvenor Street.)

Branch Office: 86, KENNINGTON PARK ROAD, S.E.

Superior Hospital-trained Nurses for Medical, Surgical, Mental, Monthly, Fever and all Infectious Cases; also Male Nurses and Medical Rubbers can be obtained immediately on application to the Superintendent.

Great care is taken in the selection of Monthly Nurses, who reside in a separate home, and never come in contact with those who attend infectious cases.

There are Homes in connection with the Association where invalids can be received under the care of their own physicians or surgeons. Each patient is provided with a separate room and a trained nurse.

M. FIRTH, *Superintendent.*

This Hospital was established in March, 1887, for the treatment of Skin Affections.

It is free to the necessitous as out-patients; others are expected to contribute according to their means. The Hospital has no endowment and is supported by the payments made by the in and out-patients and voluntary contributions.

Eleven beds are available for paying In-patients. Up to the 31st of Dec. last, 13,500 persons had been relieved, and the attendances exceeded 80,000; nearly 2,000 new Patients were treated last year. The Committee have necessarily incurred considerable expense in furnishing and fitting-up the Out and In-patients' Departments, towards which they would welcome contributions. Cheques should be crossed "Messrs. DRUMMOND." Subscriptions and Donations would be gratefully received by H. MONTAGUE DUNCAN, *Secretary.*

THE NATIONAL BENEVOLENT INSTITUTION,

FOUNDED BY THE LATE PETER HERVE.

Established 1812. ***Incorporated by Royal Charter.***

Under the immediate Protection and Patronage of Her Most Excellent Majesty the Queen, and His Royal Highness The Prince of Wales.

Treasurer—The Reverend Prebendary WHITTINGTON, M.A.

This Institution was founded for the Purpose of granting Annuities to distressed members of the Upper and Middle Classes of Society, who have attained the age of 60 years and upwards.

The Pensioners are elected half-yearly, in May and November, by the votes of the Life Governors and Subscribers.

The sum disbursed in Pensions now amounts to £12,700 per Annum.

The total number of aged Persons who have been supported by the Institution is Two thousand four hundred and twenty-four, the gross sum distributed to them up to the present exceeding £480,000.

Subscriptions, from 5s. and upwards, will be thankfully received at the Office, and any further information given between the hours of 10 and 4 daily.

Office—65, SOUTHAMPTON ROW, BLOOMSBURY, W.C. HENRY C. LATREILLE, *Secretary.* [124

MISSION TO DEEP SEA FISHERMEN.

Patron—HER MAJESTY THE QUEEN.

This Society has ministered for fourteen years to the spiritual and physical needs of the North Sea trawlers, as well as to the Fishermen on the West Coast, off the South of Ireland and elsewhere. During the past three years the Society has established two permanent hospital stations on the Labrador coast, which are also centres of spiritual effort. The steamers *Sir Donald* and *Princess May* carry on itinerary medical Mission work along the whole 800 miles of coast frequented by the English-speaking fisher-folk. The Society has also shore agents at Gorleston (Gt. Yarmouth), Ymuiden (Holland), Grimsby, &c. It thus wholly employs thirteen vessels (three of them being fully equipped hospital ships with surgeons on board), and the number of persons medically treated as in- and out-patients during 1895 was no less than 10,609.

As regards its spiritual work, it constantly sends out clergymen of the Church of England, who are provided by the Society, on application, with all that is requisite for Church Services, including Communion Plate. As the men who make use of the Society's vessels belong to many religious denominations, the basis of the Mission's operations is of necessity unsectarian.

The Council earnestly appeal for Funds. Large or small donations will be thankfully acknowledged. Cheques or Postal Orders to be made payable to **The Secretary (FRANCIS H. WOOD)**, and crossed "Lloyds Bank, Ltd."

THE NATIONAL HOSPITAL FOR CONSUMPTION,

on the Separate Principle, VENTNOR (*Incorporated by Royal Charter*) affords hospital treatment with home-like comforts to sufferers from Consumption and other Chest affections. It consists of ten Blocks of Buildings (standing in 2: acres), with separate Bedrooms for each Patient, facing the South and overlooking the Sea; also a Chapel, &c.; and its situation is in the sheltered Undercliff of the Isle of Wight. The results achieved with upwards of 14,000 cases already admitted have been most encouraging.

Funds for maintenance are urgently needed. A Donation of 30 guineas, or an Annual Subscription of 3 guineas, enables the contributor to recommend one In-Patient yearly. The yearly expenses exceed £10,000.

This Undenominational Institution is entirely dependent upon public benevolence, having ***no endowment whatever.***

It was founded in 1844 for the Maintenance, Clothing and Education of Fatherless Children of both sexes.

Orphans are received from all parts of the Kingdom, at any age between ***three months*** and eleven years, and are retained until they are fifteen.

1,917 children have already been admitted to its benefits, ***320*** of whom are still in the Orphanage.

Their requirements entail a yearly expenditure of at least ***£8,000,*** of which only ***£2,300*** is provided by annual subscriptions.

The large balance is dependent upon donations and legacies. Help from the benevolent public is therefore urgently needed and earnestly requested.

The Secretary will be pleased to give any further information.

ROYAL BLIND PENSION SOCIETY.

Patron—HER MAJESTY THE QUEEN.
Vice-Patron—H.R.H. THE PRINCE OF WALES, K.G.
President—THE DUKE OF GRAFTON, K.G.
Honorary Secretaries—Messrs. GEORGE POCOCK and PERCY R. POCOCK.

This Society grants Pensions to the Blind Poor at their own homes in sums ranging from 10s. to 25s. per month.

There are at present upwards of 900 pensioners residing in various parts of the Kingdom, among whom upwards of £6,300 is annually distributed in pensions, paid monthly, through the agency of about 600 Honorary Almoners.

Elections take place in May and November in each year.

In addition to those Elected by the votes of Subscribers, not less than two are added at every election by rotation. Others are nominated from time to time to receive the "Thomas Pocock" and "James Templeton Wood" Memorial Pensions.

To be eligible, applicants must be totally blind, above 21 years of age, of good moral character, and in receipt of an income not exceeding £20, if single, and £30 if married. No distinction is made in regard to sex or creed; nor is the receipt of parish relief a disqualification.

Application must be made on the printed forms provided by the Society.

Subscribers of 10s. 6d. annually, or Donors of Five Guineas, are entitled to One Vote at every election, and multiples thereof in proportion. They can also assist in the Nomination of a Candidate.

The payment of a Legacy to the Society confers upon each Executor the privilege of One Life Vote for every £25 bequeathed.

The yearly report, containing the rules, accounts and all information, will be forwarded on application.

Contributions will be gratefully received by the Treasurer, or by the BANK OF ENGLAND, or Messrs. Barclay and Co.

Honorary Rewards are granted for Saving Life from Drowning in all British Possessions.

Pecuniary Rewards are granted within an area of Thirty Miles around the Metropolis.

During the Skating Season, experienced Icemen are provided to prevent loss of life in the various waters about London; and Boats are in daily attendance, morning and evening, to prevent fatal results attending Accidents to the enormous number of Bathers in the Serpentine.

Nearly Three Hundred Places in and around London are furnished with Life-Saving Apparatus to rescue persons from Drowning.

The Society has for the past fifteen years encouraged Swimming competitions with "reference to Saving Life from Drowning," and Prizes are annually given for proficiency in them at various leading Schools and Training Ships selected by the Committee.

The Society is known throughout all the civilised world, but the pecuniary support it receives is quite inadequate to its usefulness, and it is necessary to remind the inhabitants of London that during a severe winter the Society has to incur a large outlay in finding ice-boats, ladders and ropes, for the protection of those who venture on dangerous ice; also for the wages and equipment of Icemen.

Life Governor.....TEN GUINEAS. Annual Governor.....ONE GUINEA.

Donations or Subscriptions will be thankfully received by Capt. I. W. HOME, Secretary, at the Office, 4, Trafalgar Square, London, W.C.; or by Messrs. PRESCOTT, DIMSDALE, CAVE, TUGWELL & CO., Bankers, 50, Cornhill, E.C. [132

THE ROYAL HOSPITAL FOR INCURABLES,

WEST HILL, PUTNEY HEATH.

Sea-side House, 55, Marina, St. Leonards-on-Sea.

Office—106, QUEEN VICTORIA STREET, E.C.

The work of the Royal Hospital for Incurables is twofold: it affords a HOME for the most necessitous, and grants a Pension of £20 a-year in cases where a home already exists. The Charity is National in its character; persons are received as Inmates and Pensioners from all parts of the United Kingdom. Present number of Beneficiaries:—INMATES, **212**; PENSIONERS, **640**. Total, **852**

AN ANNUAL SUBSCRIBER has One Vote for each Half-a-Guinea; A LIFE SUBSCRIBER has One Vote for Life for each Five Guineas. The ELECTIONS are held Half-Yearly, in the months of May and November.

The Hospital may be visited any day (except Sunday) between the hours of 12 and 6, by the Governors and Friends of the Institution.

ST. PETER'S HOSPITAL

For Stone, Stricture & Urinary Diseases, &c.

ESTABLISHED 1860.

HENRIETTA STREET, COVENT GARDEN, W.C.

President—Rt. Hon. THE EARL OF DUNRAVEN AND MOUNT EARL, K.P.
Treasurer—F. A. BEVAN, Esq.

ST. PETER'S HOSPITAL is intended for Persons of both Sexes suffering from Stone in the Bladder and other Diseases of the Genito-Urinary Organs, and contains 24 Beds, and 2 Private Wards for Paying Patients.

The number of Patients treated during the last twelve months was 448 In-Patients and **4,637** Out-Patients, the latter being seen Daily, viz., Monday, 2 to 3 and 5 to 7; Tuesday, 2 to 3; Wednesday, 5 to 7; Thursday, 2 to 3; Friday (Women and Children only), 2 to 3; and Saturday, 4 to 7.

A Donation of Ten Guineas constitutes a Life Governor; a Subscription of One Guinea an Annual Governor. Subscriptions and Donations will be thankfully received by Messrs. BARCLAY & Co., 54, Lombard Street, E.C.; Messrs. HOARE & Co., 37, Fleet Street, E.C., or by

IRWIN H. BEATTIE, *Secretary*. [134

ST. THOMAS'S HOME,

ST. THOMAS'S HOSPITAL,

ALBERT EMBANKMENT, WESTMINSTER BRIDGE, S.E.

Treasurer—JAMES GADESDEN WAINWRIGHT, Esq., J.P.
Resident Medical Officer—W. EDMUNDS, Esq., M.D., F.R.C.S.
Steward—SYDNEY PHILLIPS, Esq., B.A.

This Home has been established for the reception of such persons as desire to avail themselves of the special advantages afforded by ST. THOMAS'S HOSPITAL, and who are able and willing to bear the *whole expense* which the treatment of their case involves.

THE TERMS OF ADMISSION ARE AS FOLLOWS:—

1. The minimum charge for Board, Medicine, Nursing and Medical Attendance in the Home is at the rate of Nine Shillings a day, payable to the Steward of St. Thomas's Hospital weekly in advance. The lowest total charge, however short a time the Patient may remain in the Home, is Two Guineas.

2. The Treasurer and House Committee of St. Thomas's Hospital may determine the Patient's term in the Home by a week's notice, or less if necessary, upon a certificate by the Resident Medical Officer of the Home that the Patient is in a condition to be removed.

3. For ordinary Medical and Surgical treatment, the Patients are to be under the exclusive Professional charge of the Resident Medical Officer of the Home; but they may, at their own expense, and subject to the Rules of the establishment, employ any legally qualified Medical or Surgical Practitioner whom they may think proper as consultant with the said Resident Medical Officer, under the ordinary usages of consultation.

4. The Patients must in all respects conform to the regulations from time to time prescribed by the Treasurer and House Committee of the Hospital, for the due government and management of the Home, and all matters incidental to their position as Patients therein and removal therefrom.

A Form of Application or Admission under these regulations may be obtained on application, either personally or by letter, to the Resident Medical Officer of the Home, who can be seen daily at 12 o'clock, or to the Steward, St. Thomas's Hospital, Albert Embankment, S.E. [135

ST. LUKE'S HOSPITAL,
OLD STREET, LONDON, E.C.

Established A.D. 1751.

President—H.R.H. THE DUKE OF CAMBRIDGE, K.G. *Treasurer*—EDWARD W. NIX, Esq.

This HOSPITAL was established for the care and cure of the Insane of those classes of Society for whom no legal provision has been made. Patients are admitted either gratuitously or upon payment of a small weekly contribution, according to their circumstances.

Since the opening of the Hospital up to the 31st Dec., 1895, 24,000 Patients have been admitted, of whom upwards o 10,000 have been discharged cured.

The Convalescent Establishment in connection with the Hospital is at St. Lawrence-on-Sea, near Ramsgate.

The Committee most earnestly appeal for Donations in support of this Institution, which has for so long a period afforded valuable assistance and alleviation in this the heaviest affliction which it has pleased Divine Providence to inflict upon his creatures. A Governor's Qualification is 30 Guineas. A Subscriber of 10 Guineas, undertaking to contribute like amounts in each of the two years next following—so completing the requisite qualification—may be provisionally chosen a Governor, and be eligible at once to serve on the Committee.

W. H. BAIRD, *Secretary*. [260

SONS OF THE CLERGY CORPORATION.

THE TEMPORARY

HOME FOR LOST AND STARVING DOGS,

Battersea Park Rd., S. Lambeth, London, S.W.

PATRON—

Her Most Gracious Majesty the Queen.

President—His Grace the DUKE of PORTLAND.

Treasurer and Chairman—Sir GEORGE S. MEASOM, J.P.

OBJECTS—

1. To provide shelter and food for the lost, deserted and dangerous dogs of London.
2. To restore lost dogs to their rightful owners.
3. When good dogs are unclaimed, to find suitable homes for them at nominal charges.
4. To destroy, in a merciful and painless way, all valueless and diseased dogs.

UPWARDS OF 230,000 DOGS
have been received during the past Ten Years.

The poor dog, in life the firmest friend,
The first to welcome, foremost to defend;
Whose honest heart is still his master's own,
Who labours, fights, lives, breathes for him alone.

FUNDS ARE URGENTLY NEEDED

to feed and shelter more than 500 dogs daily, to maintain the Home and meet the expenses of the Lethal chamber and Crematorium.

CONTRIBUTIONS THANKFULLY RECEIVED BY
HENRY J. WARD, *Secretary.* [231

WEST END HOSPITAL

For Diseases of the Nervous System, Paralysis and Epilepsy,

AND ESPECIALLY

For the Indoor Treatment of Young Paralysed Children,

73, WELBECK STREET, CAVENDISH SQUARE, W.

Instituted 1878.

Under the especial Patronage of HER ROYAL HIGHNESS THE PRINCESS OF WALES.

Contains 50 Beds for Paralysed Children.

Applicants must be in attendance at the Hospital for Examination by the Physicians at half-past one o'clock upon Mondays, Wednesdays or Thursdays, or six o'clock upon Tuesday and Friday evenings.

Patients contribute according to their means. The indigent are immediately and gratuitously treated upon production of a Certificate signed by a Subscriber to the Hospital, a Minister of Religion or Registered Medical Practitioner, that the applicant is known by the donor to be deserving of free Hospital Relief.

Urgent cases treated in the first instance without letter.

N.B.—Annual Subscriptions are earnestly solicited.

H. ALEX. DOWELL, Esq., *Treasurer.*
B. HECKSTALL-SMITH, Esq., *Secretary.* [220

WEST LONDON HOSPITAL, HAMMERSMITH ROAD, W.

(Incorporated by Royal Charter, Nov. 1st, 1894.) Supported by Voluntary Contributions.

Patron—H.R.H. the PRINCE OF WALES, K.G. | *President*—His Grace the DUKE OF DEVONSHIRE, K.G.
Treasurer—W. F. AINSWORTH, Esq. | *Chairman*—WILLIAM BIRD, Esq., J.P., D.L.

Its annual income from Endowment is only ***£115,*** wherefore the Charity is dependent upon voluntary contributions to provide for its present annual expenditure of about ***£6,000,*** incurred in the treatment of about ***1,600*** In-Patients and ***27,000*** Out-Patients per annum.

It is the nearest General Hospital for Hammersmith, Fulham, Acton, Chiswick, Brentford and for large portions of Kensington and Barnes.

When the present structure, which contains ***101*** Beds, was designed and commenced, in 1871, the population of those parishes was 218,468 persons, while now it is nearly 500,000 persons. Owing to this enormous increase the provision of beds has for many years past proved utterly inadequate.

Contributions towards paying off the debt of nearly ***£10,000*** in respect of the new block of wards recently completed and intended to accommodate about ***80*** additional beds, are urgently needed. From ***60*** to ***80*** approved Patients always awaiting the next vacant bed.

Bankers { LONDON AND COUNTY BANK, Hammersmith, W.
LLOYDS BANK, Limited, 16, St. James's Street, S.W.

[274

THE AUTOMATIC CYCLOSTYLE.

The Latest Improvement in Duplicating Apparatus.

ADVANTAGES.

1. No skill required. The work being done by the Machine automatically, a novice can at once obtain perfect copies.
2. Great uniformity of copies. The pressure being constant and regular, the copies are all alike.
3. The process of re-inking is made much easier and cleaner. One inking suffices for 100 to 200 copies.
4. Equally adapted for reproducing written or typewritten matter.
5. Great speed in taking copies. It is only necessary to turn a handle which lifts and lowers the frame, and time is gained by having a less number of re-inkings.

The merits of the Cyclostyle are now sufficiently well-known to require no enumeration here, and this new appliance for reproducing the copies will be found a great advance where many copies are required and in a short time. Inking, printing, raising and lowering of frame, automatically done.

THE AUTOMATIC CYCLOSTYLE,

Price Complete. { For Reproducing Handwriting, Octavo size, £3 3s. Quarto size, £4. Foolscap size, £4 4s. Special Machine for Hot Climates, fitted with Indiarubber Rollers, Foolscap size, £5 5s.; Quarto size, £5. Outfit of Materials for reproducing Typewriting, 12s. 6d. extra each Machine.

For details and particulars apply to

For COUGHS, COLDS, ASTHMA, BRONCHITIS

DR. J. COLLIS BROWNE'S CHLORODYNE

ONLY GENUINE

ORIGINAL AND

THE GREAT SPECIFIC FOR CHOLERA,

DIARRHŒA, DYSENTERY.

GENERAL BOARD of HEALTH, London, REPORT that it ACTS as a CHARM, one dose generally sufficient. Dr. GIBBON, Army Medical Staff, Calcutta, states: **"2 DOSES COMPLETELY CURED ME OF DIARRHŒA."**

DR. J. COLLIS BROWNE'S CHLORODYNE is the TRUE PALLIATIVE in NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.

The ILLUSTRATED LONDON NEWS of Sept. 28, 1895, says:

"If I were asked which single medicine I should prefer to take abroad with me, as likely to be most generally useful, to the exclusion of all others, I should say **CHLORODYNE.** I never travel without it, and its general applicability to the relief of a large number of simple ailments forms its best recommendation."

Royal Irish Fusiliers, Cork.
Feb. 6th, 1895.

DEAR SIR,—I wish to give public testimony to the infinite value which your remedy for Dysentery and Diarrhœa (**DR. BROWNE'S CHLORODYNE**) proved to several members of the Special Service Corps, in the recent Ashanti Expedition. I bought a small bottle just before leaving London for West Africa, and having used it myself with beneficial result, treated some of my comrades with equal success (though some of them were very bad). I should be very glad to recommend it to anyone about to travel in a treacherous climate, where they are so much exposed to this dangerous malady.

Gratefully yours,
G. SMITH, "Band," R.I.F.

To J. T. DAVENPORT.

DR. J. COLLIS BROWNE'S CHLORODYNE is a liquid medicine which assuages PAIN of EVERY KIND, affords a calm, refreshing sleep WITHOUT HEADACHE, and INVIGORATES the nervous system when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of **EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.**

IMPORTANT CAUTION.—THE IMMENSE SALE of this REMEDY has given rise to many UNSCRUPULOUS IMITATIONS. Be careful to observe Trade Mark. Of all Chemists, **1s. 1½d., 2s. 9d., and 4s. 6d.**

SOLE MANUFACTURER,
J. T. DAVENPORT,
33, GREAT RUSSELL STREET, W.C.

DR. J. COLLIS BROWNE'S (late Army Medical Staff) DISCOVERED A REMEDY, to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and, as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false.*

This Caution is necessary, as many persons deceive purchasers by false representations.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Vice-Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was UNDOUBTEDLY the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *Times*, July 13th, 1864.

Dr. BROWNE coined the word CHLORODYNE to designate his discovery, therefore to apply the word to other preparations is dishonest.

GOLDSMITHS ✣ WATCHMAKERS.

THOMAS PICKFORD

AND

WILLIAM LOVELL PICKFORD

TRADING AS

PICKFORD AND CO.

ESTABLISHED 1859.

VALUE OF GOLD.

"Here's the note, how much your chain weighs to the utmost carat,
The Fineness of the Gold, and charge for fashion."

SHAKSPERE—*Comedy of Errors.*

PICKFORD & CO. beg to make the following announcement regarding the VALUE OF GOLD, feeling assured that the interest both of the Public and the Manufacturer will alike be promoted by a wider circulation of knowledge on this subject.

Gold is divided into 24 parts, termed Carats, to the ounce Troy, and the ounce of pure gold being worth 85s., it follows that gold of

9 Carats fine to the ounce Troy, is worth	£1 11 10½
12 " " " "	2 13 1½
15 " " " "	2 16 8
18 " " " "	3 3 9
22 (British Standard for Gold Coinage)	3 17 11
24 (Pure unalloyed Gold)	4 5 0

All JEWELRY sold by PICKFORD & Co. bears a Stamp denoting the guaranteed quality, and the gold will at any time be purchased at the above quotations.

Visitors from the Colonies, and intending Emigrants, are respectfully informed that as the Duty levied on English-made Watches and Jewelry varies in America, Australia, India and the Cape, from 15 to 60 per Cent., it follows that a considerable sum of money may be made or saved by purchasing in London thoroughly well-made Articles in Gold and Silver, either for presentation or to be re-sold abroad at a profit.

PICKFORD & Co. have always in stock a large and carefully-selected assortment of Gold and Silver Watches, Jewelry and Precious Stones, and as they have for the last 35 years bought and sold for NET CASH ONLY, their prices will bear favourable comparison with those of any Co-operative Stores in England.

Special Notice.—PICKFORD & Co. hold a License from Her Majesty's Government to value Gold and Silver Plate and Jewels for Probate, or between Legatees and others.

Old or Broken Watches, Jewelry, Coins, Medals, Silver Plate and all Precious Stones Purchased for Cash or taken in Exchange.

PICKFORD AND CO.,

178, UPPER STREET, ISLINGTON, LONDON, N.

ESTABLISHED in 1859.

Watches and Jewelry for Repair can be sent by post, registered.

THE

Patent Sanitary Dust Trap.

THE Patent Sanitary Dust Trap is intended to take the place of the ordinary shoot door, and consists of a drum-like hopper (A) working in a cylindrical casing (B); a lever (C) is provided, by means of which the hopper is actuated. When the trap is opened dust and refuse can be safely put in, and then, by an upward movement of the lever (C), the hopper is carried round and emptied down the shaft on the other side of the wall, the orifice being closed simultaneously with the revolving of the hopper. The perfect closing of the trap prevents any inroad of vitiated air from the shoot. The hopper revolves in dust-proof bearings, to obviate clogging.

Inside Size of Drum.		Over All Dimensions.		
DIAMETER (Inches).	LENGTH (Inches).	WIDTH (Inches).	HEIGHT (Inches).	PRICE
12	14	17½	23	£2 0 0

THE ÆOLIAN.

THE ÆOLIAN

Is conceded by the World's best Musicians to be, without question,

THE GREATEST MUSICAL INVENTION OF MODERN TIMES.

By the invention of the ÆOLIAN, *even those devoid of musical knowledge* can luxuriate in all the works of the great Masters, whether sacred or secular. The ÆOLIAN looks like an upright piano, and sounds like an orchestra. It has a majestic volume of tone, which is controlled by stops, and increased or decreased by swells, the use of which may be learned in a few hours. The music is *not in the least mechanical*; it may be tremulously sweet and low, or may vibrate, thrill, and thunder with all the power of a full ORCHESTRAL RENDITION. A touch of a finger changes the time—from presto to andante, from allegro to adagio—in an instant. The player has *absolute control* of the instrument, which responds to his will with more than life-like celerity and precision. There are red lines drawn upon the music to indicate the proper expression, and in a *week's time* the VERIEST NOVICE in music—especially if he has a good ear—can *render beautifully* the most difficult compositions. The ÆOLIAN is also fitted with a key-board which can be played by musicians in the ordinary way, rendering the instrument a lifelong pleasure to every member of the family, whether musically educated or not.

Price from £21 to £155.

We give DAILY RECITALS from 10 a.m. to 6 p.m., and your visit will be deemed a favour.
